Report on the progress made in attaining the goals of the wellness policy (REQUIRED):

The district has achieved many parts of the various goals for the different areas of the Wellness policy. There are several items that are being discussed and/or implemented that will provide more of a solid commitment to Wellness throughout the district community. One of the specific items that continues to be worked on is ensuring the district is providing healthy options for students from all backgrounds. This is something we are attempting to achieve in the Wellness/Nutrition area as well as aligning with the district's equity goals.

Educating students on proper nutrition and good eating habits and physical behaviors areas the Food Service staff will be focusing on. In addition to taste testing, the staff will be using various materials to teach students how to read nutrition labels. They will also be focusing on teaching student's proper nutrition in order to fuel their minds and bodies. Several buildings are currently offering some level of physical activity before or after school for students. The intent is to keep our students active which will help them to focus in the classroom as well as build healthy bodies and create a positive attitude.
