Description of Previous Projects

Majestic Properties – As a large commercial property management company, we provide support for cameras in remote locations and are currently designing and preparing a Video Surveillance System for a large mall property installation. Over 20 cameras installation which involves conduit and cabling runs for an average of 300ft. This project also included over 500ft of fiber installation, termination, and testing.

Forest City Properties – With Residential and Commercial properties, we partner with Forest City in both divisions. Currently at multi-tenant housing developments and Victoria Gardens Mall in Rancho Cucamonga. Over 60 cameras were installed with cabling and pathway provided by others. Planning and coordination with Victoria Gardens allowed for a successful project.

Azusa Pacific University – Over the years we have integrated a full video surveillance solution over 5 campuses. All sites are individually based and federated back to the main campus. Coordination with APU to allow us to get access to certain sections through the college allowed us to complete the project within the agreed timeline.
