#### 4: Resources and Justification

Resources
Professional development budget, Title IIA Funding, ARP/ESSER II Funding
Justification
Priority areas related to the supervision of instruction have been identified through data analysis to ensure consistent and successful implementation of the NJSLs and Achieve NJ. High quality professional learning experiences are necessary to support these initiatives and to improve educators' practice. Emphasis will be placed on the implementation of PLCs, supporting teachers and administrators as reflective practitioners, support for the development of quality SGOs, and effective data use to drive instruction at the student, class, school, and district levels. The need to support the School Improvement Panel, Strategic Plan, and school/district goals is essential in the pursuit of student achievement.
