COURSE SPOTLIGHT

DIGM 1800 - PRINCIPLES OF DIGITAL ANIMATION

This is an entry-level course that provides hands-on digital animation experience using industry-standard tools. Students learn about the complete pipeline for animation: modeling, texturing, dynamics, rigging, lighting, animation and rendering. Students start by learning 3D essentials and move on to building, rigging and animating their own robots. This class pairs well with DIGM 1500 Intro to Game Design to create a year-long digital media option.

ENTP 1955 - ENTREPRENEURSHIP MINDSET

This is an introductory course designed to create an understanding of basic entrepreneurship concepts, including design thinking as a way for accomplishing innovation. The course also includes new venture creation, corporate innovation, and social entrepreneurship as well as ways to grow the startup through the company lifecycle of product inception, manufacturing, marketing and sales at scale. Along with developing business plans from concept to launch, you get an insight into the investor mindset and startup funding options, valuation models and exit strategies.

ANTH 1240 - INTRODUCTION TO CULTURAL ANTHROPOLOGY

This course will introduce you to the full breadth of the human experience. Cultural anthropologists study cultures from around the globe. How does culture impact our understanding of health, illness and treatment? How does language influence how we think and view the world? How does cultural diversity impact communities? If you are interested in these questions, come take Intro to Cultural Anthropology at ETSU!

COURSE SPOTLIGHT

COBH 2750 - MEDICAL TERMINOLOGY

For dual enrollment students looking forward to a career in the health professions, the Medical Terminology class is a great way to get started. The course focuses on reading and interpreting health and medical reports, research reports, or professional literature. Analysis and utilization of medical terms related to various disorders is made.

PREH 1350 - PRE HEALTH PROFESSIONS

This course is recommended for students pursuing a career in a health-related field. Students have an opportunity to see a day in the life of a variety of professions to help find the best career fit for them. This course also allows the student to identify the training requirements for the profession(s) they are most interested in. Students attain valuable networking skills and learn how to gain clinical shadowing experience with health care professionals. Lastly, the course covers "soft skills" like emotional maturity, resilience, accountability, communication and teamwork in health care.

EDFN 2400 - FOUNDATIONS PROFESSIONALS OF TEACHING

Introduces students to the profession of teaching, the roles of the professional teacher, and general information regarding the teaching/learning process. Special emphasis is placed on current trends in education, teacher professionalism, the needs of diverse learners, and best practices for beginning teachers, including the promotion of active learning among students. Using a required field placement for observation and practice, this course has students analyze the skills and dispositions that develop teachers as leaders, learn the basics of lesson planning, and cultivate their initial philosophy of education.
