

Knowledge begins with the SENSES... TASTE HEAR

## Seton-LaCrosse Learning Center at Mother Seton School

It's important to us to help all students achieve learning success. The Seton-LaCrosse Learning Center is an instructional program that provides academic, social and consultative support.

### Our Educational Solution for Student Success

- Identifying students who are experiencing academic challenges which pose a barrier to learning success
- Offering early intervention for identified students in the area of reading and math (1:1 and small groups)
- Providing guidance intervention individually and in small groups to help with emotional and social difficulty
- Providing Second Step classes to students to teach emotional management, empathy, and problem solving to students
- Referring students to appropriate educational agencies if additional testing or support is needed
- Communicating and evaluating student progress with teachers and parents
- Offering small group reading and math enrichment for students performing above grade level
- Providing teacher training in Orton-Gillingham, Wilson Language, and other multi-sensory reading intervention methods

The Seton-LaCroce Learning Center, or SLLC, originally opened in 2012 as the Mother Seton Learning Center. It was renamed in January 2020 to the Seton-LaCroce Learning Center in honor of the LaCroce family's lifelong dedication to Catholic education for how it mirrored Saint Elizabeth Ann Seton's educational mission and vision. **Saint Elizabeth Ann Seton was very sensitive to individual differences among students and impressed upon the sisters the importance of considering each child's unique talents and abilities.** The Seton-LaCroce Learning Center continues that mission today at Mother Seton School.

Mother Seton School is fully accredited through AdvancED and follows the curriculum guidelines of the Archdiocese of Baltimore, which meet or exceed national and state standards. Using the archdiocesan STEM model, we integrate science, technology, engineering and math to develop creative problem solvers and inspire interest in STEM vocations.
