

2018-2019 Curriculum Update and Report

As part of our 2017-2020 District Strategic Plan, a district drive was created to house the curriculum. We also created templates for the teachers to use so that there would be a uniform look of consistency. We are currently in the second year of our District Strategic Plan and, to date, we have made the following updates:

Grades K-5 Math: ELO's, UOI's, Curriculum Maps, and Scoring Guides have been added.

Grades 6-8: Each subject taught has ELO's, Curriculum Maps, and Scoring Guides except choir and PLTW. ELA and Math subjects also have UOI's updated.

H.S.: ELA IV has ELO's and UOI's. Algebra 1, Algebra 1B, Math for Everyday, Statistics and Trigonometry have ELO's, UOI's, Curriculum Maps, and Scoring Guides. Algebra 2 and Calculous have some resources attached.

As we continue this process of moving the district curriculum to the district drive, we will add more subjects, grade levels, and content areas. This year, the elementary is going to focus on adding reading and writing curriculums. The high school will continue to add ELA and Math.
