In efforts to add additional layers of mitigation (layered approach), we identified potential enhancements to the indoor air quality of our school facilities. Currently, we have installed needlepoint bi-polar ionization devices to all the HVAC units districtwide. In addition, we have increased the HVAC air filtration by increasing the MERV rating in the filters we use. It was identified that we need to plan to sustain the higher MERV-rated filters and increase the changeout frequency. In addition, the purchase of portable HEPA filtration (air scrubbers) for classrooms, gymnasiums, cafeterias, and other high-risk areas would add a layer to our current ventilation mitigation efforts. The purchase of portable HEPA filtration (air scrubbers) for classrooms, gymnasiums, cafeterias, and other high-risk areas would add a layer to our current ventilation mitigation efforts. We identified the need for air purification inside school buses. We took into consideration the indoor air quality automated control systems. (B7). Funds are being budgeted to purchase additional sanitizing supplies (A9), to purchase shields & PPE to reduce transmission (B5) and to provide training for custodians on sanitation (A8), as needed in implementing health protocols based on guidance provided by the CDC.
