HOCKING COLLEGE

College Credit Plus Pathway: Associate of Science Degree

COLLEGE CREDIT PLUS PROGRAM

Providing students with dual credit opportunities is a proven educational strategy. Effective dual credit systems have been linked to positive student impacts at both secondary and postsecondary levels. College Credit Plus has the capacity to create systemic collaboration, which will be necessary in order for Ohio to meet its college-ready, career-ready, and postsecondary completion goals. This program also has the added benefit of creating a reliable and seamless bridge for students to transition from high school into post-secondary endeavors.

Hocking College continues to be a leader in dual enrollment partnerships as we provide pathway opportunities and support to our many high school partners.

ASSOCIATE OF SCIENCE DEGREE PATHWAY

This pathway prepares students to enter a broad variety of bachelor's degree majors with a focus on either social or natural sciences. It also provides students with skills that employers want most, such as proficiency in decision-making and problem-solving, oral and written communication skills, quantitative reasoning ability, the ability to work independently or as part of a team, and the capacity to understand and use different modes of reasoning. The Associate of Science degree enables students to fulfill the undergraduate general education requirements of most four-year degree programs and is also recommended for students who have not yet decided the field they will enter or the four-year institution they will attend.

COURSE ID	COURSE TITLE	CREDIT HOURS
GS 1010	Cornerstone	1
SOCI 1101	Introduction to Sociology	3
COMM 1130	Speech	3
DT 1102	Basic Nutrition	3
