

9-12 HEALTH SERVICES HANDBOOK

The health clinic is located in the main office complex. The Corporation Nurse is not in the school every day, but can be contacted at any time during the school day through the school nurse/health room assistant or other school personnel. The school nurse/health room assistant will be in the health clinic each day.

When a student becomes ill, but does not require immediate medical help, a determination must be made regarding whether the student should be sent home (excluded from school). Most illnesses and injuries do not require exclusion from school. The school nurse/health room assistant will determine if the illness:

1. Prevents the student from participating comfortably in activities.
2. Results in a need for care that is greater than the staff can provide without compromising the health and safety of other students.
3. Poses a risk of spreading harmful diseases to others.

A student needing to see the nurse, health room assistant, or wishing to lie down because of illness must first obtain a pass from his/her teacher then report to the health room assistant. No student may be in the health room for more than fifteen (15) minutes at the discretion of the health room assistant. At that time they must either report back to class or have the health room call home for someone to come and pick them up. If you feel ill, do not miss a class by going to the restroom and then notifying the office or the teacher later. Instead, report to your teacher, then the health-room assistant, so your absence from class may be excused. An absence before it happens is much easier to clear than one afterwards.

IMMUNIZATION POLICY

Indiana Code (IC 20-34-4-5) states that a student is not permitted to attend school beyond the first day without furnishing a written immunization record, unless:

1. The school gives a waiver (for a period not to exceed 20 days); or
2. The local health department or a physician determines that the student's immunizations have been delayed due to extreme circumstances and the required immunization will not be complete by the first day of school. The parent must furnish a written statement and a time schedule approved by a physician or health department: or
3. A medical or religious exemption is on file for the current school year. Exemptions expire at the end of year school year and must be re-submitted at the beginning of each school year.

PARENT NOTIFICATION

If a student becomes ill/injured during the school day, he/she shall report to the Health Clinic health room assistant for assessment. Parents will be notified by telephone if their student is exhibiting the following symptoms (*notification to parents of any other visit to the health room will be at the discretion of the school nurse/health room assistant*): **Conjunctivitis (pink eye), disruptive cough, diarrhea, fever, severe stomach pain, severe headache, severe ear pain, presence of live lice/nit in student's hair, significant injury, fever, unidentified skin rash/lesion, or vomiting.**

Students are not allowed to text or call a parent to let them know that they are sick or want to go home from school. Students may be subject to disciplinary action for an electronic device violation.

STUDENT EXCLUSION FOR ILLNESS STUDENT EXCLUSION FOR HEALTH CONCERNS

A student who is sick will not be able to perform well in school and is likely to spread illness to other students and staff. When a student is identified with symptoms of illness by the school nurse/health room assistant, the student will be required to be kept home for a minimum of the following school day.

If a student is excluded from school for an illness at the request of the health clinic, attendance will be excused. Parent/guardian is responsible for notifying the school for any subsequent days missed due to an illness.

Students may return to school prior to the minimum of the following school day exclusion **ONLY** if a signed and dated doctor's note is provided indicating a return to school date. Otherwise, the student will be expected to be kept home for the minimum required time, as specified for the following symptoms:

Diarrhea: Student may not return to school until a minimum of the following school day or 24 hours following the **last** episode of diarrhea.

Fever: Temperature of 100.0 degrees or greater, 99.6 or more with other symptoms. A student may not return to school until the temperature has remained normal (98.6) for a minimum of the following school day or has been 24 hours fever free **without the aid of fever-reducing medication.**

Head Lice: Student will be permitted to return to school after it is confirmed they are free of any live lice or nits by school nurse/health room assistant.

Redness of the Eye(s) with drainage: Student may not return without a doctor's note.

- If diagnosed with Conjunctivitis (pink eye) by a physician, the student may not return to school until 24 hours **after** beginning treatment.

Unidentified Skin rash/lesion: Student may not return without a doctor's note.

Vomiting: Student may not return to school until free of vomiting for a minimum of the following school day or 24 hours following the **last** episode.

If a student is returned to school prior to the requested exclusion day(s) or is masking symptoms with medication, the school nurse/health room assistant will call parent/guardian to come and take the student back home from school.

PICKING UP ILL OR INJURED STUDENT

Once parent has been notified of injury/illness requiring pick up of student, a parent or designated guardian is required to pick up the student within one (1) hour of notification unless other arrangements have been made. If parent/guardian fails to pick up student within the hour time frame or make other arrangements, the school social worker and administration will be notified.

CONTAGIOUS ILLNESS

The Indiana Department of Education developed an infectious disease school health reference guide. This manual identifies situations and helpful information for those occurrences when an infected or exposed student should be excluded from school or school-based activities. **For any CONTAGIOUS ILLNESS a doctor's note allowing return to school date is required.** For specific disease and condition exclusion information please visit: [Communicable Disease Reference Guide for Schools](#)

EMERGENCY MEDICAL AUTHORIZATION AND CONTACTS

The Corporation will distribute annually to parents/guardians of students in grades 9-12, the MVCSC medical emergency card. In the event emergency medical treatment for a student is necessary, the Corporation will adhere to the instructions on the authorization card/form.

Students will not be authorized to attend field and Corporation-sponsored trips, including athletic trips without a completed Emergency Medical Authorization. A copy of the students card must be in the possession of the staff member in charge of the event. Health room assistants will be responsible for providing copies.

Any time a student or a group of students is taken out of the Corporation to participate in a school event, the staff in charge of the event must take the medical emergency card for those students. This includes, and is not limited to, students involved in music trips, athletic trips, field trips, and academic contests. This does not include student spectators at events. Whenever it is necessary for staff members to use emergency procedures in order to care properly for a student, they are to follow the procedures described in the Superintendent's administrative guidelines and are not to abide by any "Do Not Resuscitate" (DNR) agreement that may exist for a student, unless ordered to do so by a court of law.

If contact information changes, it is the responsibility of the parent/guardian to update Skyward.

ALLERGIES

FOOD ALLERGIES

MVCSC asks that as your student's advocate for food allergies, you provide updated medical documentation on the specifics of the student's allergies at the **beginning of each school year** along with any medication prescribed by a physician that the student would need should a reaction occur at school (such as an Epi pen).

You will be notified if snacks are being provided for your student's classroom, and we encourage the families to send in a supply of "safe snacks" for their student with allergies.

LATEX PRECAUTIONS

Mt. Vernon Community School Corporation will take precautions to protect known and unknown persons with latex allergies. **NO known latex products will be used in any capacity (ex. balloons, gloves, bandages).** This includes classroom projects, experiments, and parties. Any delivery of balloons from local/area flower shops or companies that deliver to our schools will be turned away.

FOOD RELATED ACTIVITIES

In accordance with the Mt Vernon Community School Corporation [Wellness Policy](#), all foods that are provided, not sold, on the school campus during the school day (excluding Family and Consumer Science courses), shall adhere to the provided following list:

- [MVCSC Approved Food and Snack List](#)

Special consideration may be given for food and beverage items designated for educational purposes for a curriculum-based instructional lesson or unit, such as cultural exploration, historical significance, or social training (etiquette dinner). In these special cases, it is the responsibility of the teacher to inform parents/guardians of classroom activity and to communicate with parents/guardians to make appropriate accommodations for any students with medical needs, food allergies or intolerances.

Staff will be required to have a completed [Permission for food-related activities and Special Occasion Food Consumption](#) form prior to students participation in activities involving food items (to include projects using food items not intended for digestion). Staff will also be required to provide parents with a complete ingredients list prior to participation in any activity involving food items (including items not intended for digestion). Parents will then be allowed to provide any substitutions for their student based on their students sensitivity or allergy.

Any items not found on either list must be approved for use by the Corporation Nurse or Food Services Director.

If you have further questions, you may also contact your health room assistant/school nurse.

MEDICATION ADMINISTRATION

The term “medication” is not limited to prescription medication, but includes over-the-counter (“OTC”) drugs, such as Tylenol and cough/cold medication. All prescription medication shall be kept in the health clinic. **Students are not permitted to carry prescription medications.** This restriction does not apply to students allowed by applicable law to carry and self-administer emergency medicine for chronic medical conditions. Medication will be administered by the school nurse/health room assistant, or a designated school employee. Substances that are not FDA approved will not be administered at school.

The administration of prescribed medication and/or medically-prescribed treatments to a student during school hours will be permitted only when failure to do so would jeopardize the health of the student, the student would not be able to attend school if the medication or treatment were not made available during school hours, or the child has a disability and as a result, requires medication to benefit from his/her educational program.

Prior to any **prescribed medication** being administered, including injectable medicines and all blood glucose tests by finger prick, the parent/guardian must submit written consent by completing the **Mt. Vernon Community School Corporation (MVCSC) Medication Request and Authorization Form** and file it in the school’s health clinic. Medication must be in its original container with a current pharmacy label

Medication forms may be obtained by contacting the school office or health clinic and are available on our website: www.mvcsc.k12.in.us.

Medication will only be administered according to the prescription label. Requests to do otherwise will be denied and the parent will be responsible for obtaining an updated prescription.

At no time will a teacher or staff member accept medication from a parent or student.

At no time will any staff member administer medication to a student without the required training provided by a school employed registered nurse or provide medication to a student that has not been provided by the parent. This includes OTC pain reliever, allergy medication and cough drops.

SELF-CARRY/ADMINISTER OVER-THE-COUNTER MEDICATION

Students may possess and self-administer over-the-counter medications if the following conditions are met:

1. The Authorization To Carry Over-The-Counter Medication Form is filed with the clinic.
 - The student must file the parent signed authorization form with the clinic, the health assistant will verify the form is appropriately completed and verify the medication the student is carrying is as designated.
 - The Authorization To Carry Over-The-Counter Medication Form must be resubmitted each school year as authorization is only valid for the current school year.
2. The student has been given instructions as to how to self-administer the medication by the parent.
3. The student understands failure to comply with agreed upon procedures as stated on the Authorization To Carry Over-The-Counter Medication Form could result in disciplinary action or revocation of privileges.
4. The medication must be carried in the original bottle in which it was purchased.
 - The principal or his/her designee may at any time confirm that the student is complying with the terms of this policy by checking the contents of the over-the-counter medication package.

The School or School Board is not liable for civil damages as a result of a student's self-administration of over-the-counter medication or prescribed medication for a chronic disease or medical condition except for an act or omission amounting to gross negligence or willful and wanton conduct

EMERGENCY MEDICATIONS (E.G. INHALERS, EPI-PENS)

Students with a chronic disease or medical condition may possess and self-administer medication for the chronic disease or medical condition in accordance with Indiana State Law. Parents/guardians of students carrying such medications are responsible for assuring the carried medication is neither out-dated nor empty. Prior to the student carrying said medication, parent/guardian must submit written authorization by completing the **MVCSC Self-Administer Medication Permission Form** and an **Emergency Action Plan**. Forms will be filed in the school's health clinic and must be re-submitted annually at the start of the school year. Forms expire the last day of school.

These forms may be obtained by contacting the school office or health clinic and are available on our website: www.mvcsc.k12.in.us.

TRANSPORTING MEDICATION TO SCHOOL

PRESCRIPTION MEDICATION

All prescription medication to be received at school **MUST** be in a sealed envelope in its original prescription container **OR** be brought in by a parent/guardian or an individual who is eighteen (18) years of age or older and who has been designated in writing by the student's parent/guardian.

All prescription medication, including injectable medicine, must be accompanied by a physician's prescription note, a copy of the original prescription, or the current pharmacy label on the original container. A completed **MVCSC Medication Administration Permission Form must be on file prior to administering medication.** Amount of medication brought in must be noted on the Request to Administer Medication Form. Upon arrival, medication will be counted by the school nurse/health room assistant and witness. Medication will be logged into the Medication Inventory in Skyward.

Medication will not be dispensed unless this policy is followed completely. Medication will **NOT** be given if pill count does not coincide with the stated amount or incomplete authorization. The parent/guardian will be notified immediately if there is a discrepancy.

MEDICATION REFILLS

If the student's medication should require a refill, the empty medication bottle will be sent home with the student along with a copy of the MVCSC Refill Medication form. The additional medication must be brought back to school in the original container in a sealed envelope with the completed form, the pill count and signature of the parent/guardian. If unable to fill out the form, an email containing the above listed information will be accepted. This is to ensure that all medication reaches the health clinic.

MEDICATION CHANGES/DISCONTINUATION

If any change in medication is necessary, a physician's written order is required and a new **MVCSC Medication Administration Permission Form** is required. The parent/guardian is responsible for notifying the school nurse/health room assistant in writing of any discontinuation of medication.

RELEASE OF MEDICATION

A school may send home medication that is possessed by the school for administration during school hours or at school functions with a student in grades 9-12, if the student's parent provides written permission (found on the MVCSC Medication Request and Authorization Form) for the student to receive the medication and transport home.

MEDICATION DISPOSAL

Parents/Guardians will be notified by the health clinic prior to the last day of school to coordinate medication pick-up for both over-the-counter and prescription medications. Any medication left in the health clinic at the end of the last day of school and not previously coordinated for a later pick-up will be inventoried and properly disposed of by the health services and witness (i.e. liquids and pill form). Any medication not destroyed by the health services and witnesses will be destroyed by the local health department (i.e. inhalers, sharps, and epi-pens).

STUDENT ACCIDENTS

All accidents in the school building, on the school grounds, at practices, or at any events sponsored by the school, must be reported immediately to the staff or individual in charge. Staff/individual overseeing the student at the time of the incident will complete a Student/Visitor accident form. Completed forms should be submitted to the health clinic or building administrator. Parents will be notified of serious accidents as soon as possible. In the event that parents cannot be reached, the student will be discharged to the person designated as the "medical emergency contact" on the enrollment form, or if injury is life threatening, an ambulance will be called.

AFTER SCHOOL ACTIVITIES

Any student who is ill and has either not attended school or has been sent home sick from school may NOT participate in ANY after school activities until symptom free for 24 hours.
