SPECIAL EDUCATION AND HEALTH SERVICES

The Special Education and Health Services division at SCOE provides specialized support and services to students and families in Stanislaus County and surrounding counties. Our dedicated team of over 600 professionals work diligently to meet the unique needs of students from birth to age 22.

We offer direct services in school settings, in the home, support district-run programs and school sites, manage specialized classrooms on district campuses and operate two special schools. Our ultimate goal is to make a positive impact on the lives of students, families, and the broader community.
