SELECTION PROCESS

Phase I - Proposal Evaluation

Interested firms responding to this Request for Proposal must provide the information required to meet the criteria contained in "Response Format and Contents". The evaluation committee will evaluate submittals behind closed doors and choose the most highly qualified firm, and may invite them to participate in Phase II of the selection process if applicable. The following criteria will be considered in choosing the most highly qualified contractor:

1. Firm History & Capability
2. Current Workload
3. Project Personnel
4. Schedule
5. Base Bid

Phase II - Interviews

The firm or firms chosen as a result of the Phase I evaluation process may, at the discretion of the evaluation committee, be asked to participate in oral interviews. Following these interviews, the evaluation committee will recommend a firm to the Board of Education for review and approval.

Negotiation and Signing of Contract

Upon completion of evaluations by the committee, and the determination that the project is feasible and acceptable to the Troup County Board of Education, a contract will be executed between the selected firm and the School System.

RESPONSE FORMAT AND CONTENTS

Responses must be submitted in the format outlined in this section. Each response will be reviewed to determine if it is complete prior to actual evaluation and opening of bid. Failure to provide accurate, up-to-date responses to any and all portions of the RFQ may result in disqualification without prejudice. The school system reserves the right to eliminate from further consideration any responses that are deemed to be substantially or materially unresponsive to the requests for information contained in this section. The intent of the school system is that all responses follow the same format in order to evaluate each response fairly. The school system may, during the course of the evaluation process, request additional information to supplement and/or clarify the information provided.

Proposals will be evaluated in light of the material and substantiating evidence presented in the proposal, and not on the basis of what is inferred.

Each respondent shall provide the school system with Three (3) copies of his/her response and one sealed bid. Begin each section and subsection as described herein on a separate page. Number the pages in each section consecutively. Each page shall have the name of the respondent indicated clearly across the bottom of each page.

1. Cover Letter

Each proposal shall include a one-page cover letter at the beginning of the proposal. The cover letter shall include a project title, firm information (including name, address, telephone and fax number), names and telephone and fax numbers of persons authorized to provide any clarifications required.

2. Overview:

*The low bid will receive the most points, 35 points. To determine each higher bidder's score, divide the low bid by each ascending bid. That number is then multiplied by the total possible points to get each bidder's score for this category.

Award contract based on the best total score.

Evaluation Guideline for Sealed Competitive Proposals

PURPOSE:

To evaluate, rank and recommend the most qualified proposer who is capable of providing the best value to the owner. The committee approach for evaluating proposals provides opportunities for discussion of the listed criteria and expedites the selection process.

EVALUATION CRITERIA:

The evaluation criteria are defined in the RFP. Each committee member should assign a numerical value to each section and those scores will be averaged together. Once the scoring for sections 1-4 is completed, the bid will be opened and evaluated as described in the RFP, and a bid score will be assigned to each proposer. All of the scores will be totaled and averaged to determine who has the highest average ranking, and that firm will be recommended for approval to the Board of Education.

In the event of a tie, the two responders will be asked to present a best and final offer for the committee to review within a specified time. The Committee must keep all criteria discussions and rankings confidential.

1. Firm History and Capability: 30 points

This category should be a measure of the firm's stability and consistency, not just a measure of how long the firm has been in business. It should also measure both quantitatively and qualitatively the relevant projects previously awarded to the proposer and reflect the firms' ability to professionally staff, manage and report on the project.

"Relevant" might be defined as *schools and other public projects completed in the state of Georgia on a CM/GC @ Risk.*

Questions which could be asked:

How long has the firm been in business under the current management team?

Do the resumes of senior management reflect academic and field accomplishments?

Were the projects completed on time and within budget?

Were problems resolved promptly and to the owner's satisfaction?

Were change orders handled satisfactorily?

2. Current Workload: 10 points

This should be a measure of the firms ability to give their full attention to the success of this project and to ensure that the firm will not be distracted by too many prior commitments.

Questions which could be asked:

What is the firm's current workload and will that workload affect the project?

On previous projects did the firm act as a "team member" from preconstruction through completion?

3. Project Personnel Qualifications: 15 points

This category should measure the proposed Project Manager and Superintendent's experience level and how well they worked with the owner and architect on previous jobs.

Questions which could be asked:

What are the years of experience and how many jobs have been completed for each?

How well did they coordinate and communicate with other team members?

4. Project Schedule: 10 points

In school construction, opening on time is of paramount importance.

This category should not only compare each firm's estimate of time to complete this project, but should be linked to their track record of estimate versus actual time on previous jobs. It should also compare each firm's systems and methodology for time line management.

Questions which could be asked:

What is the firm's history of meeting scheduled openings?

Did work on previous project progress in a logical and orderly manner?

What type of systems does the proposer have in place for timeline management?

5. Bid: 35 points

First, the goal of the proposal selection process is to pick a General Contractor based primarily on qualification criteria (65 points) rather than solely on "low bid" (35 points) in order to have a qualified and compatible team member.

Secondly, significant consideration is given to the fact that the owner has limited resources and is concerned with the total cost of the project to the school system.

The low bidder will receive the most points, 35 points. To determine each higher bidder's score, divide the low bid by each ascending bid. That number is then multiplied by the total possible points to get each bidder's score for this category.

Questions which could be asked:

Is the bid category properly weighted?

Does the scoring system proportionally account for small differentials in bid?

How does the total cost per square foot to the owner compare to the last two comparable size projects, given present construction market condition?
