

STOUGHTON AREA SCHOOL DISTRICT

DISTRICT ADMINISTRATION BUILDING

AUTHORIZATION AND WAIVER

THE UNDERSIGNED, parent(s) of _____, a student at _____, do hereby authorize trained school staff to administer an epinephrine injection to said child whenever in the opinion of the said trained school staff our child exhibits evidence of symptoms of anaphylactic reaction to _____. The undersigned do expressly understand that said school staff, while not medical professionals, have been trained to administer said injections and to recognize symptoms. The undersigned do further understand that the injection of epinephrine into any person possesses the potential for a severe or even fatal adverse reaction in the event said injection is not properly administered. The undersigned do further understand that the medication itself also has the possibility of adverse reactions. Recognizing the limitations on the medical qualifications of said trained school staff and further understanding the seriousness of the consequences of allowing, permitting and authorizing said trained school staff to inject epinephrine into said child, _____, the undersigned do make this authorization.

FURTHER, the undersigned do hereby waive any claim for damages the undersigned or said child may have as a result of the actions or failure to act of the said trained school staff, in the course of injecting epinephrine into said child or in the course of identifying any sting, allergic reaction or condition of said child; and the undersigned will indemnify, defend and hold harmless the said trained school staff, agents, officers and employees of the school district and the Stoughton Area Schools School Nurse.

THIS AUTHORIZATION AND WAIVER is given in recognition of the dangers not treating said child in the event of an allergic reaction, the undersigned having been advised of the possibility or likelihood of severe or fatal consequences of no treatment by injection of epinephrine. •
