Occupation Snapshot

6-Digit Occupation	Empl	Avg Mean Wages	LQ	3-Year Empl Change	Annual Demand	Forecast Ann Growth
Childcare Workers	523	\$19,800	1.05	-22	78	0.0%
Social and Human Service Assistants	402	\$40,100	1.66	-10	55	1.2%
Preschool Teachers, Except Special Education	243	\$42,500	0.96	-1	24	0.0%
Child, Family, and School Social Workers	196	\$41,300	1.01	-6	21	0.6%
Kindergarten Teachers, Except Special Education	127	\$48,000	1.84	0	12	-0.5%
Occupational Therapists	77	\$85,200	0.99	-19	5	0.8%
Social and Community Service Managers	73	\$71,200	0.73	0	8	1.3%
Education and Childcare Administrators, Preschool and Daycare	30	\$47,900	0.92	1	2	-0.2%
Health Education Specialists	28	\$60,700	0.83	-2	4	0.8%
Special Education Teachers, Preschool	23	\$50,000	2.10	1	2	-0.1%
Remaining Component Occupations	44	\$55,700	0.53	0	4	1.2%
Early Childhood Education	1,766	\$39,400	1.10	-57	214	0.4%

"Annual Demand" is the projected need for new entrants into an occupation. New entrants are needed due to expected growth and to replace workers who left the occupation due to factors such as retirement or switching careers.

"Forecast Ann Growth" is the expected change in jobs due to national, long-term trend projections (per the BLS) as well as local factors such as industry mix and population growth (as computed and modeled by Chmura).

Employment by Industry

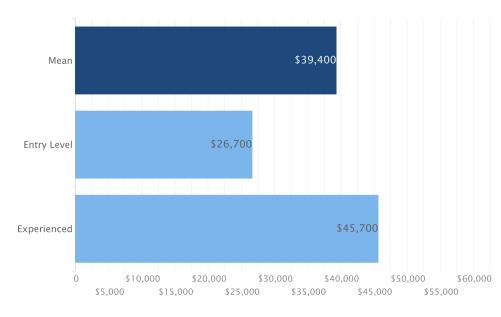

Industry Title	% of Occ Empl	Empl	10-Year Separations	10-Year Empl Growth	10-Year Total Demand
Child Day Care Services	24.0%	424	551	-9	542
Elementary and Secondary Schools	17.9%	316	335	-15	320
Individual and Family Services	9.4%	166	209	59	268
Religious Organizations	9.1%	161	196	7	203
Administration of Human Resource Programs	5.3%	94	99	-2	97
Executive, Legislative, and Other General Government Support	4.4%	78	87	3	90
General Medical and Surgical Hospitals	3.5%	62	56	1	57
Community Food and Housing, and Emergency and Other Relief Services	3.3%	58	67	4	71
Outpatient Care Centers	2.4%	42	50	7	57
Administration of Economic Program	2.0%	35	37	-1	36
Other Amusement and Recreation Industries	2.0%	35	53	4	58
Private Households	1.8%	31	45	-2	43
Residential Intellectual and Developmental Disability, Mental Health, and Substance Abuse Facilities	1.5%	26	32	3	35
Offices of Other Health Practitioners	1.4%	25	21	6	26
Social Advocacy Organizations	1.3%	23	28	5	33
Home Health Care Services	1.2%	22	18	5	23
Nursing Care Facilities (Skilled Nursing Facilities)	1.1%	20	17	-1	16
Vocational Rehabilitation Services	1.1%	19	21	-1	19
Offices of Physicians	0.9%	15	15	1	16
Employment Services	0.8%	15	18	0	18
All Others	5.6%	99	116	7	122

The industry distribution indicates the industries in which workers in the occupation(s) are primarily found.

"10-Year Empl Growth" may show industries with positive as well as negative growth; this would indicate that the occupation(s) being examined are expected to expand within some industries while contracting in others.

Wages

Occupation	Mean	Median	Entry Level	Experienced
Early Childhood Education	\$39 <i>,</i> 400	\$34,600	\$26,700	\$45,700

Occupation wages here are based on data from the Bureau of Labor Statistics, OES program, and imputed by Chmura where necessary.

When this report is run for an occupation group, the table above displays up to the top ten detailed occupations which have the highest average wages within the occupation group.

Occupation Demographics

Age 16 to 19 years (1.3%) 25 to 34 years (22.8%) 45 to 54 years (22.3%) 20 to 24 years (10.1%) 35 to 44 years (22.6%) 55 to 64 years (15.8%) 65 years and over (5.1%) Race White (53.5%) American Indian (0.4%) Pacific Islander (0.0%) Black (44.6%) Two or More Races (0.8%) Asian (0.7%) Ethnicity 98.1% Non-Hispanic/Latino (98.1%) Hispanic or Latino (of any race) (1.9%) Gender Male (11.1%) Female (88.9%) **Education and Training Requirements**

Skill and certifications gaps can help inform employee development programs, as well as provide a comparison of the needs of regional employers to the supply.

Occupation Gaps

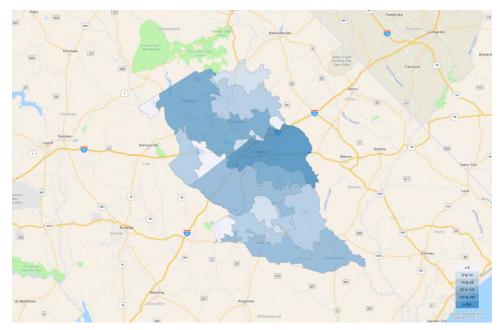

The above are the potential average annual gaps over 10 years. Many variables go into this analysis, but at its core it is based on a forecast comparing occupation demand growth to the local population growth and the projected educational attainment of those residents. When an area, for example, has an occupation expected to grow quickly but the educational requirement for the occupation does not match well with the educational attainment of its residents, there is a high potential for an occupation shortfall in the region. Alternatively, slow-growing or contracting occupations often represent potential supply surpluses.

The potential supply shortfall is an underlying force that the market needs to resolve one way or another, such as by employers recruiting from further distances for these occupations, wages going up to attract more candidates, and/or increased demand and wages enticing more local residents to get training for these occupations. While this an important analysis for determining local occupation needs, the occupation gap should be considered along with other regional data including growth and separation forecasts, unemployment rates, wage trends, and award and skill gap analyses.

"Place of work" employment is based upon the location of employers for these workers. "Place of residence" data refers to the home locations of the workforce, which is typically the preferred data set to use when calculating labor availability within a drive-time or radius of a potential worksite.

Florence, SC MSA Regional Map

Region Definition

Florence, SC MSA is defined as the following counties:

Darlington County, South Carolina

Florence County, South Carolina

Data Notes

- Occupation employment by default indicates employment by place of work. Occupation employment is as of 2021Q1 and is based on industry employment and local staffing patterns calculated by Chmura and utilizing BLS OES data.
 Employment forecasts are modeled by Chmura and are consistent with BLS national-level 10-year forecasts. Occupation wages (mean, median, and percentiles) are derived from BLS OES data and are as of 2020 and represent the average for all Covered Employment. Entry-level and experienced wages are derived from these source data, computed by Chmura.
- Industry employment is as of 2021Q1 and is based upon BLS QCEW data, imputed by Chmura where necessary, and supplemented by additional sources including Census ZBP data.
- Education and training requirements are from the BLS. Educational attainment mix and other occupation demographics data are modeled by Chmura for 2021Q1 using regional occupation employment from JobsEQ, ZCTA-level demographics data from the Census Bureau, and national occupation-demographics patterns from the BLS.
- Postsecondary awards are per the NCES and are for the 2018-2019 academic year. Any programs shown are linked with the occupation(s) being analyzed via the program-occupation crosswalk, which may not be comprehensive. Any programs shown reflect only data reported to the NCES; reporting is required of all Title IV schools. Training providers that do not report data to the NCES are not reflected.
- Job ads data are online job posts from the Real-Time Intelligence (RTI) data set, produced wholly by Chmura and gleaned from over 40,000 websites. Data reflect ads active during the last twelve month period ending 08/12/2021 and advertised for any Zip Code Tabulation Area in or intersecting with the region for which this report was produced. Historical ad volume is revised as additional data are made available and processed. Since many extraneous factors can affect short-term volume of online job postings, time-series data can be volatile and should be used with caution. All ad counts represent deduplicated figures.
- For skill and certification gaps, openings and candidates are based upon regional occupation demand (growth plus separations) and the percent of skill demand and supply. Skill demand mix data are per a one-year sample of RTI data; skill supply data are estimated using a five-year sample of resumes data; both data sets compiled as of January 2021. Data may be based, at least in part, on data from broader geographies; see the Skill Gaps analytic export for more details.
- Occupation gaps are modeled by Chmura, indicating long-term potential supply and demand mismatches in a region due, in part, to job demand and labor pool dyanamics, including educational attainment and projected growth.
- Occupation employment by place of residence is as of 2021Q1 and modeled by Chmura based upon occuaption employment by place of work and commuting patterns. Commuting patterns are derived from source data from the Census Bureau, occupation-specific commuting tendancies, and updated to reflect more recent population and employment estimates.
- Figures may not sum due to rounding.

FAQ

What is (LQ) location quotient?

Location quotient is a measurement of concentration in comparison to the nation. An LQ of 1.00 indicates a region has the same concentration of an industry (or occupation) as the nation. An LQ of 2.00 would mean the region has twice the expected employment compared to the nation and an LQ of 0.50 would mean the region has half the expected employment in comparison to the nation.

What is annual demand?

Annual demand is a of the sum of the annual projected growth demand and separation demand. Separation demand is the number of jobs required due to separations—labor force exits (including retirements) and turnover resulting from workers moving from one occupation into another. Note that separation demand does not include all turnover—it does not include when workers stay in the same occupation but switch employers. Growth demand is the increase or decrease of jobs expected due to expansion or contraction of the overall number of jobs.
