GRADUATING SENIORS: POWERWASHING YOUR CHROMEBOOK

When you graduate from Cumberland Regional High School, you get to keep your school-issued Chromebook. The Chromebooks assigned to the graduating class are deactivated over the summer. When logging in with your school email no longer works, it is time to Powerwash the device and set it up as a personal Chromebook for you to keep. Here's how:

1. Sign out of your Chromebook.
2. Press and hold Ctrl + Alt + Shift + r.
3. Select Restart.
4. In the box that appears, select Powerwash and then Continue.

Once it's done Powerwashing:

Follow the steps that appear and sign in with your own personal Google or GMail account.

Note: *The account you sign in with after you reset your Chromebook will be the new owner account. Cumberland Regional will no longer have access to the device and cannot offer support of any kind for graduates following the last day of school.*

Once you've reset your Chromebook, follow the onscreen instructions to set up your new personal Chromebook.

IMPORTANT:

If your Chromebook is still connected to Cumberland Regional High School's system, Powerwashing will only delete your data. You will not be able to set it up as a personal device.

AGAIN: you will NOT be able to Powerwash a Chromebook for personal use until it is released by the tech team.

This occurs for graduating seniors over the summer following commencement. There is no set date, as some seniors keep their school email address for college communications. Just be aware that once your school email no longer signs you into your Chromebook, it is time to Powerwash the device and set it up as a personal Chromebook.
