

# Mobile Dentist Program Overview

The Mobile Dentist Group provides examinations, cleanings, fluoride treatments, sealants, and x-rays. These services are covered 100% by any student that has active Medicaid or CHIP. Services will be covered as outlined by other individual dental insurance companies with possible out of pocket expenses to the parent after the care has been given. Any student that does not have Medicaid, CHIP, or private dental insurance, can apply for a reduced rate cost or free care through the Mobile Dentist, which will include the screening, cleaning and fluoride services, If a parent asks for free granted care, the Mobile Dental group will contact that parent and request a simple application form to be completed, one that does not ask for any tax forms or pay stubs to be presented, but just a form they need on file. From our past experience, anyone who requested the grant and completed the necessary form, received 100% coverage of the service. Applications will need to be completed annually for any student taking advantage of the program.

The Mobile Dental Group cannot provide even a simple screening evaluation on a student without having a completed Smile Pennsylvania form on their specified paperwork.

Dental forms will be sent home in late October. The Mobile Dentist will be at the schools the following dates:

Lathrop St.- January 5<sup>th</sup> and 12<sup>th</sup>

Choconut Valley - February 21<sup>st</sup>

Jr/Sr High - March 1<sup>st</sup>

Any questions, please contact the Health office in each school building.
