Tylenol – Benadryl – Tums Administration in School

The school doctor has provided a standing-order to administer one or two 325 mg. tablets of Tylenol as needed for menstrual cramps/headache/pain (chewable or liquid Tylenol will also be available). Benadryl – 1-2 tablets as needed for allergies or bee stings/bug bites. Tums – 2 tablets as needed for stomachache and heartburn, ALL with parent written or verbal permission. **It is the responsibility of the parent to notify the School Nurses IN WRITING if there is a change in their child’s health status which as a result of administration of any of these medications could be detrimental (ie: conflicts with new medications (Tums and certain antibiotics), start taking allergy medication at home on a daily basis (ie: Claritin, Sudafed), etc.).**

If you want the nurse to administer Tylenol/Benadryl/Tums to your child for this school year, please complete and sign the form below and have your child return it on the first day of school.

Thank you.

Sincerely yours,

- Bonita Duryea, RN - High School
Kristyn Sbriscia, RN - High School
Michelle Gaffney, RN - Middle School
Linda Katstra, RN –Mid/High School

School Nurses
