

Junior Arts and Crafts

The purpose of these extra classes is to allow students to develop their gross motor skills more efficiently, and hence help students express their creativity more openly. There is no doubt that arts and crafts are fun activities for kids. Be it coloring with crayons or making miniature statues from clay, folding paper to create fine origami or designing a handmade birthday card, there are several arts and crafts activities, which can enhance the interest of the children and exploit their artistic potential. By introducing arts and crafts to the kids and involving them in such activities in schools, you will invest in building their cognitive, physical, and social development.

This club will place an emphasis on group activities to help students develop important skills in collaboration. Arts and crafts initiate, develops, and encourage:

- Development of fine motor skills
- Dexterity
- Self-expression
- Socializing
- Boosting of confidence
- Creativity
- Memory and visual learning

The club is open to students in Prek3-1. The maximum number of students is 10.
