	This course will provide the learner with theoretical training and extensive hands-on training in counterbalance sit down forklift, counterbalance stand up forklift, vertical mast lift "cherry picker" and electric pallet jack. Our course will provide practical hands-on training to ready you for industrial application. All students will understand and perform pre-inspection walk arounds, physically operate and maneuver each piece of equipment through basic and challenging obstacles. Based on Ives forklift safety curriculum the student will receive an overview of warehouse equipment in the workplace on four different pieces of equipment. The concepts covered are Federal and State rules, types of equipment, main parts of each piece of equipment, safe operation, and fuel types. In addition, if student passes the theoretical test with a score of 70% or better, they will receive their theoretical certification which can be used by any employer. With our course you will be more then confident to pass the "on-site hands-on" test your new employer is required to administer. Must be 18 years old to attend course. A driver's license is not a requirement to run a forklift. Course will include OSHA-10 training two-day course that will be held at a later date.
