

If your student has tested positive for COVID-19, please follow the [CDC](#) and [Utah Department of Health and Human Services](#) guidelines for isolation before having them return to campus. Please note the recommendation is to mask around others for 5 days after isolation ends.

This is a handy [calculator](#) for figuring out how long your student needs to isolate.

Please email your student's division (see below for specific email address) each day that your student needs to stay home so that we can keep track of when to expect them back on campus.

For Middle and Upper School students: If they are feeling well enough, have them check Canvas and email their teachers to find out what they can work on from home.

For Beginning and Lower School students: If they are feeling well enough, reach out to your student's teacher to see if there is anything they can work on from home.

Take time to [notify individuals](#) who were within 6 feet of your student for more than 15 total minutes in a 24-hour period of time beginning two days before symptoms started.

You can find all of these links and more on rowlandhall.org/health.

Please let us know if you have any questions or concerns.
