Jasper High School Dual Credit

Purpose of dual credit

In Indiana, dual credit is the term given to courses in which high school students have the opportunity to earn both high school and college credits. Dual credit courses are taught by high school faculty or by adjunct college faculty or college faculty either at the high school, at the college or university, or sometimes through online courses or distance education. Dual credit is offered by both state and independent (private, regionally accredited) colleges and universities. Jasper High School offers both AP and dual credit courses.

Advanced Placement Courses (AP Courses)

Advanced Placement or AP courses are classes that have been approved by the Collegeboard. College credit is obtained by earning passing score on the AP examination the students take at the end of the course. The credit awarded depends on the accepting university standards, but the common "passing" score is a 3, and the test results are based on a scale of 1 – 5 with 5 being the highest score possible.   There are some exceptions, but offering credit for passing AP exam scores is an almost universal practice. Credit transfer policies for many institutions can be found at the Collegeboard website at: https://apstudent.collegeboard.org/creditandplacement/how-to-earn-credit-for-your-scores

Historically the Indiana Department of Education has paid for the exams in subjects of Math and Science. The fee for all courses not under this umbrella is the responsibility of the student and taking the exam is a requirement for earning high school credit for the class. Currently, students that receive textbook assistance do not have to pay for the exams.

The Collegeboard sets the exam calendar each year. AP Exams are administered in the second and third weeks of May. Scores become available in July and are sent electronically to the student. Scores may also be sent from the Collegeboard to the university in which the student may be interested, very similar to the way SAT scores can be sent. Students also have the option of indicating one university they want to automatically receive their score on their answer sheet.

Dual Credit Courses

Dual Credit courses are courses taken at Jasper High School and meet the same criteria and rigor of the college awarding the dual credit. Credits obtained in a dual credit course at Jasper High School are transcripted at the college/university awarding the credit. Once the credit has been earned, the student will request an official transcript to be sent from the college/university that has awarded the credit to the college/university the student will attend.

Acceptance of dual credit courses is always at the discretion of the college/university that will be receiving the credit. We strongly encourage all students to verify the college/university they plan to attend will accept the credits before registering for them. This can be easily verified by calling the Office of Admissions or searching the credit transfer link on the website of the school that the credit is to be applied. It is important for students to keep track of the credits they have registered for and received.

At this time, Jasper High School has dual credit agreements in place with two college/universities;

 Ivy Tech Community College

 Vincennes University

We are pleased to partner with each of these entities and have enjoyed a long-standing relationship that continues to grow each year. Because each of these schools operate completely separate from each other, there are slight variations to the registration processes. We inform students and parents of the registration processes and deadlines well ahead of time. If there are ever questions or concerns, please contact your guidance counselor or the teacher in the class offering the dual credit.

After a student graduates from Jasper High School, it is the sole responsibility of the student to contact the registrar's office at the college/universities that they received credit and have an official transcript sent to the school they will be attending.

Ivy Tech Community College

Students register for dual credit with IVY Tech in the class they will be receiving the credit. A representative from IVY Tech will distribute the registration forms during class. The representative will assist the students in filling out the registration forms and inform the students what the JHS class will count towards at IVY Tech. There is no fee for dual credit classes taken through Ivy Tech.

Ivy Tech Dual Credit Coordinator:
Angela Lubbehusen
812-492-0506
alubbehusen@ivytech.edu

Vincennes University

Students register for Vincennes University dual credit in the class they will be receiving the credit. A representative from Vincennes University will distribute the registration forms during class. The representative will assist the students in filling out the registration forms and inform the students what the JHS classes will count towards at Vincennes University. There is no fee for dual credits. There are minimum SAT/ACT/Accuplacer scores for registration; these minimum scores vary for different classes. Students will be made aware of the minimum requirements at the time of registration.

Vincennes University Dual Credit Coordinator:
Heather Moffat
812-888-4120
hmoffat@vinu.edu

Credentialing requirements, teaching assignments, and course offerings may change the ability to offer dual credit courses each year. Students should verify with the instructor that the course is being offered for dual credit at the beginning of the semester (first 2 weeks). This will allow students to change their schedule during the class change period if necessary.

.

For the **Core 40 with Academic Honors** diploma, students must:

Complete **<u>ONE</u>** of the following:
   A. Earn 4 credits in 2 or more AP courses and take corresponding AP exams
   B. Earn 6 verifiable transcripted college credits in dual credit courses from the approved dual credit list.(See above list for approved dual credit courses)
   C. Earn two of the following:
      1. A minimum of 3 verifiable transcripted college credits from the approved dual credit list,
      2. 2 credits in AP courses and corresponding AP exams,
      3. 2 credits in IB standard level courses and corresponding IB exams.
   D. Earn a combined score of 1250 or higher with a minimum score of 560 on the math, and 590 on the evidence based reading and writing section.
   E. Earn an ACT composite score of 26 or higher and complete written section
