Introduction

The Union County Educational Services Commission (UCESC) is a public school district located in Westfield, New Jersey. The district was established in June, 1969 to provide high-quality and cost-effective educational programs and solutions in response to the needs of the students, parents, faculty and administration of the 21 member school districts in Union County.

The curricula for the high school programs (Hillcrest Academy North, Hillcrest Academy South, and Lamberts Mill Academy) was designed by content area teachers in consultation with the Director of Curriculum and Instruction. All curricula follow the [New Jersey Student Learning Standards](#) and were informed by the [New Jersey Curricular Frameworks](#).

The district's Curriculum and Instruction philosophy is based on Heidi Hayes Jacobs work in Curriculum Mapping and Grant Wiggins and Jay McTighe's model of Understanding by Design. Teachers work together to create Consensus Maps and then use those maps to inform their own Projected Maps and Daily Lesson Plans. All work is completed following the Backwards Design model.

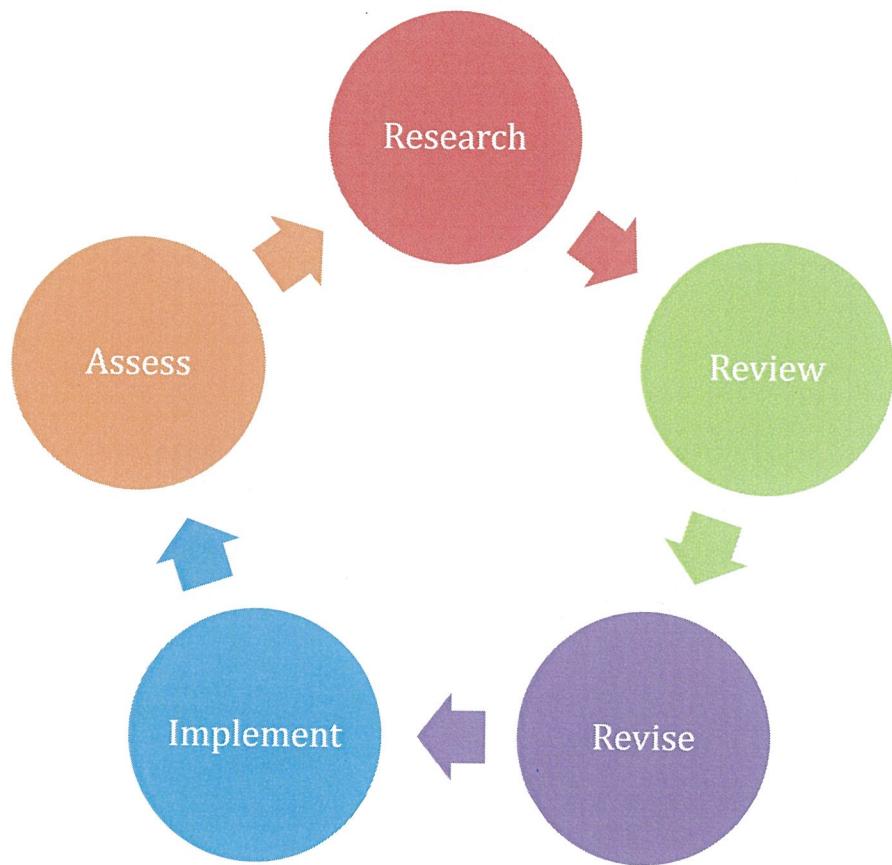

Consensus Maps: Consensus maps are designed by the department in consultation with the Director of Curriculum and Instruction and are revised every five years.

Projected Maps: Projected maps are developed by individual teachers and are continuously changing. Teachers are required to create a projected map for each unit of instruction. Maps can be changed before, during, and after the unit is complete. They will be reviewed with the Director of Curriculum and Instruction monthly.

Daily Lesson Plans: Daily Lesson Plans (DLPs) are developed by individual teachers in order to serve as a road map for the day's instruction. They are required to be aligned to the Consensus and Projected maps. DLPs should include information on all aspects of the lesson, including, but not limited to the elements included in the Elements of a Successful Lesson and the DLP Format.

Curriculum Review Cycle

The district will participate in a review and revision of the consensus maps and summative assessments every five years. This cycle may be adjusted based on any changes made by the New Jersey Department of Education.

Course Descriptions

Business Education

Business Organization/Management

This course is designed to introduce students to the role of entrepreneurship in our society. This course will enable students to acquire the knowledge and develop the skills needed to effectively organize, develop, create, and manage their own business. Students will identify the fundamentals of business creation, the personal attributes needed to be a successful entrepreneur, research various business models and use this research to create a business plan.

Success Seminar I

This course is designed to introduce students to strategies and attitudes that will help maximize their potential for success in high school, college, and career in order to become productive citizens. Topics covered include college preparation, grit and mindset, career and life skills, and service learning.

Success Seminar II

In this course students will be introduced to the skills necessary for establishing post-high school plans. By exploring possible professions along with steps needed obtain them, students will be equipped with the skills for selecting and applying for post-secondary college and/or career. Students will be introduced to various post-secondary programs, the college application process, different types of financial aid available (grants, loans, scholarships), and go through processes of creating an FSA ID and completing the FAFSA. The course will culminate in a study of skills necessary for success in post-secondary college and/or career, such as time management and positive study habits.

Success Seminar III

In this course, students will be introduced to strategies and attitudes that will help maximize their potential for success in high school, college, and career. Students learn skills that can increase their ability to cope with stress, pain, and the challenges of everyday life. Students learn about the science behind mindfulness, and the effect it has on our entire body. They will learn how stress and anxiety manifest in our bodies and can take over our lives. This course will introduce students to skills that will help them to be fully present in their lives and help them to effectively communicate with and listen to others.

Success Seminar IV

This course is a structured learning experience that provides students with the opportunity to meet academic objectives through a community service project. Students will be introduced to all stages of service learning, including planning, implementation, and evaluation. They will identify and implement projects to meet the needs of the school and their community. This course will also provide instruction in the development of interpersonal skills and what it takes to be an active citizen in today's society.

Introduction to Computer Applications

Introduction to Computer Applications is a one-year course that will use hands on, project-based, active learning. Students will be able to recognize, interpret, and apply the appropriate applications for

specific business and life needs by utilizing MS Office compatible Google Applications. Students will exhibit their knowledge by creating authentic products for authentic audiences. Units include career readiness, personal financial literacy, and business communications.

Career Education/Technology I

This course is a comprehensive package of business education, family and life skills. Students at this level are provided with the necessary pathways for life experiences while entering into the world of work and/or higher education. This course also supports lifelong learning. CET focuses on academics, applications to life and occupational skills as demonstrated by students' experiences in courses as related to the 16 career clusters supported by the state of New Jersey. CET provides a variety of learning experiences to meet the needs of high school students with many learning styles.

Career Education/Technology II

Using vocational assessments, students will identify and research their vocational preferences and interests. Students will focus on informal interviews, computer software and or reference materials. For example, OOH (Occupational Outlook Handbook), career clusters, and internet sites will be utilized. Students will research, analyze, and explore requirements (tasks) for their preferred occupation. Students will also be well groomed (teeth, face, hands, nails, hair) when they take part in these activities. There is an emphasis on situational assessments. Students will explore different vocational career interests including retail, clerical, animal care, and food service.

Personal Finance

This course provides a comprehensive study of college and career goals, credit scores, savings, investing, insurance and risk management. Students will participate in activities designed to develop their understanding of salary, taxes, and net monthly income. Additionally, they will delve into all aspects of what it takes to build and maintain a realistic family budget. Through a hands on project, students will role-play as adults for the day, with an individual family composition, income, and career. They will manage a household budget, making decisions regarding what they want and what they can afford. They will also make use of a tablet for the day, experiencing hands-on learning in a high-tech environment. All of these activities will take place as they work with corporate and community volunteer role models who share their world of work.

English Language Arts

English I

In this course, students will develop reading and writing skills that align with the ELA Common Core State Standards. Students will read a variety of texts--including excerpts from novels, short stories, poems, plays, and informational articles and documents. Students will engage in independent reading based on interest and reading level. Students will also compare works of literature to other forms of multimedia, including art and film. This course will also focus on students' development in writing narrative, argumentative, and explanatory pieces.

English II

In this course, students will continue to develop reading and writing skills that align with the ELA Common Core State Standards. Students will read a variety of works at an increasing level of text complexity—including excerpts from novels, short stories, poems, plays, and informational articles and documents. As students gain confidence in their independent reading, they will be encouraged to take on texts of increasing complexity. In class, students will also compare works of literature to other forms of multimedia, including art and film. This course will also focus on students' continued development in writing narrative, argumentative, and explanatory pieces using research skills. As students progress in their writing skills, they will begin to develop purposeful structure in order to achieve a desired effect.

English III

In English III, students will build upon skills learned in English I and II that align with the ELA Common Core State Standards. Students will read works with at an increasing level of text complexity. Students will continue to read self selected texts, but will also be given required independent reading. In class, students will also read world literature to analyze cultural experiences of people outside of the United States. Courses will also continue to evaluate and analyze works of literature to other forms of multimedia. Students will also continue to develop and craft writing skills for narrative, argumentative, and explanatory pieces. Students in English III will move beyond teacher guidance on length and organization and begin to plan and implement these decisions independently.

English IV

In English IV, students will build upon skills learned in English I, II and III that align with the ELA Common Core State Standards. In this course, students will perfect the skills learned in English I, II, and III, while also preparing for college and career. Students will continue to build their skills as independent learners by engaging in research for literary analysis and argumentative topics. In this course, students will delve deeper into the study of literary theory and style and the art of argument. Another component of this course will be preparation for college level required English course work.

Creative Writing

The focus of this course is for students to become familiar with writing across various genres, including short stories, poems, plays, novels, essays. Students will engage in various activities that will inspire writing. Students will also read texts to promote writing skills. This course moves students beyond the structured essay and prompts them to write more creative and individual pieces. Students will also learn to work through the writing process of outlining, revising, peer-editing, until final publication.

Health/Physical Education

Health/Physical Education I

Throughout Physical Education I, students will be participating in physical activities that help all students develop the knowledge, attitude, emotional skills, behavioral skills, and confidence needed to adopt and maintain physically active lifestyles. Students will participate in units from the following categories, recreational team sports, individual/lifetime activities, leisure activities, team building and cooperative learning activities, competitive team sports, and physical fitness testing.

Health I covers all aspects of human sexuality. Topics covered include structure and function of the female and male reproductive system, pregnancy, fetal development, stages of labor, overview of

sexually transmitted infections (STI), HIV/AIDS, behaviors that place individuals at greater risk for contracting an STI and various birth control methods including abstinence. In addition, CPR and First Aid will be introduced per New Jersey Department of Education Statute.

Health/Physical Education II

Physical Education II continues to provide students with opportunities to develop and refine necessary motor skills, improve and maintain physical wellness, participate in lifetime physical activities, and engage in social interaction. Students will participate in units from the following categories: recreational team sports, individual/lifetime activities, leisure activities, yoga, team building and cooperative learning activities, competitive team sports, and physical fitness testing.

Health II includes alcohol and substance abuse, prescription drug abuse, addiction/treatment, refusal skills and good self-esteem. In addition, CPR and First Aid will be reviewed per New Jersey Department of Education Statute.

Health/Physical Education III

Physical Education III will offer a wide variety of physical activities and opportunities for a lifelong healthy lifestyle. This course continues to provide students with higher level opportunities to develop and refine necessary motor skills, improve and maintain physical wellness, participate in lifetime physical activities, and engage in social interaction that has been instilled in students from prior years. Students will continue to participate in units from the following categories, but will not be limited to: recreational team sports (soccer, football, basketball, baseball/softball, volleyball, etc.), individual/lifetime activities (table tennis, yoga, weight-lifting, aerobic sports, etc.), team building and cooperative learning activities (project adventure), and physical fitness testing.

Health III concentrates on the body systems. This includes identifying parts, function, disorders, diseases and care of the body by maintaining a healthy lifestyle. Also covered is organ donation and nutrition. In addition, CPR and First Aid will be reviewed per New Jersey Department of Education Statute.

Health/Physical Education IV

Physical Education IV will continue to enable students to understand the components of health-related fitness, motor skills, flexibility, endurance, strength, coordination, and a plan to support a healthy lifestyle. The knowledge of physical education is an always evolving field and it is important that our students understand the importance of living a healthy and active lifestyle. This course encourages students to develop an individual fitness style with which they feel comfortable. Students will be able to incorporate fitness related technology into their physical fitness routine. In addition, physical fitness testing will continue to take place.

Health IV covers safety which includes first aid, fire, CPR overview, healthy relationships, dating violence, domestic abuse, and healthy conflict resolution.

Mathematics

Algebra I

Students taking Algebra I will focus on learning the basics of Algebra while expressing that knowledge both verbally and through written expressions. They will learn the basic operations working with

expressions, as well as how to write algebraic expressions with verbal descriptions. Students will also become familiar with linear equations, learning how to create them, graph them and interpret them. Students will graph and solve both equalities and inequalities. Students will be exposed to different classifications of polynomial expressions and basic computation with polynomials.

Geometry

This course is designed to emphasize the study of the properties and applications of common geometric figures in two and three dimensions. It includes the study of transformations in a coordinate plane and congruence in terms of rigid motions. Students make geometric constructions to assist in the comprehension of geometric concepts. These concepts are also applied to modeling situations. Similarity, special right triangles, right triangles, trigonometric ratios, circles, volume, and surface area of solids are also covered. Inductive and deductive thinking skills are used in problem solving situations, and applications to the real world are stressed. Students will also be introduced to the basics of writing proofs to solve (prove) properties algebra and of geometric figures.

Algebra II

Students taking Algebra II will continue to build upon skills learned in Algebra I. They will review solving linear equations both algebraically and graphically. Students will solve systems of equations and inequalities using different methods. Students working in Algebra II will work with functions and relations, demonstrating how they can create them and apply them to real world situations. Students will be exposed to matrices, and basic arithmetic operations associated with them. This course will also work with more advanced topics working with quadratics and polynomials.

Trigonometry

Trigonometry will develop the students' mathematical concepts, improve logical thinking, and help to promote success. The laws of sines and cosines will be studied and applied to real life situations. Students will study relations, functions, trigonometric graphs and their properties and transformations using angular and radian measures. There is an emphasis on solving trigonometric equations and proving trigonometric identities. Students will use graphing calculators in activities that are appropriate to the topics being studied.

Probability and Statistics

This course introduces students to the methods used in the field of applied statistics using mathematical models. Emphasis is given to concepts and techniques for collecting, analyzing, representing data, drawing conclusions, and making predictions. The major focus of this course is to provide students with experience in measures of location and dispersion, correlation, and regression. Students will use multiple representations to present data including written descriptions, numerical statistics, formulas, and graphs. Students will work with independent and dependent events, random variables, conditional probability, binomial and geometric distributions.

Consumer Math

Students taking Consumer Math will get experience in financial literacy. They will use basic mathematics skills in order to solve everyday problems. Students will experience 'real-world' applications involving mathematics such as: investments, income, expenses, taxes and needs vs wants. They will also work throughout the year completing various projects such as creating a monthly budget based on an income,

balancing a checkbook reading and writing checks. Students will be able to connect concepts learned in class with outside scenarios, preparing them to be successful and responsible consumers.

Math Strategies

This course explores the basic operations of arithmetic, subtraction, multiplication, division, and fractions. Students will be introduced to math vocabulary and symbols. Other areas covered will include rounding, estimation, decimals and fractions, numerical ordering, percentages, ratios, proportions, rational and irrational numbers, and the reading, writing, and verbalizing of various numbers. Students will gain a better understanding of numbers and how to use them in practical applications such as measurement and money.

Science

Environmental Science

The Big Bang Theory; weather; climate change - all heady subjects, all integral to our study of humanity's place in the universe. Environmental Science students will explore the Earth's place in the universe and human interaction. Further, they will study the impact on Earth through a unique combination of multimedia and hands-on activities designed to put students' experiences into perspective with regards to the long history of everything around them. By the end of the course, students will have practical knowledge of such varied topics as planetary motion and earthquakes.

Biology

Biology is the study of life. What is it? How do you stay alive? Students will learn what it takes to truly be alive through a unique blending of field and lab studies. Young scientists will implement interactive notebooks and digital portfolios to document their observations, predictions, and revelations. Students will have practical lab experience and digital dissection training upon the completion of this course.

Chemistry

This class focuses on the subatomic level and how interactions within this realm produce global change. The students will learn what matter is composed of and its interactions with everything we see, feel, and hear. By delving into the invisible world of chemistry, students will get a glimpse backstage into the wondrous universe. From nuclear energy to periodic table trends, this course will provide an enriching educational experience for all.

Forensic Science

How do you catch a criminal? That is the question that this guiding and scientifically rigorous class attempts to answer. Through new-age techniques and historical precedents, the topic of legality and CSI merge into this cause-and-effect course of intrigue and deceit. From fingerprinting to DNA analysis, students will get a front row seat into the inner workings of our criminal justice system. Moreover, they will learn how the guilty get convicted and the innocent get exonerated in the United States.

Marine Biology

This course is designed for students with an interest in marine biology and oceanography and will provide excellent background for further study of the oceans and the organisms that inhabit it. Major concepts include the study of: the interrelationship of marine and terrestrial environments, the geology

of the oceans, marine organisms, and the ecology of coral reefs. Students will learn about the physical structure and chemistry of the ocean, the diversity of ocean life, marine ecology, and the scope and impact of human interactions with the oceans. Laboratory activities reinforce concepts and principles presented. Laboratory activities, including the examination of marine specimens are utilized throughout this course to build upon student knowledge.

Social Studies

World History

World History traces the development of civilization from the Neolithic Revolution to the Age of Industrialization. This course includes the study of past civilizations and their influences on modern societies. The purpose of World History is to develop a greater understanding of how geography along with cultural institutions and beliefs shape the evolution of human societies.

United States History I

This course studies the United States from the Age of Exploration through the Civil War. US History I looks at the very first settlements in America and the dramatic development of the New World. The course introduces the themes of balance between unity and diversity, the shaping of democracy, the search for opportunity, and the influence of geographical factors through the topics of slavery, revolution, and inalienable human rights.

United States History II

United States History II traces how the United States became a modern nation and explores the challenges of modernization and America's place in the world today. Students will examine the impact of global conflicts on the United States in World Wars I & II and the Cold War as well as the human struggle for rights and equality through the Great Immigration at the turn of the 20th century, the impact of manufacturing, the creation of unions, the rise of the women's and civil rights movements. An in-depth investigation of historical events and periods, the fostering of multicultural awareness, the recognition of ethical, civic, and democratic values present in American history, and the development of a historical perspective in relation to contemporary events represent the major aspects of the course.

Economics

This course explores the choices and decisions that people make about how to use the world's limited resources. The goal of this course is to provide students with knowledge that is strongly established in economic principles so that he or she will be able to differentiate between economic models, understand issues related to global and national economics, gain insight into choices that businesses makes, and learn about the importance of managing personal finances and planning for one's financial security.

Sociology

This course will introduce students to the study of humankind's most important creation-- the social group. Sociology is based on the concept that everything that we, as humans, do is either directly or indirectly influenced by the society in which we live. In this course, students will examine the various

skills and techniques that sociologists employ when studying groups of people. Students will then examine a wide variety of groups and the behaviors that characterize them.

20th Century Civil Liberties

This course is designed to be an in-depth study of social injustice, including slavery, genocide, and present-day racism. Students will be examining the immediate and enduring consequences of genocide and hatred, especially how they continue to impact the world we live in today. The course will culminate with a participatory action-research project where students assume a proactive role as citizens in their own communities.

20th Century History

Students in 20th Century History study the major turning points that shaped the modern world, from the Renaissance through the present, including the cause and course of the World Wars I & II. They trace the rise of democratic ideas and develop an understanding of the historical roots of current world issues, especially as they pertain to international relations. They extrapolate from the American experience that democratic ideals are often achieved at a high price, remain vulnerable, and are not practiced everywhere in the world.

Spanish

Spanish I

Spanish I will teach students to communicate in present tense, simple future and simple past tenses in order to express basic needs, opinions and form questions in a real life situation. By the end of the course, students will have a solid understanding that language and culture are intertwined and that communication is not only speech, but also understanding the products of another culture, which in turn will help them understand their own selves. At this level, the primary emphasis is on developing listening and speaking skills in Spanish. Students talk about everyday situations using simple questions and short answers at the phrase or sentence level. Cultural awareness of the world where Spanish is spoken is an integral component of the course. Lastly, students will understand that successful communication is knowing how, when and why to convey a message to different audiences.

Spanish II

The second year expands the basic listening, speaking, reading, and writing skills so that students can begin to create with the language. Students feel more at ease with simple conversations and brief written descriptions on familiar topics. Students also gain a deeper appreciation of, and sensitivity to, diverse cultures and customs of Latin America and Spain. Students will see that (a) Language reflects and is influenced by the culture in which it is found, (b) Cultural perspectives are gained by using the language and through experience with its products and practices, and that (c) Strategies for communication must go beyond vocabulary acquisition and that circumlocution is just as important as word retention in terms of making meaning.

Spanish III

During the third year of study, students begin to feel comfortable communicating in the language. As more complex language patterns are introduced, students become increasingly able to describe, narrate, and state opinions on familiar situations and cultural themes. To maintain whatever level of

proficiency students have acquired over the course of their lingual education, students must develop habits that offer them opportunities to use the language in different settings (ie. writing to a pen pal, visiting a Latino market, traveling aboard, watch/listen to Spanish programming ...etc.). Students will be aware that members of one culture may make assumptions about other cultures based on their own attitudes, values and beliefs. Lastly, students will discover strategies needed to communicate in linguistically and culturally appropriate ways.

Visual Art

Drawing and Painting I

This course will encourage authentic creative expression in the form of two dimensional artwork through the use and experimentation of art mediums inspired by personal themes. Students will make connections through art history and understand how artists translate themes into tangible and symbolic pieces of art. Students will utilize art criticism as a way of understanding the themes and techniques used in art and will use it to support and explain their own art making journey.

Drawing and Painting II

In Drawing and Painting II, students will continue to use problem solving skills and critical thinking in order to design projects and understand connections to art history and the present. They will gain a deeper understanding of the purpose of art and the artist's place in the world around them. Students will focus on design as it pertains to both aestheticism and function and will understand real life applications of art and techniques in society.

Print Making

In addition to continuing the work of Drawing and Painting, students enrolled in this course will be introduced to various techniques in printmaking such as block printing, collagraphs, chine colle, mono-prints, use of the rolling press and silk screening. Students will utilize these fine arts techniques as they learn the design process, layout, history and function of these processes. Students will create for both aesthetic and function and understand the historical, cultural and conceptual aspects of printmaking.

High School Course Syllabus**

Title: Career Education/Technology II

Timeline: Full Year; 5 Credits

Course Description:

Using vocational assessments, students will identify and research their vocational preferences and interests. Students will focus on informal interviews, computer software and or reference materials. For example, OOH (Occupational Outlook Handbook), career clusters, and internet sites will be utilized. Students will research, analyze, and explore requirements (tasks) for their preferred occupation. Students will also be well groomed (teeth, face, hands, nails, hair) when they take part in these activities. There is an emphasis on situational assessments. Students will explore different vocational career interests including retail, clerical, animal care, and food service.

Title: Personal Finance

Timeline: Full Year; 5 Credits

Course Description:

This course provides a comprehensive study of college and career goals, credit scores, savings, investing, insurance and risk management. Students will participate in activities designed to develop their understanding of salary, taxes, and net monthly income. Additionally, they will delve into all aspects of what it takes to build and maintain a realistic family budget. Through a hands on project, students will role-play as adults for the day, with an individual family composition, income, and career. They will manage a household budget, making decisions around what they want and what they can afford. They will also make use of a tablet for the day, experiencing hands-on learning in a high-tech environment. All of these activities will take place as they work with corporate and community volunteer role models who share their world of work.

Course Outline:

- I. Personal Finance Strategies
- II. Career and Personal Financial Goals

Universal Declaration of Human Rights, etc.), including how they relate in terms of themes and significant concepts.</p>	<p>des Beaux Arts" and Breughel's <i>Landscape with the Fall of Icarus</i>.</p> <p>RL.9-10.9. - Analyze and reflect on (e.g. practical knowledge, historical/cultural context, and background knowledge) how an author draws on and transforms source material in a specific work (e.g., how Shakespeare treats a theme or topic from mythology or the Bible or how a later author draws on a play by Shakespeare).</p>
<p>Target Standards</p> <p>Writing</p>	<p>W.9-10.3. - Write narratives to develop real or imagined experiences or events using effective technique, well-chosen details, and well-structured event sequences.</p> <p>A. Engage and orient the reader by setting out a problem, situation, or observation, establishing one or multiple point(s) of view, and introducing a narrator and/or characters; create a smooth progression of experiences or events.</p>	<p>W.9-10.1. - Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among claim(s), counterclaims, reasons, and evidence.</p> <p>A. Develop claim(s) and counterclaims avoiding common logical fallacies, propaganda devices, and using sound reasoning, supplying evidence for each while pointing out the strengths and</p>

			each while pointing out the strengths and limitations of both in a manner that anticipates the audience's knowledge level and concerns.
B.	Use narrative techniques, such as dialogue, pacing, description, reflection, and multiple plot lines, to develop experiences, events, and/or characters.	B.	Use transitions (e.g. words, phrases, clauses) to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.
C.	Use a variety of techniques to sequence events so that they build on one another to create a coherent whole.	C.	Establish and maintain a style and tone appropriate to the audience and purpose (e.g. formal and objective for academic writing) while attending to the norms and conventions of the discipline in which they are writing.
D.	Use precise words and phrases, telling details, and sensory language to convey a vivid picture of the experiences, events, setting, and/or characters.	D.	Provide a concluding paragraph or section that supports the argument presented.
E.	Provide a conclusion that follows from and reflects on what is experienced, observed, or resolved over the course of the narrative.		W.9-10.2. - Write informative/ explanatory texts to examine and convey complex ideas, concepts, and information clearly and accurately through the effective selection, organization, and analysis of content.
		A.	Introduce a topic; organize complex ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.
		B.	Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations or other information and examples appropriate to the audience's knowledge of the topic.
		C.	Use appropriate and varied transitions to link the major sections of the text, create cohesion, and clarify the relationships
			W.9-10.4. - Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
			W.9-10.5. - Develop and strengthen writing as needed by planning, revising, editing, rewriting, trying a new approach, or consulting a style manual (such as MLA or APA Style), focusing on addressing what is most significant for a specific purpose and audience.
			W.9-10.6. - Use technology, including the Internet, to produce, share, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display
			W.9-10.4. Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
			W.9-10.5. Develop and strengthen writing as needed by planning, revising, editing, rewriting, trying a new approach, or consulting a style manual (such as MLA or APA Style), focusing on addressing what is most significant for a specific purpose and audience.
			W.9-10.6. Use technology, including the Internet, to produce, share, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display

	<p>information flexibly and dynamically.</p> <p>W9-10.10 - Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.</p>	<p>D. Use precise language and domain-specific vocabulary to manage the complexity of the topic.</p> <p>E. Establish and maintain a style and tone appropriate to the audience and purpose (e.g. formal and objective for academic writing) while attending to the norms and conventions of the discipline in which they are writing.</p> <p>F. Provide a concluding paragraph or section that supports the information or explanation presented (e.g., articulating implications or the significance of the topic).</p>	<p>among complex ideas and concepts.</p> <p>W.9-10.9. Draw evidence from literary or nonfiction informational texts to support analysis, reflection, and research.</p> <p>A. Apply <i>grades 9–10 Reading standards</i> to literature (e.g., “Analyze how an author draws on and transforms source material in a specific work [e.g., how Shakespeare treats a theme or topic from Ovid’s <i>mythology</i> or the Bible or how a later author draws on a play by Shakespeare]”).</p> <p>B. Apply <i>grades 9–10 Reading standards</i> to nonfiction informational e.g., “Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning”).</p> <p>W9-10.10 Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.</p> <p>W.9-10.4 - Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)</p> <p>W.9-10.5 - Develop and strengthen writing as needed by planning, revising, editing, rewriting, trying a new approach, or consulting a style manual (such as <i>MLA</i> or <i>APA Style</i>), focusing on addressing what is most significant for a specific purpose and audience.</p> <p>W.9-10.6 - Use technology, including the Internet, to produce, share, and update individual or shared writing products, taking advantage of technology’s capacity to link to other information and to display information flexibly and dynamically.</p> <p>W.9-10.7 - Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.</p>
--	---	--	---

W.9-10.8. - Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation (MLA or APA Style Manuals).

W.9-10.9. - Draw evidence from literary or nonfiction informational texts to support analysis, reflection, and research.

- A. Apply *grades 9–10 Reading standards* to literature (e.g., “Analyze how an author draws on and transforms source material in a specific work [e.g., how Shakespeare treats a theme or topic from Ovid mythology or the Bible or how a later author draws on a play by Shakespeare]”).
- B. Apply *grades 9–10 Reading standards* to nonfiction informational e.g., “Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning”).

W9-10.10 Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.

**Union County Educational Services Commission
High School Course Syllabus**

Title: English II

Timeline: Full Year; 5 Credits

Course Description:

In this course, students will develop reading and writing skills that align with the New Jersey Student Learning Standards. Students will read a variety of texts—including excerpts from novels, short stories, poems, plays, and informational articles and documents. Students will engage in independent reading based on interest and reading level. Students will also compare works of literature to other forms of multimedia, including art and film. This course will also focus on students' development in writing narrative, argumentative, and explanatory pieces.

Course Outline:

- I. Narrative Writing and Fiction
- II. Persuasive Writing and Nonfiction
- III. Analytic Writing and Poetry
- IV. Independent Reading
- V. Online Reading Remediation

Refer to the attached curriculum map for a detailed outline of course objectives.

Curriculum Alignment:

New Jersey Student Learning Standards - English
PARCC Evidence Tables

Grading Procedures:

Do Now	10%
Participation	20%
Class Assignments	50%
Assessments	20%

Adoption Date:

Union County Educational Services Commission
Curriculum Mapping Format: English II

	Unit I	Unit II	Unit II
Length of Unit	13 Weeks (September-December)	13 Weeks (January-March)	13 Weeks (April-June)
Writing Focus ¹	Narrative and Analytic Writing	Argumentative and Informational Writing	Analytic and Argumentative Writing
Reading Focus ¹	Short Stories Novel Study	Non-Fiction United States Historical Documents	Poetry Plays

Establish and maintain a style and tone appropriate to the audience and purpose (e.g. formal and objective for academic writing) while attending to the norms and conventions of the discipline in which they are writing.</p> <p>F. Provide a concluding paragraph or section that supports the information or explanation presented (e.g., articulating implications or the significance of the topic).</p> <p>W.9-10.4. - Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)</p> <p>W.9-10.5. - Develop and strengthen writing as needed by planning, revising, editing, rewriting, trying a new approach, or consulting a style manual (such as MLA or APA Style), focusing on addressing what is most significant for a specific purpose and audience.</p> <p>W.9-10.6. - Use technology, including the Internet, to produce, share, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.</p> <p>W.9-10.7. - Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.</p> <p>W.9-10.8. - Gather relevant information from</p>	<p>taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.</p> <p>W.9-10.9. Draw evidence from literary or nonfiction informational texts to support analysis, reflection, and research.</p> <p>A. Apply <i>grades 9–10 Reading standards to literature</i> (e.g., "Analyze how an author draws on and transforms source material in a specific work [e.g., how Shakespeare treats a theme or topic from Ovid's mythology or the Bible or how a later author draws on a play by Shakespeare]").</p> <p>B. Apply <i>grades 9–10 Reading standards to nonfiction</i> informational e.g., "Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning").</p> <p>W9-10.10 Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.</p>
--	---	---	--

multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation (MLA or APA Style Manuals).

W9-10.9. - Draw evidence from literary or nonfiction informational texts to support analysis, reflection, and research.

- A. Apply *grades 9–10 Reading standards* to literature (e.g., “Analyze how an author draws on and transforms source material in a specific work [e.g., how Shakespeare treats a theme or topic from Ovid mythology or the Bible or how a later author draws on a play by Shakespeare]”).
- B. Apply *grades 9–10 Reading standards* to nonfiction informational e.g., “Delineate and evaluate the argument and specific claims in a text, assessing whether the reasoning is valid and the evidence is relevant and sufficient; identify false statements and fallacious reasoning”).

W9-10.10 Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.

Union County Educational Services Commission
High School Course Syllabus

Title: English III

Timeline: Full Year; 5 Credits

Course Description:

In this course, students will develop reading and writing skills that align with the New Jersey Student Learning Standards. Students will read a variety of texts--including excerpts from novels, short stories, poems, plays, and informational articles and documents. Students will engage in independent reading based on interest and reading level. Students will also compare works of literature to other forms of multimedia, including art and film. This course will also focus on students' development in writing narrative, argumentative, and explanatory pieces.

Course Outline:

- I. Narrative Writing and Fiction
- II. Persuasive Writing and Nonfiction
- III. Analytic Writing and Poetry
- IV. Independent Reading
- V. Online Reading Remediation

Refer to the attached curriculum map for a detailed outline of course objectives.

- topics").
- B. Apply *grades 11–12 Reading standards* to literary nonfiction (e.g., "Delineate and evaluate the reasoning in seminal texts, including the application of constitutional principles and use of legal reasoning [e.g., in U.S. Supreme Court Case majority opinions and dissents] and the premises, purposes, and arguments in works of public advocacy [e.g., *The Federalist*, presidential addresses]").

W.11-12.10. Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes.

**Union County Educational Services Commission
High School Course Syllabus**

Title: Creative Writing

Timeline: Full Year; 5 Credits

Course Description:

The focus of this course is for students to become familiar with writing across various genres, including short stories, poems, plays, novels, essays. Students will engage in various activities that will inspire their writing. Students will also read texts to promote their writing skills. This course moves students beyond the structured essay and prompts them to write more creative and individual pieces. Students will also learn to work through the writing process of outlining, revising, peer-editing, until final publication.

Course Outline:

- I. Memoir
- II. Short Story
- III. Poetry
- IV. Drama

Refer to the attached curriculum map for a detailed outline of course objectives.

Curriculum Alignment:

New Jersey Student Learning Standards - English

Grading Procedures:

Health/Physical Education

**Union County Educational Services Commission
High School Course Syllabus**

Title: Health/Physical Education I

Timeline: Full Year; 5 Credits

Course Description:

Throughout Physical Education I, students will be participating in physical activities that help all students develop the knowledge, attitude, emotional skills, behavioral skills, and confidence needed to adopt and maintain physically active lifestyles. Students will participate in units from the following categories, recreational team sports, individual/lifetime activities, leisure activities, team building and cooperative learning activities, competitive team sports, and physical fitness testing.

Health I covers all aspects of human sexuality. Topics covered include structure and function of the female and male reproductive system, pregnancy, fetal development, stages of labor, overview of sexually transmitted infections (STI), HIV/AIDS, behaviors that place individuals at greater risk for contracting an STI and various birth control methods including abstinence. In addition, CPR and First Aid will be introduced per New Jersey Department of Education Statute.

Scope and Sequence (PE):

- I. Fitness
- II. Team Sports
- III. Individual Sports
- IV. Cooperative Games

Scope and Sequence (Health):

- I. Female Reproductive System
- II. Male Reproductive System
- III. The Beginning of the Life Cycle
- IV. Sexually Transmitted Diseases and Infections
- V. CPR
- VI. First Aid

Refer to the attached curriculum map for a detailed outline of course objectives.

High School Course Syllabus**

Title: Health/Physical Education III

Timeline: Full Year; 5 Credits

Course Description:

Physical Education III will offer a wide variety of physical activities and opportunities for a lifelong healthy lifestyle. This course continues to provide students with higher level opportunities to develop and refine necessary motor skills, improve and maintain physical wellness, participate in lifetime physical activities, and engage in social interaction that has been instilled in students from prior years. Students will continue to participate in units from the following categories, but will not be limited to: recreational team sports (soccer, football, basketball, baseball/softball, volleyball, etc.), individual/lifetime activities (table tennis, yoga, weight-lifting, aerobic sports, etc.), team building and cooperative learning activities (project adventure), and physical fitness testing.

Health III concentrates on the body systems. This includes identifying parts, function, disorders, diseases and care of the body by maintaining a healthy lifestyle and organ donation and nutrition. In addition, CPR and First Aid will be reviewed per New Jersey Department of Education Statute.

Scope and Sequence (PE):

- I. Fitness
- II. Team Sports
- III. Individual Sports
- IV. Cooperative Games

Scope and Sequence (Health):

- I. Personal Health Care
- II. Body Systems

High School Course Syllabus**

Title: Health/Physical Education IV
Timeline: Full Year; 5 Credits

Course Description:

Physical Education IV will continue to enable students to understand the components of health-related fitness, motor skills, flexibility, endurance, strength, coordination, and a plan to support a healthy lifestyle. The knowledge of physical education is an always evolving field and it is important that our students understand the importance of living a healthy and active lifestyle. This course encourages students to develop an individual fitness style with which they feel comfortable. Students will be able to incorporate fitness related technology into their physical fitness routine. In addition, physical fitness testing will continue to take place.

Health IV covers mental and emotional health including forming and maintaining healthy relationships, dating violence, domestic abuse, and healthy conflict resolution. In addition, CPR and First Aid will be reviewed per New Jersey Department of Education Statute.

Scope and Sequence (PE):

- I. Fitness
- II. Team Sports
- III. Individual Sports
- IV. Cooperative Games

Scope and Sequence (Health):

- I. Healthy and Safe Relationships
- II. Abusive Relationships
- III. Mental and Emotional Health
- IV. CPR
- V. First Aid

Refer to the attached curriculum map for a detailed outline of course objectives.

Mathematics

Union County Educational Services Commission
High School Course Syllabus

Title: Algebra I

Timeline: Full Year; 5 Credits

Course Description:

Students taking Algebra I will focus on learning the basics of Algebra while expressing that knowledge both verbally and through written expressions. They will learn the basic operations working with expressions, as well as how to write algebraic expressions with verbal descriptions. Students will also become familiar with linear equations, learning how to create them, graph them and interpret them. Students will graph and solve both equalities and inequalities. Students will be exposed to different classifications of polynomial expressions and basic computation with polynomials.

Scope and Sequence:

- I. Basic Algebraic Concepts
- II. Solving Equations
- III. Linear Equations
- IV. Solving Inequalities and Absolute Value
- V. Systems of Linear Equations and Inequalities
- VI. Laws of Exponents

Refer to the attached curriculum map for a detailed outline of course objectives.

Curriculum Alignment:

Skills	Adding and Subtracting Real Numbers Multiplying and Dividing Real Numbers Order of Operations (PEMDAS) Simplifying Algebraic Expressions with Real Numbers	Solving Equations by Adding and Subtracting (One-Step) Solving Equations by Multiplying and Dividing (One-Step) Solving Two Step Equations Solving Multi-Step Equations Solving Equations Involving the Distributive Property Solving Equations with Variables on Both Sides Solving for a Variable Solving Word Problems Involving Linear Equations Solving Problems Using Formulas Solving Problems Using Literal Equations	Using Intercepts to Graph Linear Equations (standard form) Rate of Change and Definition of Slope Forms of Linear Equations (Standard) Forms of Linear Equations (Slope-Intercept) Form of Linear Equations (Point-Slope) Parallel Lines Perpendicular Lines Writing Linear Equations (given various pieces of information)	Solving a System of Linear Equations (graphically) Solving a System of Linear Equations (substitution) Solving a System of Linear Equations (Elimination Method) Consistent and Inconsistent Systems Independent and Dependent Systems Solving and Graphing a Linear Inequalities with Two Variables Solving a System of Linear Inequalities

**Union County Educational Services Commission
High School Course Syllabus**

Title: Geometry

Timeline: Full Year; 5 Credits

Course Description:

This course is designed to emphasize the study of the properties and applications of common geometric figures in two and three dimensions. It includes the study of transformations in a coordinate plane and congruence in terms of rigid motions. Students make geometric constructions to assist in the comprehension of geometric concepts. These concepts are also applied to modeling situations. Similarity, special right triangles, right triangles, trigonometric ratios, circles, volume, and surface area of solids are also covered. Inductive and deductive thinking skills are used in problem solving situations, and applications to the real world are stressed. Students will also be introduced to the basics of writing proofs to solve (prove) properties algebra and geometric figures.

Scope and Sequence:

- I. Geometric Constructions
- II. Geometric Reasoning
- III. Lines Parallel/Perpendicular
- IV. Triangle Basics
- V. Triangle Congruence
- VI. Triangle Properties and Attributes
- VII. Transformational Geometry
- VIII. Properties of Polygons and Quadrilaterals
- IX. Two Dimensional Measurements
- X. Three Dimensional Measurements
- XI. Similarity

Refer to attached curriculum map for a detailed outline of course objectives.

High School Course Syllabus**

Title: Algebra II

Timeline: Full Year; 5 Credits

Course Description:

Students taking Algebra 2 will continue to build upon skills learned in Algebra 1. They will review solving linear equations both algebraically and graphically. Students will solve systems of equations and inequalities using different methods. Students working in Algebra 2 will work with functions and relations, demonstrating how they can create them and apply them to real world situations. Students will be exposed to matrices, and basic arithmetic operations associated with them. This course will also work with more advanced topics working with quadratics and polynomials.

Scope and Sequence:

- I. Linear Functions
- II. Linear Systems
- III. Laws of Exponents
- IV. Polynomials
- V. Factoring
- VI. Quadratic Functions
- VII. Rational Functions
- VIII. Exponential and Logarithmic Functions
- IX. Polynomial Functions
- X. Matrices
- XI. Complex Numbers

Refer to the attached curriculum map for a detailed outline of course objectives.

Unit	Unit 1 Length of Unit	Unit 2 3 Weeks	Unit 3 4 Weeks	Unit 4 4 Weeks	Unit 5 3 Weeks	Unit 6 3 Weeks
Topics	Linear Functions	Linear Systems	Laws of Exponents	Polynomials	Factoring	Quadratic Functions
Standards for Mathematical Content	A-CED.A.2 - Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales. A-REI.B.3 - Solve linear equations and inequalities in one variable, including equations with coefficients represented by letters.	A-CED.A.3 - Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or nonviable options in a modeling context. For example, represent inequalities describing nutritional and cost constraints on combinations of different foods.	N-RN.A.1 - Explain how the definition of rational exponents follows from extending the properties of integer exponents to those values, allowing for a notation for radicals in terms of rational exponents. For example, we define $5^{1/3}$ to be the cube root of 5 because we want $(5^{1/3})^3 = 5(1/3) 3$ to hold, so $(5^{1/3}) 3$ must equal 5.	A-SSE.A.1 - Interpret expressions that represent a quantity in terms of its context.	A-SSE.A.1 - Interpret expressions that represent a quantity in terms of its context.	F-IF.B.4 - For a function that models a relationship between two quantities, interpret key features of graphs and tables in terms of the quantities, and sketch graphs showing key features given a verbal description of the relationship. Key features include: intercepts; intervals where the function is increasing, decreasing, positive, or negative; relative maximums and minimums; symmetries; end behavior; and periodicity.
				a. Interpret parts of an expression, such as terms, factors, and coefficients. b. Interpret complicated expressions by viewing one or more of their parts as a single entity. For example, interpret $P(1+r)^n$ as the product of P and a factor not depending on P	A-SSE.A.2 - Use the structure of an expression to show intercepts,	F-IF.C.7 - Graph functions expressed symbolically and show key features of the graph, by hand in simple cases and using technology for more complicated cases. a. Graph linear and quadratic functions and show intercepts,

	<p>simple cases and using technology for more complicated cases.</p> <p>a. Graph linear and quadratic functions and show intercepts, maxima, and minima.</p> <p>b. Graph square root, cube root, and piecewise-defined functions, including step functions and absolute value functions.</p> <p>c. Graph polynomial functions, identifying zeros when suitable factorizations are available, and showing end behavior.</p> <p>d. (+) Graph rational functions, identifying zeros and asymptotes when suitable factorizations are available.</p>	<p>F-IF.C.7 - Solve equations involving quadratic functions graphically.</p> <p>F-IF.C.8 - Write a function defined by an expression in different but equivalent forms to reveal and explain different properties of the function.</p> <p>F-IF.C.9 - Write a function defined by an expression in different but equivalent forms to reveal and explain different properties of the function.</p>
	<p>g(x); find the solutions approximately, e.g., using technology to graph the functions, make tables of values, or find successive approximations. Include cases where $f(x)$ and/or $g(x)$ are linear, polynomial, rational, absolute value, exponential, and logarithmic functions.</p>	<p>A-APR.A.1 - Understand that polynomials form a system analogous to the integers, namely, they are closed under the operations of addition, subtraction, and multiplication; add, subtract, and multiply polynomials.</p>

are available, and showing end behavior.

e. Graph exponential and logarithmic functions, showing intercepts and end behavior, and trigonometric functions, showing period, midline, and amplitude.

<p>graph, and interpret these in terms of a context.</p> <p>A-REI.B.4 - Solve quadratic equations in one variable.</p> <p>a. Use the method of completing the square to transform any quadratic equation in x into an equation of the form $(x - p)^2 = q$ that has the same solutions.</p> <p>Derive the quadratic formula from this form.</p> <p>b. Solve quadratic equations by inspection (e.g., for $x^2 = 49$), taking square roots, completing the square, the quadratic formula and factoring, as appropriate to the initial form of the equation.</p> <p>Recognize when the quadratic formula gives</p>

High School Course Syllabus**

Title: Trigonometry

Timeline: Full Year; 5 Credits

Course Description:

Trigonometry will develop the students' mathematical concepts, improve logical thinking, and help to promote success. The laws of sines and cosines will be studied and applied to real life situations. Students will study relations, functions, trigonometric graphs and their properties and transformations using angular and radian measures. There is an emphasis on solving trigonometric equations and proving trigonometric identities. Students will use graphing calculators in activities that are appropriate to the topics being studied.

Scope and Sequence:

- I. Trigonometry with Right Triangles
- II. Trigonometry with General Triangles
- III. Circles: Sine, Cosine, and Tangent
- IV. Graphs of Trigonometric Functions
- V. Trigonometric Equations and Identities

Curriculum Alignment:

Title: Probability and Statistics

Timeline: Full Year; 5 Credits

Course Description:

This course introduces students to the methods used in the field of applied statistics using mathematical models. Emphasis is given to concepts and techniques for collecting, analyzing, representing data, drawing conclusions, and making predictions. The major focus of this course is to provide students with experience in measures of location and dispersion, correlation, and regression. Students will use multiple representations to present data including written descriptions, numerical statistics, formulas, and graphs. Students will work with independent and dependent events, random variables, conditional probability, binomial and geometric distributions.

Scope and Sequence:

- I. Introduction to Statistics
- II. Analyzing Categorical Data
- III. Displaying, Comparing, and Summarizing Quantitative Data
- IV. Modeling Data Distributions
- V. Exploring Bivariate Numerical Data
- VI. Study Design
- VII. Probability
- VIII. Counting, Permutations, and Combinations
- IX. Random Variables
- X. Sampling Distributions
- XI. One-Sample Confidence Intervals and z and t Significance Tests
- XII. Two-Sample Inference for the Difference Between Groups
- XIII. Inference for Categorical Data
- XIV. Advanced Regression

Title: Consumer Math

Timeline: Full Year; 5 Credits

Course Description:

Students taking Consumer Math will get experience in financial literacy. They will use basic mathematics skills in order to solve everyday problems. Students will experience ‘real-world’ applications involving mathematics such as: investments, income, expenses, taxes ad needs vs wants. They will also work throughout the year completing various projects such as creating a monthly budget based on an income, balancing a checkbook and how to read and write checks. Students will be able to connect concepts learned in class with outside scenarios, preparing them to be successful and responsible consumers.

Scope and Sequence:

- I. Earning Income
- II. Basic Purchases
- III. Checking and Savings Accounts
- IV. Credit
- V. Transportation
- VI. Taxes
- VII. Budgets
- VIII. Investments

Title: Math Strategies

Timeline: Full Year; 5 Credits

Course Description:

This course explores the basic operations of arithmetic, subtraction, multiplication, and division. Students will be introduced to math vocabulary and symbols. Other areas covered will include rounding, estimation, decimals and fractions, numerical ordering, percentages, ratios, proportions, rational and irrational numbers, and the reading, writing, and verbalizing of various numbers. Students will gain a better understanding of numbers and how to use them in practical applications such as measurement and money.

Scope and Sequence:

- I. Number sense and numeration (exponents, place values, comparing and ordering numbers)
- II. Addition and Subtraction: whole numbers and decimals including practical applications to money
- III. Multiplication and Division: whole numbers and decimals including practical application to money
- IV. Variables, expressions, equations and adding like terms
- V. Number Theory
- VI. Fractions: adding and subtracting
- VII. Fractions: multiplication and division
- VIII. Geometry and Measurement: exploring the basic figures, classifying triangles, circumference, perimeter, and area
- IX. Ratio, proportions and application to money
- X. Percent and application to money
- XI. Proportions and percent and application to money

Science

**Union County Educational Services Commission
High School Course Syllabus**

Title: Environmental Science

Timeline: Full Year; 5 Credits

Course Description:

The Big Bang Theory; weather; climate change - all heady subjects, all integral to our study of humanity's place in the universe. Environmental science students will explore the Earth's place in the universe and human interaction. Further, they will study the impact on Earth through a unique combination of multimedia and hands-on activities designed to put students' experiences into perspective with regards to the long history of everything around them. By the end of the course, students will have practical knowledge of such varied topics as planetary motion and earthquakes.

Scope and Sequence:

- I. Big Bang Theory
- II. Star Life Cycle
- III. Planets
- IV. Moon Phases and Tides
- V. Plate Tectonics
- VI. Earthquakes
- VII. Volcanoes
- VIII. Rock Cycle
- IX. Weather Patterns
- X. Layers of the Atmosphere
- XI. Carbon Cycle
- XII. Water Cycle
- XIII. The Climate
- XIV. Natural Resources

Refer to the attached curriculum map for a detailed outline of course objectives.

High School Course Syllabus**

Title: Biology

Timeline: Full Year; 5 Credits

Course Description:

Biology is the study of life. What is it? How do you stay alive? Students will learn what it takes to truly be alive through a unique blending of field and lab studies. Young scientists will implement interactive notebooks and digital portfolios to document their observations, predictions, and revelations. Graduates will have practical lab experience and digital dissection training upon the completion of this course.

Scope and Sequence:

- I. From Molecules to Organisms: Structures and Processes
- II. Heredity: Inheritance and Variation of Traits
- III. Biological Evolution: Unity and Diversity
- IV. Ecosystems: Interactions, Energy, and Dynamics

Refer to the attached curriculum map for a detailed outline of course objectives.

Curriculum Alignment:

New Jersey Student Learning Standards/Next Generation Science Standards - Life Sciences

Grading Procedures:

Do Now	10%
Participation	20%
Class Assignments	50%
Assessments	20%

Adoption Date:

Union County Educational Services Commission
Curriculum Mapping Format: Biology

Unit	Unit 1	Unit 2	Unit 3	Unit 4
Length of Unit	10 Weeks	10 Weeks	10 Weeks	10 Weeks
Topic	From Molecules to Organisms: Structures and Processes	Heredity: Inheritance and Variation of Traits	Biological Evolution: Unity and Diversity	Ecosystems: Interactions, Energy, and Dynamics
Standards	<p>HS-LS1-1 - Construct an explanation based on evidence for how the structure of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.</p> <p>HS-LS1-2 - Develop and use a model to illustrate the hierarchical organization of interacting systems that provide specific functions within multicellular organisms.</p> <p>HS-LS1-3 - Plan and conduct an investigation to provide evidence that feedback mechanisms maintain homeostasis.</p> <p>HS-LS1-4 - Use a model to illustrate the role of cellular division (mitosis) and differentiation in producing and maintaining complex organisms.</p> <p>HS-LS1-5 - Use a model to illustrate how photosynthesis transforms light energy into stored chemical energy.</p>	<p>HS-LS3-1 - Ask questions to clarify relationships about the role of DNA and chromosomes in coding the instructions for characteristic traits passed from parents to offspring.</p> <p>HS-LS3-2 - Make and defend a claim based on evidence that inheritable genetic variations may result from (1) new genetic combinations through meiosis, (2) viable errors occurring during replication, and/or (3) mutations caused by environmental factors.</p> <p>HS-LS3-3 - Apply concepts of statistics and probability to explain the variation and distribution of expressed traits in a population.</p>	<p>HS-LS4-1 - Communicate scientific information that common ancestry and biological evolution are supported by multiple lines of empirical evidence.</p> <p>HS-LS4-2 - Construct an explanation based on evidence that the process of evolution primarily results from four factors: (1) the potential for a species to increase in number, (2) the heritable genetic variation of individuals in a species due to mutation and sexual reproduction, (3) competition for limited resources, and (4) the proliferation of those organisms that are better able to survive and reproduce in the environment.</p> <p>HS-LS4-3 - Apply concepts of statistics and probability to support explanations that organisms with an advantageous heritable trait tend to increase in proportion to organisms lacking this trait.</p> <p>HS-LS4-4 - Construct an explanation based on evidence for how natural selection leads to adaptation of populations.</p> <p>HS-LS4-5 - Evaluate the evidence supporting claims that changes in environmental conditions may result in</p>	<p>HS-LS2-1 - Use mathematical and/or computational representations to support explanations of factors that affect carrying capacity of ecosystems at different scales.</p> <p>HS-LS2-2 - Use mathematical representations to support and revise explanations based on evidence about factors affecting biodiversity and populations in ecosystems of different scales.</p> <p>HS-LS2-3 - Construct and revise an explanation based on evidence for the cycling of matter and flow of energy in aerobic and anaerobic conditions.</p> <p>HS-LS2-4 - Use mathematical representations to support claims for the cycling of matter and flow of energy among organisms in an ecosystem.</p> <p>HS-LS2-5 - Develop a model to illustrate the role of photosynthesis and cellular respiration in the cycling of carbon among the biosphere, atmosphere, hydrosphere, and</p>

<p>HS-LS1-6 - Construct and revise an explanation based on evidence for how carbon, hydrogen, and oxygen from sugar molecules may combine with other elements to form amino acids and/or other large carbon-based molecules.</p> <p>HS-LS1-7 - Use a model to illustrate that cellular respiration is a chemical process whereby the bonds of food molecules and oxygen molecules are broken and the bonds in new compounds are formed resulting in a net transfer of energy.</p>	<p>(1) increases in the number of individuals of some species, (2) the emergence of new species over time, and (3) the extinction of other species.</p> <p>HS-LS4-6 - Create or revise a simulation to test a solution to mitigate adverse impacts of human activity on biodiversity.</p>	<p>HS-LS2-6 - Evaluate the claims, evidence, and reasoning that the complex interactions in ecosystems maintain relatively consistent numbers and types of organisms in stable conditions, but changing conditions may result in a new ecosystem.</p> <p>HS-LS2-7 - Design, evaluate, and refine a solution for reducing the impacts of human activities on the environment and biodiversity.</p> <p>HS-LS2-8 - Evaluate evidence for the role of group behavior on individual and species' chances to survive and reproduce.</p>

Title: Chemistry

Timeline: Full Year; 5 Credits

Course Description:

This class focuses on the subatomic level and how interactions within this realm produce global change. The students will learn what matter is composed of and its interactions with everything we see, feel, and hear. By delving into the invisible world of chemistry, students will get a glimpse backstage into the wondrous universe. From nuclear energy to periodic table trends, this course will provide an enriching educational experience for all.

Scope and Sequence:

- I. Atomic Theory and Structure
- II. The Periodic Table
- III. Nuclear Chemistry
- IV. Bonding and Chemical Formulae
- V. Biochemistry and Chemistry in Society

Refer to the attached curriculum map for a detailed outline of course objectives.

Curriculum Alignment:

Title: Forensics

Timeline: Full Year; 5 Credits

Course Description:

How do you catch a criminal? That is the question that this guiding and scientifically rigorous class attempts to answer. Through new-age techniques and historical precedents, the topic of legality and CSI merge into this cause-and-effect course of intrigue and deceit. From fingerprinting to DNA analysis, students will get a front row seat into the inner workings of our criminal justice system. Moreover, they will learn how the guilty get convicted and the innocent get exonerated in the United States.

Scope and Sequence:

- I. Investigation & Evidence Hair, Fiber, DNA, Fingerprints
- II. Death Manner Mechanism Cause / Forensic Anthropology
- III. Forensic Psychology

Refer to the attached curriculum map for a detailed outline of course objectives.

Title: Marine Biology

Timeline: Full Year; 5 Credits

Course Description:

This course is designed for students with an interest in marine biology and oceanography and will provide excellent background for further study of the oceans and the organisms that inhabit it. Major concepts include the study of: the interrelationship of marine and terrestrial environments, the geology of the oceans, marine organisms, and the ecology of coral reefs. Students will learn about the physical structure and chemistry of the ocean, the diversity of ocean life, marine ecology, and the scope and impact of human interactions with the oceans. Laboratory activities reinforce concepts and principles presented. Laboratory activities, including the examination of marine specimens are utilized throughout this course to build upon student knowledge.

Scope and Sequence:

- I. Ocean Environment
- II. Marine Organisms
- III. Marine Ecosystems
- IV. Humans and the Seas

Refer to the attached curriculum map for a detailed outline of course objectives.

High School Course Syllabus**

Title: World History

Timeline: Full Year; 5 Credits

Course Description:

World History traces the development of civilization from the Neolithic Revolution to the Age of Industrialization. This course includes the study of past civilizations and their influences on modern societies. The purpose of World History is to develop a greater understanding of how geography along with cultural institutions and beliefs shape the evolution of human societies.

Scope and Sequence:

- I. Geography
- II. Ancient/Classical Civilization
- III. Emergence of the First Global Age
- IV. Age of Revolutions
- V. World Wars
- VI. The Modern World

Refer to the attached curriculum map for a detailed outline of course objectives.

Title: United States History I

Timeline: Full Year; 5 Credits

Course Description:

This course studies the United States from the Age of Exploration through the Civil War. US History I course looks at the very first settlements in America, and the dramatic development of the New World. The course introduces the themes of balance between unity and diversity, the shaping of democracy, the search for opportunity, and the influence of geographical factors through the topics of slavery, revolution, and inalienable human rights.

Scope and Sequence:

- I. Pre-America
- II. Birth of a Nation
- III. The American Civil War and Reconstruction
- IV. Civil Rights Movement

Refer to the attached curriculum map for a detailed outline of course objectives.

Curriculum Alignment:

Unit	Unit 1	Unit 2	Unit 3	Unit 4
Length of Unit	10 Weeks	10 Weeks	10 Weeks	10 Weeks
Topics	Pre-America	Birth of a Nation	The American Civil War and Reconstruction	Civil Rights Movement
Essential Question(s)	What are the costs and benefits of exploration and colonization?	What inspires change? What is rights do all humans deserve?	Who defines a nation's values and priorities?	What is required for change to occur?
Big Idea ¹	A Clash of Cultures causes political, social, economic, and geographic change.	The creation of a system of government is based upon the political, social, economic, and geographic values of its creators.	As regions evolve differently, political, social, economic, and geographic conflicts erupt.	Changes in the rights and experiences of the African American Community have been evolving since the Pre-America Era and are based on the political, social, economic, and geographic state of the country instead of human rights.
Standards	<p>6.1.12.A.1.a - Explain how British North American colonies adapted the British governance structure to fit their ideas of individual rights, economic growth, and participatory government.</p> <p>6.1.12.A.1.b - Analyze how gender, property ownership, religion, and legal status affected political rights.</p> <p>6.1.12.B.1.a - Explain how geographic variations (e.g., climate, soil conditions, and other natural resources) impacted economic development in the New World.</p> <p>6.1.12.C.1.a - Explain how economic ideas and the practices of mercantilism and capitalism</p>	<p>6.1.12.A.2.b - Compare and contrast state constitutions, including New Jersey's 1776 constitution, with the United States Constitution, and determine their impact on the development of American constitutional government.</p> <p>6.1.12.A.2.c - Compare and contrast the arguments of Federalists and Anti-Federalists during the ratification debates, and assess their continuing relevance.</p> <p>6.1.12.A.2.d - Explain how cultural conflicts and complicated</p>	<p>6.1.12.A.3.h - Examine multiple perspectives on slavery and evaluate the claims used to justify the arguments.</p> <p>6.1.12.A.3.i - Examine the origins of the antislavery movement and the impact of particular events, such as the Amistad decision, on the movement.</p> <p>6.1.12.D.3.a - Determine how expansion created opportunities for some and hardships for others by considering multiple perspectives.</p> <p>6.1.12.D.3.b - Explain how immigration intensified ethnic and cultural conflicts and complicated</p>	<p>6.1.12.D.4.d - Relate conflicting political, economic, social, and sectional perspectives on Reconstruction to the resistance of some Southern individuals and states.</p> <p>6.1.12.D.5.d - Relate varying immigrants' experiences to gender, race, ethnicity, or occupation.</p> <p>6.1.12.A.6.c - Relate the creation of African American advocacy organizations (i.e., the National Association for the Advancement of Colored People) to United States Supreme Court decisions (i.e., <i>Plessy v. Ferguson</i>) and state</p>

¹ Every unit will focus on the political, social, economic and geographic causes and effects of the topics studied.

	<p>conflicted during this time period.</p> <p>6.1.12.C.1.b - Determine the extent to which natural resources, labor systems (i.e., the use of indentured servants, African slaves, and immigrant labor), and entrepreneurship contributed to economic development in the American colonies.</p> <p>6.1.12.D.1.a - Assess the impact of the interactions and conflicts between native groups and North American settlers.</p>	<p>Judicial review made the Supreme Court an influential branch of government, and assess the continuing impact of the Supreme Court today.</p> <p>6.1.12.A.2.e - Examine the emergence of early political parties and their views on centralized government and foreign affairs, and compare these positions with those of today's political parties.</p> <p>6.1.12.B.2.b - Evaluate the effectiveness of the Northwest Ordinance in resolving disputes over Western lands and the expansion of slavery.</p>	<p>the forging of a national identity.</p> <p>6.1.12.D.3.c - Assess how states' rights (i.e., Nullification) and sectional interests influenced party politics and shaped national policies (i.e., the Missouri Compromise and the Compromise of 1850).</p> <p>6.1.12.A.4.a - Analyze the ways in which prevailing attitudes, socioeconomic factors, and government actions (i.e., the Fugitive Slave Act and Dred Scott Decision) in the North and South (i.e., Secession) led to the Civil War.</p> <p>6.1.12.A.4.b - Analyze how ideas found in key documents (i.e., the Declaration of Independence, the Seneca Falls Declaration of Sentiments and Resolutions, the Emancipation Proclamation, and the Gettysburg Address) contributed to demanding equality for all.</p> <p>6.1.12.D.2.a - Analyze contributions and perspectives of African Americans, Native Americans, and women during the American Revolution.</p> <p>6.1.12.D.2.b - Explain why American ideals put forth in the Constitution (i.e., due process, rule of law, and individual rights) have been denied to different groups of people throughout time.</p>	<p>and local governmental policies.</p> <p>6.1.12.D.8.b - Assess the impact of artists, writers, and musicians of the 1920s, including the Harlem Renaissance, on American culture and values.</p> <p>6.1.12.A.13.b - Analyze the effectiveness of national legislation, policies, and Supreme Court decisions (i.e., the Civil Rights Act, the Voting Rights Act, the Equal Rights Amendment, Title VII, Title IX, Affirmative Action, Brown v. Board of Education, and Roe v. Wade) in promoting civil liberties and equal opportunities.</p> <p>6.1.12.B.13.a - Determine the factors that led to migration from American cities to suburbs in the 1950s and 1960s, and describe how this movement impacted cities.</p> <p>6.1.12.C.13.a - Explain how individuals and organizations used economic measures (e.g., the Montgomery Bus Boycott, sit downs, etc.) as weapons in the struggle for civil and human rights.</p> <p>6.1.12.D.13.a - Determine the impetus for the Civil Rights Movement, and explain why national governmental actions were needed to ensure civil rights for African Americans.</p> <p>6.1.12.D.13.b - Compare and contrast the leadership and</p>
--	--	---	--	--

	<p>impact of African American leaders and institutions in shaping free Black communities in the North.</p> <p>6.1.12.A.3.a - Assess the influence of Manifest Destiny on foreign policy during different time periods in American history.</p> <p>6.1.12.A.3.b - Determine the extent to which America's foreign policy (i.e., Tripoli pirates, the Louisiana Purchase, the War of 1812, the Monroe Doctrine, the War with Mexico, and Native American removal) was influenced by perceived national interest.</p> <p>6.1.12.A.3.e - Judge the fairness of government treaties, policies, and actions that resulted in Native American migration and removal.</p>	<p>contrast the immediate and long-term effects of the Civil War on the economies of the North and South.</p> <p>6.1.12.D.4.a - Compare and contrast the roles of African Americans who lived in Union and Confederate states during the Civil War.</p> <p>6.1.12.D.4.c - Analyze the debate about how to reunite the country, and determine the extent to which enacted Reconstruction policies achieved their goals.</p> <p>6.1.12.D.4.d - Relate conflicting political, economic, social, and sectional perspectives on Reconstruction to the resistance of some Southern individuals and states.</p> <p>6.1.12.D.4.e - Analyze the impact of the Civil War and the 14th Amendment on the development of the country and on the relationship between the national and state governments.</p>	<p>ideology of Martin Luther King, Jr., and Malcolm X during the Civil Rights Movement, and evaluate their legacies.</p>

Title: United States History II

Timeline: Full Year; 5 Credits

Course Description:

United States History II traces how the U.S. became a modern nation and explores the challenges of modernization and America's place in the world today. Students will examine the impact of global conflicts on the United States in World Wars I & II and the Cold War as well as the human struggle for rights and equality through the Great Immigration at the turn of the 20th century, the impact of manufacturing, the creation of unions, the rise of the women's and civil rights movements. An in-depth investigation of historical events and periods, the fostering of multicultural awareness, the recognition of ethical, civic, and democratic values present in American history, and the development of a historical perspective in relation to contemporary events represent the major aspects of the course.

Scope and Sequence:

- I. Industrial Revolution and the Progressive Era
- II. Early 1900s
- III. The World at War
- IV. Contemporary US History

Refer to the attached curriculum map for a detailed outline of course objectives.

Unit	Unit 1	Unit 2	Unit 3	Unit 4
Length of Unit	10 Weeks	10 Weeks	10 Weeks	10 Weeks
Topics	Industrial Revolution and The Progressive Era	Early 1900s	The World at War	Contemporary US History
Essential Question(s)	How does technology impact society and socio-economics?	How does power impact political, social, economic, and geographic change?	What rights do all humans deserve? Do we have an obligation to humanity beyond our borders?	Does might make right? Who are the winners and losers in globalization?
Big Idea ¹	The Impact of Industrialization on Society	Understanding Human Ambition	Conflicting Ideologies Effect the Human Experience	Globalization
Standards	<p>6.1.12.A.5.a - Assess the impact of governmental efforts to regulate industrial and financial systems in order to provide economic stability.</p> <p>6.1.12.A.5.b - Analyze the effectiveness of governmental policies and of actions by groups and individuals to address discrimination against new immigrants, Native Americans, and African Americans.</p> <p>6.1.12.B.5.b - Assess the impact of rapid urbanization on the environment and on the quality of life in cities.</p> <p>6.1.12.C.5.a - Analyze the economic practices of</p>	<p>6.1.12.D.6.c - Analyze the successes and failures of efforts to expand women's rights, including the work of important leaders (i.e., Elizabeth Cady Stanton, Susan B. Anthony, Alice Paul, and Lucy Stone) and the eventual ratification of the 19th Amendment.</p> <p>6.1.12.A.7.a - Analyze the reasons for the policy of neutrality regarding World War I, and explain why the United States eventually entered the war.</p> <p>6.1.12.A.7.b - Evaluate the impact of government policies designed to promote patriotism and to protect national security during times of war on individual rights (i.e., the Espionage Act and the Sedition Amendment).</p>	<p>6.1.12.A.11.a - Evaluate the effectiveness of international agreements following World War I (e.g., League of Nations, Treaty of Versailles, Washington Naval Conference, Kellogg-Briand Pact) in preventing international disputes.</p> <p>6.1.12.A.11.b - Compare and contrast different perspectives about how the United States should respond to aggressive policies and actions taken by other nations at this time.</p> <p>6.1.12.A.11.c - Determine if American policies regarding Japanese internment and actions against other minority groups were a denial of civil rights.</p> <p>6.1.12.A.11.d - Analyze the decision to use the atomic bomb and the consequences of doing so.</p> <p>6.1.12.A.11.e - Assess the responses of the United States and other nations to the violation of human rights that occurred during the Holocaust and</p>	<p>6.1.12.A.12.a - Analyze ideological differences and other factors that contributed to the Cold War and to United States involvement in conflicts intended to contain communism, including the Korean War, the Cuban Missile Crisis, and the Vietnam War.</p> <p>6.1.12.A.12.b - Examine constitutional issues involving war powers, as they relate to United States military intervention in the Korean War, the Vietnam War, and other conflicts.</p> <p>6.1.12.A.12.c - Explain how the Arab-Israeli conflict influenced American foreign policy.</p> <p>6.1.12.D.12.a - Analyze the impact of American governmental policies on independence movements in Africa, Asia, the Caribbean, and the Middle East.</p> <p>6.1.12.D.12.b - Analyze efforts to eliminate communism, such as McCarthyism, and their impact on individual civil liberties.</p>

¹ Every unit will focus on the political, social, economic and geographic causes and effects of the topics studied.

	<p>corporations and monopolies regarding the production and marketing of goods, and determine the positive or negative impact of these practices on individuals and the nation and the need for government regulations.</p> <p>6.1.12.C.5.b - Compare and contrast economic development of the North, South, and West in the post-Civil War period.</p> <p>6.1.12.D.5.b - Evaluate how events led to the creation of labor and agricultural organizations that protect the rights of workers.</p> <p>6.1.12.D.5.d - Relate varying immigrants' experiences to gender, race, ethnicity, or occupation.</p> <p>6.1.12.A.6.a - Evaluate the effectiveness of Progressive reforms in preventing unfair business practices and political corruption and in promoting social justice.</p> <p>6.1.12.A.6.c - Relate the creation of African American advocacy organizations (i.e., the National Association for the Advancement of</p>	<p>other genocides.</p> <p>6.1.12.D.11.d - Compare the varying perspectives of victims, survivors, bystanders, rescuers, and perpetrators during the Holocaust.</p> <p>6.1.12.C.7.b - Assess the immediate and long-term impact of women and African Americans entering the work force in large numbers during World War I.</p> <p>6.1.12.A.8.a - Relate government policies to the prosperity of the country during the 1920s, and determine the impact of these policies on business and the consumer.</p> <p>6.1.12.D.8.a - Explain why the Great Migration led to heightened racial tensions, restrictive laws, a rise in repressive organizations, and an increase in violence.</p> <p>6.1.12.D.8.b - Assess the impact of artists, writers, and musicians of the 1920s, including the Harlem Renaissance, on American culture and values.</p> <p>6.1.12.A.9.a - Analyze how the actions and policies of the United States government contributed to the Great Depression.</p> <p>6.1.12.B.9.a - Determine how agricultural practices, overproduction, and the Dust Bowl intensified the worsening economic situation during the</p>	<p>6.1.12.D.12.c - Evaluate how the development of nuclear weapons by industrialized countries and developing countries affected international relations.</p> <p>6.1.12.D.12.d - Compare and contrast American public support of the government and military during the Vietnam War with that of other conflicts.</p> <p>6.1.12.D.12.e - Explain how World War II and the Holocaust led to the creation of international organizations (i.e., the United Nations) to protect human rights, and describe the subsequent impact of these organizations.</p> <p>6.1.12.A.13.b - Analyze the effectiveness of national legislation, policies, and Supreme Court decisions (i.e., the Civil Rights Act, the Voting Rights Act, the Equal Rights Amendment, Title VII, Title IX, Affirmative Action, Brown v. Board of Education, and Roe v. Wade) in promoting civil liberties and equal opportunities.</p> <p>6.1.12.D.15.a - Compare United Nations policies and goals (i.e., the International Declaration of Human Rights and the United Nations Millennium Development Goals) intended to promote human rights and prevent the violation of human rights with actions taken by the United States.</p> <p>6.1.12.D.15.b - Compare the perspectives of other nations and the United States regarding United States foreign policy.</p>
--	---	--	--

<p>Colored People) to United States Supreme Court decisions (i.e., Plessy v. Ferguson) and state and local governmental policies.</p> <p>6.1.12.C.6.a - Evaluate the effectiveness of labor and agricultural organizations in improving economic opportunities for various groups.</p> <p>6.1.12.D.9.a - Explore the global context of the Great Depression and the reasons for the worldwide economic collapse.</p> <p>6.1.12.D.9.b - Analyze the impact of the Great Depression on the American family, migratory groups, and ethnic and racial minorities.</p> <p>6.1.12.A.10.a - Evaluate the arguments regarding the role of the federal government during the New Deal era.</p> <p>6.1.12.A.10.b - Assess the effectiveness of governmental policies enacted during the New Deal period (i.e., the FDIC, NLRB, and Social Security) in protecting the welfare of individuals.</p>	<p>6.1.12.D.15.c - Explain how and why religious tensions and historic differences in the Middle East have led to international conflicts, and analyze the effectiveness of United States policy and actions in bringing peaceful resolutions to the region.</p> <p>6.1.12.D.15.d - Analyze the reasons for terrorism and the impact that terrorism has had on individuals and government policies, and assess the effectiveness of actions taken by the United States and other nations to prevent terrorism.</p>

Title: Sociology

Timeline: Full Year; 5 Credits

Course Description:

This course will introduce students to the study of humankind's most important creation-- the social group. Sociology is based on the concept that everything that we, as humans, do is either directly or indirectly influenced by the society in which we live. In this course, students will examine the various skills and techniques that sociologists employ when studying groups of people. Students will then examine a wide variety of groups and the behaviors that characterize them.

Scope and Sequence:

- I. The Sociological Perspective
- II. Socialization and Social Change
- III. Social Structure
- IV. Social Stratification
- V. Sociology of Poverty and Politics

Refer to the attached curriculum map for a detailed outline of course objectives.

Curriculum Alignment:

NJ Student Learning Standards - Social Studies

Title: 20th Century Civil Liberties

Timeline: Full Year; 5 Credits

Course Description:

This course is designed to be an in-depth study of social injustice, including slavery, genocide, and present-day racism. Students will be examining the immediate and enduring consequences of genocide and hatred, especially how they continue to impact the world we live in today. The course will culminate with a participatory action-research project where students assume a proactive role as citizens in their own communities.

Scope and Sequence:

- I. The Environment
- II. Life Under the Jim Crow South/ Life Under Nazi Germany
- III. Women's Rights Movement/ Civil Rights
- IV. Law and Order
- V. Hate Groups
- VI. Modern Day (American) Social Issues

Refer to the attached curriculum map for a detailed outline of course objectives.

High School Course Syllabus

Title: 20th Century History

Timeline: Full Year; 5 Credits

Course Description:

Students in Modern World History study the major turning points that shaped the modern world, from the Renaissance through the present, including the cause and course of the World Wars I & II. They trace the rise of democratic ideas and develop an understanding of the historical roots of current world issues, especially as they pertain to international relations. They extrapolate from the American experience that democratic ideals are often achieved at a high price, remain vulnerable, and are not practiced everywhere in the world.

Scope and Sequence:

- I. Renaissance and Reformation
- II. Age of Exploration
- III. Industrialization and Nationalism
- IV. Imperialism (Asia, Africa, India, Latin America)
- V. WWI & Russian Revolution
- VI. Rise of dictatorships (Nazism and Fascism) & WWII
- VII. Cold War and Postwar Changes
- VIII. Globalization and Current World Issues

Refer to the attached curriculum map for a detailed outline of course objectives.

Curriculum Alignment:

NJ Student Learning Standards - Social Studies

Spanish

**Union County Educational Services Commission
High School Course Syllabus**

Title: Spanish I

Timeline: Full Year; 5 Credits

Course Description:

Spanish I will teach students to communicate in present tense, simple future and simple past tenses in order to express basic needs, opinions and form questions in a real life situation. By the end of the course, students will have a solid understanding that language and culture are intertwined and that communication is not only speech, but also understanding the products of another culture, which in turn will help them understand their own selves as well. At this level, the primary emphasis is on developing listening and speaking skills in Spanish. Students talk about everyday situations using simple questions and short answers at the phrase or sentence level. Cultural awareness of the world where Spanish is spoken is an integral component of the course. Lastly, students will understand that successful communication is knowing how, when and why to convey a message to different audiences.

Course Outline:

- I. Personal Identity
- II. La vida escolar
- III. La Familia y las celebraciones
- IV. La Familia y la comida
- V. La comida y el restaurante
- VI. La salud y las actividades

Refer to the attached curriculum map for a detailed outline of course objectives.

High School Course Syllabus**

Title: Spanish II

Timeline: Full Year; 5 Credits

Course Description:

The second year expands the basic listening, speaking, reading and writing skills so that students can begin to create with the language. Students feel more at ease with simple conversations and brief written descriptions on familiar topics. Students also gain a deeper appreciation of, and sensitivity to, diverse cultures and customs of Latin America and Spain. Students will see that (a) Language reflects and is influenced by the culture in which it is found, (b) Cultural perspectives are gained by using the language and through experience with its products and practices, and that (c) Strategies for communication must go beyond vocabulary acquisition and that circumlocution is just as important as word retention in terms of making meaning.

Course Outline:

- I. Personal Identity
- II. La vida escolar
- III. La Familia y las celebraciones
- IV. La Familia y la comida
- V. La comida y el restaurante
- VI. La salud y las actividades

Refer to the attached curriculum map for a detailed outline of course objectives.

High School Course Syllabus**

Title: Spanish III

Timeline: Full Year; 5 Credits

Course Description:

During the third year of study, students begin to feel comfortable communicating in the language. As more complex language patterns are introduced, students become increasingly able to describe, narrate, and state opinions on familiar situations and cultural themes. To maintain whatever level of proficiency students have acquired over the course of their lingual education, students must develop habits that offer them opportunities to use the language in different settings (ie. writing to a pen pal, visiting a Latino market, traveling aboard, watch/listen to Spanish programming...etc.). Students will be aware that members of one culture may make assumptions about other cultures based on their own attitudes, values and beliefs. Lastly, students will discover strategies needed to communicate in linguistically and culturally appropriate ways.

Course Outline:

- I. Personal Identity
- II. La vida escolar
- III. La Familia y las celebraciones
- IV. La Familia y la comida
- V. La comida y el restaurante
- VI. La salud y las actividades

Visual Art

**Union County Educational Services Commission
High School Course Syllabus**

Title: Drawing and Painting I

Timeline: Full Year; 5 Credits

Course Description:

This course will encourage authentic creative expression in the form of two dimensional artwork through the use and experimentation of art mediums inspired by personal themes. Students will make connections through art history and understanding how artists translate themes into tangible and symbolic pieces of art. Students will utilize art criticism as a way of understanding the themes and techniques used in art and will use it to support and explain their own art making journey.

Scope and Sequence:

- I. Why do we create art? Function and Feeling
- II. Intro to Drawing- Contour
- III. Intro to Shading and Creating Three Dimensional Objects
- IV. Intro to Color Theory
- V. Intro to Painting and Techniques
- VI. Acrylic Painting
- VII. Intro to Sculpture - Building and Casting in Plaster

Refer to the attached curriculum map for a detailed outline of course objectives.

Curriculum Alignment:

NJ Student Learning Standards - Visual and Performing Arts

Grading Procedures:

Do Now	10%
Participation	20%
Class Assignments	50%
Assessments	20%

Adoption Date:

Title: Drawing and Painting II

Timeline: Full Year; 5 Credits

Course Description:

In Drawing and Painting II, students will continue to use problem solving skills and critical thinking in order to design projects and understand connections to art history and the present. They will gain a deeper understanding of the purpose of art and the artist's place in the world around him. Students will focus on design as it pertains to both aestheticism and function and will understand real life applications of art and techniques in society.

Scope and Sequence:

- I. Intro to Art (Art Criticism and Aesthetics vs Function)
- II. Drawing - Contour (Realism vs Abstract)
- III. Drawing - Shading/ Still Life
- IV. Color Drawing - Symbolism in Art Utilizing Color
- V. Color Theory (Painting)
- VI. Painting and Techniques
- VII. Acrylic Painting (Styles, Techniques in Still Life and Portraiture)
- VIII. Sculpture and Three Dimensional Design in Plaster

Refer to the attached curriculum map for a detailed outline of course objectives.
