

AR VR2U

AN INTRODUCTION TO THE WORLD OF IMMERSIVE TECHNOLOGIES (XR)

The San Diego County Office of Education's Innovation Division wants to bring Augmented Reality (AR), Virtual Reality (VR), and Mixed Reality (MR) into your classroom. This one-hour experience allows students to try out AR & VR in the convenience of their own classrooms, and helps them understand the differences between AR, VR, and MR. Let us bring you a glimpse into of the future of education and show you how these immersive technologies (XR) will help all educators break down the walls of the classroom.
