Stafford Township Board of Education Regulation

R 7424 BED BUGS

The following procedures are established in implementation of Policy 7424 – Bed Bugs.

A. Observation of Possible Bed Bug Bites or Bed Bugs on a Student

1. A staff member who observes what he/she believes may be bed bug bites on a student or bed bugs on the student or in or on the student's possessions shall send the student to the school nurse.

2. The school nurse shall examine the student to determine if the student has bed bug bites or if there are any bed bugs present on the student or in or on the student's possessions.

3. If the school nurse determines the student does not have bed bug bites or bed bugs on them or in or on their possessions, the student will be returned to resume their school day.

B. Confirmation of Bed Bug Bites or Bed Bugs on a Student

1. If the school nurse believes the student has bed bug bites or finds bed bugs on the student or in or on the student's possessions, the school nurse will contact the Principal or designee.

2. The Principal or designee will arrange for a licensed pest management professional to complete an inspection of the student's classroom(s) to determine if bed bugs are present.

3. If a licensed pest management professional cannot complete an inspection within twenty-four hours of the request from the school district, the district custodial staff will vacuum the student's classroom(s) with a vacuum cleaner using a new vacuum cleaner bag.

4. When vacuuming is completed by district custodial staff, the staff member shall seal the bag and discard it in a receptacle outside the school building. If the vacuum does not have a bag, the contents of the vacuum shall be emptied into a secure plastic bag, sealed, and discarded into a receptacle outside the school building. The vacuum will also be treated.

5. The Principal shall determine if the classroom(s) should be occupied by staff and students until the inspection by a licensed pest management professional is conducted.

C. Inspection by Licensed Pest Management Professional

1. If an inspection by the licensed pest management professional determines bed bugs are not present in the classroom(s) inspected, the school program shall resume use of the classroom(s) if the Principal previously decided the classroom(s) should not be occupied by staff or students.

2. If an inspection by the licensed pest management professional determines bed bugs are in the classroom(s), the area(s) will be treated by a licensed pest management professional. Any treatment shall be in accordance with the provisions of the New Jersey Pest Management Act, the district's Pest Management Plan, and any other applicable law.

D. Communication with Student's Parent

1. The school nurse will contact the student's parent on the results of the examination.

2. A parent of a student who is believed to have a live bed bug(s) on them or in or on their possessions will be required to arrange for their child to be picked-up from school to return home to change clothes and for the parent to inspect any possessions the student brings to school. The nurse may provide the parent with information regarding bed bugs.

   a. Upon the student's return to school after being sent home to change clothes and an inspection of their possessions they bring to school, the student will be required to report to the school nurse who will examine the child and the child's possessions before the child can resume the school day.

      (1) If there are no signs of bed bugs on the student or in or on the student's possessions upon being examined by the school nurse after the child returns to school, the student will be able to resume their school day.

   b. The school nurse may examine the student and the student's possessions subsequent to their initial return to school to ensure the student and possessions are free of bed bugs.

      (1) In the event the nurse finds live bed bugs on the student or in or on the student's possession after the student's initial return to school or upon any subsequent examination by the school nurse, the school nurse will

contact the parent and require the parent to pick-up the student from school.

3. A parent of a student who is believed to have bed bug bites, but no evidence of bed bugs on them or in or on their possessions, will be informed of such results and the student may be required to be examined by the school nurse subsequent to the initial examination to ensure bed bugs are not on the student or in or on their possessions they bring to school.

E. School Communications

1. The Principal, in consultation with the school nurse, will determine if the parents of other students should be informed if bed bugs are found in an area of the school. This determination will be made on a case-by-case basis.

   a. Parents of other students need not be informed if bed bugs are found on a student or in or on the student's possessions, and are not found in the school building.

F. Compliance with Applicable Laws

1. The Principal or designee will ensure the school district complies with all notification requirements and any other legal requirements, including the New Jersey Pest Management Act, the district's Pest Management Plan, and any other applicable law.
