

Some updates are not automatically deployed to your device. This is done to reduce interruptions throughout the day.

It is recommended that you "check online for updates from Microsoft Update" at least once a month.

Step 1: type update in the bottom left search bar & click "check for updates"

Step 2: Even if device says "you are up to date" - we recommend clicking the blue link to check for other updates.

Windows Update

*Some settings are managed by your organization
