Code: **EBBAA/ JHCCC**
Adopted: June 24, 2006

Infection Control - HIV, AIDS, HBV

The district shall use standard precautions at all times for infection control. Each person is therefore treated as though an HIV, AIDS or HBV[1] infection exists.

The district shall develop an Exposure Control Plan that includes infection control procedures for staff and students.

Staff and students shall receive an annual in-service that includes correct procedures for cleaning up body fluid spills and for personal cleanup, appropriate disposal, immunization and personal hygiene, as well as the location and a content review of first-aid and clean-up kits. Kits shall be available for each room in the building and in each district vehicle.

In addition to an annual in-service, staff and students on a regular basis will receive HIV, AIDS and HBV information.

The information shall emphasize infection — how infection is spread as well as how it is not spread.

The district will cooperate with the Nevada Department of Education, the Nevada Department of Human Services, Health Services, and the local health department in delivering HIV, AIDS and HBV education.

END OF POLICY
