

PARTICIPATING DISTRICT QUOTAS

Quotas are the number of student seats assigned to each participating district for each class session for that semester based on the class maximum size and is invoked on the first day of class only if enrollment in the class is over its established maximum. Each high school is granted two seats in each class.

1. Two of each high school's allotted seats can be used for priority enrollment, which is pre-designation of the students for these seats. These pre-designated students must attend on the first day of class to maintain their registration.
2. If the enrollment is within the established maximum on the first day of class, the quota has no effect.
3. If the class is over the established maximum on the first day of class, the quota system will be invoked.
4. There are exceptions in the classes for Cosmetology and Certified Nursing Assistant. For those programs, quotas will be one allotted seat per high school instead of two.
