Prepared by: Ron Todo, Associate Superintendent  
Business & Facilities

**Background Information**

On November 15, 2016 the Board of Education authorized advertising Requests for Qualifications (RFQ's) for engineering, testing, and inspection services. RFQ's for geotechnical engineering services were published and 12 proposals were received. A qualifications-based review was performed by a selection committee consisting of district staff. The selected firms can be utilized for on-call geotechnical engineering services for the duration of the Measure X Bond Program, as well as for other projects of the District. The District may update the list of approved geotechnical engineering firms periodically through the RFQ process. As projects are identified, proposals will be obtained and the agreements will be presented to the Board of Education for approval.

**Educational Analysis**

The geotechnical engineering firms will assist the District with implementation of projects that serve to optimize the educational program.

**Fiscal Analysis**

Approval of the geotechnical engineering services firms identified on the attached list will provide the District with a cost-effective means to obtain proposals for required geotechnical engineering services.

**Recommendation**

It is recommended that the Board of Education approve the attached list of firms for on-going geotechnical engineering services for Measure X projects and other projects of the District.

On a motion # 245 by Trustee Blough, seconded by Trustee LaBelle and carried by a vote of 370, the Board of Education approved, by roll-call vote, the attached list of firms to provide on-going geotechnical engineering services for the Measure X Bond Program, and for other projects of the District.
