

Inside Education offers a unique opportunity to become more:

INFORMED CONNECTED ENGAGED

Each month, a select group of local community members will hop on a bus for a fun and interactive field trip to explore Monterey County's classrooms and programs.

Participants in this September through May, half-day series will discover new possibilities in education and become better prepared to discuss, evaluate, and support our local schools.

Inside Education is offered by the Monterey County Office of Education, in partnership with local school districts.

INSIDE EDUCATION

Inside Education Monterey County offers community members an up-close and personal look into current challenges and intricacies of public education, and the remarkable work educators and administrators are doing in today's classrooms.

TAKE A PEEK INTO THE 21ST CENTURY CLASSROOM

The relationship between teacher and student, mutual respect between school and family, and the support and connection from the community is always at the heart of any successful educational program.

BE A PART OF THE NEXT INSIDE EDUCATION SERIES

As the community becomes more aware of the obstacles and opportunities in public education, we believe they will also become staunch supporters for public funding and policy support that can make the public school system work better for every child we serve.

"INSIDE EDUCATION WILL CHANGE HOW YOU UNDERSTAND PUBLIC EDUCATION"

"Inside Education Monterey County provides community members with a first-hand interactive look at local educational programs, services, and partnerships. Inside Education will change how you understand public education and give you hope about the future of our communities and our world."

— **Dr. Deneen Guss**
Monterey County
Superintendent of Schools
