## <u>Life Threatening Health Conditions</u>

## **Procedures for Life Threatening Conditions**

## Student Enrolls in School:

- 1. Upon enrollment, parent/guardian completes health history form.
- 2. Nurse/secretary/data processor/registrar reviews health history for life threatening conditions.
- 3. If a life-threatening condition is indicated on the form, and the school nurse has not reviewed the health history form, the school nurse will be notified.
- 4. The enrollment will be held until the school nurse is able to verify the existence of a life-threatening health condition and complete an individual health plan.
- 5. Upon completion of an Individual Health Plan (IHP) and prior to the student attending, the school nurse shall confirm:
  - a. All non-expired medications have been received.
  - b. Required staff training has been completed.
  - c. Any equipment identified in the medication and/or treatment order has been provided by the parent or the school district as required under federal law.
  - d. The required staff has been provided with training to implement the IHP.
- 6. A new medication and/or treatment order must be completed, and Individual Health Care Plans will be reviewed and amended as necessary prior to the first day of student attendance each school year.
- 7. Following proper notification, students without an updated medication and/or treatment order or and Individual Health Care Plan that has not been reviewed and/or updated annually will be excluded and may not attend school until plans and medications are current.
- 8. Exclusion will be subject to the appeal procedures for student exclusions (Policy 3413). Parents have the right to a hearing, provided they notify the school within (3) days after receiving the exclusion order. If the parent/guardian requests a hearing, the District will notify the parent/guardian and the school Principal in writing, of the time and place for the hearing, and will present the case to a hearing officer appointed by the Superintendent.
