Control of Communicable Disease

M

## 8451 CONTROL OF COMMUNICABLE DISEASE

The Board of Education recognizes that control of the spread of communicable disease is essential to the well-being of the school community and to the efficient operation of the schools.

The Board shall be bound by the statutes and by rules of the State Board of Education for the exclusion and readmission of pupils who have contracted a communicable disease and of teachers and pupils who have been exposed to a communicable disease and for the instruction of teachers in health and the prevention of disease. The Board shall comply with regulations of the New Jersey Department of Health and the Bergen County Board of Health governing the prevention, control, and reporting of communicable disease.

The Principal may exclude from the school building any teacher or pupil who appears to be ill or has been exposed to a communicable disease to prevent the spread of communicable diseases. As provided by N.J.S.A. 26:4-6, "Anybody having control of a school may, on account of the prevalence of any communicable disease, or to prevent the spread of communicable diseases, prohibit the attendance of any teacher or pupil of any school under their control and specify the time during which the teacher or scholar shall remain away from school". The Department of Health and Services shall provide guidance to the school of the appropriateness of any such prohibition.

Any pupil retained at home or excluded from school by reason of having or being suspected of having a communicable disease shall not be readmitted to his/her classroom until he/she presents written evidence of being free of communicable disease. That evidence may be supplied by the school medical inspector or another qualified physician who has examined the pupil. Any pupil or adult who has weeping skin lesions that cannot be covered shall be excluded from school.

The Superintendent shall develop procedures for the control of communicable disease that include the instruction of teaching staff members in the detection of disease and measures for its prevention and control; the removal from school premises to the care of a responsible adult for pupils identified and excluded in accordance with this policy; the preparation of standards for the readmission of pupils who have recovered from communicable disease; the provision of appropriate home instruction to excluded pupils in accordance with law; and the filing of reports as required by law.
