October 14, 2022

To the Board of Education  
North Rose-Wolcott Central School District, New York

In planning and performing our audit of the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the North Rose-Wolcott Central School District, New York as of and for the year ended June 30, 2022, in accordance with auditing standards generally accepted in the United States of America, we considered the North Rose-Wolcott Central School District, New York's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

Our consideration of internal control was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control that might be significant deficiencies or material weaknesses and therefore, there can be no assurance that all deficiencies, significant deficiencies, or material weaknesses have been identified. We did not identify any deficiencies in internal control that we consider to be material weaknesses. However, as discussed below, we identified certain matters involving the internal control and other operational matters that are presented for your consideration. This letter does not affect our report dated October 14, 2022 on the financial statements of the District. We will review the status of these comments during our next audit engagement. Our comments and recommendations, all of which have been discussed with appropriate members of management, are intended to improve the internal control or result in other operating efficiencies. Our comments are summarized as follows:

**Current Year Deficiencies in Internal Control:**

**School Lunch Fund –**

Federal regulation #7 CFR Part 210.09 recommends the School Lunch Fund balance not exceed three months average expenditures. As of June 30, 2022, the District's School Lunch Fund unassigned balance totaled \$447,455 and exceeded three months average expenditures in the amount of \$192,893.

We recommend the District closely monitor the School Lunch program and make every effort to comply with the federal regulation.

**Fuel Depot –**

During the course of our examination, we noted that the District does not reconcile fuel purchased to fuel usage.

We recommend the District take advantage of the reports that are available from the fueling system to reconcile fuel usage and consumption.

**(Current Year Deficiencies in Internal Control) (Continued)**

**School Lunch Meal Tracking –**

During the course of our examination, we noted one instance in which the number of meals claimed did not agree with the number of meals served, according to production records.

We recommend the District review the above item and take the necessary corrective action.

**Other Items:**

The following items are not considered to be deficiencies in internal control; however, we consider them other items which we would like to communicate to you as follows:

**Cyber Risk Management –**

The AICPA Center for Audit Quality recently issued a cyber security risk management document discussing cyber threats that face both public and private entities. The District's IT personnel routinely assesses cyber risk as part of their normal operating procedures. The District should document their cyber risk assessment process in writing which should include the risk assessment process, the frequency of the risk assessment, how findings are to be communicated to the appropriate level of management, and how the process will be monitored.

**Federal Programs –**

As a result of recent federal program changes, the District documents various federal program procedures through written questionnaires prepared by the Program Coordinators and the Business Office. Recent guidance from the New York State Education Department suggests federal recipients should enhance their written documentation into a written procedural manual that is more detailed and specific to each federal program compliance requirement.

\*

We believe that the implementation of these recommendations will provide the District with a stronger system of internal control while also making its operations more efficient. We will be happy to discuss the details of these recommendations with you at your convenience.

This communication is intended solely for the information and use of management, the Federal and State Oversight Agencies (for schools & single audits), the Board of Education, others within the organization and is not intended to be, and should not be, used by anyone other than these specified parties.

We wish to express our appreciation to all staff for the courtesies extended to us during the course of our examination.
