

Administering Medications to Students

Mapleton Public Schools (the “District”) recognizes that a significant number of students have health problems that require the administration of medication during the school day. School personnel shall not administer prescription or nonprescription medications to students unless appropriate administration cannot reasonably be accomplished outside of school hours and the student’s parent/guardian is not available to administer the medication during the school day.

Medication may be administered to students by school personnel whom a registered nurse has trained and delegated the task of administering such medication. For purposes of this policy, the term “medication” includes both prescription medication and nonprescription medication, but does not include medical marijuana. The administration of medical marijuana shall be in accordance with the Board’s policy on administration of medical marijuana to qualified students (JLCDB).

For purposes of this policy and accompanying regulation, the term “nonprescription medication” includes but is not limited to over-the-counter medications, homeopathic and herbal medications, vitamins, and nutritional supplements that have been approved by the Federal Food and Drug Administration (FDA).

Medication may be administered to students by the school nurse or other school designee only when the following requirements are met:

1. Medication shall be in the original, properly labeled container. If it is a prescription medication, the student’s name, the name of the medication, dosage, how often it is to be administered, and name of the prescribing health care practitioner shall be printed on the container.
2. The school shall have received written permission to administer the medication from the student’s health care practitioner with prescriptive authority under Colorado law, or a standing medical order if the medication is an over-the-counter medication such as Advil or Tylenol.
3. The school shall have received written permission from the student’s parent/guardian to administer the medication to the student.
4. The parent/guardian shall be responsible for providing all medication to be administered to the student.

Self-Administration of Medicine for Asthma, Allergies, or Anaphylaxis

A student with asthma, a food allergy, other severe allergies, or a related, life-threatening condition may possess and self-administer medication to treat the student’s asthma, food

or other allergy, anaphylaxis or related, life-threatening condition any medication that is prescribed by a licensed health care practitioner to be used by the student. Self-administration of such medication may occur during school hours, at school-sponsored activities, or while in transit to and from school or a school-sponsored activity. Student possession and self-administration of such medication shall be in accordance with regulation JLCD-R.

Authorization for a student to possess and self-administer medication to treat the student's asthma, food or other allergy, anaphylaxis or other related, life-threatening condition may be limited or revoked by the school director after consultation with the school nurse and the student's parent/guardian if the student demonstrates an inability to responsibly possess and self-administer such medication. Student possession, use, distribution, sale, or being under the influence of medication inconsistent with this policy shall be considered a violation of District policy concerning drug and alcohol involvement by students and may subject the student to disciplinary consequences, including suspension and/or expulsion, in accordance with applicable Board policy.

Adopted September 24, 2013, by the Board of Education for Mapleton Public Schools.
