

SHASTA COUNTY OFFICE OF EDUCATION

LCFF Budget Overview for Parents

Local Educational Agency (LEA) Name: Shasta County Office of Education

CDS Code: 45104540000000

School Year: 2023-24

LEA contact information:

Carie Webb

Executive Director, Student Programs

cwebb@shastacoe.org

(530) 225-0377

School districts receive funding from different sources: state funds under the Local Control Funding Formula (LCFF), other state funds, local funds, and federal funds. LCFF funds include a base level of funding for all LEAs and extra funding - called "supplemental and concentration" grants - to LEAs based on the enrollment of high needs students (foster youth, English learners, and low-income students).

Budget Overview for the 2023-24 School Year

Projected Revenue by Fund Source

This chart shows the total general purpose revenue Shasta County Office of Education expects to receive in the coming year from all sources.

The text description for the above chart is as follows: The total revenue projected for Shasta County Office of Education is \$46,624,364, of which \$15,936,626 is Local Control Funding Formula (LCFF), \$13,321,579 is other state funds, \$13,413,469 is local funds, and \$3,952,690 is federal funds. Of the \$15,936,626 in LCFF Funds, \$258,203 is generated based on the enrollment of high needs students (foster youth, English learner, and low-income students).

LCFF Budget Overview for Parents

The LCFF gives school districts more flexibility in deciding how to use state funds. In exchange, school districts must work with parents, educators, students, and the community to develop a Local Control and Accountability Plan (LCAP) that shows how they will use these funds to serve students.

This chart provides a quick summary of how much Shasta County Office of Education plans to spend for 2023-24. It shows how much of the total is tied to planned actions and services in the LCAP.

The text description of the above chart is as follows: Shasta County Office of Education plans to spend \$43,873,299 for the 2023-24 school year. Of that amount, \$1,019,330 is tied to actions/services in the LCAP and \$42,853,969 is not included in the LCAP. The budgeted expenditures that are not included in the LCAP will be used for the following:

The LCAP describes services to students in county-operated programs, expelled pupils, and foster youth. The county office has many restricted grants to provide services to students and districts in the county such as after-school programs, geographic leads to provide differentiated assistance to districts, special education, and other professional development services. Grant funds and related expenditures are not included in the LCAP. Additionally, base services such as staffing for transportation, information technology, business, and human resources are not included as well as the related operating costs. Services and outcome data for students with special needs are described in school district LCAPs.

Increased or Improved Services for High Needs Students in the LCAP for the 2023-24 School Year

In 2023-24, Shasta County Office of Education is projecting it will receive \$258,203 based on the enrollment of foster youth, English learner, and low-income students. Shasta County Office of Education must describe how it intends to increase or improve services for high needs students in the LCAP. Shasta County Office of Education plans to spend \$258,563 towards meeting this requirement, as described in the LCAP.

LCFF Budget Overview for Parents

Update on Increased or Improved Services for High Needs Students in 2022-23

This chart compares what Shasta County Office of Education budgeted last year in the LCAP for actions and services that contribute to increasing or improving services for high needs students with what Shasta County Office of Education estimates it has spent on actions and services that contribute to increasing or improving services for high needs students in the current year.

The text description of the above chart is as follows: In 2022-23, Shasta County Office of Education's LCAP budgeted \$250,549 for planned actions to increase or improve services for high needs students. Shasta County Office of Education actually spent \$238,842 for actions to increase or improve services for high needs students in 2022-23.

The difference between the budgeted and actual expenditures of \$-11,707 had the following impact on Shasta County Office of Education's ability to increase or improve services for high needs students:

The small difference in budgeted expenditures compared to actual expenditures was a result of an inability to hire for permanent intervention staff. In order to ensure the needs of student continued to be met, the intervention support was provided through the use of a qualified substitute. All needs were able to be met.

SHASTA COUNTY OFFICE OF EDUCATION

Local Control and Accountability Plan

The instructions for completing the Local Control and Accountability Plan (LCAP) follow the template.

Plan Summary [2023-24]

General Information

A description of the LEA, its schools, and its students in grades transitional kindergarten–12, as applicable to the LEA.

Shasta County Office of Education serves students in grades K-12 within three different schools, including Shasta County Juvenile Court School (JCS), Shasta County Independent Study (SCIS), and Excel Academy (Excel). All three schools primarily serve students in the greater suburban area of the city of Redding. A small percentage of students live in outlying rural communities such as Shingletown and Anderson. The socio-economic status of the area is quite poor with around 80% of enrolled students qualifying for free and reduced lunch. All programs utilize county services for nurses and school psychologist.

Court school and Independent Study both qualify as Dashboard Alternative Schools (DASS). The educational status of parents is typically high school graduates with a small percentage with some level of higher education. The ethnicity is primarily white, with a small percentage of Native American and Hispanic students. Our programs often have very few English Language Learners enrolled, which is consistent with the majority of other programs/districts in the Shasta County Area.

Excel Academy is a small regional placement program serving approximately 36 students in grades K-8. This school currently is staffed with 3 teachers, 10 behavior management assistants, 1 office staff, and one administrator. Excel provides a safe and supportive environment where students develop effective academic and behavioral skills. Students are empowered to achieve their full potential through inter-agency

partnerships and collaboration with families. This regional program provides a structured setting specifically designed to address the needs of students who require an intensive program to address emotional disabilities or serious behaviors that impede their learning, all students enrolled receive IEP services. These services offered include specialized academic instruction, behavior intervention, speech, occupational therapy, education-related counseling and guidance in both individual and group settings. Students also have the support of one school counselor, a Selpa-contracted Mental Health Clinician, a psychologist, and a Behavior Intervention Case Manager. The small size allows for supervision and safety while allowing the least restrictive environment.

The Shasta County Independent Study (SCIS) serves students who seek an educational alternative to traditional seat-time-based education. The program serves students in grades 6-12, with instruction provided at two locations, 3711 Oasis Road, and at Shasta College for the purpose of facilitating concurrent enrollment for 11th and 12th-grade students. The school uses the instructional strategy of independent study with support to meet the educational needs, interests, aptitudes, and abilities of all students. Currently, there are four full-time teachers and a paraprofessional working with approximately 120 students. Students meet with their teacher for one hour two times per week at either of the two locations in Shasta County. The school's curricula are standards-based, and courses are considered equivalent to quality classroom instruction. The school's mission statement is, "To develop educated and responsible citizens." The school's vision statement is, "To offer flexible options for personalized learning to prepare students for college and career," with an emphasis on students' abilities: to be independent learners who are effective time managers, goal-oriented, and critical thinkers; effective communicators who listen for understanding and advocate for self and others; and productive citizens who are collaborative and culturally literate lifetime learners."

Juvenile Court School (JCS) is a small school located at the Shasta County Juvenile Detention Center. Students are provided instruction in the standards-based curriculum. The school consists of 3 teachers, 4 Behavior Management Assistants, a Special Education teacher, and an administrator. This program serves students aged 10 and above. Dependent upon court determinations students are placed in general, secure track or camp programming. The River's Edge Academy is in its second year of implementation. This academy was formed within the JCS facility to provide a safe, structured program alternative to out-of-county placement. This program is where youth can access individualized treatment services, cognitive-based interventions, and supports to move toward family reunification or independent living. This population has a high transiency and significant rates of adverse childhood experiences. Students receive additional support from a school counselor and those with Individualized Education Programs have access to specialized academic instruction, individual counseling, speech, occupational therapy, and Selpa-contracted mental health services. All juvenile court school programming is focused on rehabilitation, successful transition into adulthood, positive futures, and reductions in recidivism.

Due to the transient nature of student enrollments, traditional academic cohort data is not reflective of the current student body and is not always an appropriate indicator of student learning loss or progress. In addition, the highly variable student enrollment and low student numbers cause metrics to vary significantly from year to year. Therefore to provide additional indicators of growth or needs, local data and benchmarks are included along with California Assessment of Student Performance and Progress metrics, English Language Proficiency Indicator, A-G Course completion, Career Technical Education pathway completion, advanced placement examination passage, and middle school and high school dropout rates. Student progress is measured three times per year using a norm-referenced assessment (NWEA MAP) to determine if students have met specific reading, language, and math growth targets.

Reflections: Successes

A description of successes and/or progress based on a review of the California School Dashboard (Dashboard) and local data.

SUMMARY: The CA Dashboard and local data demonstrate the following successes:

- Graduation Rate increased from 75.2% to 80%
- Professional Development and Instructional Coaching delivered to all teachers
- Suspension rate remains low at 2.5%
- 10.20% of students completing One Semester, Two Quarters, or Two Trimesters of College Credit Courses
- 14.28% of Students Completing Two Semesters, Three Quarters, or Three Trimesters of College Credit Courses
- 22 SCOE JCS/SCIS School Students earned Food Handlers certification
- 23 SCOE JCS/SCIS Students earned CPR certification
- Created a team to work on the development of a new school-specific PBIS framework
- 100% of students received instruction in Hope Science with the intent to increase self-efficacy and positive school environment/belonging
- The School Counselor (JCS) provided weekly academic counseling services and transcripts review to ensure accurate credit attainment
- The School Counselor and School Psychologist (Excel) provide 2 times weekly social skill groups to support students with disabilities
- The School Counselor (SCIS) provides monthly Student Wellness Awareness (S.W.A.G.) topics (i.e. mental health, healthy relationships, vaping/cessation)
- SCOE JCS received a 6-year WASC Accreditation and SCIS had a successful mid-year WASC review
- Over 300 student visits the wellness center to access social-emotional support or academic tutoring
- Implementation of schoolwide SEL program with CASEL standards
- All 9-12 grades received grade-appropriate guidance lessons
- Kelvin Pulse Dimension: Instructional Environment
- 88.6% of all students answered positively to questions about thig teacher expectations, connections to learning outside of the classroom, and strong relationships with students (Kelvin)

Grad Rate Progress:

During the 22-23 school year, SCOE has continued to engage teachers and administrators with student data analysis to improve classroom instruction. SCOE's 2021-22 graduation rate is 80% which is a significant improvement. Shasta County Independent Study's increase in graduation rate has allowed for an exit out of comprehensive support. Student suspension rates dropped significantly because of the implementation of trauma-responsive and restorative practices in all classrooms which is a trend from previous school years. This work will continue through SART and PBIS teams and the development of a tiered intervention and positive incentive program. The

suspension/expulsion rate for SCIS and JCS is zero percent. Both Excel and JCS are piloting a new behavior management database to monitor progress and support accurate DATA collection specific to student behavior goals.

Professional Learning Progress:

Professional Learning in the areas of social-emotional learning, trauma-informed practice, and personalized learning has further contributed to increasing the capacity of teachers and school staff members to utilize effective instructional strategies. Excel is continuing its work with Heather Forbes. The Measures of Academic Progress and CAASPP data highlight the need for continued academic intervention support for students and professional learning for teachers. Plans are to continue professional development (Classroom 180, behavior 360, verbal de-escalation). A newly hired Alternative Ed curriculum support position will work with school site teams to support professional learning communities directly related to identified problems of practice that support continuous improvement.

College and Career Readiness Progress:

The SCOE College and Career coordinator and school counselor provided all students with access to college and career exploration and soft skill development activities. These activities included career-focused virtual field trips, resume-building, college visits, and guest speakers. Students interested in obtaining their Serv-Safe Food Handlers certification or CPR certification were provided with the necessary preparation to qualify for this certification. In collaboration with probation, SCOE continued to provide virtual welding instruction at River's Edge Academy serving both high school students and students who have graduated. Shasta County Independent Study has begun the implementation of a gardening program that supports students in learning the process of growing and maintaining their own food source. SCIS also opened its maker space to offer media production, 3D printing and begin entrepreneurial pathway development. To continue to grow these opportunities of College and Career Readiness, school counselors are teaming up with curriculum support to develop non-traditional pathways for certifications and work experience. Work is in progress to continue the development of dual enrollment courses.

Instructional Practices Progress:

SCOE has increased the use of instructional technology by providing each student with access to Chromebook devices. SCOE teachers are engaged with professional learning opportunities that assist them with utilizing technology in all areas of the curriculum. The use of GOOGLE suite tools, Edgenuity, and other online platforms will continue to be utilized in all classrooms. Project-Based Learning and Science, Technology, Engineering, Arts, and Math (STEAM) instruction will be introduced and integrated into the curriculum through weekly visits to the maker space. Excel is utilizing the TWIG curriculum to integrate a hands-on approach to science. Teachers will assist students with deepening their understanding of science and math through their engagement with lessons that incorporate state-of-the-art technology. The addition of a maker-space, has allowed for Independent Study students opportunities outside of the core curriculum, however we are working on scheduling and training our other two sites(Excel/REA) on the use of equipment so that we can maximize student access.

Social-Emotional Supports Progress:

SCOE has increased the number of training to support foster and homeless youth. Current educational partners and the development of new partners assisted SCOE with increasing the availability of services for students. Attendance rates have increased at both Independent Study and Excel Academy 91.54% and SCIS - 88.93%. SCIS established a wellness center where students can receive counseling support, one-on-one tutoring support, and attend monthly student wellness awareness topics. The wellness center includes a PositiviTEA bar, sensory items, and other social-emotional supports. There were over 300 student visits to the wellness center for the utilization of the tools and

supports. These services will continue to provide additional resources for students identified as English Learners, Foster Youth, Low Income, and academically challenged. SCOE provided a comprehensive and tiered approach that starts with whole-school support for academic recovery, behavior interventions, and positive messaging regarding the importance of attendance. Both Excel and SCIS have developed outside sensory and learning spaces, which have added additional safe spaces for students to receive outside education, counseling, and a proactive social environment. These spaces of sensory support and social-emotional regulation are currently in development at Juvenile Court Schools.

SCOE plans to maintain and build upon this success in the following ways:

- Continue to analyze MAP pre and post-assessment information to differentiate instruction to increase student achievement.
- Continue to analyze data from formative and summative assessments to plan instruction to support individual student outcomes.
- Infuse instructional coaching to provide teachers with content training, demonstration lessons, co-plan/co-teach opportunities, and observation/feedback to improve instruction and de-escalation practices.
- Commit to ongoing PLCs to support teachers in implementing, revising, and monitoring formative assessments
- Emphasize lesson design with student voice and choice.
- Continue to implement SART and PBIS practices that impact positive school climate, safety, and school engagement in a tiered intervention system.
- Career pathway development for non-traditional certifications and work experience

SCOE will continue to monitor Dashboard indicators, local data, and educational partner feedback to ensure the effectiveness of actions and services and analyze additional data as it becomes available.

Reflections: Identified Need

A description of any areas that need significant improvement based on a review of Dashboard and local data, including any areas of low performance and significant performance gaps among student groups on Dashboard indicators, and any steps taken to address those areas.

All Student Groups

All SCOE sites' greatest need is to increase academic achievement, specifically in Reading and Math, as demonstrated by the percentage of students scoring at Standard Not Met. In addition to this, our NWEA Map data shows decreases in academic growth significantly across grades 7-8 and 11-12. School teams are focusing on instructional practices that communicate high standards for academic achievement and areas for intervention and learning loss recovery.

CAASPP ELA and Math Percentage of students scoring at Level 1 (Standard Not Met):

All Student Groups

- CAASPP ELA: 53.25%
- CAASPP Math: 75.32%

Students w/ Disabilities:

- CAASPP ELA: 93.55%
- CAASPP Math: 90.63%

NWEA MAP Grade level performance:

Grade levels with determined negative growth outcomes:

Math Growth (as measured by RIT scale growth):

SCIS Grades:

- 7 to 8- (-) 1.2

JCS Grades:

- 8 to 9- (-) 6
- 10 to 11- (-) 6.9
- 11 to 12- (-) 4.8

Reading Growth (as measured by RIT scale growth):

SCIS Grades:

- 6 to 7- (-) 5
- 11 to 12 - (-) 0.9

Excel Grades:

- 2 to 3- (-) 9.9
- 4 to 5- (-) 15.3
- 6 to 7- (-) 21.7
- 7 to 8- (-) 10

JCS Grades:

- 11 to 12- (-) 16.5

Kevin Pulse DATA:

Dimension: Positive Affect

70% of students answered positively to the question - When I need help I find someone I can talk to?

63% of students answered positively to the question - During the past week how often did you feel hopeful?

39% of students answered positively to the question - During the past week how often have you felt worried?

Grad Rate Needs:

Academic performance in areas of math and language needs to improve, and credit deficiency is a notable concern. Intervention and/or enrichment strategies will continue to be implemented and improve student completion of work assignments through consistent monitoring for all students. The Critical areas for improvement addressed by the WASC visiting committee included: The programs will continue to build upon the success of the learning platforms currently implemented. Edgenuity, Achieve 3000, and NWEA MAP enables teachers to identify gaps in skill level so that strategic intervention can be delivered and personalized for individual students and small group instruction. Students have had opportunities to explore college options, participate in elective opportunities, Career exploration, and engage in college courses via concurrent enrollment.

To address these needs we will continue to examine transcripts, maintain our 100% FAFSA completion rate, and develop transition plans for all students, through the efforts of the administrative team, faculty, school counselor, and all support staff.

Professional Learning/Instructional Practice Needs:

Collaboration is in place to develop teacher effectiveness and monitor student progress, faculty are working to address attendance concerns and root cause analysis of student motivation and credit deficiency.

To address these needs we will continue Professional Learning teams with a focus on specific problems of practice that align to the needs assessment and goal rationale. These groups are monitored by the administration to gather data and feedback. Areas of focus include attendance, student engagement, scaffolding and differentiating instruction, and in new areas such as Canvas, Universal Lesson Design(UDL), Classroom 180, and PLC+ activators.

College and Career Readiness Needs:

A Career/Transition Specialist began work to address the Career Technical Education possibilities for our students. A focus on career exploration beyond the traditional was put in place with a variety of interest surveys and the Get Focused, Stay Focused curriculum. SCIS and REA students visited Shasta College, California State University, Chico. Strategies are in place for measuring results and gauging progress toward achievement. Collaboration is in place to develop teacher effectiveness and monitor student progress. Progress on the LCAP is reported to the board on a quarterly basis and is shared with community engagement partners via a dashboard.

To address these needs we will continue to develop and implement high-quality lessons. Increase our engagement of students in certification courses, increased student usage of Chrome Books, and teachers' increased knowledge of trauma-informed practices. The long-range action plan addresses the academic and emotional deficits of students coupled with the need for career and college readiness.

Social-Emotional Support Needs:

The administrative team implemented systems for increasing engagement this year, which included the study of data and a closer examination of the reasons students were refusing school and not completing work. A district SART Team is in development this year. This is no small task and will continue to evolve. this team added two student members and two community partners to the makeup of the team to support Native American voice, student voice, and community support.

To address these needs school site teams are administering hope assessments to students periodically throughout the year, with lessons developed to encourage the development of students' growth mindset and hope. Additional supports include administrative support, a school counselor, and all staff training in trauma-informed practices. Monitoring our Kelvin data, specifically, our student's positive affect scores, has been useful in measuring growth targets. We will continue this work in an effort to see greater increases over time.

LCAP Highlights

A brief overview of the LCAP, including any key features that should be emphasized.

Goal 1: Ensure that ALL students graduate “college and career ready” through the full implementation of a broad course of study that emphasizes Common Core State Standards(CCSS), and includes intervention supports provided by highly qualified staff. (Broad Goal)

Goal 1 Context: To support all students in achieving their projected growth targets, site administrators identified a need to enhance school-wide instructional support. This includes robust weekly professional learning to design effective, and engaging instruction for all students. Collaboration time has focused on infusing formative assessments into lesson planning, analyzing MAP data to inform instruction, and individualized coaching for all teachers. Often our students enrolled in grades 9-12 do not have access to a more traditional means of achieving college and career readiness as measured on the CA Dashboard, such as multiple options for CTE Career Pathway completion, A-G course completion, college credit courses, leadership/military science, AP exams, IB exams, or the State Seal of Bi-literacy. Therefore, this goal also focuses on increasing access to these opportunities designed specifically for the population of students served in juvenile court school and independent study. Many students enroll in our programs with gaps in their knowledge, low levels of academic confidence, or deficits in academic organization and preparedness; therefore, they require intensified support related to goal setting and progress monitoring. Students are assessed upon enrollment, and individual learning plans developed with student input to set short and long-term goals. Various data sources will continue to be analyzed regularly to identify students in need of tiered academic support.

Goal 2: Ensure that all students are actively engaged in a safe, healthy, and culturally responsive environment. (Broad Goal)

Goal 2 Context: Positive school climate, trauma-informed practices, safety, and strong interpersonal connections are all foundational elements that are necessary to keep families and students engaged in their education. Due to the adverse experiences, high mobility, and exclusionary practices that many of our students have encountered, it is necessary to develop and maintain intensified tiered systems of support to ensure they can positively engage at school. Specific local metrics are crafted based on identified needs of students in the programs.

Goal 3: Countywide, SCOE will coordinate services to ensure that services for expelled youth are provided in cooperation with local districts with the goal of decreasing expulsion and suspension and ensuring expelled students have access to appropriate programs. (Broad Goal)

Goal 3 Context: Intensive coordination and monitoring of foster youth and expelled students in Shasta County is necessary to ensure these student groups continue to progress educationally. In addition, it is critical to support these student groups with other supports that are coordinated and provided by the SCOE staff in partnership with local school districts and community providers.

Goal 4: SCOE will coordinate services for all foster youth residing in Shasta County in accordance with the education code and review the plan annually for changes.

Goal 4 Context: Foster Youth represents one of the most vulnerable and academically underperforming subgroups in Shasta County and across the state. Foster youth are regularly the lowest-performing student subgroup in nearly all indicators measuring educational outcomes including LCFF priorities and Dashboard metrics. The SCOE Foster Youth Services Coordinating Program is committed to improving educational outcomes for foster youth through the coordination and collaboration of services, that increase communication between Child Welfare agencies and LEAs, identifying needs, and working collectively in the best interest of foster students. The actions for Goal 4 will sustain the progress exemplified by the related metrics by supporting LEA liaisons through the development of systems for reporting information and by being a point of contact for districts as foster youth often attend different schools throughout their school careers. When services and support teams are able to provide coordinated efforts, less time is wasted when a student arrives at a new school.

The highlights of the SCOE 2021-24 LCAP include the following:

- Instructional Coaching Model with 1:1 coaching support for all teachers, including multiple coaching cycles that include lesson design and modeling, co-teaching, observations, and feedback
- Professional Development related to cultural proficiency and culturally responsive instruction, Universal Lesson Design, and strategies for engaging instruction
- Current technology utilizing 1:1 laptops for all students
- Academic intervention and tutoring
- Career Technical Education courses and certifications
- Administration of the MAP assessment three times per year to monitor student growth
- Individual counseling and Social Skills Groups provided by School Psychologist/Counselor
- Academic Counseling for grades 9-12
- Transition supports for students who have attended the Shasta County Court School
- Support to families and coordination of services accessed through community providers
- Continue to implement Positive Behavioral Interventions and Supports (PBIS) with fidelity, to support a positive school climate and trauma-informed practices
- Coordination of support and services for foster youth
- Coordination of support and services for students who have been expelled

Comprehensive Support and Improvement

An LEA with a school or schools eligible for comprehensive support and improvement must respond to the following prompts.

Schools Identified

A list of the schools in the LEA that are eligible for comprehensive support and improvement.

Excel Academy (Shasta County Special Education)

Support for Identified Schools

A description of how the LEA has or will support its eligible schools in developing comprehensive support and improvement plans.

Shasta County Office of Education, as the LEA, will support its eligible schools in developing CSI plans in the following ways:

Excel Academy(Shasta County Special Education) gathered educational partner input throughout the school year through meetings and surveys from staff, families, students, and community members. Excel hosted events before school started and ongoing throughout the year which were designed to gather information regarding goal assessment and needs. The needs assessment and survey compiled data and information on the strengths and weaknesses of current practices in academic instruction and student support.

Supporting the development of the School Plan for Student Achievement (SPSA): Excel Academy has access to the support SCOE provides for all districts through its professional development department where administrators can get support in analyzing assessments and developing reports to meet requirements. The school site council was shown academic data from benchmark assessments in math and reading. Low scores showed that continued support in reading is a priority. The CSI identifiers of low test scores were discussed as well as student benchmark data related to these deficiencies. Options for evidence-based intervention strategies were discussed and school site council members participated in developing a plan for improvement based on the context (funding, staffing, student needs, etc.) for the identified school and their specific area of improvement.

Identify and address Resource Inequities: The district engaged with stakeholder groups to analyze resource allocation and identify resource inequities. This process included a review of budgets, staffing, instructional materials, and resources. In the process of this stakeholder engagement to assess and determine the needs for improvement, it became evident that many students did not have a stable connection to the internet. A form survey was given to all families to describe the status of their internet connect-ability, which showed who needed what in the way of equipment and training. Therefore additional Chromebooks and hot spots were obtained in order to address this need. Parents, administrators, and faculty are increasingly aware of the lack of community resources for youth mental health.

Provide budgeting support through Business Services: Administrators meet regularly with Business Services to monitor purchases and meet expenditure reporting deadlines.

Provide feedback and plan development through regular workgroup meetings: Regular workgroup meetings are provided by SCOE which allow for collaboration and provide guidance in the development of plans; SCOE also schedules workshops such as those given by CDE which support the development and implementation of plans, administration discusses goals quarterly at all staff meetings.

Monitoring and Evaluating Effectiveness

A description of how the LEA will monitor and evaluate the plan to support student and school improvement.

Shasta County Office of Education will regularly monitor and evaluate the implementation and effectiveness of the plan through collaboration and meetings of the administrative team.

School Site Council meetings: A combined SSC (consisting of staff, parents, and community members) meets a minimum of three times per year to give input for, develop and monitor the implementation and effectiveness of the schools' CSI/SPSA plans

Regular monitoring of the budget; meetings between Administrators and budgeters: Administrators and budgeters meet regularly about the budget, and updates or significant changes are discussed at the school site council and administrative council. Administrators and teachers meet frequently to discuss needs and initiatives related to funding.

Analysis of eligibility of purchases: Business Services provides guidance for the eligibility of purchases and monitors the budget and deadlines for purchasing and submitting expenditures

Attendance and Suspension records, along with report cards and transcripts, will be reviewed quarterly to monitor progress toward student achievement, engagement, and college and career readiness. Benchmark assessment scores are available to monitor learning loss and recovery. CAASPP/Benchmark scores will monitor achievement. The address of the student is being monitored to determine who is unassigned, foster or homeless youth, so support measures can be offered. Students who are absent or tardy repeatedly will be consulted, and advised of the importance, plans for removing any roadblocks will be documented and followed up on through class advisors and behavioral specialists. The SART process has been developed and implemented.

Students will meet with guidance counselors regularly to ensure they are enrolled in computer-based classes, dual enrollment, career pathway programs, and other requirements for College and career readiness. Administrators and faculty will monitor individual progress and make recommendations for changes in schedules and for placement in upcoming semesters.

Systems and equipment have been implemented to allow distance communications when face-to-face communications are not possible. The educational partners, including staff, parents, students, and the community, have reviewed and will continue to review and analyze data. These groups will be given opportunities to offer guidance and suggestions for improvement at various times throughout the year (Opening

Plan, Learning Continuity and Attendance Plan, Back to School Night, CSI plan, Budgeting, School Plan for Student Achievement, and Local Control and Accountability Plan).

The District and School are continuing professional development in new areas such as Canvas, Universal Lesson Design(UDL), trauma-informed practices (Classroom 180), and PLC+ activators. Administrators, teachers, and support staff regularly attend trainings offered by the Shasta County Office of Education, CASBO, County Operated Student Programs, to master concepts, increase abilities, and stay abreast of all new requirements. Professional Development support is also being provided in the areas of academic instruction, social-emotional learning, and trauma-informed practices. Supplemental intervention materials are also being purchased to support academic achievement.

Engaging Educational Partners

A summary of the process used to engage educational partners and how this engagement was considered before finalizing the LCAP.

The Shasta County Office of Education is dedicated to maximizing student success. Ongoing communication among all educational partners is the key to making sure that our students are supported to the best of our ability. In addition, we are also meeting/engaging with parent advisory groups, student advisory council(s), outside community partners/groups, faculty associations, and employee groups as follows:

Parents:

- School Site Council Goals Update/Input: serves as the parent advisory committee (Met in Sept/Nov/Jan/March)
- Excel Academy conducts exit interviews for students returning to districts - (Conducted in December and June)
- Parent Teacher conferences (Oct/March)
- American Indian Advisory Committee (Oct/Feb/March)

Students:

- Climate Surveys/Forums: Kelvin Pulses 5+ times annually(Sept/Nov/Jan/March/May)
- JCS town hall meetings (Nov/Dec/Jan/Feb/March/April/May/June)
- Student Voice panels (Dec/April)
- Student members part of the Student Attendance Review Team (SART) (Feb/March/April/May/June)

Advisory Groups/Community Partners:

- Board of Education Updates/Input: (Aug/Oct/Jan/June)
- Board of Education Approval: Annually (June)
- School Site Council Goals Update/Input: (Sept/Nov/Jan/March/May)

Community Partners:

- Quarterly meetings with Probation to discuss goals, instruction, behavior, collaboration, and materials as it relates to the LCAP.
- County-wide expulsion plan committee meeting twice annually(Dec/March)
- SELPA Board meetings (Feb/April/May)
- River's Edge Steering Committee (Oct/Jan/June)
- STEP-UP Rising Scholars Initiative (Sept/Dec/May)
- Juvenile Justice Coordinating Council (Aug/Nov/June)

Certificated (Teachers) and Classified (Para/BMA/Admin Assistants):

- Monday Collaboration/PD meetings (Weekly)
- Safety Committee (Aug/Sept/Dec/May)
- Attendance Huddles (Weekly)
- SART Team Meetings (Weekly)

- EERC (Bargaining unit committee) (Sept/Oct/Nov/Dec/Jan/April)

Administrators/Principals:

- Student Programs Leadership Team: (Sept/Oct/Nov/Dec/Jan/Feb/March/April/May)
- Special Ed Director meetings (Monthly)
- Principal meetings (Monthly)

As the Shasta County Office of Education LEA has fewer than 50 English Language Learners, DELAC is not required. However, unduplicated students' parents were represented at parent meetings and in surveys. Program metrics and data included in the LCAP and used as monitoring tools have been shared with each of the groups in various forums, both formally and informally.

A summary of the feedback provided by specific educational partners.

Staff:

All staff has communicated the desire for professional development opportunities to improve their practice and content knowledge with an emphasis on teachers using Blended Learning and Technology strategies for instruction, social-emotional learning, and continued implementation of credit recovery strategies for improved graduation rates. Staff expressed a desire to target areas of need based on assessment results. Staff acknowledged that student performance on NWEA MAP could be improved with a more strategic analysis of instructional gaps.

Parents:

Parents have indicated that services such as career opportunities and mental health and behavior counseling will benefit their students. Parents have also expressed the need for further intervention in the areas of math and writing. Surveys indicate that district and school facilities are in good repair. Parents/guardians requested resources to support students transitioning to college or a career after high school. Parents/guardians were very optimistic about the increase of CTE opportunities and dual enrollment accomplishments. Survey feedback indicated high-interest levels in academic counseling for students for college preparation.

Students:

Student feedback has confirmed and validated the need expressed by administrators and other school staff for all staff to hold high expectations and the desire to develop caring relationships with them. Student input reveals a need to clarify and streamline systems and responsibilities for sharing information about college and careers (teacher responsibility, college, and career coordinator). There is a continued need to educate students about FAFSA completion, transcripts, and graduation requirements. Students indicate that they have sufficient access to instructional materials and technology. Students indicated access to subjects they need to prepare for high school/college.

Common themes across all groups:

All partner feedback supports additional college and career readiness activities such as mock interviews, career day, and more guest speakers. Staff, parents/guardians, and students were excited about high ratings related to Kelvin data, specifically student connections with school staff, school staff treating students with respect, feelings of school safety, and low suspension rates. Partners suggested ways of expanding the variety of incentives available to students as part of the PBIS Student Acknowledgment System. Staff, parents/guardians, and community partners all requested additional transitional support when students leave Shasta County Juvenile Court School.

A description of the aspects of the LCAP that were influenced by specific input from educational partners.

The themes identified from educational partner feedback directly informed the development of the four goals in the 2021-24 LCAP. In addition, specific pieces of input influenced actions in the LCAP.

GOAL 1:

Feedback: Staff, parent/guardian, and student feedback around student achievement shaped Goal 1. MAP data shows that SCOE has an area for growth in general Tier I supports for all students. Compared to the previous year, data suggests patterns of learning loss in reading and math for all students. Staff, parents/guardians, and community partners also expressed concern about these patterns in the data and had questions regarding the decline in academic performance. Actions focus heavily on improving instruction through professional development and coaching, increasing staff understanding and usage of MAP growth target data, and providing academic intervention to students in need. Site Administrators established accountability to measure ongoing staff skill development through the STEP process, student perception of the school's academic expectations, and formative and summative assessments to measure academic growth and achievement.

Graduation rate and CCI data also informed Goal 1 of the 2021-24 LCAP. In 2019-20, 83% of SCOE students graduated with their one-year cohort. The one-year graduation rate is a metric SCOE will continue to track in Goal 1. In 2019-20, 0% of SCOE students were "prepared" as measured by the College and Career Indicator on the California Dashboard. Staff and parent/guardian reactions to these data points informed actions in Goal 1 that expand middle school career exploration, CTE activities and increase parent and student engagement in college and career readiness activities. The leadership team developed local metrics and actions focused heavily on expanding alternative opportunities to enhance students' college and career preparation.

Educational partner feedback supports the continuation of Goal 1 and the corresponding actions, including continuing CTE activities and parent and student engagement. Based on feedback, additional career connection activities such as mock interviews, career days, and guest speakers were added to Goal 1, Action 1.2, and 1.3. Actions support the continuation of professional development and student perception of the school's academic expectations. MAP data continues to demonstrate a need for continued support for high-quality instruction in English Language Arts and Math for all students, and staff and family are in support of continuing actions around coaching and support for engaging instruction.

GOAL 2:

Educational partners, including students, staff, and families, all reported high confidence levels concerning school climate. Survey feedback identified strengths in school safety, predictable routines and structures, and student connections to adults on campus. In order to continue positive school culture, site teams have been created to implement PBIS Systems and Practices, including specific strategies to maintain a strong school climate and student wellness support. Actions reflect the continued implementation of tiered social-emotional practices to maintain the previously documented positive outcomes and educational partner perceptions. Metrics include student/family perception of school climate and student perception of connectedness with teachers, and safety on campus.

Educational partner feedback supports the continuation of Goal 2 and the corresponding actions, including specific strategies to maintain a strong school climate and counseling for all students.

Goals and Actions

Goal

Goal #	Description
1	Ensure that ALL students graduate “college and career ready” through the full implementation of a broad course of study which emphasizes Common Core State Standards(CCSS), and includes intervention supports provided by highly qualified staff.

An explanation of why the LEA has developed this goal.

Based on 20-21 NWEA/MAP assessment DATA 80% of students are not college and career ready, in an effort to increase readiness we will continue teacher professional development and support for analyzing formative assessment scores, delivering intervention instruction, and start an introduction to Universal Lesson Design.

According to survey data, 20% of parents did not know what FAFSA was and 62% of seniors did not complete the FAFSA. Parents indicated that they needed more information about financial aid and steps for applying to college. The actions and metrics, when grouped together, will help achieve Goal 1 by supporting teachers in their skills. The metrics will show an increase in formative assessment scores for those students who participate in the program over time. In addition, the actions of parent communication will increase the percentage of parents who respond that they had enough information for applying to college.

To support all students in achieving their projected growth targets, site administrators identified a need to enhance school-wide instructional supports. This includes robust weekly professional learning to design effective, and engaging instruction for all students. Collaboration time has focused on infusing formative assessments into lesson planning, analyzing MAP data to inform instruction, and individualized coaching for all teachers. Often our students enrolled in grades 9-12 do not have access to more traditional means of achieving college and career readiness as measured on the CA Dashboard, such as multiple options for CTE Career Pathway completion, A-G course completion, college credit courses, leadership/military science, AP exams, IB exams, or the State Seal of Bi-literacy.

Additionally, all partners desired more options for career exploration, stackable certificates, and modified career pathways that fit within the structure of the juvenile court school and independent study model. The current focus of career technical education and exploration is the incorporation of middle school students in order to support the transition into pathways upon entry into high school. While CAASPP scores are an indicator to support college and career readiness, due to the transitory nature of our student population Local measures of academic progress(NWEA MAP) have been implemented for baselines. SCOE will promote parental participation for students in all groups by communicating in advance through newsletter, system calls, website announcements and teacher communication.

ShastaCOE English Learner population is below 20% and often at 0%, therefore, there is no data to address this portion.

Measuring and Reporting Results

Metric	Baseline	Year 1 Outcome	Year 2 Outcome	Year 3 Outcome	Desired Outcome for 2023–24

Actions

Action #	Title	Description	Total Funds	Contributing
1.1	Assessment	Use common assessments (NWEA) for the purpose of designing intervention and acceleration with the assistance of a para-educator to monitor learning and success at teacher, site and COE levels.	\$3,909.00	No
1.2	College and Career Readiness	Continue to offer and expand Career Technical Education (CTE) opportunities through the provision of Alternative Education Program Director to support individualized college and career guidance and coaching on dual enrollment, concurrent enrollment, college and career readiness indicators, and implementation of career and college engagement opportunities for students and families, with an emphasis on parents of English Language Learners, foster youth, socioeconomically disadvantaged students, and students with exceptional needs.	\$117,997.00	No
1.3	Enrichment Activities	Ensure that students from historically underserved groups have equitable access to enrichment activities (college visits, art exhibits, VAPA performances. on-site electives)	\$2,699.00	Yes
1.4	Technology	All students will utilize chrome books to access instructional software and curriculum appropriate to grade level to develop edit and publish common core aligned assignments. Students will have access to tools and technology via a checkout system	\$5,000.00	No
1.5	Intervention	Provide English and Math recovery courses to students with identified skills deficits	\$64,887.00	No
1.6	Expanded Learning	Provide extended time to students through a paraprofessional to increase overall academic achievement, social emotional learning,	\$22,800.00	Yes

Action #	Title	Description	Total Funds	Contributing
		and college and career awareness through availability of paraprofessional for tutoring and small group intervention.		
1.7	Professional Development	<p>Teachers and paraprofessionals will participate in weekly collaborations and Professional Development that focus on:</p> <ul style="list-style-type: none"> California Standards instruction (Math, ELA, NGSS, ELD) Curriculum alignment (Math, ELA, NGSS, ELD) Student outcome data (engagement, attendance, NWEA Map) Course Access including expanding AG courses, development of career pathway curriculum, and ROP partnership <p>The core 30 hours is scheduled as part of regular work hours.</p> <p>2 additional days for curriculum development are planned.</p>	\$2,699.00	Yes
1.8	Professional Development	Teachers will attend conferences (ex.UDL/CUE/CANVAS/Edgenuity and/or Aeries) for increasing knowledge of implementation of online learning tools and resources for students.	\$26,306.00	Yes
1.9	Enrichment	Ensure that students from historically underserved groups have equitable access to enrichment activities (college visits, art exhibits, VAPA performances. on-site electives)	\$5,000.00	No
1.10	Data Support	Collection of attendance and chronic absenteeism data to support analysis of early indicators of drop out.	\$79,689.00	Yes

Action #	Title	Description	Total Funds	Contributing
1.11	Instruction	Provide smaller class sizes and individualized instruction, intervention and acceleration services to students on a daily basis, embedded in regular classroom instructional schedule, to increase overall student achievement and address the individual needs of special education, foster youth, adjudicated youth and ELL students.	\$83,183.00	Yes

Goal Analysis [2022-23]

An analysis of how this goal was carried out in the previous year.

A description of any substantive differences in planned actions and actual implementation of these actions.

All actions were implemented successfully. during the 2022-2023 school year, contributing to maintaining the positive outcomes addressed in Goal 1. There were no substantive differences in the planned actions and actual implementation..

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

No substantive differences

An explanation of how effective the specific actions were in making progress toward the goal.

Goal 1 Action 1 - NWEA MAP informs this work as student growth targets are tracked and monitored during the school year. This action has been moderately effective, and continues to improve as we create more consistent systems and timely data analysis to inform instruction. Feedback from students, parents, and teachers is informing modifications to the NWEA data review and monitoring process.

Goal 1 Action 2 - Significant progress has been made to increase our student completion of dual and concurrent enrollment participation. We are working to increase these opportunities by adding an additional Dual enrollment class in communications.

Goal 1 Action 3,6,9 had a significant impact on supporting college and/or career readiness. The addition of a full-time Academic Counselor was successful, as evidenced by an increase in student and family understanding related to FAFSA, Regional Occupation Program, and other career connections. This position has also increased messaging to parents via the school newsletter and has formed stronger relationships between SCOE and the local community college program.

Goal 1 Action 4 - Technology support has been maintained and all students have 1:1 Chromebook access. We have purchased hotspots to check out to those students who have internet connectivity issues and will be increasing the amount of these moving forward into 23-24. Teachers have designed curricula and interactive lessons using the Canvas platform for credit recovery and personal growth development. All teachers received training in Edgenuity for customizing lessons and assessments.

Goal 1 Action 5 - This action has been most successful in increasing our attendance rates, with students utilizing intervention support to complete missing work. Our plans are to capitalize on this action by better utilizing assessment data to inform instructional groupings.

Goal 1 Action 7 and 8 - Professional learning opportunities have been well received by staff as evidenced by staff requests for additional support and positive post-training survey results. Professional development in the areas of trauma-informed practice and positive behavior intervention systems will be continued and additional support for de-escalation methods.

Goal 1 Actions 6 and 11 - Providing additional academic support has allowed for targeted small-group instruction. Expanded Learning Opportunities (Action 6) were implemented with students in grades 6-12, however, student attendance was not consistent. Teams are looking at revising how students are referred and scheduled to ensure participation and sufficient time for interventions. Additional teacher at JCS has allowed for smaller class sizes.

Goal 1 Action 10 - This action has led to refined data processes, and this work is ongoing. The analysis of early indicators of drop-out between administrators and faculty has increased the graduation rate which is one indicator of the effectiveness of this work. This team is reviewing back-end Aeries SIS course mapping to ensure accurate reporting to the dashboard for A-G completion and College and Career Indicator rates.

A description of any changes made to the planned goal, metrics, desired outcomes, or actions for the coming year that resulted from reflections on prior practice.

Action 2 - changed title of College and Career Specialist to Alternative Education Program Director

Amended metric to include cohort graduation DATA - for the 22-23 year a waiver was not approved for the one-year graduation rate; therefore we have amended the metric to show both sets of graduation rate DATA

Added additional metrics to support Action 2:

Percentage of A-G courses completed with a C or better

Percentage of students completing one semester of a college course

Percentage of students completing two semesters of a college course

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Goals and Actions

Goal

Goal #	Description
2	Ensure that all students are actively engaged in a safe, healthy and culturally responsive environment.

An explanation of why the LEA has developed this goal.

Stakeholder input and California Healthy Kids Survey identified a need for an increase in school connectedness and parent engagement. This goal has been identified to support students and adults in building strong, respectful, and lasting relationships and to develop collaborative solutions that lead to personal, community, and societal well-being. The actions and metrics, when grouped together, will help achieve Goal 2 by meeting the indicated need for parent connectedness and engagement.

Measuring and Reporting Results

Goal Analysis [2022-23]

An analysis of how this goal was carried out in the previous year.

A description of any substantive differences in planned actions and actual implementation of these actions.

All actions were implemented successfully. during the 2022-2023 school year, contributing to maintaining the positive outcomes addressed in Goal 1. The substantive differences in the planned actions and actual implementation was a decrease in the number of students enrolled in dual enrollment opportunities this year because of staffing we were only able to offer one dual enrollment class on campus.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

No substantive differences

An explanation of how effective the specific actions were in making progress toward the goal.

Goal 2 Action 1 and 3 - Professional development was provided on differentiating instruction, universal lesson design, and personalized learning. Excel and SCIS both saw an increase in attendance to support professional development in regard to engaging student instruction. We are increasing the focus on de-escalation techniques, restorative practices, and positive behavioral intervention supports for students refusing class at JCS.

Goal 2 Action 2 and 7 - This action has aided in implementing ILPs, transition support for students, and communication about students' progress, needs, and goals with parents, school staff, probation officers, and the receiving district to ensure smooth transitions with adequate support. Also had a significant impact on supporting college and/or career readiness. The addition of a full-time Academic Counselor was successful, as evidenced by an increase in student and family understanding related to FAFSA, Regional Occupation Program, and other career connections. This position has also increased messaging to parents via the school newsletter and has formed stronger relationships between SCOE and the local community college program.

Goal 2 Action 4 - Technology support has been maintained and all students have 1:1 Chromebook access. We have purchased hotspots to check out to those students who have internet connectivity issues and will be increasing the amount of these moving forward into 23-24. Teachers have designed curricula and interactive lessons using the Canvas platform for credit recovery and personal growth development. All teachers received training in Edgenuity for customizing lessons and assessments.

Goal 2 Action 5 - This action has been effective and is reflected in the SCIS and JCS graduation rate and communication with receiving districts. It is also reflected in the positive increases in attendance for SCIS and Excel. In collaboration with probation staff, SART teams, and PBIS teams supports are being analyzed and established for students refusing school while incarcerated. All staff have been trained in the Science of HOPE and are utilizing Hope score to inform social-emotional supports.

Goal 2 Action 6 - Data Analyst has worked to provide teams with actionable attendance and assessment data. This data is used to inform the work of Site School Attendance Review Teams (SART). We will continue to participate in the county-wide SART training to ensure that students with attendance problems are identified as early as possible to provide appropriate support and intervention services.

Goal 2 Action 7 - The addition of a full-time Academic Counselor at Excel has increased communication and support for families of students and District partners. This position moving forward will also be incorporating CASEL grade-level lessons for all elementary students and increasing middle school career exploration and pro-social skill development. This action success is evidenced by an increase in student and family understanding related to FAFSA, Regional Occupation Program, and other career connections. This position has also increased messaging to parents via the school newsletter and has formed stronger relationships between SCOE and the local community college program.

A description of any changes made to the planned goal, metrics, desired outcomes, or actions for the coming year that resulted from reflections on prior practice.

Goal:
No changes

Amended Metrics:
Added JCS DATA to Syscloud metric
Clarified what the measurement is in the "FIT" Report
For EL classifications changed "N/A" to "For confidentiality group size is too small to report"

Desired Outcomes:
No amended outcomes

Actions:
No amended actions

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Goals and Actions

Goal

Goal #	Description
3	Countywide, SCOE will coordinate services to ensure that services for expelled youth are provided in cooperation with local districts with the goal of decreasing expulsion and suspension and ensuring expelled students have access to appropriate programs.

An explanation of why the LEA has developed this goal.

Every three years, each county superintendent of schools, in conjunction with superintendents of the school districts within the county, are required to develop a plan for providing educational services to all expelled pupils in that county and to submit the plan to the State Superintendent of Public Instruction, per California Education Code Section 48926

The plan shall enumerate existing educational alternatives for expelled pupils, identify gaps in educational services to expelled pupils, and strategies for filling those service gaps. The plan shall also identify alternative placements for pupils who are expelled and placed in district community day school programs but who fail to meet the terms and conditions of their rehabilitation plan or who pose a danger to other district pupils, as determined by the governing board. The actions for Goal 3 will sustain the progress exemplified by the related metrics by continuing to collaborate with districts to develop effective systems for placing expelled youth and by being a point of contact for districts.

Measuring and Reporting Results

Metric	Baseline	Year 1 Outcome	Year 2 Outcome	Year 3 Outcome	Desired Outcome for 2023–24
Percentage of students expelled in Shasta County	2020-21 0.02%	2021-22 0.04% per DataQuest (13/27764 students)	0.00% (12/27669 students)		0%
Number of students county-wide being referred to SARB	2020-21 180 SARB referrals county wide	2021-22 104 SARB referrals countywide	2022-23 118		50% reduction from Baseline (90 students or less referred to SARB)

Actions

Action #	Title	Description	Total Funds	Contributing
3.1	Developing, implementing and monitoring of Countywide Expulsion Plan	The executive director will coordinate with district leads will participate in county-wide meetings to update the three-year Countywide Expulsion Plan. This plan will be monitored annually.	\$2,500.00	No

Goal Analysis [2022-23]

An analysis of how this goal was carried out in the previous year.

A description of any substantive differences in planned actions and actual implementation of these actions.

The Committee for Expelled Students reviewed the recently approved Plan for Expelled Students. The committee met two times to coordinate services for expelled students, including transitions, the transfer of credits (including partial credits), and records.

There were no substantive differences in the planned actions and the actual implementation of actions.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

No material differences.

An explanation of how effective the specific actions were in making progress toward the goal.

Action 1 was effective in making progress toward coordinating and sharing support services for expelled students in Shasta County. Specifically, meeting regularly with district administrators to hear input on the plan development to ensure the coordination of services for these students. Districts are appreciative of the supports and resources offered through community connect, Foster youth support, and County-wide School Attendance Review Board.

A description of any changes made to the planned goal, metrics, desired outcomes, or actions for the coming year that resulted from reflections on prior practice.

Goal:

Goals and Actions

Goal

Goal #	Description
4	SCOE will coordinate services for all foster youth residing in Shasta County in accordance with the education code and review the plan annually for changes.

An explanation of why the LEA has developed this goal.

Foster Youth represents one of the most vulnerable and academically underperforming subgroups in Shasta County and across the state. Foster youth are regularly the lowest performing student subgroup in nearly all indicators measuring educational outcomes including LCFF priorities and Dashboard metrics. The SCOE Foster Youth Services Coordinating Program is committed to improving educational outcomes for foster youth through coordination and collaboration of services, that increase communication between Child Welfare agencies and LEAs, identifying needs, and working collectively in the best interest of foster students. The actions for Goal 4 will sustain the progress exemplified by the related metrics by supporting LEA liaisons through the development of systems for reporting information and by being a point of contact for districts as foster youth often attend different schools throughout their school careers. When services and support teams are able to provide coordinated efforts, less time is wasted when a student arrives at a new school.

Measuring and Reporting Results

Metric	Baseline	Year 1 Outcome	Year 2 Outcome	Year 3 Outcome	Desired Outcome for 2023–24
Percentage of foster youth district liaisons that will have access to professional development opportunities to receive legislative updates, develop awareness of inter-agency systems, policy and procedure development and supports for foster youth as measured by	20/21 100% of foster youth district liaisons had access to professional development opportunities. 23 of 25 participated in at least one of the training opportunities.	21/22 100% of foster youth district liaisons had access to professional development opportunities and training materials. 21 of 25 districts participated in a minimum of one training opportunity.	22/ 23 100% of foster youth district liaisons had access to professional development opportunities and training materials. 22 of 25 districts participated in a minimum of one training opportunity.		Maintain 100% of districts receiving opportunities to engage in professional development opportunities annually.

Metric	Baseline	Year 1 Outcome	Year 2 Outcome	Year 3 Outcome	Desired Outcome for 2023–24
attendance at quarterly/annual trainings.					
Percentage EAC members engaging in strategies to improve the educational outcomes of foster youth as monitored by participation in focus groups and needs assessments.	20/21 100% of EAC members participated in focus groups and 78% participated in the annual needs assessment.	21/22 56% of EAC members participated in focus groups and 80% participated in the annual needs assessment.	22/23 68% of EAC members participated in focus groups and 59% participated in the annual needs assessment.		Maintain 100% of EAC member participation in focus groups and increase participation in annual needs assessment 5% each year.
Percentage of annual interagency case planning meetings attended by SCOE representative. Case planning meetings include Interagency Placement Committee (IPC), AB 2083 Interagency Leadership Team (ILT), CSEC Multi-Disciplinary Team (MDTs), and Mappings as measured by the quarterly report to Shasta County HHSA.	20/21 SCOE participated in 92% of IPC meetings, 100% of ILT meetings, 81% of CSEC MDT's and 87% of mappings.	21/22 SCOE participated in 100% of IPC meetings, 90% of ILT meetings, 83% of CSEC MDT's and 100% of mappings.	22/23 SCOE participated in 94% of IPC meetings, 100% of ILT meetings, 100% of CSEC MDT's and 94% of mapping meetings.		Maintain/Increase participation at inter-agency case planning meetings to a minimum of 90% for each meeting annually.
County-wide Foster Youth Chronic Absenteeism rate as	20/21 (most recent year countywide data available on dataquest) 30.2%	21/22 Countywide foster youth chronic absenteeism rate 44.6%	22/23 County-wide Foster Youth chronic absenteeism rate not published on		Decrease countywide foster youth chronic absenteeism rate by 2% in each year.

Metric	Baseline	Year 1 Outcome	Year 2 Outcome	Year 3 Outcome	Desired Outcome for 2023–24
reported by DataQuest.			California Schools Dashboard as of 8.8.23		
Countywide Foster Youth FAFSA/CDAA completion as reported by the annual FYSCP FAFSA challenge.	20/21 100% completion rate for graduating seniors.	21/22 92% completion rate for graduating seniors.	22/23 70% completion rate for seniors eligible to graduate.		Maintain 100% FAFSA/CDAA completion rate for eligible graduating foster youth annually.

Actions

Action #	Title	Description	Total Funds	Contributing
4.1	Information sharing.	<p>Monitor local policy/procedures and data infrastructure necessary to support and monitor educational success, including efficient transfer of health and education records and the health and education passport.</p> <ol style="list-style-type: none"> 1. Work with CDE, districts and county child welfare and probation agencies to obtain, share and analyze data to accurately identify foster youth and track progress on all required metrics. 2. Maintain and monitor MOUs with probation, HHSA and district agencies to increase graduation rates and reduce school transfer rates. 	\$104,656.00	No
4.2	District Liaison professional development	<p>Ensure foster youth liaisons (Ed Code 48853.5) and district level oversight staff have access to knowledge, and resources to meet the needs of foster youth.</p> <ol style="list-style-type: none"> 1. Train and support district liaisons and district level oversight staff to ensure district and school site staff are informed about and implement all laws and district policies affecting foster youth. 	\$122,343.00	No

Action #	Title	Description	Total Funds	Contributing
		<p>2. Monitor services provided to foster youth at the district level to ensure:</p> <ul style="list-style-type: none"> • All foster youth have access to necessary education services. • To reduce school transfers and ensure foster youth are transported to their school of origin when in their best interest, including facilitating transportation. • Ensure priority access for foster youth to receive district level tutoring and other academic and social/emotional supports, afterschool and summer enrichment programs, and extracurricular activities. 		
4.3	Interagency Partnerships/Leveraging Funds	Maintain and annually update the established Contract between SCOE and Health and Human Service Agency for information sharing and coordination of educational services and Transportation services for School of Origin.	\$0.00	No
4.4	Educational Case Management	<p>Assure students have access to social-emotional and academic support.</p> <p>Request academic and behavioral reports from schools quarterly for all foster youth. Work with social workers, counselors, and other stakeholders to identify foster youth in need of additional supports. Identify available supports provided by the district and or other community-based agencies/organizations. Help youth and stakeholders navigate the referral process, follow up with service providers to ensure access, and obtain progress reports.</p>	\$131,335.00	No
4.5	Coordination of Executive Advisory Council.	SCOE will coordinate and facilitate a foster youth Executive Advisory Council to ensure coordination and collaboration between county districts and inter-agency collaborative partners.	\$21,663.00	No

Action #	Title	Description	Total Funds	Contributing
4.6	Coordination of Preschool Services.	SCOE will coordinate preschool services for Shasta County jurisdiction foster youth, including attendance at Child and Family Team meetings for 3-5 year old's and through expediting the At Risk Youth Preschool Referral to ensure timely and appropriate placement in eligible state preschool programs.	\$0.00	No

Goal Analysis [2022-23]

An analysis of how this goal was carried out in the previous year.

A description of any substantive differences in planned actions and actual implementation of these actions.

All planned actions were implemented and carried out to fidelity. Additional tutoring services were offered by SCOE during the 22/23 school year to augment the tutoring services available to foster youth through districts. Tutors were hired via AB 130 direct services dollars.

An explanation of material differences between Budgeted Expenditures and Estimated Actual Expenditures and/or Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services.

Material differences occurred due to a restructuring of the Youth Support Services Department. Action 1 projected actual: \$93,166.70, Action 2 projected actual: \$73,852.46, Action 4 projected actual: \$121,165.45, Action 5 projected actual: \$17,836.97.

An explanation of how effective the specific actions were in making progress toward the goal.

Actions 2, 4, and 5 were successful in providing coordination of support services for Foster Youth in Shasta County. The Foster Youth service team supported the services delivered to Foster Youth by maintaining consistent communication with District liaisons, collaborating with the courts and Health and Human Services, ensuring the timely transfer of school records through the use of the Foster Focus system, supporting smaller districts, refining end of year data and, providing professional development for District staff. The number of foster youth requiring academic and behavioral intervention supports increased over the 22/23 school year, the foster youth team will be looking to add additional case management in coming years to keep up with the growing need. The decline in students completing the FAFSA and the increase in foster youth chronic absenteeism highlight the need for additional case management services.

A description of any changes made to the planned goal, metrics, desired outcomes, or actions for the coming year that resulted from reflections on prior practice.

Goal:

No changes

Metrics:

No amended metrics

Desired Outcomes:

No amended outcomes

Actions:

Added action 6 "coordination of Preschool services". This action was added after a data project revealed that nearly half of Shasta County Jurisdiction foster youth are ages 0-5 and less than 20% of preschool-eligible foster youth were enrolled in state preschool programs. Preschool provides an early and important opportunity for foster youth to engage in learning with their peers that can positively impact their success as a student after entering kindergarten and beyond.

A report of the Total Estimated Actual Expenditures for last year's actions may be found in the Annual Update Table. A report of the Estimated Actual Percentages of Improved Services for last year's actions may be found in the Contributing Actions Annual Update Table.

Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students [2023-24]

Projected LCFF Supplemental and/or Concentration Grants	Projected Additional LCFF Concentration Grant (15 percent)
\$258,203	0%

Required Percentage to Increase or Improve Services for the LCAP Year

Projected Percentage to Increase or Improve Services for the Coming School Year	LCFF Carryover — Percentage	LCFF Carryover — Dollar	Total Percentage to Increase or Improve Services for the Coming School Year
2.09%	0.00%	\$0.00	2.09%

The Budgeted Expenditures for Actions identified as Contributing may be found in the Contributing Actions Table.

Required Descriptions

For each action being provided to an entire school, or across the entire school district or county office of education (COE), an explanation of (1) how the needs of foster youth, English learners, and low-income students were considered first, and (2) how these actions are effective in meeting the goals for these students.

Using the calculation tool provided by the state, the Shasta County Office of Education has calculated that it will receive a total of \$258,203 in Supplemental and Concentration funding under the Local Control Funding Formula (LCFF). In addition, using the same calculation tool, the proportionality percentage has been calculated at 2.09%.

All actions and expenditures of funds marked as contributing to increased or improved services were developed specifically to focus on the needs of our unduplicated population based on a careful analysis of data and input from our stakeholders. All these actions are principally directed toward our unduplicated student population to help SCOE programs be effective in meeting the goals of the LEA LCAP and the identified needs of the unduplicated student population.

Action 1.3
 We will be using supplemental and concentration grant funding to provide enrichment activities to increase engagement. This action will ensure equitable access to enrichment activities (college visits, art exhibits, VAPA performances, and on-site electives). Based on the needs determined by the analysis of our student data and input from our educational partners, our students will benefit from expanded learning opportunities throughout the year.

Action 1.6

Provides extended time to students through paraprofessional support with the aim to increase overall academic achievement, social-emotional learning, and college and career awareness.

To address these needs action will also provide targeted support for tutoring and small group intervention.

Actions 1.7, 1.8, 2.3

Intentionally designed professional development will be provided to all staff to build capacity in the delivery of standards-based core academic content and to develop trauma-informed teaching practices and classroom environments specifically designed to support our students' social-emotional needs as it relates to learning. As we looked at our student data, beginning with our dashboard results and progressing to more recent assessment results, there is an identified need for an abundance of attention directed at improving our ELA and mathematics performances. While all of our students are in need of great assistance, we noticed that our foster youth and our English learners (ELA and math below standard) had a significant need for improvement. In addition, in mathematics, our students who are low-income had the most significant need for improvement.

In order to address these needs for low-income students and English learners, we have increased our support for professional learning, curriculum development, and materials to target efforts at improving our outcomes

Action 1.10 and 2.5

Attendance is foundational to the ability of our students to engage in the instruction and support provided through our program and improving student attendance continues to be a focus. Due to a wide range of factors, our students often come to our programs with a history of academic and/or social struggles in school environments, often resulting in poor school attendance. This truth creates a unique set of needs that we aim to address through the diligent oversight of our School Attendance Review Team (SART). Our SART will continue to participate in the county-wide trainings to ensure that students with attendance problems are identified as early as possible to provide appropriate support and intervention services to both students and parents, especially those parents of Foster Youth, English Language Learners, socioeconomically disadvantaged students, and students with exceptional needs. Accurate data collection and monitoring systems are an essential component to addressing the needs of our students, especially our socioeconomically disadvantaged, foster youth, and English Language Learners.

To address these needs we are honing the process of collecting and reporting student data, attendance (more specifically chronic absenteeism data), and academic outcomes for our unduplicated students demonstrated the need for increased data analysis and support. Specifically, will help us develop early warning systems to be able to intervene when a student shows signs of disengagement and possibly dropping out of school. To work upstream and prevent high school dropouts, we will be providing an extensive instruction program specifically designed with the unique needs of our students in mind.

Action 1.11

Our instructional program provides individualized instruction, intervention, and acceleration services to students on a daily basis. These services will be embedded in a regular classroom instructional schedule in order to ensure access and increase overall student achievement. They will also be Staff will collaborate in the planning and implementation in order to address the individual needs of special education, foster

youth, adjudicated youth, and ELL students. These targeted services are seeking to provide more opportunities for teachers to continue to revise and implement the new ELA and math curriculum and also to learn strategies to target our unduplicated student groups, in an effort to increase their credit recovery rates more significantly and expeditiously.

To address these needs, targeted intervention and small group instruction will be provided by a certificated Intervention teacher.

Action 2.2

To support this essential work, we will continue to provide students access to a school counselor for academic guidance and social-emotional learning delivered through a multi-tiered system of support. To help students respond resiliently and achieve the goals that they set for themselves, we will continue to build staff capacity through participation in the county-wide Ambassador of Hope training to develop hope-centered systems and practices across all district programs.

To address these needs we will continue to implement staff collaboration and professional development to help all staff develop an engaging curriculum to encourage students to attend on a regular basis. We can also work with student input and voice to do things that will increase their interest in school, like enhancing library selections through interest surveys and reading levels.

Action 2.4

Given the safety concerns expressed by all of our educational partners and in consideration of the traumatic backgrounds of many of our students we have increased technology safety support. This will help to support students in their efforts to access the latest in educational technology safely and increase the likelihood of academic success.

To address these needs we will continue training of online safety software and monitoring to promote a safe learning environment and academic integrity

We anticipate that the implementation of the actions and services above will have a significant impact on the following student outcomes for our socioeconomically disadvantaged, foster youth, and English Language Learner students:

- Attendance
- Student Engagement
- Academic Performance in ELA, Math, and across a broad course of study
- Graduation Rate
- Preparation for college and/or career after graduation

To determine the overall effectiveness of these actions to achieve progress toward our goals, we anticipate that we will see improvement in the following metrics and outcomes included in our LCAP, specifically looking at the performance of our socioeconomically disadvantaged students, foster youth students, and English Language Learners:

1. Attendance-improved overall school attendance across student programs and decreased chronic absenteeism

- 2. Decreased Drop Out Rate
- 3. Decreased Suspension Rate
- 4. Increased/Improved performance on local and statewide assessments in ELA and Math
- 5. Increase in College & Career Indicators like participation in dual enrollment courses, A-G courses, and CTE pathways

A description of how services for foster youth, English learners, and low-income students are being increased or improved by the percentage required.

Shasta County Office of Education is meeting the requirement to increase or improve services by 2.09% through the implementation of the wide actions described above in prompt 1.

A description of the plan for how the additional concentration grant add-on funding identified above will be used to increase the number of staff providing direct services to students at schools that have a high concentration (above 55 percent) of foster youth, English learners, and low-income students, as applicable.

N/A

Staff-to-student ratios by type of school and concentration of unduplicated students	Schools with a student concentration of 55 percent or less	Schools with a student concentration of greater than 55 percent
Staff-to-student ratio of classified staff providing direct services to students	N/A	N/A
Staff-to-student ratio of certificated staff providing direct services to students	N/A	N/A

Instructions

[Plan Summary](#)

[Engaging Educational Partners](#)

[Goals and Actions](#)

[Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students](#)

For additional questions or technical assistance related to the completion of the Local Control and Accountability Plan (LCAP) template, please contact the local county office of education (COE), or the California Department of Education's (CDE's) Local Agency Systems Support Office, by phone at 916-319-0809 or by email at lcff@cde.ca.gov.

Introduction and Instructions

The Local Control Funding Formula (LCFF) requires local educational agencies (LEAs) to engage their local educational partners in an annual planning process to evaluate their progress within eight state priority areas encompassing all statutory metrics (COEs have 10 state priorities). LEAs document the results of this planning process in the LCAP using the template adopted by the State Board of Education.

The LCAP development process serves three distinct, but related functions:

- **Comprehensive Strategic Planning:** The process of developing and annually updating the LCAP supports comprehensive strategic planning (California *Education Code* [EC] Section 52064[e][1]). Strategic planning that is comprehensive connects budgetary decisions to teaching and learning performance data. LEAs should continually evaluate the hard choices they make about the use of limited resources to meet student and community needs to ensure opportunities and outcomes are improved for all students.
- **Meaningful Engagement of Educational Partners:** The LCAP development process should result in an LCAP that reflects decisions made through meaningful engagement (EC Section 52064[e][1]). Local educational partners possess valuable perspectives and insights about an LEA's programs and services. Effective strategic planning will incorporate these perspectives and insights in order to identify potential goals and actions to be included in the LCAP.
- **Accountability and Compliance:** The LCAP serves an important accountability function because aspects of the LCAP template require LEAs to show that they have complied with various requirements specified in the LCFF statutes and regulations, most notably:
 - Demonstrating that LEAs are increasing or improving services for foster youth, English learners, and low-income students in proportion to the amount of additional funding those students generate under LCFF (EC Section 52064[b][4-6]).
 - Establishing goals, supported by actions and related expenditures, that address the statutory priority areas and statutory metrics (EC sections 52064[b][1] and [2]).
 - Annually reviewing and updating the LCAP to reflect progress toward the goals (EC Section 52064[b][7]).

The LCAP template, like each LEA’s final adopted LCAP, is a document, not a process. LEAs must use the template to memorialize the outcome of their LCAP development process, which should: (a) reflect comprehensive strategic planning (b) through meaningful engagement with educational partners that (c) meets legal requirements, as reflected in the final adopted LCAP. The sections included within the LCAP template do not and cannot reflect the full development process, just as the LCAP template itself is not intended as a tool for engaging educational partners.

If a county superintendent of schools has jurisdiction over a single school district, the county board of education and the governing board of the school district may adopt and file for review and approval a single LCAP consistent with the requirements in *EC* sections 52060, 52062, 52066, 52068, and 52070. The LCAP must clearly articulate to which entity’s budget (school district or county superintendent of schools) all budgeted and actual expenditures are aligned.

The revised LCAP template for the 2021–22, 2022–23, and 2023–24 school years reflects statutory changes made through Assembly Bill 1840 (Committee on Budget), Chapter 243, Statutes of 2018. These statutory changes enhance transparency regarding expenditures on actions included in the LCAP, including actions that contribute to meeting the requirement to increase or improve services for foster youth, English learners, and low-income students, and to streamline the information presented within the LCAP to make adopted LCAPs more accessible for educational partners and the public.

At its most basic, the adopted LCAP should attempt to distill not just what the LEA is doing for students in transitional kindergarten through grade twelve (TK–12), but also allow educational partners to understand why, and whether those strategies are leading to improved opportunities and outcomes for students. LEAs are strongly encouraged to use language and a level of detail in their adopted LCAPs intended to be meaningful and accessible for the LEA’s diverse educational partners and the broader public.

In developing and finalizing the LCAP for adoption, LEAs are encouraged to keep the following overarching frame at the forefront of the strategic planning and educational partner engagement functions:

Given present performance across the state priorities and on indicators in the California School Dashboard (Dashboard), how is the LEA using its budgetary resources to respond to TK–12 student and community needs, and address any performance gaps, including by meeting its obligation to increase or improve services for foster youth, English learners, and low-income students?

LEAs are encouraged to focus on a set of metrics and actions that the LEA believes, based on input gathered from educational partners, research, and experience, will have the biggest impact on behalf of its TK–12 students.

These instructions address the requirements for each section of the LCAP, but may include information about effective practices when developing the LCAP and completing the LCAP itself. Additionally, information is included at the beginning of each section emphasizing the purpose that each section serves.

Plan Summary

Purpose

A well-developed Plan Summary section provides a meaningful context for the LCAP. This section provides information about an LEA's community as well as relevant information about student needs and performance. In order to provide a meaningful context for the rest of the LCAP, the content of this section should be clearly and meaningfully related to the content included in the subsequent sections of the LCAP.

Requirements and Instructions

General Information – Briefly describe the LEA, its schools, and its students in grades TK–12, as applicable to the LEA. For example, information about an LEA in terms of geography, enrollment, or employment, the number and size of specific schools, recent community challenges, and other such information as an LEA wishes to include can enable a reader to more fully understand an LEA's LCAP.

Reflections: Successes – Based on a review of performance on the state indicators and local performance indicators included in the Dashboard, progress toward LCAP goals, local self-assessment tools, input from educational partners, and any other information, what progress is the LEA most proud of and how does the LEA plan to maintain or build upon that success? This may include identifying specific examples of how past increases or improvements in services for foster youth, English learners, and low-income students have led to improved performance for these students.

Reflections: Identified Need – Referring to the Dashboard, identify: (a) any state indicator for which overall performance was in the “Red” or “Orange” performance category or any local indicator where the LEA received a “Not Met” or “Not Met for Two or More Years” rating AND (b) any state indicator for which performance for any student group was two or more performance levels below the “all student” performance. What steps is the LEA planning to take to address these areas of low performance and performance gaps? An LEA that is required to include a goal to address one or more consistently low-performing student groups or low-performing schools must identify that it is required to include this goal and must also identify the applicable student group(s) and/or school(s). Other needs may be identified using locally collected data including data collected to inform the self-reflection tools and reporting local indicators on the Dashboard.

LCAP Highlights – Identify and briefly summarize the key features of this year's LCAP.

Comprehensive Support and Improvement – An LEA with a school or schools identified for comprehensive support and improvement (CSI) under the Every Student Succeeds Act must respond to the following prompts:

- **Schools Identified:** Identify the schools within the LEA that have been identified for CSI.
- **Support for Identified Schools:** Describe how the LEA has or will support the identified schools in developing CSI plans that included a school-level needs assessment, evidence-based interventions, and the identification of any resource inequities to be addressed through the implementation of the CSI plan.
- **Monitoring and Evaluating Effectiveness:** Describe how the LEA will monitor and evaluate the implementation and effectiveness of the CSI plan to support student and school improvement.

Engaging Educational Partners

Purpose

Significant and purposeful engagement of parents, students, educators, and other educational partners, including those representing the student groups identified by LCFF, is critical to the development of the LCAP and the budget process. Consistent with statute, such engagement should support comprehensive strategic planning, accountability, and improvement across the state priorities and locally identified priorities (*EC* Section 52064[e][1]). Engagement of educational partners is an ongoing, annual process.

This section is designed to reflect how the engagement of educational partners influenced the decisions reflected in the adopted LCAP. The goal is to allow educational partners that participated in the LCAP development process and the broader public understand how the LEA engaged educational partners and the impact of that engagement. LEAs are encouraged to keep this goal in the forefront when completing this section.

Statute and regulations specify the educational partners that school districts and COEs must consult when developing the LCAP: teachers, principals, administrators, other school personnel, local bargaining units of the LEA, parents, and students. Before adopting the LCAP, school districts and COEs must share it with the Parent Advisory Committee and, if applicable, to its English Learner Parent Advisory Committee. The superintendent is required by statute to respond in writing to the comments received from these committees. School districts and COEs must also consult with the special education local plan area administrator(s) when developing the LCAP.

Statute requires charter schools to consult with teachers, principals, administrators, other school personnel, parents, and students in developing the LCAP. The LCAP should also be shared with, and LEAs should request input from, schoolsite-level advisory groups, as applicable (e.g., schoolsite councils, English Learner Advisory Councils, student advisory groups, etc.), to facilitate alignment between schoolsite and district-level goals and actions.

Information and resources that support effective engagement, define student consultation, and provide the requirements for advisory group composition, can be found under Resources on the following web page of the CDE's website: <https://www.cde.ca.gov/re/lc/>.

Requirements and Instructions

Below is an excerpt from the 2018–19 *Guide for Annual Audits of K–12 Local Education Agencies and State Compliance Reporting*, which is provided to highlight the legal requirements for engagement of educational partners in the LCAP development process:

Local Control and Accountability Plan:

For county offices of education and school districts only, verify the LEA:

- a) Presented the local control and accountability plan to the parent advisory committee in accordance with Education Code section 52062(a)(1) or 52068(a)(1), as appropriate.
- b) If applicable, presented the local control and accountability plan to the English learner parent advisory committee, in accordance with Education Code section 52062(a)(2) or 52068(a)(2), as appropriate.

- c) Notified members of the public of the opportunity to submit comments regarding specific actions and expenditures proposed to be included in the local control and accountability plan in accordance with Education Code section 52062(a)(3) or 52068(a)(3), as appropriate.
- d) Held at least one public hearing in accordance with Education Code section 52062(b)(1) or 52068(b)(1), as appropriate.
- e) Adopted the local control and accountability plan in a public meeting in accordance with Education Code section 52062(b)(2) or 52068(b)(2), as appropriate.

Prompt 1: “A summary of the process used to engage educational partners and how this engagement was considered before finalizing the LCAP.”

Describe the engagement process used by the LEA to involve educational partners in the development of the LCAP, including, at a minimum, describing how the LEA met its obligation to consult with all statutorily required educational partners as applicable to the type of LEA. A sufficient response to this prompt must include general information about the timeline of the process and meetings or other engagement strategies with educational partners. A response may also include information about an LEA’s philosophical approach to engaging its educational partners.

Prompt 2: “A summary of the feedback provided by specific educational partners.”

Describe and summarize the feedback provided by specific educational partners. A sufficient response to this prompt will indicate ideas, trends, or inputs that emerged from an analysis of the feedback received from educational partners.

Prompt 3: “A description of the aspects of the LCAP that were influenced by specific input from educational partners.”

A sufficient response to this prompt will provide educational partners and the public with clear, specific information about how the engagement process influenced the development of the LCAP. The response must describe aspects of the LCAP that were influenced by or developed in response to the educational partner feedback described in response to Prompt 2. This may include a description of how the LEA prioritized requests of educational partners within the context of the budgetary resources available or otherwise prioritized areas of focus within the LCAP. For the purposes of this prompt, “aspects” of an LCAP that may have been influenced by educational partner input can include, but are not necessarily limited to:

- Inclusion of a goal or decision to pursue a Focus Goal (as described below)
- Inclusion of metrics other than the statutorily required metrics
- Determination of the desired outcome on one or more metrics
- Inclusion of performance by one or more student groups in the Measuring and Reporting Results subsection
- Inclusion of action(s) or a group of actions
- Elimination of action(s) or group of actions
- Changes to the level of proposed expenditures for one or more actions

- Inclusion of action(s) as contributing to increased or improved services for unduplicated services
- Determination of effectiveness of the specific actions to achieve the goal
- Determination of material differences in expenditures
- Determination of changes made to a goal for the ensuing LCAP year based on the annual update process
- Determination of challenges or successes in the implementation of actions

Goals and Actions

Purpose

Well-developed goals will clearly communicate to educational partners what the LEA plans to accomplish, what the LEA plans to do in order to accomplish the goal, and how the LEA will know when it has accomplished the goal. A goal statement, associated metrics and expected outcomes, and the actions included in the goal should be in alignment. The explanation for why the LEA included a goal is an opportunity for LEAs to clearly communicate to educational partners and the public why, among the various strengths and areas for improvement highlighted by performance data and strategies and actions that could be pursued, the LEA decided to pursue this goal, and the related metrics, expected outcomes, actions, and expenditures.

A well-developed goal can be focused on the performance relative to a metric or metrics for all students, a specific student group(s), narrowing performance gaps, or implementing programs or strategies expected to impact outcomes. LEAs should assess the performance of their student groups when developing goals and the related actions to achieve such goals.

Requirements and Instructions

LEAs should prioritize the goals, specific actions, and related expenditures included within the LCAP within one or more state priorities. LEAs should consider performance on the state and local indicators, including their locally collected and reported data for the local indicators that are included in the Dashboard in determining whether and how to prioritize its goals within the LCAP.

In order to support prioritization of goals, the LCAP template provides LEAs with the option of developing three different kinds of goals:

- **Focus Goal:** A Focus Goal is relatively more concentrated in scope and may focus on a fewer number of metrics to measure improvement. A Focus Goal statement will be time bound and make clear how the goal is to be measured.
- **Broad Goal:** A Broad Goal is relatively less concentrated in its scope and may focus on improving performance across a wide range of metrics.
- **Maintenance of Progress Goal:** A Maintenance of Progress Goal includes actions that may be ongoing without significant changes and allows an LEA to track performance on any metrics not addressed in the other goals of the LCAP.

At a minimum, the LCAP must address all LCFF priorities and associated metrics.

Focus Goal(s)

Goal Description: The description provided for a Focus Goal must be specific, measurable, and time bound. An LEA develops a Focus Goal to address areas of need that may require or benefit from a more specific and data intensive approach. The Focus Goal can explicitly reference the metric(s) by which achievement of the goal will be measured and the time frame according to which the LEA expects to achieve the goal.

Explanation of why the LEA has developed this goal: Explain why the LEA has chosen to prioritize this goal. An explanation must be based on Dashboard data or other locally collected data. LEAs must describe how the LEA identified this goal for focused attention, including relevant consultation with educational partners. LEAs are encouraged to promote transparency and understanding around the decision to pursue a focus goal.

Broad Goal

Goal Description: Describe what the LEA plans to achieve through the actions included in the goal. The description of a broad goal will be clearly aligned with the expected measurable outcomes included for the goal. The goal description organizes the actions and expected outcomes in a cohesive and consistent manner. A goal description is specific enough to be measurable in either quantitative or qualitative terms. A broad goal is not as specific as a focus goal. While it is specific enough to be measurable, there are many different metrics for measuring progress toward the goal.

Explanation of why the LEA has developed this goal: Explain why the LEA developed this goal and how the actions and metrics grouped together will help achieve the goal.

Maintenance of Progress Goal

Goal Description: Describe how the LEA intends to maintain the progress made in the LCFF State Priorities not addressed by the other goals in the LCAP. Use this type of goal to address the state priorities and applicable metrics not addressed within the other goals in the LCAP. The state priorities and metrics to be addressed in this section are those for which the LEA, in consultation with educational partners, has determined to maintain actions and monitor progress while focusing implementation efforts on the actions covered by other goals in the LCAP.

Explanation of why the LEA has developed this goal: Explain how the actions will sustain the progress exemplified by the related metrics.

Required Goals

In general, LEAs have flexibility in determining what goals to include in the LCAP and what those goals will address; however, beginning with the development of the 2022–23 LCAP, LEAs that meet certain criteria are required to include a specific goal in their LCAP.

Consistently low-performing student group(s) criteria: An LEA is eligible for Differentiated Assistance for three or more consecutive years based on the performance of the same student group or groups in the Dashboard. A list of the LEAs required to include a goal in the LCAP based on student group performance, and the student group(s) that lead to identification, may be found on the CDE’s Local Control Funding Formula web page at <https://www.cde.ca.gov/fg/aa/lc/>.

- **Consistently low-performing student group(s) goal requirement:** An LEA meeting the consistently low-performing student group(s) criteria must include a goal in its LCAP focused on improving the performance of the student group or groups that led to the LEA’s eligibility for Differentiated

Assistance. This goal must include metrics, outcomes, actions, and expenditures specific to addressing the needs of, and improving outcomes for, this student group or groups. An LEA required to address multiple student groups is not required to have a goal to address each student group; however, each student group must be specifically addressed in the goal. This requirement may not be met by combining this required goal with another goal.

- **Goal Description:** Describe the outcomes the LEA plans to achieve to address the needs of, and improve outcomes for, the student group or groups that led to the LEA's eligibility for Differentiated Assistance.
- **Explanation of why the LEA has developed this goal:** Explain why the LEA is required to develop this goal, including identifying the student group(s) that lead to the LEA being required to develop this goal, how the actions and associated metrics included in this goal differ from previous efforts to improve outcomes for the student group(s), and why the LEA believes the actions, metrics, and expenditures included in this goal will help achieve the outcomes identified in the goal description.

Low-performing school(s) criteria: The following criteria only applies to a school district or COE with two or more schools; it does not apply to a single-school district. A school district or COE has one or more schools that, for two consecutive years, received the two lowest performance levels on all but one of the state indicators for which the school(s) receive performance levels in the Dashboard and the performance of the "All Students" student group for the LEA is at least one performance level higher in all of those indicators. A list of the LEAs required to include a goal in the LCAP based on school performance, and the school(s) that lead to identification, may be found on the CDE's Local Control Funding Formula web page at <https://www.cde.ca.gov/fg/aa/lc/>.

- **Low-performing school(s) goal requirement:** A school district or COE meeting the low-performing school(s) criteria must include a goal in its LCAP focusing on addressing the disparities in performance between the school(s) and the LEA as a whole. This goal must include metrics, outcomes, actions, and expenditures specific to addressing the needs of, and improving outcomes for, the students enrolled at the low-performing school or schools. An LEA required to address multiple schools is not required to have a goal to address each school; however, each school must be specifically addressed in the goal. This requirement may not be met by combining this goal with another goal.
- **Goal Description:** Describe what outcomes the LEA plans to achieve to address the disparities in performance between the students enrolled at the low-performing school(s) and the students enrolled at the LEA as a whole.
- **Explanation of why the LEA has developed this goal:** Explain why the LEA is required to develop this goal, including identifying the schools(s) that lead to the LEA being required to develop this goal; how the actions and associated metrics included in this goal differ from previous efforts to improve outcomes for the school(s); and why the LEA believes the actions, metrics, and expenditures included in this goal will help achieve the outcomes for students enrolled at the low-performing school or schools identified in the goal description.

Measuring and Reporting Results:

For each LCAP year, identify the metric(s) that the LEA will use to track progress toward the expected outcomes. LEAs are encouraged to identify metrics for specific student groups, as appropriate, including expected outcomes that would reflect narrowing of any existing performance gaps.

Include in the baseline column the most recent data associated with this metric available at the time of adoption of the LCAP for the first year of the three-year plan. LEAs may use data as reported on the 2019 Dashboard for the baseline of a metric only if that data represents the most recent available (e.g., high school graduation rate).

Using the most recent data available may involve reviewing data the LEA is preparing for submission to the California Longitudinal Pupil Achievement Data System (CALPADS) or data that the LEA has recently submitted to CALPADS. Because final 2020–21 outcomes on some metrics may not be computable at the time the 2021–24 LCAP is adopted (e.g., graduation rate, suspension rate), the most recent data available may include a point in time calculation taken each year on the same date for comparability purposes.

The baseline data shall remain unchanged throughout the three-year LCAP.

Complete the table as follows:

- **Metric:** Indicate how progress is being measured using a metric.
- **Baseline:** Enter the baseline when completing the LCAP for 2021–22. As described above, the baseline is the most recent data associated with a metric. Indicate the school year to which the data applies, consistent with the instructions above.
- **Year 1 Outcome:** When completing the LCAP for 2022–23, enter the most recent data available. Indicate the school year to which the data applies, consistent with the instructions above.
- **Year 2 Outcome:** When completing the LCAP for 2023–24, enter the most recent data available. Indicate the school year to which the data applies, consistent with the instructions above.
- **Year 3 Outcome:** When completing the LCAP for 2024–25, enter the most recent data available. Indicate the school year to which the data applies, consistent with the instructions above. The 2024–25 LCAP will be the first year in the next three-year cycle. Completing this column will be part of the Annual Update for that year.
- **Desired Outcome for 2023–24:** When completing the first year of the LCAP, enter the desired outcome for the relevant metric the LEA expects to achieve by the end of the 2023–24 LCAP year.

Timeline for completing the “**Measuring and Reporting Results**” part of the Goal.

Enter information in this box when completing the LCAP for 2021–22 .	Enter information in this box when completing the LCAP for 2021–22 .	Enter information in this box when completing the LCAP for 2022–23 . Leave blank until then.	Enter information in this box when completing the LCAP for 2023–24 . Leave blank until then.	Enter information in this box when completing the LCAP for 2024–25 . Leave blank until then.	Enter information in this box when completing the LCAP for 2021–22 or when adding a new metric.

The metrics may be quantitative or qualitative; but at minimum, an LEA’s LCAP must include goals that are measured using all of the applicable metrics for the related state priorities, in each LCAP year as applicable to the type of LEA. To the extent a state priority does not specify one or more metrics (e.g., implementation of state academic content and performance standards), the LEA must identify a metric to use within the LCAP. For these state priorities, LEAs are encouraged to use metrics based on or reported through the relevant self-reflection tool for local indicators within the Dashboard.

Actions: Enter the action number. Provide a short title for the action. This title will also appear in the action tables. Provide a description of the action. Enter the total amount of expenditures associated with this action. Budgeted expenditures from specific fund sources will be provided in the summary tables. Indicate whether the action contributes to meeting the increase or improved services requirement as described in the Increased or Improved Services section using a “Y” for Yes or an “N” for No. (**Note:** for each such action offered on an LEA-wide or schoolwide basis, the LEA will need to provide additional information in the Increased or Improved Summary Section to address the requirements in *California Code of Regulations*, Title 5 [5 CCR] Section 15496(b) in the Increased or Improved Services Section of the LCAP).

Actions for English Learners: School districts, COEs, and charter schools that have a numerically significant English learner student subgroup must include specific actions in the LCAP related to, at a minimum, the language acquisition programs, as defined in *EC* Section 306, provided to students and professional development activities specific to English learners.

Actions for Foster Youth: School districts, COEs, and charter schools that have a numerically significant Foster Youth student subgroup are encouraged to include specific actions in the LCAP designed to meet needs specific to Foster Youth students.

Goal Analysis:

Enter the LCAP Year.

Using actual annual measurable outcome data, including data from the Dashboard, analyze whether the planned actions were effective in achieving the goal. Respond to the prompts as instructed.

- Describe the overall implementation of the actions to achieve the articulated goal. Include a discussion of relevant challenges and successes experienced with the implementation process. This must include any instance where the LEA did not implement a planned action or implemented a planned action in a manner that differs substantively from how it was described in the adopted LCAP.
- Explain material differences between Budgeted Expenditures and Estimated Actual Expenditures and between the Planned Percentages of Improved Services and Estimated Actual Percentages of Improved Services, as applicable. Minor variances in expenditures or percentages do not need to be addressed, and a dollar-for-dollar accounting is not required.
- Describe the effectiveness of the specific actions to achieve the articulated goal as measured by the LEA. In some cases, not all actions in a goal will be intended to improve performance on all of the metrics associated with the goal. When responding to this prompt, LEAs may assess the effectiveness of a single action or group of actions within the goal in the context of performance on a single metric or group of specific metrics within the goal that are applicable to the action(s). Grouping actions with metrics will allow for more robust analysis of whether the strategy the LEA is using to impact a specified set of metrics is working and increase transparency for educational partners. LEAs are encouraged to use such an approach when goals include multiple actions and metrics that are not closely associated.
- Describe any changes made to this goal, expected outcomes, metrics, or actions to achieve this goal as a result of this analysis and analysis of the data provided in the Dashboard or other local data, as applicable.

Increased or Improved Services for Foster Youth, English Learners, and Low-Income Students

Purpose

A well-written Increased or Improved Services section provides educational partners with a comprehensive description, within a single dedicated section, of how an LEA plans to increase or improve services for its unduplicated students in grades TK–12 as compared to all students in grades TK–12, as applicable, and how LEA-wide or schoolwide actions identified for this purpose meet regulatory requirements. Descriptions provided should include sufficient detail yet be sufficiently succinct to promote a broader understanding of educational partners to facilitate their ability to provide input. An LEA’s description in this section must align with the actions included in the Goals and Actions section as contributing.

Requirements and Instructions

Projected LCFF Supplemental and/or Concentration Grants: Specify the amount of LCFF supplemental and concentration grant funds the LEA estimates it will receive in the coming year based on the number and concentration of low income, foster youth, and English learner students.

Projected Additional LCFF Concentration Grant (15 percent): Specify the amount of additional LCFF concentration grant add-on funding, as described in EC Section 42238.02, that the LEA estimates it will receive in the coming year.

Projected Percentage to Increase or Improve Services for the Coming School Year: Specify the estimated percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the LCAP year as calculated pursuant to 5 CCR Section 15496(a)(7).

LCFF Carryover — Percentage: Specify the LCFF Carryover — Percentage identified in the LCFF Carryover Table. If a carryover percentage is not identified in the LCFF Carryover Table, specify a percentage of zero (0.00%).

LCFF Carryover — Dollar: Specify the LCFF Carryover — Dollar amount identified in the LCFF Carryover Table. If a carryover amount is not identified in the LCFF Carryover Table, specify an amount of zero (\$0).

Total Percentage to Increase or Improve Services for the Coming School Year: Add the Projected Percentage to Increase or Improve Services for the Coming School Year and the Proportional LCFF Required Carryover Percentage and specify the percentage. This is the LEAs percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the LCAP year, as calculated pursuant to 5 CCR Section 15496(a)(7).

Required Descriptions:

For each action being provided to an entire school, or across the entire school district or COE, an explanation of (1) how the needs of foster youth, English learners, and low-income students were considered first, and (2) how these actions are effective in meeting the goals for these students.

For each action included in the Goals and Actions section as contributing to the increased or improved services requirement for unduplicated pupils and provided on an LEA-wide or schoolwide basis, the LEA must include an explanation consistent with 5 CCR Section 15496(b). For any such actions continued into the 2021–24 LCAP from the 2017–2020 LCAP, the LEA must determine whether or not the action was effective as expected, and this determination must reflect evidence of outcome data or actual implementation to date.

Principally Directed and Effective: An LEA demonstrates how an action is principally directed towards and effective in meeting the LEA’s goals for unduplicated students when the LEA explains how:

- It considers the needs, conditions, or circumstances of its unduplicated pupils;
- The action, or aspect(s) of the action (including, for example, its design, content, methods, or location), is based on these considerations; and
- The action is intended to help achieve an expected measurable outcome of the associated goal.

As such, the response provided in this section may rely on a needs assessment of unduplicated students.

Conclusory statements that a service will help achieve an expected outcome for the goal, without an explicit connection or further explanation as to how, are not sufficient. Further, simply stating that an LEA has a high enrollment percentage of a specific student group or groups does not meet the increase or improve services standard because enrolling students is not the same as serving students.

For example, if an LEA determines that low-income students have a significantly lower attendance rate than the attendance rate for all students, it might justify LEA-wide or schoolwide actions to address this area of need in the following way:

After assessing the needs, conditions, and circumstances of our low-income students, we learned that the attendance rate of our low-income students is 7 percent lower than the attendance rate for all students. (Needs, Conditions, Circumstances [Principally Directed])

In order to address this condition of our low-income students, we will develop and implement a new attendance program that is designed to address some of the major causes of absenteeism, including lack of reliable transportation and food, as well as a school climate that does not emphasize the importance of attendance. Goal N, Actions X, Y, and Z provide additional transportation and nutritional resources as well as a districtwide educational campaign on the benefits of high attendance rates. (Contributing Action[s])

These actions are being provided on an LEA-wide basis and we expect/hope that all students with less than a 100 percent attendance rate will benefit. However, because of the significantly lower attendance rate of low-income students, and because the actions meet needs most associated with the chronic stresses and experiences of a socio-economically disadvantaged status, we expect that the attendance rate for our low-income students will increase significantly more than the average attendance rate of all other students. (Measurable Outcomes [Effective In])

COEs and Charter Schools: Describe how actions included as contributing to meeting the increased or improved services requirement on an LEA-wide basis are principally directed to and effective in meeting its goals for unduplicated pupils in the state and any local priorities as described above. In the case of COEs and charter schools, schoolwide and LEA-wide are considered to be synonymous.

For School Districts Only:

Actions Provided on an LEA-Wide Basis:

Unduplicated Percentage > 55 percent: For school districts with an unduplicated pupil percentage of 55 percent or more, describe how these actions are principally directed to and effective in meeting its goals for unduplicated pupils in the state and any local priorities as described above.

Unduplicated Percentage < 55 percent: For school districts with an unduplicated pupil percentage of less than 55 percent, describe how these actions are principally directed to and effective in meeting its goals for unduplicated pupils in the state and any local priorities. Also describe how the actions **are the most effective use of the funds** to meet these goals for its unduplicated pupils. Provide the basis for this determination, including any alternatives considered, supporting research, experience, or educational theory.

Actions Provided on a Schoolwide Basis:

School Districts must identify in the description those actions being funded and provided on a schoolwide basis, and include the required description supporting the use of the funds on a schoolwide basis.

For schools with 40 percent or more enrollment of unduplicated pupils: Describe how these actions are principally directed to and effective in meeting its goals for its unduplicated pupils in the state and any local priorities.

For school districts expending funds on a schoolwide basis at a school with less than 40 percent enrollment of unduplicated pupils: Describe how these actions are principally directed to and how the actions are the most effective use of the funds to meet its goals for foster youth, English learners, and low-income students in the state and any local priorities.

A description of how services for foster youth, English learners, and low-income students are being increased or improved by the percentage required.

Consistent with the requirements of 5 CCR Section 15496, describe how services provided for unduplicated pupils are increased or improved by at least the percentage calculated as compared to the services provided for all students in the LCAP year. To improve services means to grow services in quality and to increase services means to grow services in quantity. Services are increased or improved by those actions in the LCAP that are included in the Goals and Actions section as contributing to the increased or improved services requirement, whether they are provided on an LEA-wide or schoolwide basis or provided on a limited basis to unduplicated students. A limited action is an action that only serves foster youth, English learners, and/or low-income students. This description must address how these action(s) are expected to result in the required proportional increase or improvement in services for unduplicated pupils as compared to the services the LEA provides to all students for the relevant LCAP year.

For any action contributing to meeting the increased or improved services requirement that is associated with a Planned Percentage of Improved Services in the Contributing Summary Table rather than an expenditure of LCFF funds, describe the methodology that was used to determine the contribution of the action towards the proportional percentage. See the instructions for determining the Planned Percentage of Improved Services for information on calculating the Percentage of Improved Services.

A description of the plan for how the additional concentration grant add-on funding identified above will be used to increase the number of staff providing direct services to students at schools that have a high concentration (above 55 percent) of foster youth, English learners, and low-income students, as applicable.

An LEA that receives the additional concentration grant add-on described in EC Section 42238.02 is required to demonstrate how it is using these funds to increase the number of staff who provide direct services to students at schools with an enrollment of unduplicated students that is greater than 55 percent as compared to the number of staff who provide direct services to students at schools with an enrollment of unduplicated students that is equal to or less than 55 percent. The staff who provide direct services to students must be certificated staff and/or classified staff employed by the LEA; classified staff includes custodial staff.

Provide the following descriptions, as applicable to the LEA:

An LEA that does not receive a concentration grant or the concentration grant add-on must indicate that a response to this prompt is not applicable.

Identify the goal and action numbers of the actions in the LCAP that the LEA is implementing to meet the requirement to increase the number of staff who provide direct services to students at schools with an enrollment of unduplicated students that is greater than 55 percent.

An LEA that does not have comparison schools from which to describe how it is using the concentration grant add-on funds, such as an LEA that only has schools with an enrollment of unduplicated students that is greater than 55 percent, must describe how it is using the funds to increase the number of credentialed staff, classified staff, or both, including custodial staff, who provide direct services to students at selected schools and the criteria used to determine which schools require additional staffing support.

In the event that an additional concentration grant add-on is not sufficient to increase staff providing direct services to students at a school with an enrollment of unduplicated students that is greater than 55 percent, the LEA must describe how it is using the funds to retain staff providing direct services to students at a school with an enrollment of unduplicated students that is greater than 55 percent.

Complete the table as follows:

- Provide the staff-to-student ratio of classified staff providing direct services to students with a concentration of unduplicated students that is 55 percent or less and the staff-to-student ratio of classified staff providing direct services to students at schools with a concentration of unduplicated students that is greater than 55 percent, as applicable to the LEA. The LEA may group its schools by grade span (Elementary, Middle/Junior High, and High Schools), as applicable to the LEA. The staff-to-student ratio must be based on the number of full time equivalent (FTE) staff and the number of enrolled students as counted on the first Wednesday in October of each year.
- Provide the staff-to-student ratio of certificated staff providing direct services to students at schools with a concentration of unduplicated students that is 55 percent or less and the staff-to-student ratio of certificated staff providing direct services to students at schools with a concentration of unduplicated students that is greater than 55 percent, as applicable to the LEA. The LEA may group its schools by grade span (Elementary, Middle/Junior High, and High Schools), as applicable to the LEA. The staff-to-student ratio must be based on the number of FTE staff and the number of enrolled students as counted on the first Wednesday in October of each year.

Action Tables

Complete the Data Entry Table for each action in the LCAP. The information entered into this table will automatically populate the other Action Tables. Information is only entered into the Data Entry Table, the Annual Update Table, the Contributing Actions Annual Update Table, and the LCFF Carryover Table. With the exception of the Data Entry Table, the word “input” has been added to column headers to aid in identifying the column(s) where information will be entered. Information is not entered on the remaining Action tables.

The following tables are required to be included as part of the LCAP adopted by the local governing board or governing body:

- Table 1: Total Planned Expenditures Table (for the coming LCAP Year)

- Table 2: Contributing Actions Table (for the coming LCAP Year)
- Table 3: Annual Update Table (for the current LCAP Year)
- Table 4: Contributing Actions Annual Update Table (for the current LCAP Year)
- Table 5: LCFF Carryover Table (for the current LCAP Year)

Note: The coming LCAP Year is the year that is being planned for, while the current LCAP year is the current year of implementation. For example, when developing the 2022–23 LCAP, 2022–23 will be the coming LCAP Year and 2021–22 will be the current LCAP Year.

Data Entry Table

The Data Entry Table may be included in the LCAP as adopted by the local governing board or governing body, but is not required to be included. In the Data Entry Table, input the following information for each action in the LCAP for that applicable LCAP year:

- **LCAP Year:** Identify the applicable LCAP Year.
- **1. Projected LCFF Base Grant:** Provide the total amount of LCFF funding the LEA estimates it will receive for the coming school year, excluding the supplemental and concentration grants and the add-ons for the Targeted Instructional Improvement Grant Program and the Home to School Transportation Program, pursuant to 5 CCR Section 15496(a)(8).

See *EC* sections 2574 (for COEs) and 42238.02 (for school districts and charter schools), as applicable, for LCFF apportionment calculations.

- **2. Projected LCFF Supplemental and/or Concentration Grants:** Provide the total amount of LCFF supplemental and concentration grants the LEA estimates it will receive on the basis of the number and concentration of unduplicated students for the coming school year.
- **3. Projected Percentage to Increase or Improve Services for the Coming School Year:** This percentage will not be entered; it is calculated based on the Projected LCFF Base Grant and the Projected LCFF Supplemental and/or Concentration Grants, pursuant to 5 CCR Section 15496(a)(8). This is the percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the coming LCAP year.
- **LCFF Carryover — Percentage:** Specify the LCFF Carryover — Percentage identified in the LCFF Carryover Table from the prior LCAP year. If a carryover percentage is not identified in the LCFF Carryover Table, specify a percentage of zero (0.00%).
- **Total Percentage to Increase or Improve Services for the Coming School Year:** This percentage will not be entered; it is calculated based on the Projected Percentage to Increase or Improve Services for the Coming School Year and the LCFF Carryover —

Percentage. This is the percentage by which the LEA must increase or improve services for unduplicated pupils as compared to the services provided to all students in the coming LCAP year.

- **Goal #:** Enter the LCAP Goal number for the action.
- **Action #:** Enter the action's number as indicated in the LCAP Goal.
- **Action Title:** Provide a title of the action.
- **Student Group(s):** Indicate the student group or groups who will be the primary beneficiary of the action by entering "All," or by entering a specific student group or groups.
- **Contributing to Increased or Improved Services?:** Type "Yes" if the action **is** included as contributing to meeting the increased or improved services; OR, type "No" if the action is **not** included as contributing to meeting the increased or improved services.
- If "Yes" is entered into the Contributing column, then complete the following columns:
 - **Scope:** The scope of an action may be LEA-wide (i.e., districtwide, countywide, or charterwide), schoolwide, or limited. An action that is LEA-wide in scope upgrades the entire educational program of the LEA. An action that is schoolwide in scope upgrades the entire educational program of a single school. An action that is limited in its scope is an action that serves only one or more unduplicated student groups.
 - **Unduplicated Student Group(s):** Regardless of scope, contributing actions serve one or more unduplicated student groups. Indicate one or more unduplicated student groups for whom services are being increased or improved as compared to what all students receive.
 - **Location:** Identify the location where the action will be provided. If the action is provided to all schools within the LEA, the LEA must indicate "All Schools." If the action is provided to specific schools within the LEA or specific grade spans only, the LEA must enter "Specific Schools" or "Specific Grade Spans." Identify the individual school or a subset of schools or grade spans (e.g., all high schools or grades transitional kindergarten through grade five), as appropriate.
- **Time Span:** Enter "ongoing" if the action will be implemented for an indeterminate period of time. Otherwise, indicate the span of time for which the action will be implemented. For example, an LEA might enter "1 Year," or "2 Years," or "6 Months."
- **Total Personnel:** Enter the total amount of personnel expenditures utilized to implement this action.
- **Total Non-Personnel:** This amount will be automatically calculated based on information provided in the Total Personnel column and the Total Funds column.

- **LCFF Funds:** Enter the total amount of LCFF funds utilized to implement this action, if any. LCFF funds include all funds that make up an LEA’s total LCFF target (i.e., base grant, grade span adjustment, supplemental grant, concentration grant, Targeted Instructional Improvement Block Grant, and Home-To-School Transportation).
 - **Note:** For an action to contribute towards meeting the increased or improved services requirement it must include some measure of LCFF funding. The action may also include funding from other sources, however the extent to which an action contributes to meeting the increased or improved services requirement is based on the LCFF funding being used to implement the action.
- **Other State Funds:** Enter the total amount of Other State Funds utilized to implement this action, if any.
- **Local Funds:** Enter the total amount of Local Funds utilized to implement this action, if any.
- **Federal Funds:** Enter the total amount of Federal Funds utilized to implement this action, if any.
- **Total Funds:** This amount is automatically calculated based on amounts entered in the previous four columns.
- **Planned Percentage of Improved Services:** For any action identified as contributing, being provided on a Limited basis to unduplicated students, and that does not have funding associated with the action, enter the planned quality improvement anticipated for the action as a percentage rounded to the nearest hundredth (0.00%). A limited action is an action that only serves foster youth, English learners, and/or low-income students.
 - As noted in the instructions for the Increased or Improved Services section, when identifying a Planned Percentage of Improved Services, the LEA must describe the methodology that it used to determine the contribution of the action towards the proportional percentage. The percentage of improved services for an action corresponds to the amount of LCFF funding that the LEA estimates it would expend to implement the action if it were funded.

For example, an LEA determines that there is a need to analyze data to ensure that instructional aides and expanded learning providers know what targeted supports to provide to students who are foster youth. The LEA could implement this action by hiring additional staff to collect and analyze data and to coordinate supports for students, which the LEA estimates would cost \$165,000. Instead, the LEA chooses to utilize a portion of existing staff time to analyze data relating to students who are foster youth. This analysis will then be shared with site principals who will use the data to coordinate services provided by instructional assistants and expanded learning providers to target support to students. In this example, the LEA would divide the estimated cost of \$165,000 by the amount of LCFF Funding identified in the Data Entry Table and then convert the quotient to a percentage. This percentage is the Planned Percentage of Improved Service for the action.

Contributing Actions Table

As noted above, information will not be entered in the Contributing Actions Table; however, the ‘Contributing to Increased or Improved Services?’ column will need to be checked to ensure that only actions with a “Yes” are displaying. If actions with a “No” are displayed or if actions that are contributing are not displaying in the column, use the drop-down menu in the column header to filter only the “Yes” responses.

Annual Update Table

In the Annual Update Table, provide the following information for each action in the LCAP for the relevant LCAP year:

- **Estimated Actual Expenditures:** Enter the total estimated actual expenditures to implement this action, if any.

Contributing Actions Annual Update Table

In the Contributing Actions Annual Update Table, check the ‘Contributing to Increased or Improved Services?’ column to ensure that only actions with a “Yes” are displaying. If actions with a “No” are displayed or if actions that are contributing are not displaying in the column, use the drop-down menu in the column header to filter only the “Yes” responses. Provide the following information for each contributing action in the LCAP for the relevant LCAP year:

- **6. Estimated Actual LCFF Supplemental and/or Concentration Grants:** Provide the total amount of LCFF supplemental and concentration grants the LEA estimates it will actually receive based on of the number and concentration of unduplicated students in the current school year.
- **Estimated Actual Expenditures for Contributing Actions:** Enter the total estimated actual expenditure of LCFF funds used to implement this action, if any.
- **Estimated Actual Percentage of Improved Services:** For any action identified as contributing, being provided on a Limited basis only to unduplicated students, and that does not have funding associated with the action, enter the total estimated actual quality improvement anticipated for the action as a percentage rounded to the nearest hundredth (0.00%).
 - Building on the example provided above for calculating the Planned Percentage of Improved Services, the LEA in the example implements the action. As part of the annual update process, the LEA reviews implementation and student outcome data and determines that the action was implemented with fidelity and that outcomes for foster youth students improved. The LEA reviews the original estimated cost for the action and determines that had it hired additional staff to collect and analyze data and to coordinate supports for students that estimated actual cost would have been \$169,500 due to a cost of living adjustment. The LEA would divide the estimated actual cost of \$169,500 by the amount of LCFF Funding identified in the Data Entry Table and then convert the quotient to a percentage. This percentage is the Estimated Actual Percentage of Improved Services for the action.

LCFF Carryover Table

- **9. Estimated Actual LCFF Base Grant:** Provide the total amount of LCFF funding the LEA estimates it will receive for the current school year, excluding the supplemental and concentration grants and the add-ons for the Targeted Instructional Improvement Grant Program and the Home to School Transportation Program, pursuant to 5 CCR Section 15496(a)(8).

- **10. Total Percentage to Increase or Improve Services for the Current School Year:** This percentage will not be entered. The percentage is calculated based on the amounts of the Estimated Actual LCFF Base Grant (9) and the Estimated Actual LCFF Supplemental and/or Concentration Grants (6), pursuant to 5 CCR Section 15496(a)(8), plus the LCFF Carryover – Percentage from the prior year. This is the percentage by which services for unduplicated pupils must be increased or improved as compared to the services provided to all students in the current LCAP year.

Calculations in the Action Tables

To reduce the duplication of effort of LEAs, the Action Tables include functionality such as pre-population of fields and cells based on the information provided in the Data Entry Table, the Annual Update Summary Table, and the Contributing Actions Table. For transparency, the functionality and calculations used are provided below.

Contributing Actions Table

- 4. Total Planned Contributing Expenditures (LCFF Funds)
 - This amount is the total of the Planned Expenditures for Contributing Actions (LCFF Funds) column
- 5. Total Planned Percentage of Improved Services
 - This percentage is the total of the Planned Percentage of Improved Services column
- Planned Percentage to Increase or Improve Services for the coming school year (4 divided by 1, plus 5)
 - This percentage is calculated by dividing the Total Planned Contributing Expenditures (4) by the Projected LCFF Base Grant (1), converting the quotient to a percentage, and adding it to the Total Planned Percentage of Improved Services (5).

Contributing Actions Annual Update Table

Pursuant to *EC* Section 42238.07(c)(2), if the Total Planned Contributing Expenditures (4) is less than the Estimated Actual LCFF Supplemental and Concentration Grants (6), the LEA is required to calculate the difference between the Total Planned Percentage of Improved Services (5) and the Total Estimated Actual Percentage of Improved Services (7). If the Total Planned Contributing Expenditures (4) is equal to or greater than the Estimated Actual LCFF Supplemental and Concentration Grants (6), the Difference Between Planned and Estimated Actual Percentage of Improved Services will display “Not Required.”

- 6. Estimated Actual LCFF Supplemental and Concentration Grants
 - This is the total amount of LCFF supplemental and concentration grants the LEA estimates it will actually receive based on of the number and concentration of unduplicated students in the current school year.
- 4. Total Planned Contributing Expenditures (LCFF Funds)
 - This amount is the total of the Last Year's Planned Expenditures for Contributing Actions (LCFF Funds)

- 7. Total Estimated Actual Expenditures for Contributing Actions
 - This amount is the total of the Estimated Actual Expenditures for Contributing Actions (LCFF Funds)
- Difference Between Planned and Estimated Actual Expenditures for Contributing Actions (Subtract 7 from 4)
 - This amount is the Total Estimated Actual Expenditures for Contributing Actions (7) subtracted from the Total Planned Contributing Expenditures (4)
- 5. Total Planned Percentage of Improved Services (%)
 - This amount is the total of the Planned Percentage of Improved Services column
- 8. Total Estimated Actual Percentage of Improved Services (%)
 - This amount is the total of the Estimated Actual Percentage of Improved Services column
- Difference Between Planned and Estimated Actual Percentage of Improved Services (Subtract 5 from 8)
 - This amount is the Total Planned Percentage of Improved Services (5) subtracted from the Total Estimated Actual Percentage of Improved Services (8)

LCFF Carryover Table

- 10. Total Percentage to Increase or Improve Services for the Current School Year (6 divided by 9 + Carryover %)
 - This percentage is the Estimated Actual LCFF Supplemental and/or Concentration Grants (6) divided by the Estimated Actual LCFF Base Grant (9) plus the LCFF Carryover – Percentage from the prior year.
- 11. Estimated Actual Percentage of Increased or Improved Services (7 divided by 9, plus 8)
 - This percentage is the Total Estimated Actual Expenditures for Contributing Actions (7) divided by the LCFF Funding (9), then converting the quotient to a percentage and adding the Total Estimated Actual Percentage of Improved Services (8).
- 12. LCFF Carryover — Dollar Amount LCFF Carryover (Subtract 11 from 10 and multiply by 9)
 - If the Estimated Actual Percentage of Increased or Improved Services (11) is less than the Estimated Actual Percentage to Increase or Improve Services (10), the LEA is required to carry over LCFF funds.

The amount of LCFF funds is calculated by subtracting the Estimated Actual Percentage to Increase or Improve Services (11) from the Estimated Actual Percentage of Increased or Improved Services (10) and then multiplying by the Estimated Actual LCFF Base Grant (9). This amount is the amount of LCFF funds that is required to be carried over to the coming year.

- 13. LCFF Carryover — Percentage (12 divided by 9)
 - This percentage is the unmet portion of the Percentage to Increase or Improve Services that the LEA must carry over into the coming LCAP year. The percentage is calculated by dividing the LCFF Carryover (12) by the LCFF Funding (9).

California Department of Education
January 2022
