

TILE FINISHER

Tile Finishing— What is it?

Tile Finishers work together with Tile Layers to create installations of ceramic, glass or stone tile. The Finisher does most of the setting up of materials at the job and clean up before & after. They mix all mortars, by machine or by hand mixing. The Finisher grouts in all tile set by the Tile Layers, which may include showers, tubs, countertops, floors, stairs, building exteriors, ceilings and others. The Finisher also cleans, and polishes finished surfaces, they may also perform finish caulking. Tile Finishing is very active work and is often strenuous. It may involve working off of scaffolding.
