

CAREER TECHNICAL EDUCATION

The Baldy View ROP Commission shall:

1. Support the relationship of working with the high schools, community colleges, adult schools, and private schools in the area to develop and implement career technical education opportunities that will provide, supplement and/or broaden, on an as-needed basis, the scope of currently available career preparation opportunities in the area.
2. Maintain a progressive program of career technical education training opportunities currently available in the community.
3. Provide youth and adults with career guidance services aimed at successful completion of a career technical education program and placement in gainful employment.
4. Maintain an effective communication system that will inform potential students of the career opportunities available through the ROP.
5. Maintain a program that will complement and articulate curriculum in the process of providing career technical education.
