Code: **IF**
Adopted: June 24, 2006

Curriculum Development

The Board recognizes that to improve the quality of instructional programs and to respond to changing societal and community needs, it cannot permit the curriculum to remain static. The Board deems it essential that the district develop and implement an instructional management system which will modify curricula to meet changing needs, ensuring quality educational programs serving each individual student's interests.

While the Board retains its full rights and responsibilities under the laws and regulations of the state of Nevada with regard to determining curriculum, it authorizes the superintendent to organize committees and other structures which would be responsive and representative in planning curriculum improvements and be effective at implementing approved changes.

Decision making within the curriculum improvement process should be based on reliable data collected through a comprehensive assessment of needs. The assessment should include, but is not limited to, evaluation of student performance using appropriate measurement tools and procedures, surveys of parent perceptions and professional staff recommendations.
