

How to Check for Updates on your Chromebook

Your Chromebook automatically checks for and downloads updates when connected to Wi-Fi or Ethernet. Most updates should load when you restart your Chromebook, but once in a while, you may need to check for updates.

Here's How:

1. Click on the settings tray in the bottom-right corner of the screen.
2. Enter the settings using the gear icon.
3. Click on **About Chrome OS** on the bottom of the left column.
4. Select the **Check for updates** option.
5. Once the update finishes downloading, click **Restart**.
