

2022/23 Facilities Rewind

The 2022-23 School year was yet another busy year with facilities improvements district wide. Some of the notable highlights include:

- The remodel of the ARHS lecture hall
- The renovation of the modular classroom at AMSB
- Sidewalk and patio replacement at ARHS
- The replacement of the curtain wall frame at the rear gym entrance at ARHS
- Roof restoration for both gym roofs at AMSB and AMSO
- Wall panel installation to remedy the water intrusion into the gym walls at AMSB and AMSO
- Two new outdoor pavilions at AMSB and AMSO
- Renovations to District Office to add two additional office spaces for the SLI coaches
- Replacement of the underground chilled water piping at ARHS
- The glycol loop at AMSO was flushed, cleaned, refilled and an inline filter was added

As always, the entire Amity custodial staff went above and beyond this school year working to ensure the schools will be ready for the start of the school year. Working around after school programs, contractors in and out of the building, they did it with pride and professionalism. The Amity maintenance staff too worked hard on not only preventative maintenance work scheduled for the summer, but projects that were not able to get completed during the school year and unexpected "emergencies" that pop up during the course of the summer.

Some of the other projects that took place this year with the help of our custodial and maintenance staff were:

- Replacing a ductless mini split unit in the music room at AMSO
- Replacing the ceiling tiles in the AMSO cafeteria as well as repainting the serving area
- Cleaning and preparing the modular building at AMSB for renovation
- Refinishing the gym floors at all three schools
- Replacing the aging VFD drives at ARHS
