

Infographics

Seeking a different form of expression for your students to produce and present information for your class?

Sick of the same old PowerPoint or poster?

Have you tried Infographics?

“An infographic (information graphic) is a representation of information in a graphic format designed to make the data easily understandable at a glance. People use infographics to quickly communicate a message, to simplify the presentation of large amounts of data, to see data patterns and relationships, and to monitor changes in variables over time.

Infographics abound in almost any public environment -- traffic signs, subway maps, tag clouds, musical scores and weather charts are just a few examples, among a huge number of possibilities.” ~ Whatis.com

There are a variety of free websites to have students choose from to guide them through their process. Here are three we recommend:

- CANVA <https://www.canva.com/create/infographics/>
- PIKTOCHART <https://piktochart.com/>
- VENNGAGE <https://venngage.com/>

Read this to get more explanation and ideas. Interesting and Helpful
