

GRADE 5 - AMERICAN HISTORY (PREHISTORY - 1820)

OVERVIEW

The fifth grade curriculum takes a rigorous look at American history. This curriculum begins with the pre-historic arrival of hunter-gatherer societies on the North American continent. Students examine pre-Columbian Native American cultures, Old World influences, and the age of exploration and colonization.

Using this information, students shift their focus to the developing American nation. Students trace the founding of America from the colonial period through the Constitutional era. Specific emphasis is placed on the American Revolution and its aftermath in preparation for eighth grade.

Current events is an integral part of the curriculum in each grade level and should be reviewed and discussed on a regular basis, keeping in perspective the suitability of the topic for the grade level. Current events should reflect themes from other content areas as well.
