Baldy View ROP "Made in Ontario" Video Released!

The city of Ontario releases a new video each month through its "Made in Ontario" video series showcasing various businesses and organizations within the city. This September, Ontario featured Baldy View ROP in the series and provided a great look at what we offer to our students and the community!

Filming took place at the Career Training Center and features an organizational overview provided by Superintendent Shelley Adams, Ed.D., who shared during the video, "Building the local economic profile is an extremely important part of the ROP system. Part of the work we do is really geared towards what does the local economic profile need."

Video footage also showcased the various courses taught at the campus such as Registered Dental Assistant, Emergency Medical Responder, Pharmacy Clerk, and more!

We are so excited about the video and thank the City of Ontario as well as Windsong Productions for doing such a great job! Watch the video online now at: www.youtube.com/CityofOntario

Partner Profile: Ontario Chamber of Commerce

The Ontario Chamber of Commerce office lobby

The Ontario Chamber of Commerce was founded in 1910 with a mission to promote and develop the economic prosperity and quality of life of the Ontario business community through leadership, education, advocacy, relationship development, and innovation. The Chamber is a voluntary, not-for-profit business organization dedicated to improving the economic environment of the community.

The Ontario Chamber of Commerce focuses on economic development, legislative advocacy, and membership services. The strength of the Chamber lies in its membership, small businesses, large corporations, home-based businesses, and professional men and women working together to enhance the quality of life in Ontario. The Ontario Chamber works to positively impact the quality of life in the region while supporting the growth and prosperity of our members through a wide variety of programs and initiatives. Together with talented leaders in business, community, and government, the Chamber volunteers and professional staff work to make this community a better place. From education to economic development, the Ontario Chamber of Commerce is committed to giving each member the opportunity to prosper in today's competitive business world.

Today, the Chamber represents over 380 businesses and 80,000 employees. From small businesses to fortune 500 companies, the Chamber takes great pride in advocating for each entity. The Ontario Chamber of Commerce's footprint extends from the eastern boundaries of the Inland Empire to the western edges of the San Gabriel Valley. Its unique form of connecting and building relationships in the region has resulted in a diverse and strong business community. The majority of focus is in the Greater Ontario region through promoting and supporting small businesses. Ontario is the economic hub of the Inland Empire and its Chamber of Commerce is the connecting voice to the industry sectors that are driving the local economy.

As a member of the Baldy View ROP Institutional Advisory Board, Ontario Chamber of Commerce CEO Peggi Hazlett is able to provide clear and relevant information based upon the needs of businesses in the region. Workforce development is targeted in sectors including manufacturing, logistics and distribution, construction, and healthcare. Each of these industry sectors need skilled and trained employees. The Chamber is supportive of Baldy View ROP as it knows the organization is geared towards developing the workforce to meet growing employment demands. Thank you, Peggi Hazlett, for sharing this story!

Ontario Chamber of Commerce CEO Peggi Hazlett being honored for her years of service to the Baldy View ROP Institutional Advisory

SPOTLIGHT ON THE STUDENTS

Sports Medicine

The Sports Medicine course has long been a popular choice for BVROP students throughout our partnering school districts, and for the first time is now being offered at Upland High School. The course lays the foundation for students interested in sports medicine and its related fields of study such as physical therapy and kinesiology. The course also provides students with hands-on training in injury prevention and treatment.

Upland High School seniors Jacqueline Velazquez and Erin Renda prepare rolls of bandages in preparation for football practice

management as it takes place within the games,” Instructor Morin shared.

Students taking the course this semester have diverse career goals and interests. Upland High School junior Taygan Kennedy, who comes from a family full of nurses and doctors, wants to pursue a career in healthcare but is not sure in what capacity yet. She is also taking the BVROP Healthcare Occupations course at Upland High School.

“Both of my ROP courses give me hands-on experience and an idea about what my future may hold. It’s a good opportunity for kids who have an interest in something to explore what that job might be like for them,” she said.

Upland High School sophomore, George Estranga, has the goal of eventually working for the FBI. He sees his Sports Medicine course as being a good first step.

“We learn the anatomy of the human body, such as identifying different bones, learning how different joints function, and how to repair them. It’s knowledge that could help me understand things like autopsies and information taken from crime scenes down the road,” he said, adding that the BVROP Crime Scene Investigation course also at Upland High School will be “the next ROP course I take.”

For its first semester, Sports Medicine is off to a great start and we are happy to be able to provide this versatile and emerging course of study at Upland High School!

Sports Medicine is taught at Upland High School as an embedded course during the school day and also features an after-school lab component that gets students involved with Upland High School varsity football and varsity volleyball games. Students rotate through home games as they job-shadow student trainers to gain a field and court-level look at live sports and the potential injuries that can take place within competition.

Instructor Jimmy Morin also works at Upland High School as an athletic trainer and will be working with his students during all of the games they attend.

“Being close to the action gives the students a great perspective on how we as athletic trainers see the game. Through the job-shadowing they do, they are able to observe game set-ups and injury

Upland High School sophomore Alyssa Reyes stretches a student athlete’s quadriceps muscles prior to his team practice

New Baldy View ROP Course

The new Baldy View ROP Computer Programming and Informatics course taught at Claremont High School immerses students in the crucial programming language, C++, by teaching them how to create their own computer games. Instructor Brent Gilson started the students off in their programming education by teaching them how to use Scratch, a type of coding software that allows them to learn the mechanics of writing computer code through a graphically enriched and easy-to-follow way.

"C++ is one of the most common languages used in game development and software engineering. It is also very common for college students majoring in computer science and related subjects to work with this language," Instructor Gilson explained. "The students begin with Scratch because it is easier to use than C++ and gets them used to what coding looks like and how it works. They'll use it at first but then will move on to using only C++ for the rest of the semester."

Students began the course by using Scratch for the first few weeks and analyzing the functions of various games. Students then used Scratch to create replicas of games that already exist, such as the retro classic Pac Man, or to borrow elements from pre-existing games to create their own.

Claremont High School senior Thomas Aguirre shared that he is interested in studying either game design or artificial intelligence in college, and feels that the course is preparing him for either field.

"I think it's really important to be exposed to a career that you're interested in and ROP courses are a really good way to do that," Thomas said. "I love how every task in this course is like a mini puzzle. The entire class period involves lots of problem solving and is a great way to learn coding in a structured and formal way. I had some experience with coding a little on my own, but not like this."

Claremont High School junior John Horgan echoed a similar line of thought in terms of being able to take the course and learn more advanced aspects of a subject he has already explored outside of school.

"I've done lots of self-teaching so I was really happy to be able to have this option in school. I wanted to finally take my first steps towards a career in coding and this is the first time I've had any proper teaching in the subject," John said.

When asked about the most important lessons he's learned so far, John shared, "I like to tell stories through games and I also want to be able to create software that will impact people in their daily lives. This course is teaching me more efficient ways to code, like the ways that you can store data in variable places so you can reference it again later and not have to keep retyping it. It's been a great course so far and something I'd recommend to anyone."

Claremont High School students utilize Scratch software to design their first computer games

A screenshot taken from a game being developed by Claremont High School senior Thomas Aguirre

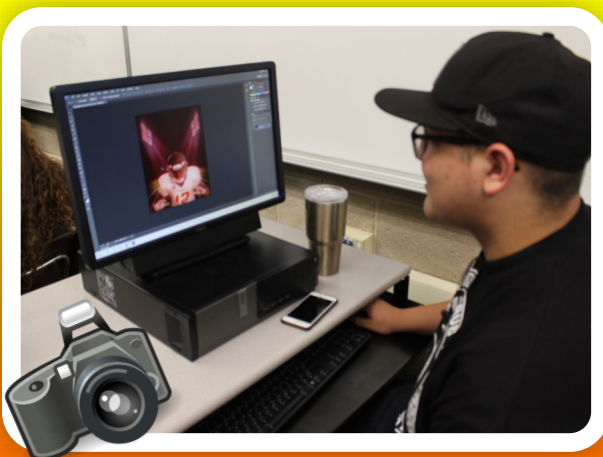

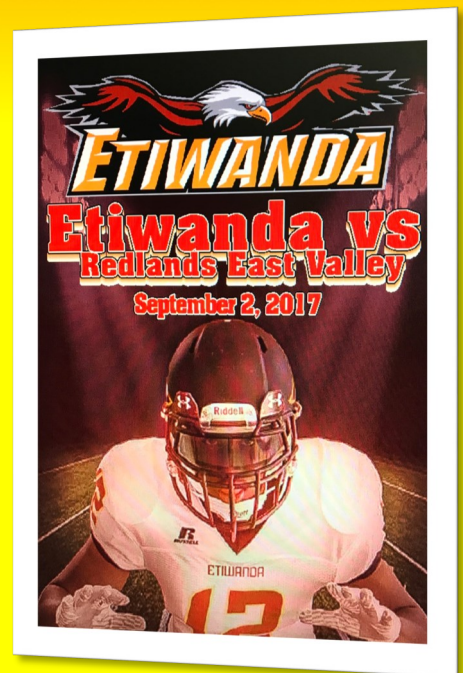

SPOTLIGHT ON THE STUDENTS

Commercial Photography

Students taking the Baldy View ROP Commercial Photography course at Etiwanda High School this year are gaining valuable professional experience as they have been getting involved with their school's varsity football program. Throughout the season, students' work is being featured as the cover art for home game programs. By having their work featured, students are gaining first hand experience in producing work specific to a client's needs while also developing their own professional portfolios.

Instructor Derrick Williams emphasizes students' ability to use cameras the same way professional photographers do. Instead of relying on automatic settings to take pictures, his students are only allowed to shoot in manual settings, forcing them to make camera adjustments based on factors such as light and motion on their own. In addition, students become well-versed in working with the highly-used photo editing software, Adobe Photoshop, a standard program not only in the photography business but also in marketing and communications departments across many various industries.

Etiwanda High School senior Nick Garcia had his work featured for a pre-season home game program on September 2nd, and says taking the course has already influenced his future career.

Nick Garcia edits his program cover artwork using Adobe Photoshop software

"My parents own a bridal company in Fontana, which I've been working at for most of my life and will operate when I'm older. Thanks to this class, I'm going to be able to expand our photography component, which is something we've really never had before," he shared.

Regarding the selection of his artwork for a football game program, Nick said that he was proud, as were his parents regarding the news.

"I was surprised to hear it, but excited. Everything I know in photography is because of Mr. Williams. He really opened up the world of photography to me."

ALUMNI AT WORK

Kaya Flores applies field-side medical support to a Don Lugo athlete during football practice

Don Lugo High School senior Kaya Flores is putting the training she received in her Baldy View ROP Sports Medicine course to quick use. Kaya took the course with Instructor Kim Hansen at Don Lugo High School last school year as a junior and was enrolled in both the embedded course as well as the after-school lab section. She passed her articulation exams in the subject, allowing her to earn college credit, and is currently working as a student athletic trainer with Ms. Hansen at her high school as well.

"Taking the ROP Sports Medicine course was a huge advantage for me because I get to practice on the field what I learned in class," Kaya shared.

Kaya credits the course with preparing her for employment. As part of the curriculum, Kaya learned about the protocol involved in various aspects of treating injuries and how to administer first aid treatment. She says she initially enrolled in the course out of an interest in the subject matter, but learned much more than she expected she would.

"I was interested in learning about the recovery process from sports-related injuries. I took the class expecting to just learn about the subject, but I also gained training to get a job in this field," she said. "The lessons you can learn through this ROP course are essential if you are trying to obtain a job."

Kaya's current responsibilities as a student trainer are to assist Ms. Hansen, who also serves as an athletic trainer for Don Lugo High School, in working with student athletes and addressing basic injuries and providing treatment not only for injuries but also to help prevent them from taking place. Kaya wants to continue her education in sports medicine and is planning on majoring in kinesiology in college so she can continue to work professionally as an athletic trainer.

Employers!

CTE Incentive Grant Flash

A newly modernized and renovated medical skills lab will be up and running in October at the Baldy View ROP Career Training Center. The lab is updated with a variety of state-of-the-art medical equipment to be utilized by students taking Health Science and

Medical Technology courses including Medical Assistant, Sports Medicine, Healthcare Occupations, Licensed Vocational Nursing, and more!

The lab's renovations are made possible through the funds awarded to Baldy View ROP and our partnering districts, Chaffey Joint Union High School District, Chino Valley, Claremont, and Upland Unified School Districts, through the state-funded CTE Incentive Grant (CTEIG).

The lab features various sections designed to emulate settings found within the healthcare industry. These include hospital exam rooms, doctors' offices, and trainers' stations. Newly purchased equipment includes hospital beds, life-size training mannequins, sports medicine training tables, visual aids and anatomical models, ultrasound equipment, and an electronic medicine dispensing unit!

New hospital beds recreate the experience for students learning about hospital bedside manners and patient care

Students work in a realistic hospital simulation lab with advanced mannequins that emulate patient functions

Students work within the lab-simulated patient examination rooms

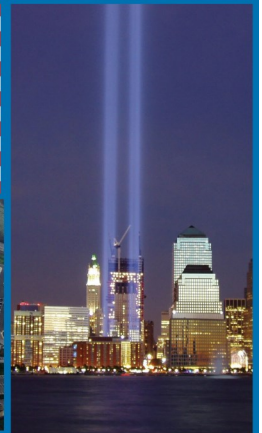

Students utilize training tables used in sports medicine and by physical therapists

Our hearts and thoughts are with Las Vegas and all of the victims and their families as we mourn the tragic and senseless events that took place on Sunday, October 1st.

September 11th - Day of Remembrance

Thank you to all our men and women of service as we pay tribute to those that lost their lives on 9/11/2001.

EAT FOR CHANGE

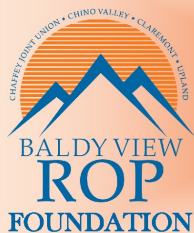

Make dinner a selfless act by joining us for a fundraiser to support Baldy View ROP students!

Chipotle at 11334 4th Street, Ste. 101 in Rancho Cucamonga (Across the street from the Ontario Mills Mall) on Wednesday, November 8th between 4:00pm and 9:00pm.

Bring this flyer, show it on your smart phone, or tell the cashier you're supporting the cause! 50% of the proceeds from your order will be donated to Baldy View ROP Foundation to support student scholarships!

If placing an order online during your fundraiser, please note you must choose the pay in-store option and inform our cashier of your participation before paying. Gift card purchases during fundraisers do not count towards total donated sales, but purchases made with an existing gift card will count.

ATTENTION SENIORS AND ADULT STUDENTS!
SCHOLARSHIPS AVAILABLE!

**DUE
FEBRUARY 1,
2018**

Pursuing post-secondary education after high school? Apply for a Baldy View ROP Foundation Scholarship to help you pay for your continued education!

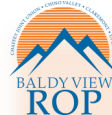

All seniors who have completed an ROP course at any time in high school are eligible to apply!

Complete applications at www.baldyviewrop.com/foundation

Scholarships Awarded on Monday, April 9th, 2018 at the Student Success Awards! For additional information, contact Baldy View ROP Foundation at bvropfoundation@bvrop.org

Carol Creaser of ATI leads an orientation with BVROP LVN students to teach them how to use the program

LVN Program Introduces NCLEX Test Prep System

Baldy View ROP is introducing a new e-learning system to help further prepare our nursing students for the National Council Licensure Exam (NCLEX). BVROP's Licensed Vocational Nursing program is top-ranked by Practical Nursing based upon the NCLEX pass rates among its students, which are historically higher than both the state and national averages.

The new e-learning system offered through Assessment Technology Institute (ATI) enables students to take tests and review learning outcomes throughout their LVN course so they can consistently assess their progress and target areas of the exam where they may need to improve their scores. The program also allows instructors the opportunity to augment curriculum and revamp course topics as they address students' testing outcomes. Special thanks to LVN Program Director, Dr. Sally Mahmoud, for sharing this story!

Staff News and Notes

Baldy View ROP in the Community

Baldy View ROP staff have attended and participated in many various events within the community this fall in efforts to educate our stakeholders about the opportunities available with Baldy View ROP. On Tuesday, September 26th, we presented at the Chino Teen Center to a group of afterschool students about the various ROP courses available for them to take. On Saturday, September 30th, we attended the Expanding Horizons College and Career Conference for Youth for foster and homeless youth hosted by the San Bernardino County Superintendent of Schools (SBCSS). Thank you to both the Chino Teen Center and to the SBCSS for inviting us to these events!

Marketing and Recruitment Adviser Andi Johnston at the Expanding Horizons College and Career Conference

Director of Business Development/Public Relations Dora Edney with educators and manufacturing professionals at the Manufacturing in Education Conference

BVROP Attends the

Manufacturing in Education Conference

Baldy View ROP Director of Business Development/Public Relations Dora Edney attended the Manufacturing in Education Conference at the Mission Inn in Riverside on Friday, September 22nd. The conference was hosted by the Manufacturers' Council of the Inland Empire and focused on ideas and solutions for developing programs for careers in advanced manufacturing. The conference was informative and beneficial as we continue to research and gather information on manufacturing and related industries within the Inland Empire and southern California. We are developing our Automated Supply Chain Pathway for students to prepare them for this versatile and high-paying industry that is continuing to see employment growth and success in our region. We will be introducing courses in this pathway at Claremont High School and the Career Training Center beginning Fall 2019.

BVROP Presents at the

Latino Youth Empowerment Conference

Baldy View ROP participated in the Latino Youth Empowerment Conference as hosted by the Latino Peace Officers Association, Inland Empire Chapter, on Saturday, September 23rd at Chaffey College. Marketing and Public Relations Specialist Sean Pravica hosted a table in the morning during the event and later participated as a speaker during the conference's breakout session. Sean presented an overview of the organization and discussed the various courses available to high school and adult students as well as the various opportunities and benefits our courses provide. He also showed the newly-released City of Ontario "Made in Ontario" feature on Baldy View ROP. Thank you, Latino Peace Officers Association, Inland Empire Chapter, for having us at your conference!

Marketing and Public Relations Specialist Sean Pravica with members of the Latino Peace Officers Association, Inland Empire Chapter, and fellow conference speakers from Job Corps.

Thank you to all Career Technicians and high school staff that invited us to your campuses this fall to talk with your students about Baldy View ROP courses! We appreciate your support and look forward to continuing to teach all of our great students from each of your schools!

Staff News and Notes

Welcome to Baldy View ROP!

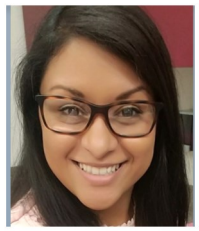

Steve Hall

Instructor - Firefighting Technology

Steve is Baldy View ROP's new Firefighting Technology Instructor. Steve spent 33 years serving with the Montclair Fire Department as a firefighter, EMT, engineer, hazardous materials specialist, and acting captain. He retired in 2011 and began

teaching fire technology and emergency medical responders courses at Chaffey College. Steve looks forward to providing his students at BVROP with technical and hands-on training in a course that is equivalent to a Fire Technology 1 college class. He says that "to be able to pass on knowledge to the next generation of firefighters is a privilege." When he's not teaching, Steve's main hobby is historical reenacting. He participated in many of the events of the 150th anniversary of the Civil War including Gettysburg, where his direct ancestors served in the 20th Maine Volunteer Regiment in the Union Army. Steve shares that many of his family members have worked in education and that his daughter currently works as a STEM teacher in Sacramento. Welcome, Steve!

Andi Johnston

Marketing and Recruitment Adviser

Andi comes to Baldy View ROP as the Marketing and Recruitment Adviser, a new position that will focus on marketing Baldy View ROP adult programs and adult programs within the Adult Education Consortium to include: Chaffey College,

Chaffey, Chino Valley, Fontana, and Upland Adult Schools. Andi earned her Bachelor's degree in Cinema and Broadcast Arts from Azusa Pacific University and her Master of Arts in Strategic Public Relations from USC. Her extensive marketing background includes projects with Wendy's International, Disney/ABC Television Group, and 15 years with In-N-Out Burger. After having worked her way up from the store level at In-N-Out, Andi last served the company as a marketing coordinator where she worked with media requests, donation allocations, marketing materials, and logo use approval. She looks forward to growing interest and enrollment in the adult program while building lasting relationships with students, staff, and organizational partners. She also hopes to one day earn her doctorate degree. In her spare time, Andi keeps busy by spending time with her four young boys. She loves to take them camping with her husband, Kevin. Although madly in love now, Andi admits she did not like Kevin when she first met him in the fourth grade playing soccer, a sport she continues to play to this day. Welcome, Andi!

Jeanette Juarez

Instructor - Retail Marketing

Jeanette has been teaching the Retail Marketing course at Buena Vista High School as a substitute instructor and now officially joins Baldy View ROP as a permanent employee. Jeanette brings over 10 years of experience and has served as a manager of

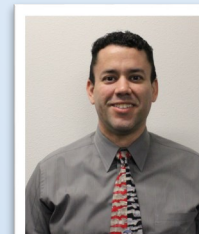

two restaurants, a trucking company, and an administrative director for a private school. Jeanette currently consults small businesses with developing innovative marketing strategies and in learning how to best utilize social media. Jeanette is excited to continue to draw on this experience with her students as she prepares them for entry level work in retail. Jeanette is passionate about inspiring the new generation of students and workers and is excited to motivate her students to pursue their interests, including through additional ROP courses. She says, "Once their interest is sparked their possibilities become endless." As a Chino High School grad, she loves the feeling of being able to give back to her community and empower its youth. Jeanette loves spending her free time with her husband of 10 years and three young sons enjoying life and always seeking new adventures. Welcome, Jeanette!

Tracy Ornelas

Test Proctor

Tracy Ornelas joins Baldy View ROP as our first Test Proctor. In this new position for the organization, Tracy will administer Pearson VUE tests at the BVROP Career Training Center. She received her Bachelor's degree in psychology from CSU San Bernardino and is currently pursuing her Master's degree in Counseling Psychology. Her professional background includes over 10 years of test administration experience as well as employment services counseling. Tracy is eager to meet her new coworkers at BVROP and increase her knowledge about Pearson VUE testing and its policies. In her spare time, Tracy enjoys spending time with her daughter, watching movies, listening to music, and going out to eat and trying new foods. She is also getting ready to join a new fitness boot camp program that she is excited about experiencing. In the future, Tracy would also like to have her own therapy practice once she graduates her Master's program and earns her MFT/LPCC license to practice. Welcome, Tracy!

Dr. Scott Walker

Program Specialist - Curriculum Development

Scott comes to Baldy View ROP as our new Program Specialist - Curriculum Development. Scott earned both his Bachelor's and Master's degrees in Biochemistry from UC Riverside and his Doctorate in Pathobiology from USC. He also completed his credential education studies at CSU Long Beach. As Program Specialist with Baldy View ROP, Scott will be responsible for developing curriculum and ensuring that ROP courses taught throughout Baldy View ROP and our partnering school districts are compliant with state and federal curricular guidelines. He is looking forward to being able to provide excellent support not only to our staff and instructors as they prepare our students for career and college, but to all of our stakeholders. He is especially enthusiastic about helping to ensure students achieve their goals in the classroom. Outside of work, Scott enjoys spending time outdoors and likes to fly planes and helicopters, scuba dive, and take long motorcycle rides along the coast on sunny days. Welcome, Scott!
