THE KING'S ACADEMY

Mission, Vision, and Core Values

Who We Are: The King's Academy is an independent, college preparatory school for grades 6-12 which exists to honor and glorify our King Jesus Christ.

Mission: The King's Academy is a Christ-centered school that inspires academic excellence, servant leadership, and enduring relationships.

Vision: Graduates of The King's Academy are transformed by Christ, live a life that honors God, and use their gifts to influence the world for Him.

Core Values

A Christ-centered School

All school programs are grounded in a Biblical worldview, affirming that true education recognizes God as the supreme source of all truth, knowledge, and wisdom. Faculty and staff are Christian role models who have been called to ministry and have a love for young people. The King's Academy desires that students have teachable hearts and coachable spirits in order to grow in Christian maturity.

Academic Excellence

God's Word calls us to do all things with excellence. The King's Academy offers a college preparatory curriculum with the goal of developing God's best for each student. Highly qualified teachers who are passionate about their subject will challenge and support all students. TKA promotes academic, artistic, and athletic excellence as part of a balanced and joyous education.

Servant Leadership

Local and global service is an integral part of The King's Academy. We engage students to look beyond themselves and reach out to others in love and compassion. We equip students to share the Gospel and provide opportunities for students to contribute their God-given gifts and talents. All students are encouraged to serve the school community and lead by Godly example.

Enduring Relationships

The King's Academy offers a loving environment where students are encouraged to grow in their relationships with Jesus Christ, their families, teachers, and peers. We strive to partner with parents to bring their children up "in the discipline and instruction of the Lord" (*Ephesians 6:4*). Our program includes numerous relationship-building opportunities that create a school culture defined by respect, integrity, and love.

Nondiscriminatory Policy

The King's Academy admits students of any race, color, and national and ethnic origin to all the rights, privileges, programs, and activities generally accorded or made available to students at the school. It does not discriminate on the basis of race, color, or national and ethnic origin in administration of its educational policies, admissions policies, scholarship and loan programs, and athletic and other school-administered programs.

APPENDIX: HIGH SCHOOL ACADEMIC PLANNER	

INTRODUCTION

The King’s Academy 2023-2024 Course Catalog is designed to assist students and parents in selecting courses for the entire school year. All courses offered at The King’s Academy (TKA) are included in this catalog. **However, the school reserves the right to modify all courses and to withdraw courses for which too few students register.**

Academic Policies

For most academic matters, please refer to the “Academic Information” section in the *Student/Parent Handbook*.

The schedule for enrollment, including change deadlines, is as follows:

Course Request Week – Opens 1 st week in February	Students make their initial course selections.
Week prior to school start	Add/Drop by grade level for errors and last-minute changes.
Week 1	No core course changes will be processed, errors only.
Weeks 2-4	Add/Drop with counselors.
	LAST DAY to Add/Drop without a notation on the transcript.
Weeks 5-9	Course may be dropped with a W (withdrawn) notated on the transcript. Courses may not be added for credit during this period.
Week 10 and following	Dropped course will receive an F notated on the transcript.

Yearlong VPA courses may not be added or dropped at the semester break. Full-year enrollment is required.

Honors Courses

Students who wish to participate in an honors class must meet all pre- or co-requisites.

Advanced Placement (AP) Courses

Advanced Placement classes are, in essence, college-level courses. Students who wish to take an AP class must submit an Advanced Placement (AP) Course Student Application to be approved by the AP Committee, and they must meet all pre- or co-requisites. The AP Committee will evaluate every student’s situation individually to ensure their course load is the best for their needs. TKA limits the number of AP courses a student can take by grade-level. TKA limits 9th graders to two (2) AP classes, 10th graders to three (3) AP classes, 11th graders to four (4) AP classes, and 12th grader to five (5) AP classes. **TKA requires every student who takes an AP course to take the AP exam for that course.** A student who is not enrolled in the AP course at TKA may not take the AP exam at TKA. These classes are designed to prepare the students for the national AP exams administered in May. In some cases, colleges and universities award credit to incoming students who have scored well on AP exams. There is a fee to take each AP exam.

Homework Load

These estimates are based on data collected from students in the annual Student Course Surveys. Actual homework load will vary by student.

Junior High (hours per night)		High School (hours per night)	
6 th Grade	Up to 2	9 th Grade	Up to 3
7 th Grade	Up to 2.5	9 th Grade with Honors Classes	Up to 3
8 th Grade	Up to 2.5	10 th Grade	Up to 3
		10 th Grade with Honors and AP Classes	Up to 3.5
		11 th and 12 th Grade	Up to 45 minutes per course
		AP Classes	Up to 60 minutes per course

Course Description Footnote Symbols

- * College preparatory courses meeting the University of California (UC) eligibility requirements are noted by an asterisk (*). Students who meet the UC admissions requirements will also meet requirements for many other universities.

- ^ A caret (^) denotes courses earning an extra grade point, which includes all AP courses and only the following honors courses: **Biology Honors, Chemistry Honors and Spanish 3 Honors**. The letter grade awarded in the course remains the same on the student's transcript, but the extra grade point is calculated into the GPA and noted on the course with an asterisk.

- ▣ A square (▣) signifies that a course has been submitted for UC approval.

The King's Academy High School Graduation Requirements

Subject Area	Total Credits
Bible	10-30 <i>(dependent upon year entered)</i>
Math †	20-30 <i>(at Geometry or higher)</i>
Science**	30
English	40
Social Studies	30
World Languages‡	10-30
Physical Education (9 th grade must take PE)	20
Visual and Performing Arts (VPA)	10
<u>Electives</u>	<u>20 <i>(minimum)</i></u>
Credits Required for Graduation	240 credits

Note: An integral component of TKA's high school curriculum is required annual participation in TKA's service week.

Yearlong classes = 10 credits; semester-long classes = 5 credits

Of the 150 credits required for UC eligibility, 70 credits must be taken in the last two (2) years of high school. In order to qualify for UC eligibility, students must have a C or higher in all required courses.

† *Pre-Algebra will not be awarded high school credit. Completion of math sequence through Geometry is required to be considered college preparatory.*

** *Completion of Biology and Physical Science or Chemistry required*

‡ *Completion of a level of a world language is required in high school. Completion of level three (3) or higher is strongly recommended.*

BIBLE DEPARTMENT

The King's Academy stands firm in the truth that the Bible is the inspired, infallible Word of God. Therefore, it is the primary book used in each of the Bible courses. The main purpose of each course is to present an accurate, thoughtful study of His Word, and to continually explore the practical implications for each student in his or her daily life.

Bible 6: Engaging the Heart Year 1 Year 6

This course takes students on a journey to evaluate the trustworthiness of the Bible and investigate the life, death, and resurrection of Jesus. Students will examine the plot and four significant motifs within the story of Scripture to uncover the Golden thread that connects the Old Testament to the New Testament and how it applies to their lives.

Bible 7: Old Testament Survey Year 7

This course is an Old Testament survey covering Genesis through Malachi. It focuses on Genesis and the thread of redemption throughout the Pentateuch, historical, poetic, and prophetic books, pointing to the coming of the Messiah, Jesus Christ. Students apply biblical wisdom to their lives as they learn about ordinary people who lived imperfect yet active lives of faith in God.

Bible 8: The Life of Christ & The Early Church Year 8

This course focuses on the life of Christ as recorded in Matthew, Mark, and Luke. Lessons are drawn from Christ's sermons, miracles, and parables. The content also includes historical, cultural, and geographical background information on Christ's life, and memory verses taken from the Gospels. In addition, the spread of the gospel as recorded in the Book of Acts is studied and applied to the students' lives. Emphasis is made on the practical relevance of these biblical teachings to the students' faith and lives.

Bible 9: Foundations of Faith 1 Semester 9

This course will challenge students to objectively investigate the roles of faith, trust, and reason in determining the beliefs that we use as the foundational elements to our worldview as Christians. Students will examine the concepts of faith, reality and truth from the perspectives of each of the major worldviews prior to examining some of the core beliefs of Christ-centered Theism. Students will evaluate the claim that the Bible is God's collected book of inerrant revelation using internal and external evidence which include non-Christian sources and historical archaeological discoveries.

Bible 10: Foundations of Faith 2 Semester 10

This course invites students to a deeper study of the Old Testament and to identify basic hermeneutical methods and to be equipped to analyze and exegete different types of genres within the text. Students will understand the difference between exegetical and eisegetical critique in order to formulate and construct personal understanding and arguments for accurate application.

Bible 11: Life of Christ & Spiritual Formation Year 11

This course equips students with basic guidelines, principles, and tools to effectively evaluate the claims, sources, and accounts of Jesus of Nazareth. Student will compare and contrast different beliefs about the deity and humanity of Jesus. Students will understand and differentiate between core theological claims regarding the atonement and test the reliability of the resurrection. Additionally, this course equips students to differentiate between and respond to the seven invitations of Jesus in the journey towards spiritual maturity. Students will examine, compare, and contrast the views of legalistic, moralistic, and relational discipleship.

BIBLE DEPARTMENT (CONT'D)

All seniors are required to take a semester of Doctrine & Apologetics and a semester of one of the following: Christ & Culture, or Leadership, Evangelism, & Discipleship.

Bible 12: Doctrine & Apologetics (Required) Semester

12

This course equips students to examine the major doctrines pertaining to the nature and existence of God, evil, and the nature of man. Students will interact with doctrine in the context of community to exercise critical thinking and gain an appreciation for the significance of reasoned theology in the context of applying their personal worldview. Students will strengthen the skill of defending their theological positions in a contemporary culture of competing worldviews.

Bible 12: Christ & Culture

Semester

12

This course will equip students to identify the tension between the eternal plan of God and the reality of operating in a disintegrated culture. Students will examine the purpose of God for the earth and their role in applying their unique calling in this generation. Students will compare and contrast common approaches to the relationship between Christ and Culture and formulate their own theological perspective and personal plan for application beyond the walls of the classroom.

Bible 12: Leadership, Evangelism, & Discipleship

Semester

12

This course will equip students with the ability to discover, align, and invest in their talents and gifts in ministry in life. Students will develop their unique personal calling and leverage their talents through coaching relationships.

COMPUTER SCIENCE AND ENGINEERING DEPARTMENT

Robotics Engineering and Prog. 1 – JH **Semester** **6-8**
This junior high technology elective course is designed to introduce students to the world of robotics, engineering, and programming. It allows teachers to teach STEM concepts utilizing the LEGO Mindstorm's EV3 Robots. Students learn how to build robots and program basic robot behaviors using motors and rotation, sound, light, touch and ultrasonic sensors. Labs and projects are designed to encourage independent study, creativity, and cooperative teamwork. Key educational concepts in mathematics, engineering design, tradeoffs, system integration, hypothesis and observation, measurement and analysis, and documentation will be reinforced.

Computer Science Discoveries **Semester** **7**
Computer Science Discoveries (CS Discoveries) is an introductory computer science course that empowers students to create authentic artifacts and engage with computer science as a medium for creativity, communication, problem solving, and fun.

Robotics Engineering and Prog. 2 – JH **Semester** **7-8**
This junior high technology elective course builds on the skills and knowledge students were introduced to in Robotics Engineering and Programming 1. Students further develop their understanding and skills building robots and programming basic robot behaviors using motors and rotation, sound, light, touch and ultrasonic sensors. Labs and projects are designed to encourage independent study, creativity, and cooperative teamwork. Key educational concepts in mathematics, engineering design, tradeoffs, system integration, hypothesis and observation, measurement and analysis, and documentation will be reinforced.
Prerequisite: Robotics Engineering and Programming 1 - JH

Creative Computing **Semester** **8**
The Creative Computing course is a beginner computer science course introducing the basics of programming. Students learn JavaScript with Karel and Python with Tracy. Students also create a personal portfolio website in HTML and CSS showcasing projects they build throughout the course.

Audio Engineering and Production **Semester** **9-12**
This course is designed to introduce students to digital audio production. In this course, students will learn the following methodologies and basics: recording, producing, distinction of music genres, digital audio history, introduction to music theory, and the science of sound. In conjunction with this training, students will be able to learn how to properly use the necessary sound equipment and Logic Pro X for audio production.

Audio-Visual Technical Support **Semester** **9-12**
This hands-on course will teach and train students in the understanding and use of professional audio/visual (A/V) equipment for supporting events such as chapels, assemblies, concerts and more. Students who take this course will become "certified users" of the TKA equipment in the W Building, Theater, Gym, and Quad. In this class, students will be required to support weekly Spiritual Life events and a small selection of other non-school-hour events for TKA. (While supporting non-school hour events, students will be paid hourly for their A/V Tech Support.) This course will cover the preparation and use of the TKA soundboards, video systems, presentation software, lighting boards, and pro-audio equipment. This course will also cover event communication, stage design, philosophy of a sound technician, plus basic audio engineering and video production fundamentals.

Computer-Aided Design (CAD) **Semester** **9-12**
In this course, computer-aided design (CAD) and drafting are taught using AutoCAD software. Students will learn basic drafting techniques, geometric constructions, and how to read and create two-dimensional and three-dimensional working drawings. This course will emphasize the use of AutoCAD in an architectural context, but it is also recommended for students interested in engineering and technical fields.
Prerequisite: Completion of or concurrent enrollment in Geometry.

COMPUTER SCIENCE AND ENGINEERING DEPARTMENT (CONT'D)

Introduction to Computer Science 1 **Semester** **9-12**
This course provides an overview of computer science and its related disciplines. Students will begin with the language of computers and how it is used to represent numbers, text, images, and information theory. Students will be introduced to computer programming in JavaScript. Topics include algorithms, flowcharts, branching, and loops. Additional units will cover boolean logic, graphics, logic & comparison operators. Students will complete projects that demonstrate the skills learned. Socratic Seminars will engage the students in real world applications of computer science. Group projects will emphasize collaboration, meeting design requirements, and the engineering process.

Introduction to Computer Science 2 **Semester** **9-12**
This course further explores topics in computer science. Units will examine the development and design of animation & games, events, user input, functions & parameters. JavaScript will be used for programming labs and to develop game apps. Additional units will cover data structures & group projects.
Prerequisites: Completion of Introduction to Computer Science 1

PLTW: Introduction to Engineering Design * **Year** **9-12**
This is a foundation course in the Project Lead The Way (PLTW) Engineering Program. In this course, students are introduced to the engineering profession and a common approach to the solution of engineering problems, an engineering design process. Utilizing the activity-project-problem-based (APB) teaching and learning pedagogy, students will progress from completing structured activities to solving open-ended projects and problems that require them to develop planning, documentation, communication, and other professional skills. Through both individual and collaborative team activities, projects, and problems, students will solve problems as they practice common engineering design and development protocols such as project management and peer review. Students will develop skills in technical representation and documentation of design solutions according to accepted technical standards, and they will use current 3D design and modeling software to represent and communicate solutions. In addition, the development of computational methods that are commonly used in engineering problem solving, including statistical analysis and mathematical modeling, are emphasized. Ethical issues related to professional practice and product development are also presented.

PLTW: Principles of Engineering * **Year** **10-12**
This course is a foundation course of the high school engineering pathway for Project Lead The Way (PLTW). This survey course exposes students to some of the major concepts they will encounter in a postsecondary engineering course of study. Through problems that engage and challenge, students explore a broad range of engineering topics, including mechanisms, the strength of materials and structures, automation, and kinematics. The course applies and concurrently develops secondary level knowledge and skills in mathematics, science, and technology. Students have the opportunity to develop skills and understanding of course activities through activity, project, and problem-based (APB) learning. By solving rigorous and relevant design problems using engineering and science concepts within a collaborative learning environment, APB learning challenges students to continually hone their interpersonal skills, creative abilities, and problem solving skills. Students will also learn how to document their work and communicate solutions to their peers and members of the professional community. It also allows students to develop strategies to enable and direct their own learning.
Prerequisite: Completion of Introduction to Engineering Design

*** Course meets UC eligibility**

All course offerings are subject to minimum enrollment levels and staffing availability.

COMPUTER SCIENCE AND ENGINEERING DEPARTMENT (CONT'D)

AP Computer Science Principles * ^

Year

9-12

This course is centered around seven big ideas: creativity, abstraction, data and information, algorithms, programming, the Internet, and global impact. The course will emphasize computational thinking practices. Students will be expected to connect computing to other disciplines, create computational artifacts and communicate their purpose, use abstraction and analysis to develop models for solving complex problems, and work effectively in teams. This course will prepare students for the through-course assessment that asks students to both explore the implications of computing innovations and create a computer application. The course follows the College Board recommended curriculum.

Prerequisites: Completion of Algebra 2 with an A- or higher, or Algebra 2 Honors with a B- or higher, and AP Committee approval.

AP Computer Science A * ^

Year

10-12

This course introduces students to computer science with fundamental topics that include problem-solving, design strategies and methodologies, organization of data (data structures), approaches to processing data (algorithms), analysis of potential solutions, and the ethical and social implications of computing. The course emphasizes both object-oriented and imperative problem-solving and design. Because the discipline of computer science emphasizes problem solving, a study of the discipline requires a mechanism to express potential solutions precisely and concisely. Any natural language such as English allows inconsistencies and ambiguities. *Therefore, the AP Computer Science A course requires that potential solutions to problems be written in Java programming language.*

Prerequisites: Completion of or concurrent enrollment in Pre-Calculus, completion of AP Computer Science Principles, Introduction to Computer Science or an approved outside course, and AP Committee approval.

* Course meets UC eligibility

^ Earns an extra grade point

All course offerings are subject to minimum enrollment levels and staffing availability.

ENGLISH DEPARTMENT

The King's Academy English Department Literature Selection Philosophy

The English Department of The King's Academy is committed to the rigorous, college-preparatory study of language and literature from different genres and time periods with an aim to explore, analyze, and evaluate a variety of writing styles and voices. The study of any literature is inherently tied to the human condition; therefore, difficult material may appear in some of the course content. These matters are examined through a biblical framework that supports our foundations of faith as a school.

English 6:	Year	6
Literature and Composition		

Choose Your Own Adventure. Literature selections for this class center on the thematic idea of choosing your own adventure. The course is designed to transition students from reading comprehension at an elementary level to literary analysis at a junior high level. Throughout the year, students will be introduced to literary concepts such as characterization, theme, and foreshadowing. Students will read several full-length literary works, along with short stories, poems, biographies and more. Additionally, this course is designed to give students a solid foundation of compositional skills including: sentence-based grammar, vocabulary in context, and other formal mechanics. Composition is taught within the framework of literature, giving students not only a solid foundation in the fundamentals of written discourse, but also challenging them to integrate the concepts of grammar and vocabulary into their writing.

English 7:	Year	7
Literature and Composition		

Pursuing Perseverance, Character, and Hope. Literature selections for this class center on the thematic framework of perseverance, character, and hope as seen in Romans. This course builds on the foundational tools developed in English 6. Throughout the year, students will read and analyze various literary texts, lessons will advance the students' level of compositional skills including essay structure, proofreading, and editing. There is a concentrated focus on sentence-based grammar, vocabulary in context, and other formal mechanics.

English 8:	Year	8
Literature and Composition		

Discovering the Way of Wisdom on Life's Journey. Literature selections for this class center on the thematic idea of discovering wisdom on the journey of life. This course prepares students for the transition to high school level grammar, multi-paragraph essay writing, active reading, and the further development of study skills. Building on the advanced grammar and paragraph structuring from English 7, students further develop the technical and expository essay writing skills necessary for success beyond junior high. Class discussions, creative writing, and projects challenge young readers to develop both critical thinking skills and an appreciation for quality literature, short stories, poetry and non-fiction, and the value of wisdom in literary works.

English 9: *	Year	9
Literature and Composition		

Social Revolution and Spiritual Redemption. Literature selections for this class center on the thematic framework of social revolution and spiritual redemption. In this course, students will be introduced to a variety of classic literature with a particular emphasis on the recognition of literary devices and author's diction. Vocabulary will be developed in the context of reading, and writing will be taught and practiced through the use of formal and informal written analysis of literature, structured essays, and a research assignment.

*** Course meets UC eligibility**

All course offerings are subject to minimum enrollment levels and staffing availability.

ENGLISH DEPARTMENT (CONT'D)

English 9 Honors: * **Year** **9**
Literature and Composition

Social Revolution and Spiritual Redemption. Literature selections for this class center on the thematic framework of social revolution and spiritual redemption. This honors course provides an in-depth study of many of the same hallmark classic works of literature as its English 9 counterpart; however, the class also includes a few key modern titles. Students will spend extensive time on developing key critical analysis skills in discussion, reading, and writing in preparation for future honors and AP courses. Prerequisite: Completion of English 8 with an A- or higher.

English 10: * **Year** **10**
World Literature and Composition

Myth, Madness, and Mayhem: A Primer on the Individual and Society. Literature selections for this class center on the thematic topics of myth, mayhem, and madness. This course focuses on world literature and literary analysis. Students will be introduced to various literary perspectives from around the world through different historical eras including the Classical period, the Renaissance, Romanticism, World War I and II as seen in various novels, plays, short stories, poems, non-fiction books and essays. Writing skills are further developed through formal writing, timed essay writing, and journal writing. In addition, students review grammar and vocabulary in preparation for the SAT.

English 10 Honors: * **Year** **10**
World Literature and Composition

Heroes and Beasts: Examining the Duality of Humanity. Literature selections for this class center on the thematic idea of the dual nature of the human condition. This course is a study in world literature, and the curriculum is designed to give students a sampling of the styles of various countries and cultures throughout history in order to broaden students' perspectives on literature and worldviews. Students will explore the connections between literary archetypes and the problems and privileges of the human condition. Students will learn about ancient Greece, the Renaissance, Romanticism, and World War I and II through novels, plays, short stories, poems, and non-fiction books and essays, and other artistic resources such as art, film, and music to make thematic connections to the literature. This course will focus on developing analytical writing skills through a number of timed essays, take-home essays, research projects, and revision tasks. The writing of reflective journals and personal narratives will also help students grow in their writing skills and prepare for future courses.

Prerequisites: Completion of English 9 with an A- or higher, or English 9 Honors with a B+ or higher.

American Literature: □ **Year** **11-12**
American Literature and Composition: Freedom Writers

This course will focus on American writers in defense of freedom from tyranny and oppression in many forms. The course explores the thematic idea that good writing is a key component in the creating, maintaining, and protecting liberty. Literature will cover a variety of genres, voices, and historical seasons from the earliest foundations of the country to the present. Students will be able to trace a writer's rhetorical and linguistic choices as they evaluate the impact of these strategies in communicating the writer's central message. Class discussions, rhetorical and literary analysis essays, presentations, projects, and speeches are designed to engage students in understanding a writer's purpose, audience, and subject in conjunction with the literary and structural elements of the text.

Note: Juniors not taking an AP English course will be enrolled in this course. Seniors who have not previously taken this course may be enrolled in the American Literature and Composition: Freedom Writers.

- * Course meets UC eligibility
- Course pending UC approval

All course offerings are subject to minimum enrollment levels and staffing availability.

ENGLISH DEPARTMENT (CONT'D)

AP English Language and Composition * ^ **Year** **11-12**
The AP English Language and Composition course aligns to an introductory college-level rhetoric and writing curriculum, which requires students to develop evidence-based analytic and argumentative essays that proceed through several stages or drafts. Students evaluate, synthesize, and cite research to support their arguments. Throughout the course, students develop a personal style by making appropriate grammatical choices. Additionally, students read and analyze the rhetorical elements and their effects in non-fiction texts, including graphic images as forms of text, from many disciplines and historical periods.
Prerequisites: Completion of English 10 or American Literature with an A- or higher, or English 10 Honors or AP English Literature and Composition with a B+ or higher, and AP Committee Approval.

AP English Literature and Composition * ^ **Year** **11-12**
Advanced Placement English Literature and Composition is a college-level course focusing on literary analysis, critical thinking, and expository writing. Style, structure, and techniques of writing are taught with the goal of developing a literary sensibility and academic voice. The power of literature to deepen and broaden the range of human experience and awareness is also explored as students work through various pieces of literature, including novels, short stories, and poetry, all with an eye toward critical analysis. Through close reading, students must analyze and write in a variety of modes, including visual media, for a variety of audiences, developing a sense of personal style and an ability to analyze and articulate how the resources of language operate in any given text. In concert with the College Board's AP English course description, this course teaches "students to read primary and secondary sources carefully, to synthesize material from these texts in their own compositions, and to cite sources using conventions recommended by professional organizations such as the Modern Language Association." Featured authors include (but are not limited to) William Faulkner, George Orwell, Fyodor Dostoevsky, Cormac McCarthy, Shakespeare, Albert Camus, Mary Shelley, Zora Neale Hurston, Joseph Conrad and others. The course follows the College Board recommended curriculum.
Prerequisites: Completion of English 10 or American Literature with an A- or higher, or English 10 Honors or AP English Language and Composition with a B+ or higher, and AP Committee approval.

British Literature: □ **Year** **12**
British Literature: The Journey to be a Knight
This explores the concept of knighthood both historically and in the modern day; literary selections will range from classic texts featuring legendary knights, *Beowulf*, *Sir Gawain*, *King Arthur*, and "The Knight's Tale" from *Canterbury Tales*; a few Shakespearean knights as seen in *Hamlet*, selections from: *Much Ado About Nothing*, *Henry V*, *Othello* (time allowing). One major theme that the course explores is the journey to knighthood requires a warrior to face some type of monster. A study of modern, nonfictional knights will be interspersed with the classics, along with some exploration of the challenges of spreading imperialism. These texts together will create a balance of epic fictional narratives of others alongside the personal journey to knighthood from biographical sources, and the self. Units of study incorporate a variety of writing exercises to express critical reading and thinking skills; it will also emphasize rhetorical style, structure, research and other vital techniques of writing.
Note: Seniors who have previously taken American Literature & Composition: Freedom Writers and are not currently enrolled in an AP English course will be enrolled in this course.

- * Course meets UC eligibility
- Course pending UC approval
- ^ Earns an extra grade point

All course offerings are subject to minimum enrollment levels and staffing availability.

ENGLISH ELECTIVES

Folklore, Legends & Writing - JH

Semester

6-8

This course will introduce students to the common American Folklore and Legends which are often alluded to in the higher levels of and more sophisticated literature they will find in high school and college. Students will practice grade-level reading and writing skills through literary analysis and creative writing based on the folklore and legends they are reading.

Speaking with Confidence - JH

Semester

6-8

This course provides students with the opportunity to significantly improve their public speaking skills by practicing and delivering speeches and presentations. Students will learn to speak publicly in a convincing, confident, and concise style, and to identify and apply key skills for making effective presentations. The course will introduce interviews, storytelling, persuasive speaking, impromptu, and other types of speeches. The main components of this class will be critical thinking and speaking techniques.

Introduction to Debate - JH

Semester

7-8

This course provides students with a foundation in debate by teaching the skills of research, critical thinking, and debate techniques. Students will learn to analyze topics, form logical arguments, and think critically. The course will introduce competition-style events including policy debate and the Lincoln-Douglas debate. Students will build skills in arguing both sides of an issue as well as defending their argument with logic and quality research. This course is designed to be hands-on, with an emphasis on quick, analytical thinking, and convincing logical arguments.

Advanced Speech & Debate

Year

9-12

The purpose of this course is to provide competitive speech and debate students an opportunity to continue to improve their communication skills through the process of in-depth study of the many areas of speech communication. Students will apply knowledge and skills acquired in Beginning Speech and Debate to an understanding of Extemporaneous Speaking, Duo Interpretation, Original Oratory, Impromptu Speech, Public Forum Debate, Parliamentary Debate, and Lincoln Douglas Debate. Students will develop skills in composing and delivering rhetoric in a variety of individual and team speeches and debates. Major categories of study will be history of logic and rhetoric, development of performance practices for interpretation events, delivery of persuasive speeches, delivery of spontaneous speeches, and delivery of cases in debate events.

Note: Students enrolled in this class must be willing to compete in debate competitions outside of the school day or on weekends.

Creative Writing

Semester

9-12

With an emphasis on short fiction and poetry, this course is an introduction to and a celebration of the elements of quality creative writing. This hands-on, workshop-style class is for students who appreciate the creative use of figurative language and also seek to enhance, expand, and improve both their expository and creative writing skills.

Public Speaking and Debate

Semester/Year

9-12

This course provides students with the opportunity to significantly improve their critical thinking, speaking, analytical and rhetorical skills by practicing and delivering various speeches, and presentations, and engaging in both informal and academic debate. Students will learn to speak publicly in a convincing, confident, and concise style, and identify and apply key skills of effective public speaking. They will master the skills required to track complex arguments, ask key questions, and refute claims. Students who successfully complete this course will be invited to compete on the TKA Debate team.

MATHEMATICS DEPARTMENT

Math 6

Year

6

This course helps build a strong foundation in all areas of math to prepare students for success in General Math and Pre-Algebra. Content areas include operations with fractions and decimals, integers, ratios, rates, percentages, surface area, volume, as well as algebraic expressions, equations, and inequalities. Sixth grade students who complete this course will be on track to complete the standard college preparatory program.

General Math

Year

6-7

This course prepares students for Pre-Algebra. Basic mathematical concepts and skills are reviewed and reinforced including the study of: integers; rational numbers such as fractions; decimals; expressions and basic linear equations; ratios and percentages; angles and geometric figures; circumference and perimeter; surface area and volume; and probability. General Math does not count as a high-school college preparatory course, even if taken in high school.

Pre-Algebra

Year

6-8

In this course, students will study multi-step equations, linear equations, functions, radicals, integer exponents, scientific notation, unit conversions, congruent and similar figures, angle relationships, data analysis, volumes of solids, and applications of the Pythagorean Theorem. This class is required for students who plan to take Algebra 1. Pre-Algebra does not count as a high-school college preparatory course, even if taken in high school.

Algebra 1 *

Year

7-10

This introductory high school level course focuses on algebraic thinking and multiple representations, including verbal, numeric, symbolic, and graphical representations. This course covers topics including: exponents and roots; simplifying radicals; simplifying expressions; absolute value and equations; solving and graphing linear equations and inequalities; solving systems of equations; simplifying polynomial expressions; factoring polynomials; graphing and solving quadratic equations by factoring, completing the square, and quadratic formula. A scientific calculator is required.

Prerequisite: Completion of Pre-Algebra with a B- or higher.

Note: Students enrolled in this course during 6th–8th grade must earn a final grade of B or higher to enroll in Geometry. High school students who do not pass the second-semester final exam with a grade of C- or higher and/or do not earn a second-semester grade of B- or higher should take a summer Algebra 1 remedial course.

Geometry *

Year

8-10

This course will use fun, practical problems, creative projects, and a review of the skills and concepts developed in Algebra 1 to train students in geometry topics. Such topics include the use of inductive and deductive reasoning to understand plane, coordinate, and solid geometry, including relationships between points, lines, angles, and planes. Students will also discover the relationships within and between triangles, quadrilaterals, polygons, circles, and solids; including the topics of congruence, similarity, area, perimeter, volume, and surface area. Students will be trained in the language of geometry in order to write proofs for theorems, write proofs for proving congruence and similarity, understand postulates, and become masters at problem-solving.

Prerequisite: Completion of Algebra 1 with a B or higher (for students up to grade 8) or C- or higher (for students in grade 9 and above)

Geometry Honors *

Year

8-10

This course includes all the material in the regular Geometry course, in addition to more advanced geometry material.

Prerequisites: Completion of Algebra 1 with an A- or higher.

* Course meets UC eligibility

All course offerings are subject to minimum enrollment levels and staffing availability.

MATHEMATICS DEPARTMENT (CONT'D)

Algebra 1A/1B □

2-Year

9-10

Algebra 1A and Algebra 1B is a two-year sequence of courses covering the same content as the one-year Algebra 1 course. Extra emphasis will be placed on the remediation of prerequisite skills and problem-solving in order to ensure that all students can successfully master the content standards for Algebra 1. The course begins with a brief review of pre-algebra topics (solving linear equations, simplification of phrases involving variables, and writing equations from word problems), and advances to an exploration of quadratic, linear, and exponential functions and systems of linear functions. Students are awarded 5 credits for the successful completion of Algebra 1A and 5 credits for the successful completion of Algebra 1B.

Algebra 2 *

Year

9-11

This course is designed to solidify the foundational algebraic concepts originally introduced in Algebra 1, while expanding the student's understanding of more advanced topics that will prove necessary in higher-level math courses. Topics covered include: linear equations; quadratics; polynomials; function transformation; complex numbers; logarithmic; trigonometric; rational, and radical functions.

Prerequisites: Completion of Algebra 1 with a B or higher and Geometry with a C- or higher.

Algebra 2 Honors *

Year

9-11

Algebra 2 Honors is a second-year, enriched algebra course. It runs at a faster pace and includes more challenging problems than regular Algebra 2. Topics covered are the same as Algebra 2, but also include probability and statistics.

Prerequisites: Completion of Algebra 1 and Geometry with an A- or higher or Geometry Honors with a B+ or higher.

Financial Mathematics

Year

10-12

This course is designed to give students experience with practical applications of the math skills they have learned in school. The emphasis is on application to their lives now and to their future financial decisions. The first semester covers personal finances including calculating income, account and credit card interest, loan payments, auto and housing costs, and investments. The second semester covers business finances including production, purchasing, marketing, accounting, and financial management.

Pre-Calculus *

Year

10-12

Pre-Calculus covers algebra review; plane trigonometry; plane analytic geometry; complex numbers; polynomial functions; elementary probability; vectors; and matrices.

Prerequisites: Completion of Algebra 2 or Algebra 2 Honors with a C- or higher.

AP Pre-Calculus □ ^

Year

10-12

This course follows the College Board-recommended curriculum. Topics include Polynomial and Rational Functions, Exponential and Logarithmic Functions, Trigonometric and Polar Functions, and Functions involving Parameters, Vectors, and Matrices.

Prerequisites: Completion of Algebra 2 Honors with a B+ or higher, completion of General Algebra 2 with an A- or higher, a passing grade on a Precalculus Readiness test, and AP Committee approval.

* Course meets UC eligibility

□ Course pending UC approval

^ Earns an extra grade point

All course offerings are subject to minimum enrollment levels and staffing availability.

MATHEMATICS DEPARTMENT (CONT'D)

Calculus * **Year** **11-12**

Calculus (non-AP) will include an extensive review of topics from algebra, trigonometry and analytic geometry that are needed for success in calculus. The course covers the topics normally taught in the first two quarters of a four-quarter college calculus sequence. This course is intended for students who have completed Pre-Calculus but do not intend to take the AP test. It prepares the student to take calculus in college.

Prerequisites: Completion of Pre-Calculus with a B or higher, or Pre-Calculus Honors with a C+ or higher.

AP Calculus AB * ^ **Year** **11-12**

This course follows the College Board recommended curriculum. Topics include the theory of limits; derivatives and integrals of algebraic, logarithmic, exponential, trigonometric, and inverse trigonometric functions; and areas, volumes, and applications of calculus to physical problems.

Prerequisites: Completion of Pre-Calculus with an A- or higher, or Pre-Calculus Honors with a B+ or higher, a passing grade on a Calculus Readiness Test, and AP Committee approval.

AP Calculus BC * ^ **Year** **11-12**

This course follows the College Board recommended curriculum. The content includes all topics covered in the AP Calculus AB course, plus others such as parametric, polar, and vector functions, and series.

Prerequisites: Completion of Pre-Calculus with an A- or higher, or Pre-Calculus Honors with a B+ or higher, a passing grade on a Calculus Readiness Test, and AP Committee approval.

Statistics * **Year** **11-12**

This course is designed to introduce students to the fundamental principles of statistics and provide a solid foundation for college study in statistics. A knowledge of statistics is essential for many college majors, including business, math, medicine, psychology, and social science. This course is ideally suited for students who have completed Calculus and wish to keep their math skills current, and for students who have completed Pre-Calculus and want to investigate other aspects of applying math. Topics include categorical data, quantitative data, methods of collecting and analyzing data, correlation, regression, probability theory, confidence intervals, and hypothesis testing.

Prerequisites: Completion of Pre-Calculus or Pre-Calculus Honors with a C- or higher.

AP Statistics * ^ **Year** **11-12**

This course follows the College Board recommended curriculum. The course will cover the material in an initial college course in statistics. As such, it will include all of the topics in the Statistics course, at a faster pace, with increased emphasis on writing. Students will do projects requiring statistical reasoning. These may be either surveys or experiments.

Prerequisites: Completion of Pre-Calculus with an A- or higher, or Pre-Calculus Honors with a B+ or higher, and AP Committee approval.

* Course meets UC eligibility

^ Earns an extra grade point

All course offerings are subject to minimum enrollment levels and staffing availability.

PHYSICAL EDUCATION DEPARTMENT

*The Physical Education requirement for high school graduation is fulfilled by taking two (2) years of P.E. classes. All students in 9th grade are required to take P.E. Students in 10th through 12th grades must complete an additional two (2) semesters of P.E. or P.E. electives.**

Note: Grades earned for P.E. or P.E. electives, taken for the P.E. graduation requirement, will not be included in the academic GPA.

** Exceptions: Students in 10th-12th grade (not 9th grade) who participate on a TKA junior varsity or varsity athletic team, Color Guard, Winter Guard, or Marching Band for one (1) season will receive five (5) P.E. credits. Students in 10th-12th grade may earn up to a maximum of ten (10) P.E. credits in a given school year.*

Physical Education 6 **Year** **6**
The 6th grade physical education classes are designed to prepare the 6th grade students for adolescence and junior high school. Team sports and the Presidential Physical Fitness Test are the main priorities of the class. The course objectives are twofold: first, that the student become enabled to pass the Presidential Physical Fitness Tests; second, that the student learn and be able to participate in a variety of team and individual sports such as soccer, wrestling, basketball, flag football, track and field, baseball, basic self-defense and fitness.

Physical Education – JH **Year** **7-8**
The junior high boys' and girls' physical education classes are designed to prepare junior high students for adolescence and high school. Team sports and the Presidential Physical Fitness Test are the main priorities of the class. The course objectives are two-fold: first, that the student become enabled to pass the Presidential Physical Fitness Tests; second, that the student learn and be able to participate in a variety of team and individual sports such as soccer, wrestling, basketball, flag football, track and field, baseball, basic self-defense, and fitness.

Physical Education – HS **Semester/Year** **9-12**
High school boys' and girls' physical education classes are designed to be intermediate-level classes that teach high school students about lifelong fitness, including a more advanced level of team sports and completion of the Presidential Physical Fitness Tests.

PHYSICAL EDUCATION ELECTIVES

Basketball – JH **Semester/Year** **7-8**
This co-ed class is aimed at developing the skills required to play basketball. This course cannot be taken for P.E. credit.

Strength and Conditioning **Semester/Year** **10-12**
This course is designed as an introduction to the fundamentals of weight training as part of an overall fitness program. Emphasis will be placed on safety. The student will be taught proper form and technique. The student will learn how to create their own workout program. Daily workouts will consist of warming up with jogging and stretching. Cardio will be included once a week. Sophomores will participate in President Physical Fitness testing.

SCIENCE DEPARTMENT

Science 6: Earth Science

Year

6

Sixth-grade science is the systematic study of God's physical creation and how it works. Each unit engages students in a relevant real-world problem where they investigate real world scientific phenomena, engage in collaboration and discussion, and develop models or explanations in order to arrive at solutions. Students will experience a blended learning environment that utilizes hand-on activities, print materials, and powerful digital tools to support online and offline learning. Earth science is the focus of this course.

Science 7: Life Science

Year

7

The seventh-grade Life Science course examines the wonders of God expressed through His creation. Hands-on laboratory activities and collaborative work emphasize a more complex understanding of change, cycles, patterns, and relationships in the living world. Students build on basic principles related to these concepts by exploring structure and function from cells to body systems; the dynamic relationships among organisms, populations, communities and ecosystems; and the change of populations as a result of the transmission of genetic information from generation to generation. By completing labs throughout the year, students' explanations of nature are developed and tested using observation, experimentation, models, and critical thinking. Science and engineering practices at this level include manipulation of variables in experiments, analyzing and interpreting data, and drawing evidence from multiple sources to support a claim.

Science 8: Physical Science

Year

8

Physical Science is the study of the non-living components of the natural world. Throughout the year, students will study topics surrounding matter and energy and the changes that they undergo. The course begins with a general exploration of matter and energy, including structure and states of matter, physical and chemical changes, types of energy, and the law of conservation of mass and energy. The remainder of the first semester takes a closer look at matter on a molecular level by introducing such topics as the periodic table, chemical bonding and reactions, and types of solutions. In the second semester, the course returns to look more closely at energy related to motion, work and power, electricity, and sound and light. Frequent practical laboratory sessions will be used to reinforce scientific concepts and truly engage the students. Through both the scope of content covered in class and the regular hands-on investigation of scientific principles, students will practice independent learning and develop the necessary laboratory and data collection skills for high school science.

Biology *

Year

9-10

Biology is one of the fundamental science courses that all high school students must take. Biology focuses on the large and small workings of living things as well as the actual practice of investigating those processes through labs. The course begins with a unit on scientific practices as students learn best practices of lab work. It then requires students to apply those lab practices to our major units on ecology, stewardship, cell biology, energy flow, inheritance of traits, and evolutionary theory. A large portion of this class focuses on applying what students are learning to lab work which involves designing experiments, carrying them out, and making predictions. Students will get extensive exposure to science practices in labs that will prepare them for successful laboratory work in the rest of their high school science courses.

Prerequisite: Completion or concurrent enrollment in Algebra 1 or Algebra 1B.

*** Course meets UC eligibility**

All course offerings are subject to minimum enrollment levels and staffing availability.

SCIENCE DEPARTMENT (CONT'D)

Biology Honors * ^

Year

9-11

Biology is one of the fundamental science courses that all high school students must take. Biology focuses on the large and small workings of living things as well as the actual practice of investigating those processes through labs. The course begins with a unit on scientific practices as students learn best practices of lab work. It then requires students to apply those lab practices to our major units on ecology, stewardship, cell biology, energy flow, inheritance of traits, and evolutionary theory. A large portion of this class focuses on applying what students are learning to lab work, which involves designing experiments, carrying them out, and making predictions. Students will get extensive exposure to science practices in labs that will prepare them for successful laboratory work in the rest of their high school science courses. While the content of Honors and Regular Biology are similar, there will be a greater emphasis in the Honors course placed upon developing higher-level thinking skills, such as synthesis and application, which will be assessed on exams and in other written assignments.

Prerequisite: Completion of Science 8 with an A- or higher and completion or concurrent enrollment in Algebra 1 or Algebra 1B

Physical Science *

Year

10-11

Physical Science is designed to provide a conceptual framework for advanced study in Chemistry and Physics. The course will focus on the concepts underlying the structure and behavior of matter (Chemistry) and the laws governing energy and its behavior (Physics). Physical Science is designed as a standard laboratory class with experiments and formal reports as an integral part of the coursework.

Students entering 10th grade who have earned a B or higher in both Biology and Algebra 1, and are currently enrolled in Algebra 2, may choose to bypass Physical Science and take Chemistry. The Physical Science course covers vital concepts that will be used by students in Physics and Chemistry.

Chemistry *

Year

10-12

This course covers such topics as the structure of matter, nomenclature, electronic structure, periodicity, intermolecular forces and a mathematical treatment of thermodynamics, kinetics, equilibrium, stoichiometry, acids and bases and redox chemistry. This course is geared to prepare students for success in college-level chemistry. Labs cover classic experiments in each major topic. Students must be competent in Algebra 1 prior to entering chemistry, as the course requires a strong foundation in algebraic manipulation.

Prerequisites: Completion of Biology with a B or higher, or Biology Honors with a B- or higher, completion of Algebra 1 with a B or higher and concurrent enrollment in Algebra 2 or higher. Completion of Biology, Physical Science, and Algebra 1 (for a grade 11 or 12 student).

Chemistry Honors * ^

Year

10-12

This course involves a more in-depth and mathematically rigorous treatment of the subjects covered in regular chemistry and includes detailed coverage of molecular structure and topics in applied chemistry.

Prerequisites: Completion of Biology with an A- or higher, or Biology Honors with a B+ or higher, completion of Algebra 1 with an A- or higher, and concurrent enrollment in Algebra 2 or higher.

AP Chemistry * ^

Year

11-12

The purpose of the AP Chemistry course is to expose students to a college-level chemistry course. The course will build on material from the first year of chemistry, emphasizing extensive lab work and discussion of advanced topics in chemistry. Evaluation of student performance will be through chapter exams and formal lab reports accompanying laboratory assignments. The course follows the College Board recommended curriculum.

Prerequisites: Completion of Chemistry with an A- or higher, or Chemistry Honors with a B or higher, and AP Committee approval.

* Course meets UC eligibility
^ Earns an extra grade point

All course offerings are subject to minimum enrollment levels and staffing availability.

SCIENCE DEPARTMENT (CONT'D)

AP Biology * ^

Year

11-12

AP Biology is a full-year, college-level laboratory and field science course designed to provide a comprehensive study of biochemistry, cell & molecular biology, genetics, evolutionary theory and ecology. Students gain experience in experimental data analysis, critical thinking, laboratory and field investigation skills. This course follows the College Board recommended curriculum and demands time and effort beyond that of a typical high school course.

Prerequisites: Completion of Biology with an A- or higher, or completion of Biology Honors with a B+ or higher, completion of Chemistry with a B- or higher, or completion of Chemistry Honors with a C+ or higher, and AP Committee approval.

Environmental Science *

Year

11-12

Environmental Science is a full-year laboratory and field science course designed to introduce students to scientific principles and methodologies needed to understand the interrelationships of the natural world, to analyze environmental problems, and to examine solutions for resolving or preventing them. The field of environmental science is interdisciplinary, and students grapple with a wide variety of topics from biology, chemistry, geology and social sciences. Students also engage with Bay Area agencies and non-profit organizations working in soil and water quality, water resources management, habitat restoration, endangered species recovery, and other local environmental issues.

Prerequisites: Completion of Biology and completion of Chemistry or Physical Science.

Physics *

Year

11-12

Physics is an Algebra-based, college-preparatory class in the physical sciences. It covers classical Newtonian mechanics, the definition of work, energy and power, optics, and applications of these definitions to mechanical, and electromagnetic systems. The class consists of lectures, problem-solving sessions, and laboratory activities. Students must be able to think critically, work problems, and have high proficiency involving algebra, plane geometry, and trigonometric relations. Experience with vectors is recommended but not required.

Prerequisites: Concurrent enrollment in Pre-Calculus or Pre-Calculus Honors. Completion of Chemistry with a B or higher or Chemistry Honors with a B- or higher.

AP Physics 1 * ^

Year

11-12

This course is intended to cover the first semester of college-level study in algebra-based physics. Students explore principles of Newtonian mechanics (including rotational motion); work, energy, and power. Students will need to be highly proficient in algebraic manipulation, including graphing and trigonometry. This is an inquiry-driven course where students will develop an understanding of concepts in physics through experimentation and data analysis rather than the traditional lecture format. Students will spend approximately 25%-50% of class time in the laboratory doing traditional experiments as well as designing and executing their own experiments as part of learning how to apply course material to solve problems with minimal guidance. Assessment will be based on College Board problems split equally between problem solving and experimental design/explanatory essay questions.

Prerequisites: Concurrent enrollment in Pre-Calculus or Pre-Calculus Honors. Completion of Chemistry with an A- or higher, or Chemistry Honors with a B+ or higher. AP Committee approval required.

* Course meets UC eligibility

^ Earns an extra grade point

All course offerings are subject to minimum enrollment levels and staffing availability.

SCIENCE DEPARTMENT (CONT'D)

Anatomy and Physiology *

Year

11-12

The Anatomy and Physiology class is designed to give juniors and seniors a look at God's most fascinating creation, the human body. The course is designed to cover the 11 major systems of the body relating to: Anatomy – the study of form or structure of body parts and how these relate to one another; and Physiology – the study of the functioning of the body's structural machinery, how the parts of the body work and carry out their life-sustaining activities; identifying issues and diseases related to the different systems of the body; and ways to stay healthy. While utilizing classroom lectures and discussions, the course will also rely heavily on hands-on activities, lab dissections of different organs, and specimen in order to view anatomical structures. Outside medical professionals are invited to speak to students, so they may gain a deeper understanding of the different systems and topics that are relevant. Depending on the year and situation, this course may include an end-of-year field trip to a cadaver lab to apply what has been learned to actual human examples.

Prerequisites: Completion of Biology and completion of Chemistry or Physical Science.

Marine Science □

Year

11-12

The objectives of Marine Science are to explore the physical, chemical, and biological characteristics of the global marine environment; to discover the oceans' ecological interrelationships, including marine mammals; and to investigate marine natural resources, global environmental issues, and ocean stewardship. Special consideration will be given to the marine ecology of the California coast, and students will experience at least one outdoor field trip to a local Bay Area site.

Prerequisites: Completion of Biology and completion of Chemistry or Physical Science.

* Course meets UC eligibility

□ Course pending UC approval

All course offerings are subject to minimum enrollment levels and staffing availability.

SOCIAL STUDIES DEPARTMENT

Ancient World History 6 **Year** **6**
The sixth-grade study of ancient world history begins with creation and ends with the fall of the Roman Empire. The class explores the cultures of Mesopotamia, Egypt, Kush, Canaan, India, China, Greece, and Rome. The world religions studied (Judaism, Hinduism, Buddhism, Christianity) present opportunities to learn about the beliefs of people around the world and become more aware of humanity's need for God. History will come alive through reading paired with primary source materials and simulations, discussions, and choice projects.

Geography and Medieval World History 7 **Year** **7**
This course explores medieval history in five (5) regions of the world: Africa, Arabia, East Asia, Europe and the Americas. This course exposes students to the major cultures and civilizations that influenced the medieval world. Students will experience history through dynamic activities, as well as a variety of creative projects. Additionally, students will complete a systematic study of world geography skills and content. Students will continue to discover that World History is the history of God's creation.

U.S. History 8 **Year** **8**
Eighth grade U.S. History is an overview of U.S. history from the period of the explorers to the Great Wave of Immigration, with an emphasis on God's hand in the nation's history and on how past events influence today's thinking. Additionally, students will learn to appreciate the richness of this nation's freedom, bought with great sacrifice, and learn to apply a wealth of knowledge that will encourage healthy debate and emerging political consideration. At an additional cost, an East Coast trip is available for students who wish to participate in visiting historical sites.

Ancient World History 9 * **Year** **9**
In this course, students will learn the story of human civilization from the "classical age" of Greece and Rome up to A.D. 1600. The first semester is a study of the classical civilizations of the world through the fall of Rome and the rise of the Byzantine Empire. The second semester surveys the medieval world and ends with a strong focus on the early development of modern western civilization in the Renaissance and Reformation. The course will integrate a biblical worldview as it surveys the political, religious, and social history of the classical and medieval civilizations.

Modern World History 10 * **Year** **10**
This course is a survey of the events that brought about the modern world. Starting with the global "Age of Exploration," this course will cover the major events and geographical realities of the 16th through 20th centuries. Key movements and trends will be discussed, and emphasis will be placed on cause and effect relationships. Students will have opportunities to explore topics in-depth through simulations, projects, presentations, essay writing, and research reports, building a variety of skills throughout the year. The course will integrate a biblical worldview as it surveys the political, religious, and social history of all areas of the world.

*** Course meets UC eligibility**

All course offerings are subject to minimum enrollment levels and staffing availability.

SOCIAL STUDIES DEPARTMENT (CONT'D)

AP World History: Modern * ^	Year	10
<p>The AP World History course covers significant events, individuals, developments, and processes from 1200 to the present. Students develop and use the same skills, practices, and methods employed by historians: analyzing primary and secondary sources; developing historical arguments; making historical connections; and utilizing reasoning about comparison, causation, and continuity and change over time. The course provides six themes that students explore throughout the course in order to make connections among historical developments in different times and places: humans and the environment, cultural developments and interactions, governance, economic systems, social interactions and organization, and technology and innovation.</p> <p>Prerequisites: Completion of Ancient World History 9 with an A- or higher and AP Committee approval. For a student who has not completed Ancient World History 9 they must have completed English 9 with an A- or higher, or English 9 Honors with a B+ or higher, and AP Committee approval.</p>		
U.S. History 11 *	Year	11
<p>This course is a survey of American history from the Colonial Period to the present day, with an emphasis on the twentieth century. Students will have opportunities to explore topics in-depth through simulations, projects, presentations, essay writing, and research reports, building a variety of skills throughout the year. Students learn about the various political, social, religious, and economic developments that have shaped and continue to shape the United States. Essay writing and critical thinking are emphasized as integral ways of understanding how the past relates to the present and future. The last quarter of the year will emphasize student first-person interviews focusing on eyewitness accounts of a previous era's military conflict in which the United States was involved.</p>		
AP U.S. History * ^	Year	11
<p>This college-level course provides an in-depth survey of United States history, focusing on economic progress, political issues, and social change throughout the development of our nation. The class format includes group lectures and collaborative assignments, emphasizing argumentative writing and primary source analysis. In addition to the text, students will read a variety of other sources on historical topics and issues. The course follows the College Board recommended curriculum.</p> <p>Prerequisites: Completion of Modern World History 10 with an A- or higher, or AP World History with a B- or higher, and AP Committee approval.</p>		
Government *	Semester	12
<p>This course provides students with a thorough understanding of the U.S. government's structure and process. A brief review is given to the process the Founding Fathers went through to develop the Constitution. The function and operation of each branch of the U.S. government is thoroughly discussed. Students will participate in an interactive simulation to understand the practical application of all three branches of government as well as the Bill of Rights. The course is also designed to prepare students to become informed citizens and to get involved in the political process.</p>		
AP U.S. Government and Politics * ^	Semester	12
<p>This college-level introduction to United States Government and Politics course offers students an opportunity to study the complexities and interrelationships of modern American government. The class will pay close attention to current and past political events to analyze the foundations, institutions, beliefs, and groups that participate in American politics. The course follows the College Board recommended curriculum.</p> <p>Prerequisites: Completion of AP U.S. History with a B- or higher or U.S. History 11 with an A- or higher, and AP Committee approval.</p>		

- * Course meets UC eligibility
- ^ Earns an extra grade point

All course offerings are subject to minimum enrollment levels and staffing availability.

SOCIAL STUDIES DEPARTMENT (CONT'D)

Economics * **Semester** **12**
This class introduces the student to the basic principles of America's market economy, including competition, opportunity cost, supply and demand, scarcity, prices, incentives, taxation, and monetary and fiscal policy. Students will understand common economic terms and concepts and be introduced to economic reasoning.

AP Macroeconomics ■ ^ **Semester** **12**
This course is an introductory college-level macroeconomics course. Students cultivate their understanding of the principles that apply to an economic system as a whole by using principles and models to describe economic situations and predict and explain outcomes with graphs, charts, and data as they explore concepts like economic measurements, markets, macroeconomic models, and macroeconomic policies.
Prerequisite: Completion of U.S. History with an A- or higher, or AP U.S. History with a B- or higher.

SOCIAL STUDIES ELECTIVES

History of California **Semester/Year** **9-12**
In semester one, students will explore the theme of 'identity' as they learn about the history of California through the lives of the indigenous groups that lived in the territory prior to European contact, the Spanish colonial era, the Mexican period, the process of becoming a state, and the Gold Rush. Students will visit local landmarks to make connections between the content of the course and the world we live in. In semester two, students will explore the theme of 'identity' as they learn about the history of California through the building of the railroad, immigration reform, building of state infrastructure, WWI and WWII, and through social and political movements. Students will visit local landmarks to make connections between the content of the course and the world we live in. In both semesters, students will produce group projects to show their understanding of the course theme and the content that is covered.

Introduction to the Law **Semester** **9-12**
In this course, students will learn about the structures, sources, and authority for the law. Litigation, corporate law, family law, and municipal law are a few areas of the law that are introduced. Students will also learn about God and the law from the perspective of a Christian lawyer. Students will focus on the skills of developing, supporting, and articulating an argument in written and oral form.

Introduction to Psychology **Semester** **9-12**
This course covers a wide range of psychology topics. The course will begin with a thorough overview of types of research in psychology – natural observation, case studies, correlational studies, and experimental design. Students will gain insight into the scientific nature of the discipline by focusing on experimental design at the outset. Students will then explore various disciplines in psychology including child development, social psychology, learning theory, and cognitive psychology through reading the primary research experiments that shaped the field of psychology. By reading original research, students can see the importance of rigorous scientific methods in the field of psychology and the exciting research questions that lie ahead. The course is structured in a discussion format. Students will be encouraged to think critically and appreciate the incredible design of God in how He made us so similar and yet so unique.

AP Psychology * ^ **Year** **11-12**
This course is designed as a fast-paced, college-level introduction to psychology. Students will learn the history of psychology as well as the scientific study of the mental processes and behaviors of humans and animals. Abnormal psychology, social psychology, developmental psychology, motivation, and emotion are just a few of the topics that will be covered in great detail. This course will require a significant amount of reading, but the information will be especially interesting. The course follows the College Board recommended curriculum.
Prerequisites: Completion of English 10/11 with an A- or higher, or English 10 Honors with a B+ or higher or AP English Language and Composition with a B- or higher, and AP Committee approval.

* Course meets UC eligibility

■ Course pending UC approval

^ Earns an extra grade point

All course offerings are subject to minimum enrollment levels and staffing availability.

VISUAL AND PERFORMING ARTS DEPARTMENT

ART

Discovering Art – JH

Semester

6-8

Introductory concepts of design and composition will be integrated into each of the various art lessons and projects. The six abstract elements and five abstract principles of design will be the core unifying set of concepts for each semester. Major projects may include (but are not limited to) basic drawing skills (including the human figure and face, and linear perspective drawing), basic color theory and the color wheel, papier mâché sculpture, low-relief, stylized self-portrait sculptures, holiday-themed tissue paper "stained glass" windows, and basic hand-built ceramic pottery techniques.

Introduction to Digital Painting – JH

Semester

7-8

In this course, students will learn the following digital painting methodologies and basics: applying traditional techniques to a digital process, concept painting, lighting, contrast, still life vs. photo studies, composition, and speed painting. In conjunction with this training, students will create works of art with the software Procreate for iPadOS. Students are recommended, but not required, to purchase a stylus to use with their iPads.

Linear Perspective Drawing

Semester

7-12

The drawing and painting techniques of perspective to create the illusion of deep space on a flat surface were developed and mastered during the Italian Renaissance. In this linear perspective drawing class, 1-point, 2-point, and 3-point linear perspective drawing techniques will be presented and then practiced by each student, resulting in the creation of accurate renderings of architectural subjects and their surrounding environments. The mastery of these drawing skills will have useful and practical applications for those students who desire to subsequently take computer-aided design (CAD) classes as well as college study in the fields of architecture and the visual arts.

Note: Not a UC approved course.

Video Production and Editing

Semester

7-12

In this course, students will learn how to create videos through pre-production, production, and post-production. Students will learn how to write scripts as well as develop organizational spreadsheets before filming. Students will be taught to manipulate and operate camera equipment and lighting technology. Additional topics include how to edit using Adobe's Premier Pro and other effects programs, and how to create content for various media platforms such as YouTube. There will be separate classes for junior high and high school students.

Note: Not a UC approved course.

AP 2-D Art and Design ^

Year

9-12

The AP 2-D Art and Design course consists of three different parts and AP Portfolio Exams. Students create a portfolio of work to demonstrate inquiry through art and design and development of materials, processes, and ideas over the course of a year. Portfolios include works of art and design, process documentation, and written information about the work presented. In May, students submit portfolios for evaluation based on specific criteria, which include skillful synthesis of materials, processes, and ideas and sustained investigation through practice, experimentation, and revision, guided by questions. Students may choose to submit any or all of the AP Portfolio Exams.

Prerequisite: Completion of Discovering Art or evidence of valid equivalent, submission of an AP Application, submission of a portfolio, and teacher approval.

* Course meets UC eligibility

Course pending UC approval

^ Earns an extra grade point

All course offerings are subject to minimum enrollment levels and staffing availability.

VISUAL AND PERFORMING ARTS DEPARTMENT (CONT'D)
ART (CONTD.)

Ceramics	Semester	9-12
-----------------	-----------------	-------------

Various techniques of hand-built ceramic pottery and sculpture will be the emphasis of this one-semester class. The opportunity to learn wheel-thrown pottery can also be made available. Basic glazing and firing skills will be learned. Students will have at least two major hand-built ceramic assignments, with the opportunity to create and complete additional advanced ceramic assignments as time permits.

Note: Not a UC approved course.

Yearbook □	Year	10-12
-------------------	-------------	--------------

Yearbook is a year-long course designed to have students understand the role of visual art and design, and its impact on society and culture, particularly in publication mediums. This course is responsible for the capturing events of the current school year with the culminating publication of The King's Academy Yearbook. The course may be retaken each of the three years. The teacher serves as the advisor to the students who make up the Yearbook Staff. The course will focus on students understanding a designer's target audience and stimulating creativity through a variety of two-dimensional media. Then, students will apply this artistic process to create designs for the yearbook publication. Finally, they will maintain the integrity of design through the editing process, while collaborating and communicating with their colleagues on the yearbook staff. The assignments in the course will demonstrate a student's ability to apply the principles of design and effectively communicate their message. Assignments will also have students process, respond to, and judge design works using their knowledge of the elements of art and the principles of design. The yearbook is produced online using Jostens application, Yearbook Avenue.

Prerequisites: Completion of Digital Photography or evidence of valid equivalent, and submission of Yearbook Staff Application and acceptance by the current Advisor and Editor(s).

Note: Students must be willing to take photos at school events for use in the yearbook and other school-wide publications, including the website. If accepted to the Yearbook Staff, the student may only drop due to schedule conflicts.

Yearbook Honors □	Year	11-12
--------------------------	-------------	--------------

Honors Yearbook is a year-long course in which students are responsible for the production of The King's Academy Yearbook. Additionally, as a student in Honors Yearbook 2, students provide leadership skills as an "editor" of at least one section of the publication. Editors will play a crucial role in developing and creating the following year's theme and major design elements. They will also work with new yearbook students in a mentor role. They will critique previous books and present their thoughts on students' design, typography, theme, layout, and photography, giving new students a clear understanding of what makes a strong yearbook. In addition to the responsibility of their own pages, honors staff will edit pages completed by fellow staffers offering suggestions for improvements and checking for detail cohesion within the book as a whole. Continuing students enjoy both more responsibility for and more input toward not only the yearbook as a publication but also in the functioning and duties of the staff as well.

Prerequisites: Completion of Yearbook 1. Submission of Yearbook Editor Application and acceptance by the current Advisor.

Note: Students must be willing to take photos at school events for use in the yearbook and other school-wide publications, including the website. If accepted to the Yearbook Staff, the student may only drop due to schedule conflicts.

□ **Course pending UC approval**

All course offerings are subject to minimum enrollment levels and staffing availability.

VISUAL AND PERFORMING ARTS DEPARTMENT (CONT'D)
ART (CONTD.)

Digital Photography	Semester	9-12
Learn digital photography! This hands-on course will introduce fundamental principles and techniques of single-lens reflex (SLR) photography in the digital format. Students will utilize elements of visual design and composition to develop an “eye” for evaluating and creating images. Students will use camera equipment to gain a working knowledge of manual technical exposure control techniques, ideally being able to use digital SLR cameras proficiently at the end of the course. In addition, students will become familiar with basic editing and management of photographic images utilizing editing programs such as Adobe Lightroom. Students need to have access to a DSLR camera. Camera rental fees apply if necessary. Note: Not a UC approved course.		
Discovering Art – HS *	Year	9-12
Introductory concepts of design and composition will be integrated into each of the various art lessons and projects. The six abstract elements and five abstract principles of design will be the core unifying concepts for each semester. Major projects may include (but are not limited to) basic drawing skills (including the human figure and face, and linear perspective drawing), basic color theory, introductory hand-built ceramic pottery, holiday-themed decorative arts projects, and introductory painting skills (watercolor, acrylic).		
Computer 3D Modeling with ZBrush *	Year	9-12
This course is designed to teach students the basics of hard surface and organic modeling. They will build models using polygonal modeling techniques to create unique sculptures in 3D. Additional topics that will be covered are basic human and quadruped anatomy as well as texture painting. Background or interest in clay sculpting is recommended, but not required.		
Digital Design and Animation *	Year	9-12
This course will teach students graphic design using Adobe Creative Cloud and introduce animation. Students will learn the principles of design and how to effectively use them to create various graphics in bitmap and vector art. Additionally, students will be introduced to basic user interface design, learn to incorporate a Christ-focused perspective within the foundations of design, and promote creativity to produce engaging pieces of art. The second semester of the class will focus on drawing for animation and the art of animation. Traditional drawing skills recommended but not required.		

* Course meets UC eligibility

All course offerings are subject to minimum enrollment levels and staffing availability.

VISUAL AND PERFORMING ARTS DEPARTMENT (CONT'D)

DANCE

Dance Fundamentals – JH

Year

6-8

This course provides an introduction to the art of dance. The focus of this class is to allow students to begin exploring movement through ballet, jazz, and modern dance. Students will be introduced to the terms, techniques, and creative elements of dance. The course is designed to develop skills in coordination, agility, flexibility, proper alignment, creative expression, and confidence. Students will have the opportunity to showcase their learning in the classroom, as well as in a spring recital event.

Intermediate Dance – JH

Year

7-8

JH Intermediate Dance will progress students beyond JH Dance Fundamentals into a more rigorous curriculum. This course is for students who wish to deepen their existing dance technique in ballet, modern, jazz and tap, and be challenged by complex choreography. This course will also include some study into world dance and culture. Students who take JH Intermediate Dance will have more than a basic understanding of proper dance technique, including alignment, posture, turn out, entering and landing jumps, spotting for turns, etc., as well as a large vocabulary of steps in ballet, jazz, and modern.

Prerequisite: Completion of JH Dance Fundamentals or by audition.

Beginning Dance Fundamentals *

Year

9-12

The course provides an introduction to the art of dance. The focus of this class is to allow students to experiment with many different dance forms and learn about their historical and cultural roots. Students will be introduced to the terms, techniques, and creative elements of contemporary dance. The Fundamentals course is designed to develop skills in coordination, agility, flexibility, proper alignment, creative expression and confidence. Students will have the opportunity to showcase their learning in the classroom, as well as in recital events.

Dance Workshop *

Year

9-12

This course is for intermediate students who want to perform. Students will use the foundation from Dance Fundamentals and apply it to choreography, teamwork, and performance. Dance Workshop will focus on various styles of performance choreography and is designed to expand the student's technical training, creative expression, and critical analysis of dance through practical experience in rehearsal and performance. Students will be required to participate in performances.

Prerequisite: Completion of Beginning Dance Fundamentals or teacher recommendation.

Notes: Admission is determined by audition.

Advanced Dance *

Year

9-12

This course is for advanced dance students who have a strong desire to perform. Students are expected to learn material at a fast pace, expand their technical and historical knowledge of dance, develop their technique, demonstrate professionalism, and work as a team. Students choreograph some of the dances they perform. Students in this course form the advanced dance class performance team, *Ignite*.

Prerequisite: Completion of Dance Workshop or teacher approval.

Note: Class fees apply.

*** Course meets UC eligibility**

All course offerings are subject to minimum enrollment levels and staffing availability.

VISUAL AND PERFORMING ARTS DEPARTMENT (CONT'D)

THEATRE

Fundamentals of Theatre – JH

Year

6-8

This is an elective that will introduce students to many aspects of acting and theatre production. The course is structured around units, including monologue and scene work, auditioning, story-telling, script writing, costume design, critique writing, improv exercises, and theatre games. Students will demonstrate what they have learned by completing in-class performances and projects. This class is designed for students who have had little to no experience in theatre.

Theatre 1 *

Year

9-12

Theatre 1 will introduce high school students to the foundations of theatre. They will be exposed to theatre history, terminology, and basic principles of acting including character analysis, movement, staging, collaboration, improvisation, and critical analysis of performance. This hands-on course provides students with the fundamental knowledge of all aspects of theatre and helps students develop confidence on stage.

Note: This class should only be taken once for credit, and it is the only UC-approved theatre course.

Theatre 2

Year

10-12

This elective course is designed for students who successfully completed Theatre 1 and who desire the skills needed to pursue theatre beyond the basic level. This course will focus on acting theory and methodology, as well as playwriting, directing, and theatre production. The course will also cover similar units as Theatre 1 but will take them to a deeper level. Additionally, this course culminates in an end-of-year production.

Prerequisites: Completion of Theatre 1 or teacher approval or with evidence of valid prerequisites, audition, and successful completion of theatre history packet.

Note: Not a UC approved course.

Theatre 3

Year

11-12

This elective course is designed for students who successfully completed Theatre 2. The course will also cover similar units as Theatre 2, but will take them to a deeper level with an emphasis in directing and production management. Additionally, this course culminates in an end-of-year production.

Prerequisites: Completion of Theatre 2 or teacher approval.

Note: Not a UC approved course.

Film Studies ■

Year

11-12

This yearlong course will examine the art of film from five approaches: 1) historical growth and development; 2) genre approach; 3) artistic approach (in-depth study of filmmaking techniques); 4) trademark directors; 5) the Christian biblical worldview. The five approaches above will be interwoven so students will get a strong sense of the art and history of cinema from its inception in the 1890s to the present world. Students will become skilled in the art of film analysis through the consideration of a film's literary, dramatic/theatrical, and cinematic elements.

* Course meets UC eligibility

■ Course pending UC approval

All course offerings are subject to minimum enrollment levels and staffing availability.

VISUAL AND PERFORMING ARTS DEPARTMENT (CONT'D)

THEATRE (CONTD.)

Theatre 4

Year

12

This is a course specifically designed for the aspiring senior student who will be applying for theatre or musical theatre as a major (in some form) in college and has completed Theatre 3. The students will be given upper-level challenge projects, as well as time to develop their complex higher-level thinking and projects that prepare them for universities, colleges, and professional pursuits. Students will be able to have one-on-one training, extra attention, and extra resources to help them achieve their career goals. Projects include: advanced preparation for various kinds of auditions, how to teach theatre, advanced acting prep, advanced directing and playwriting, advanced theatre tech, and any other projects the students wish to add in preparation for college and the professional world. Students are required to obtain any lists of scholarship and college requirements for the colleges or theatre companies to which they are applying so that their products can be tailored to their specific needs.

Prerequisites: Completion of Theatre 3 or teacher approval.

Note: Not a UC approved course.

MUSIC

Concert Choir – JH

Year

6-8

Concert Choir is a class for junior high students who enjoy singing and who seek a better understanding of how the voice works. Students will develop the ability to use their voice properly so that they learn to sing and project in a healthy way. Students will become familiar with solfege, sight reading, breathing, musical genre and the International Phonetic Alphabet. The choir will perform a variety of choral music, such as gospel, musical theater, and classical. This class will perform at least two times during the academic year and will compete in choral competitions if the instructor thinks the students are ready to do so. This course is excellent preparation for entrance into the high school choirs.

Notes: A polo shirt and a sense of pitch are required.

Knight Club Jazz Band *

Year

6-12

Knight Club Jazz Band will perform jazz standards, swing music, big band tunes, ballads, funk, bebop, and contemporary popular and rock music. The band will participate in contests and festivals, mostly during the spring semester. Students will perform at some school and community events to promote the school and foster school spirit. There will be time required outside of school for performances. Traditional instruments in school jazz band include saxophones, trumpets, trombones, and rhythm section (piano, drums, bass, and guitar).

Notes: Admission is determined by audition. This class meets Z Period only.

* Course meets UC eligibility

All course offerings are subject to minimum enrollment levels and staffing availability.

VISUAL AND PERFORMING ARTS DEPARTMENT (CONT'D)

MUSIC (CONT'D)

Beginning Band (Blue Band) **Year** **6-12**
The beginning Blue Band is designed to be an introduction to participation in a concert band. Students will develop music reading skills on a band instrument and will be prepared for participation in the intermediate Gold Band. Students will incorporate beginning- to medium-easy-level literature in their repertoire and will perform publicly each semester. Students playing wind instruments will be required to own or rent an instrument for this course. For percussion students, school-owned equipment is available. Students will need to own their own drumsticks and mallets as well as a practice pad.

Intermediate Band (Gold Band) **Year** **6-12**
The intermediate Gold Band class is designed for students with an intermediate performance level. Students will incorporate easy- to medium-level literature in their repertoire and will perform publicly each semester. Students playing wind instruments will be required to own or rent an instrument for this course. For percussion students, school-owned equipment is available. Students will need to own their own drumsticks and mallets as well as a practice pad.
Prerequisites: Successful completion of Blue Band or teacher approval. Students must be able to read music.

String Ensemble **Year** **6-12**
This orchestra provides performance experience for intermediate string players who play one of four orchestral string instruments: violin, viola, cello, or double bass. Students learn how to make music as an ensemble. Repertoire will include arrangements of music for string orchestra representing various music periods and styles. Students will be required to own or rent an instrument for this course.
Prerequisites: One year or more previous ensemble experience and weekly private lessons are required.
Notes: Admission is determined by audition.

String Orchestra * **Year** **6-12**
This orchestra provides performance experience for advanced string players who play one of four orchestral string instruments: violin, viola, cello, or double bass. Students will perform a range of moderate length orchestral works, symphonic movements, and concert pieces at least twice per semester. This course may be repeated for additional credit. Students will be required to own or rent an instrument for this course.
Prerequisites: Two or more years of playing experience, including at least one year of ensemble playing experience, teacher approval, and weekly private lessons are required.
Notes: Admission is determined by audition.

Knights Brigade/Percussion Ensemble * **Year** **7-12**
The class is designed for students with intermediate to advanced performance level. Students will incorporate medium- to difficult-level literature in their repertoire and will perform publicly each semester in field show competitions, school rallies, pep band, and concerts. Competitions will be included in the schedule as well as playing at sporting events. Students will be required to own their own practice pad, mallets, and drumsticks for this course.
Prerequisites: Successful completion of Gold Band or teacher approval. Students must be able to read music.
Summer band camp is required.
Notes: Class fees apply. Admission is determined by audition.

* Course meets UC eligibility

All course offerings are subject to minimum enrollment levels and staffing availability.

VISUAL AND PERFORMING ARTS DEPARTMENT (CONT'D)

MUSIC (CONT'D)

Knights Brigade/Wind Ensemble * **Year** **7-12**
The class is designed for students with intermediate to advanced performance level. Students will incorporate medium- to difficult-level literature in their repertoire and will perform publicly each semester in field show competitions, school rallies, pep band, and concerts. Competitions will be included in the schedule as well as playing at sporting events. Students will be required to own or rent an instrument for this course.
Prerequisites: Successful completion of Gold Band or teacher approval. Students must be able to read music.
Summer band camp is required.
Notes: Class fees apply. Admission is determined by audition.

Concert Choir – HS * **Year** **9-12**
Concert Choir is a class for students who enjoy singing and are interested in vocal development. Students will learn proper singing technique, music fundamentals, solfege, and sight singing. The choir will perform a variety of choral music with variations in levels of difficulty - depending on the abilities of the singers. The students will perform a variety of genres including contemporary worship, gospel, musical theater, and classical (not necessarily in that order). Concert choir will perform two big concerts during the academic year.
Notes: Admission is determined by audition.

Knightshine * **Year** **9-12**
This course is for the serious performing arts student who enjoys combining their vocal and choreographic talents. The focus of this class is on advanced performance, and it involves creativity, vocal and dance technique, stage presence, audition techniques, ministry, and team building. This course will involve substantial ear training and interval training, genre recognition, learning to sing in different languages and a broad coverage of the International Phonetic Alphabet. The course will strive to develop an all-around young musician. Students will perform a variety of choral music, carefully selected from many genres. This choir sings two major concerts, participates in open houses, sings in chapel, sings at home football games, and will be singing in competitions.
Notes: Admission is determined by audition in both dance and singing. Dance shoes are required. Class fees apply.

Worship Leading **Semester/Year** **9-12**
This course focuses on teaching students how to create musical environments in which others can draw near to Jesus, develop their ability to lead, and learn the skills required to effectively serve in worship ministry. Students will discover why they should worship God and learn how to lead themselves in a growing relationship with Jesus first. Being an effective worship leader starts with personal worship. This class will explore what worship means as well. It's not a genre of music, but rather, a lifestyle.
Notes: Admission is determined by audition.

* Course meets UC eligibility

All course offerings are subject to minimum enrollment levels and staffing availability.

WORLD LANGUAGES DEPARTMENT

French 1 * **Year** **7-12**
French 1 is designed to introduce students to the enjoyment of learning a second language. Emphasis is placed on developing proficiency in interpersonal, interpretive, presentational, and intercultural communication. Throughout the course, listening skills are developed simultaneously with speaking skills. The textbook provides ample opportunity for students to develop their writing skills, and authentic texts are used to challenge and expand student reading levels. Vocabulary lessons are set in the context of real-life situations for the students, and each lesson places an emphasis on French culture. After completing this course, students should understand the basic skills involved in learning a language such as identifying parts of speech and conjugating verbs, being able to communicate in daily situations, and understanding the relationship between language and culture.

French 2 * **Year** **8-12**
French 2 is the continuation of spoken and written French for students who have successfully completed French 1. The course begins with a review of the salient grammar and vocabulary topics presented in the first year. The balance between listening, speaking, reading and writing is maintained, with an emphasis on communicative competency. Students learn about French and francophone cultures in each unit. After completing this course, students should be able to engage in creative conversations where they ask and answer questions, give detailed descriptions, make simple comparisons, narrate events in the present, narrate events in the past using the past tense, narrate events in the near future, give commands, summarize a simple text they have read or heard, and express personal wishes and needs.

Prerequisite: Completion of French 1 with a C- or higher.

French 3 * **Year** **9-12**
French 3 is the continuation of spoken and written French for students who have successfully completed French 2. The course begins with a review of the salient grammar and vocabulary topics presented in the second year. Communication, culture, and grammar are integrated into thematic units, with a balance of listening, speaking, reading, and writing skills maintained in the course. After completing this course, students should be able to engage in extended conversations using all tenses, narrate past and future events using complex sentences, express conditions in complex sentences, express emotions and wishes in complex sentences, read authentic texts that are both fiction and non-fiction for comprehension, and write a text of several paragraphs.

Prerequisite: Completion of French 2 with a C- or higher.

French 4 * **Year** **10-12**
French 4 is the continuation of spoken and written French for students who have successfully completed French 3. Developing fluency in reading and writing and expanding fluency in oral communication are the primary objectives of this course. The curriculum introduces an expansive thematic vocabulary, reviews and refines grammatical concepts, and increases cultural awareness. Contemporary francophone culture is a central focus of this course, as it helps students understand daily life in a French-speaking environment. Cultural and historical components include information on artistic creators, short films, and literature readings. This course will be conducted in French with rare recourse to English to explain grammar, if necessary.

Prerequisite: Completion of French 3 with a C- or higher.

* Course meets UC eligibility

All course offerings are subject to minimum enrollment levels and staffing availability.

WORLD LANGUAGES DEPARTMENT (CONT'D)

AP French Language and Culture * ^ **Year** **11-12**

The AP French Language and Culture course emphasizes communication (understanding and being understood by others) by applying interpersonal, interpretive, and presentational skills in real-life situations. This includes vocabulary usage, language control, communication strategies, and cultural awareness. While students need a strong grammatical foundation for communication, this course strives not to overemphasize grammatical accuracy at the expense of communication. To best facilitate the study of language and culture, the course is taught almost exclusively in French. In this course, students are engaged in an exploration of culture in both contemporary and historical contexts. The course develops students' awareness and appreciation of cultural products, e.g. tools, books, music, laws, conventions, institutions; practices (patterns of social interactions within a culture); and perspectives (values, attitudes, and assumptions).

Prerequisites: Completion of French 3 with an A- or higher, or completion of French 4 with a B+ or higher, and AP committee approval.

Mandarin 1 * **Year** **7-12**

This is an introductory course of spoken and written Simplified Chinese for students who have had minimal or no Chinese language background. The four areas of language arts (reading, writing, listening and speaking) are integral parts of this beginning course. Communication is the focus of all classroom activities. Students will learn grammar, vocabulary, and culture through authentic and meaningful contexts.

Mandarin 2 * **Year** **8-12**

This is the continuation of spoken and written Simplified Chinese for students who have successfully completed Mandarin 1. Emphasis will be placed on the four language skills: reading, writing, listening, and speaking. Communication will be the focus in all classroom activities in which students will expand their vocabulary, grammar structures, and knowledge and experience in a culture that spans over ten themes of day-to-day life contexts.

Prerequisite: Completion of Mandarin 1 with a C- or higher.

Mandarin 3 * **Year** **9-12**

This is the continuation of spoken and written Simplified Chinese for students who have successfully completed Mandarin 2. The course level is rigorous and will focus on communication, grammar, and culture in reading, writing, listening, and speaking. Students will be reading and writing more comprehensive texts, and speaking and participating in more complex discussions. Grammar will be in-depth, including crafting structures of resultative and potential complements, comparison, degrees of emphasis, questions with structural particles, aspects, and phrase structures. Culture will delve into idiom stories and will introduce Chinese culture related to day-to-day lifestyles, different industries, geographical landmarks, and classic literature.

Prerequisite: Completion of Mandarin 2 with a C- or higher.

Mandarin 4 * **Year** **10-12**

This is the continuation of spoken and written Simplified Chinese for students who have successfully completed Mandarin 3. The course level is rigorous and will focus on communication, grammar, and culture in reading, writing, listening, and speaking. Students will be reading and writing more comprehensive texts, and speaking and participating in more complex discussions. Grammar will be in-depth, including crafting structures of passive sentences, compound sentences of cause-and-effect and conditional sentences, pivotal and causative sentences, omissions, rhetorical questions, and expressing tones of voice. Culture will delve into idiom stories and introduce more Chinese culture related to showing concerns, gift giving, etiquette, modern prose writers, traditional and contemporary music, job industries and businesses, overseas study and universities.

Prerequisite: Completion of Mandarin 3 with a C- or higher.

*** Course meets UC eligibility**

^ Earns an extra grade point

WORLD LANGUAGES DEPARTMENT (CONT'D)

AP Chinese Language and Culture * ^

Year

11-12

The AP Chinese Language and Culture course is designed to provide students with a learning experience equivalent to that of a fourth-semester (or the equivalent) college course in Simplified Chinese. This course will be conducted almost exclusively in Chinese and students will be required to speak Chinese as much as possible. This course emphasizes communication (understanding and being understood by others) by applying interpersonal, interpretive, and presentational skills in real-life situations. Vocabulary usage, language control, communication strategies, and cultural awareness are presented and practiced. This course strives not to overemphasize grammatical accuracy at the expense of communication. Students will engage in an exploration of culture in both contemporary and historical contexts. The course develops students' awareness and appreciation of cultural products, (e.g. tools, books, music, laws, conventions, institutions); practices (patterns of social interactions within a culture); and perspectives (values, attitudes, and assumptions).

Prerequisites: Completion of Mandarin 3 with an A- or higher, or completion of Mandarin 4 with a B+ or higher, and AP committee approval.

Spanish 1 *

Year

7-12

This course is designed as an introduction to Spanish for students who have little or no Spanish language background. Emphasis is placed on developing proficiency in interpersonal, interpretive, presentational and intercultural communication. Vocabulary and oral practice are the focus of all classroom activities, and they drive the curriculum. Students learn the material through meaningful contexts, such as video and audio programs. Each unit of the textbook is situated in a different Spanish-speaking country, which further develops an awareness of Latino culture. After completing this course, students should understand the basic skills involved in learning a language such as identifying parts of speech and conjugating verbs, being able to communicate in daily situations, and understanding the relationship between language and culture.

Spanish 2 *

Year

8-12

This course is a continuation of spoken and written Spanish for students who have successfully completed Spanish 1. Emphasis is placed on developing proficiency in interpersonal, interpretive, presentational and intercultural communication, and communication is the focus of all classroom activities. Students learn increasingly complex vocabulary and will master present, preterite, imperfect, conditional, present perfect, present subjunctive and command forms of the verbs, as well as other grammar. Projects are centered on the use of the language.

Prerequisite: Completion of Spanish 1 with a C- or higher.

Spanish 2 Honors *

Year

8-12

This course follows the same curriculum as Spanish 2, but is a more in-depth study of the four areas of language: reading, writing, speaking, and listening. Students will learn vocabulary according to the themes being studied and will master present, preterite, imperfect, conditional, present perfect, present subjunctive, and command forms of the verbs in Spanish. Students will write essays about different topics in the target language, give oral presentations about Hispanic cultural events, and practice their speaking abilities with other students by creating short dialogues.

Prerequisite: Completion of Spanish 1 with an A- or higher.

Spanish 3 *

Year

9-12

This course is a continuation of Spanish for students who have successfully completed Spanish 2. Grammar and vocabulary from Spanish 1 and 2 are reinforced, and more challenging content is introduced. Students learn vocabulary through meaningful contexts and gain an authentic perspective of the Latino culture. By the end of the year, students will have mastered all fifteen verb tenses. At this advanced level, the study of literature is a basis for further linguistic and cultural understanding.

Prerequisite: Completion of Spanish 2 with a C- or higher.

*** Course meets UC eligibility**

^ Earns an extra grade point

All course offerings are subject to minimum enrollment levels and staffing availability.

WORLD LANGUAGES DEPARTMENT (CONT'D)

Spanish 3 Honors * ^

Year

9-12

This course follows the same curriculum as Spanish 3, but is a more in-depth study of the four areas of language: reading, writing, speaking and listening. Students learn vocabulary through meaningful contexts and gain an authentic perspective of the Latino culture. By the end of the year, students will have mastered all fifteen verb tenses. At this advanced level, the study of literature is a basis for further linguistic and cultural understanding. Students will write in-class essays to demonstrate their understanding of the grammar and extensive vocabulary. Students will have comprehensive conversations with the teacher on many topics.

Prerequisites: Completion of Spanish 2 with an A- or higher, or completion of Spanish 2 Honors with a B+ or higher.

Spanish 4 *

Year

10-12

In this course, students review and expand upon the content from the first three levels, as students go on to master more advanced language skills. By the end of this course, students should be able to talk in the past, present, and future using conditional and subjunctive tenses. They should also be able to write multi-paragraph texts, comprehend the main idea and some details of an authentic listening passage, and read more complex texts in Spanish.

Prerequisites: Completion of Spanish 3 or Spanish 3 Honors with a C- or higher.

AP Spanish Language and Culture * ^

Year

11-12

This course emphasizes communication by applying interpersonal, interpretive, and presentational skills in real-life situations and is taught almost exclusively in Spanish. Students engage in the exploration of culture in both contemporary and historical contexts by developing awareness and appreciation of cultural products, practices, and perspectives. The course is structured around six themes: beauty and aesthetics, contemporary life, families and communities, global challenges, personal and public identities, and science and technology. The course follows the College Board recommended curriculum.

Prerequisites: Completion of Spanish 3 or 4 with an A- or higher, or completion of Spanish 3 Honors with a B+ or higher, and AP committee approval.

First-Year American Sign Language *

Year

9-12

This is an **online course**. TKA students who register for this course will be scheduled into an elective period. Student progress will be monitored during the elective period by a TKA teacher. In this American Sign Language course, students will learn the basics of the language, be taught simple conversations, and cover topics including numbers, feelings, yes/no questions, facial expressions, cultural aspects and more. This online course includes interactive elements such as live instructor-led orientations and weekly lesson review activities, live one-on-one signing appointments, a student discussion board, and an instructor-led wiki. There is a strong emphasis on learning to sign more fluently. In the second part of the course, students learn over 200 new signs and begin to create ASL sentence structures that can be used to form conversational patterns. Cultural aspects of the deaf community are woven into each unit. Please note: Students must pass the final exams for both Part 1 and Part 2 of this course to receive credit. This course does not count toward a student's NCAA Eligibility Center academic certification status.

* Course meets UC eligibility

^ Earns an extra grade point

All course offerings are subject to minimum enrollment levels and staffing availability.

WORLD LANGUAGES DEPARTMENT (CONT'D)

Second-Year American Sign Language * Year 9-12

This is an **online course**. TKA students who register for this course will be scheduled into an elective period. Student progress will be monitored during the elective period by a TKA teacher. In this American Sign Language course, students will learn over 400 new signs, with dialogs in each unit touching on the motivation for learning ASL, occupations, ordering food in a restaurant, shopping, conversations at home and school, discussions about weather and sports, and linguistic features such as classifiers. It illustrates more ways in which a variety of ASL sentence structures can be used to form conversational sentences. This online course includes interactive elements such as live instructor-led orientations and weekly lesson review activities, live one-on-one signing appointments, a student discussion board, and an instructor-led wiki. Please note: Students must pass the final exams for both Part 1 and Part 2 of this course to receive credit. This course does not count toward a student's NCAA Eligibility Center academic certification status.

Prerequisite: Completion of First-Year American Sign Language with a passing grade.

Third-Year American Sign Language * Year 9-12

This is an online course. TKA students who register for this course will be scheduled into an elective period. Student progress will be monitored during the elective period by a TKA teacher. In this American Sign Language course, students dive into more advanced ASL signing, including unique grammar features and advanced classifiers and locatives. They learn, compose, and present their new-found vocabulary and narratives by immersing themselves in Deaf culture and community, from opinions, slang, and idioms, to using technology and media that offers authentic Deaf perspectives. Students explore how travel, cultural differences, and geography affect sign language and gain a better understanding of Deaf culture by learning important events and examining topics such as education, science, and literature. Students go on to discover ways in which Deaf culture influences the world in general. Students advance their signing skills by developing verb tenses, grammar, and syntax. Students translate Scripture into ASL structure, as well as expand their ASL vocabulary to include additional faith-related words and phrases, expanding on their ability to speak the Truth in ASL. Students apply their language skills in real conversation activities, including conversations about their faith, and through opportunities to debate real issues and explore the next steps in education and career opportunities for their new intermediate ASL skills.

Prerequisite: Completion of First-Year and Second-Year American Sign Language courses with a passing grade.

* Course meets UC eligibility

All course offerings are subject to minimum enrollment levels and staffing availability.

INTERDISCIPLINARY ELECTIVES

Broadcasting	Semester/Year	7-12
This course explores many aspects of broadcasting, which include creating dynamic announcements, use of the equipment, news writing, directing and announcing techniques, and learning a production workflow. Dedication is required.		
Note: On live broadcast days, students are required to report to the broadcasting room by 7:40 a.m. Work after school may be necessary.		

NON-DEPARTMENTAL ELECTIVES

Study Skills	Semester/Year	6-9
This course is designed to support students with their executive functioning skills, in addition to supporting the student in completing coursework for their other classes. In this class, students will cover organizational skills, time management, note-taking, understanding textbooks, strategies to maximize homework and classwork as well as test-taking skills.		
Note: This is not tutoring or a study hall, as students will receive instruction in specific executive functioning skills.		

Office Assistant	Semester/Year	7-12
A leadership role where students work directly with administrative staff to accomplish a variety of tasks including the use of office copiers to print forms, filing, alphabetizing, delivering messages to classrooms and other office assignments. General computer skills are desired. Excellent attendance is important. Students will receive a Pass/Fail grade.		
Prerequisites: Maintaining a GPA of 2.5 and office staff/counselor approval.		

Study Hall	Semester/Year	7-12
This class may be chosen as an elective. No credit will be given for this class, and the student must have parental permission to enroll. Students are required to use this time to work quietly in the assigned classroom.		
Note: Private tutoring is not allowed during the school day at The King's Academy.		

Tutoring	Semester/Year	7-12
TKA provides a unique opportunity for students to receive tutoring on campus A-G period during the school day. This class is an elective, and there is no extra cost. The Tutoring class is staffed by a well-qualified tutor and peer tutors. The main focus of the class is to offer help in math and science. No credit will be given for this class.		
Note: Private tutoring is not allowed during the school day at The King's Academy.		

Library Aide	Semester/Year	8-12
Students will be trained to assist the library staff in the areas of book processing, circulation, collection development, display making, inventory, and shelving. Students will receive a Pass/Fail grade.		
Prerequisites: Maintaining a GPA of 2.5 and Librarian approval.		

NON-DEPARTMENTAL ELECTIVES (CONT'D)

Student Council	Year	10-12
<p>Student Council members will serve the TKA community as a team and develop leadership skills by taking responsibility to plan, organize, and execute school-wide events such as monthly Clubs, homecoming, Carnival, Spirit Week, and the Junior High Banquet. Students will willingly learn and grow in their relationship with Christ and others as they receive training in servant leadership, missional living, and spiritual formation. Be advised: This position is a major commitment for the year as it is time-consuming and includes hours outside of the school day. Students will receive a Pass/Fail grade.</p> <p>Prerequisites: Application, active follower of Christ and role model for the student body, previous leadership positions (academic, athletic, or extracurricular), teacher and administrative recommendation, maintaining a GPA of 2.5 with no F's.</p>		
Peer Tutor	Semester/Year	11-12
<p>A student can sign up to be a peer tutor to work alongside a teacher. The peer tutor helps fellow students by assisting them with math and science homework assignments and test preparation. The peer tutor works under the supervision of the teacher and receives a Pass/Fail grade.</p> <p>Prerequisite: Academic Support Director approval.</p>		
Teacher Assistant	Semester/Year	11-12
<p>Duties will vary with each teacher. Students will be trained to use office copiers to print and collate class materials and will assist with filing and other projects as needed. Students will receive a Pass/Fail grade.</p> <p>Prerequisites: Maintaining a GPA of 2.5 and teacher/counselor approval.</p>		

MY ACADEMIC COURSE PLANNER

Directions: List the courses you have taken (or plan to take) each year in high school. Pay attention to TKA graduation requirements and admission requirements for post-high school options (colleges, internships, etc.). Required classes are in **BOLD**. One semester = 5 credits, 1 year = 10 credits. A minimum of 60 units is required each year in grades 9-11. A total of 240 units is required for graduation.

- Please check the Course Catalog for pre-requisites.
- AP Courses – Students who wish to take an AP class must submit an Advanced Placement (AP) Course Student Application to be approved by the AP Committee, and they must meet all pre- or co-requisites. TKA requires every student who takes an AP course to take the AP exam for that course.
- Tutoring/Study Hall does not earn credit towards graduation and does not appear on the student's transcript.
- College Admissions Requirements: Refer to specific institutions' admission requirements (e.g. UC/CSU "a-g" & major requirements).
- Note: An integral component of TKA's high school curriculum is required annual participation in TKA's service week.

THE KING'S ACADEMY

Statement of Faith

1. We believe the Bible to be the inspired, the only infallible, authoritative, inerrant Word of God (*2 Timothy 3:16, 2 Peter 1:21*).
2. We believe there is one God, eternally existent in three persons--Father, Son, and Holy Spirit (*Genesis 1:1, Matthew 28:19, John 10:30*).
3. We believe that God directly created the heavens and the earth and all that lies therein (*Genesis 1*).
4. We believe in the deity of Christ (*John 10:33*), His virgin birth (*Isaiah 7:14, Matthew 1:23, Luke 1:35*), His sinless life (*Hebrews 4: 15, 7:26*), His miracles (*John 2:11*), His vicarious and atoning death (*1 Corinthians 15:3, Ephesians 1:7, Hebrews 2:9*), His Resurrection (*John 11:25, 1 Corinthians 15:4*), His Ascension to the right hand of God (*Mark 16:19*), and His personal return in power and glory (*Acts 1:11, Revelation 19:11*).
5. We believe in the absolute necessity of regeneration by the Holy Spirit for salvation because of the exceeding sinfulness of human nature, and that men are justified on the single ground of faith in the shed blood of Christ, and that only by God's grace and through faith alone are we saved (*John 3:16–19, 5:24; Romans 3:23, 5:8–9; Ephesians 2:8–10; Titus 3:5*).
6. We believe in the resurrection of both the saved and the lost: they that are saved unto the resurrection of life, and they that are lost unto the resurrection of condemnation (*John 5:28–29*).
7. We believe in the spiritual unity of believers in our Lord Jesus Christ (*Romans 8:9, 1 Corinthians 2:12–13, Galatians 3:26–28*).
8. We believe in the present ministry of the Holy Spirit by whose indwelling the Christian is enabled to live a godly life (*Romans 8:13–14; 1 Corinthians 3:16, 6:19–20; Ephesians 4:30, 5:18*).

THE KING'S ACADEMY

Expected Schoolwide Learning Results (ESLR)

ESLR #1: Spiritually Maturing Students Who

- ❖ Have accepted or been encouraged to accept Jesus Christ as their personal Savior
- ❖ Understand the Biblical perspective on the world and its practical applications
- ❖ Understand the character of God and have a core knowledge of His Word
- ❖ Live out the Christian faith by integrating biblical principles into conversations, decisions, and actions of daily life
- ❖ Are able to share and defend the Christian faith with others
- ❖ Encourage and support the Christian community
- ❖ Understand and practice the basic spiritual disciplines of worship, Bible study, prayer, and fellowship

ESLR #2: Academically Excellent Students Who

- ❖ Demonstrate foundational excellence in offered subject matter
- ❖ Effectively communicate ideas in oral, artistic, and written media
- ❖ Read with the ability to demonstrate comprehension
- ❖ Demonstrate practical applications of taught methods and concepts
- ❖ Demonstrate logical, analytical, and critical thinking skills
- ❖ Demonstrate understanding of the Judeo-Christian and Greco Roman heritage of western civilization and its relevance to the global culture
- ❖ Effectively research, process and present information from a variety of sources
- ❖ Demonstrate knowledge of proper care of their bodies and physical health
- ❖ Demonstrate appropriate organization and study skills for successful learning

ESLR #3: Morally Principled Students Who

- ❖ Respond to social pressures in a God-honoring way
- ❖ Demonstrate honesty and integrity in all social, academic, and extra-curricular activities
- ❖ Honor God through their words and actions
- ❖ Practice and communicate Biblical principles when faced with adversity

ESLR #4: Socially Confident and Concerned Students Who

- ❖ Demonstrate the ability to discuss differences of opinion respectfully while maintaining their own integrity
- ❖ Interact with others with Christ-like love
- ❖ Demonstrate healthy, honorable, and respectful interactions with members of the opposite gender
- ❖ Use their personal talents and gifts to serve others
- ❖ Participate confidently and appropriately in social, academic, and work situations
- ❖ Demonstrate an appreciation of the significance of family
- ❖ Demonstrate respect for authority
- ❖ Demonstrate the ability to interact with adults in reasonable, thoughtful, and appropriate ways
