Academic achievement and learning will be affected if K and grade 1 classes are combined
Distance from school to home
Integrity of the dual immersion program

The block schedule seems to be more exhausting and less productive due to the amount of time in a class. When rotating 6 classes a day it gives the students a mental break and a little time to walk and stretch. This generation is Covid children and have been indoors long enough.
When staples of a community are removed from communities things may fall apart without the appropriate response to community concerns.
Safety
I don't send my other grandchild to elementary or middle school in your district. Your district is toooo greedy and always asking for money.
stop removing teachers
no combo class
Lot tamaños de las clases y el hecho de que no tienen suficientes ayudantes en la clase, más de 20 niños es demasiado para una sola maestra (Lot of class sizes and the fact that they don't have enough helpers in the class, more than 20 kids is too much for one teacher)
Con la mayor cantidad de alumnos es más común que presten menos atención a ellos pies serían muchos para pocos maestros. (With the larger number of students, it is more common for them to pay less attention to them. Feet would be many for few teachers.)
Allowing political agendas in school
Not enough resources to really make a difference.

Location
Degradation of teacher efficacy.
Calidad en la enseñanza y grupos con una gran cantidad de alumnos (Quality in teaching and groups with a large number of students)
Kids develop mentally, emotionally, physically, and interaction is part of child development. We dont want to go back to Covid Time closure.
Adequate staffing; DI program integrity
Too many students to one teacher
Less support for kids with IEPs
Overcrowding, longer lunch lines, more bullying, insufficient staff, larger student populations=increase in behavioral problems and increased lack of
More traffic
Not worried, I'm pulling my kids out of the district once my oldest is out of elementary school
El aprendizaje no será lo ideal con muchos estudiantes en una misma clase (Learning will not be ideal with many students in the same class)
Distance from home
Closest school will be further away. Increased traffic at schools. Administrative growing pains may result from combining different schools with
Increased traffic for student drop off and pick ups. Increased competition for school extracurriculars (sports and academic teams).
Quality of the academic programs in the school and class size. Also dealing with bullying and being able to monitor students.
Bullying

Having too many kids in one classroom and per teacher. Currently PE teachers are overseeing about 100 students when giving sports and seems challenging to oversee what happens to all kids while students are under their supervision
they might more of the bullying
Accessibility to quality music education
I do not want my children bussed when Grandview is across the street.
Teacher student ratio
Equity for all, parents want to volunteer and get involved but it's always the same people.
Combo classes
Unsafe communities due to homeless moving in, gangs,
Displacement of teachers
School site management
Dual Immersion
Right now classrooms are at capacity/ imagine more students in a classroom. It would be over capacity and students wouldn't be able to learn as well as too right now. Teachers wouldn't have time for each individual student.
Security, student safety
Large class size, less attention from teacher may lead to worse academic performance
We are so worried about the safety of our community because there will be homekey project nest to my house, I worry about my kids can not play around or even walk around because there are so many homeless people walking around, we plan to move out Hacienda heights
Not able to choose any school
Not able to chose a school
Not able to choose school
Community Safety, and Keeping Students Safe
If one teacher has more the 20 students it makes it harder to teach and doesn't give enough room for one on one with a student that may need more help. Please don't turn this to LauSd. I came from their and i can see how over worked and tired some teachers are.
Teachers actually teaching
Location
To elaborate on the emotional, last year my son started off in a combo class that he didn't thrive in. He was depressed he had a different reccess time than his friends in the same grade. He needs more help in math but wasn't getting it, part because the teacher had to teach 2 grades. While this is temporary it is detrimental to some kids who can't handle it. We had a rough first 5 months of school, eventhough combo class was maybe a month.
If there are to many children per class each child doesn't get individual attention
Extremely difficult and hazardous drop off and pickup do to lack of parking around community as a result of overcrowding.
Adjusting to new staff when they already know staff that is there now.
Parking

Loss of Dual Immersion program
Excessive Traffic
The type of people that will attend the school
Safety
Consolidated schools will increase the amount of student per teacher ratio. When this ratio is increased, the quality of education drops.
Combination Classes in Elementary Schools
Estamos luchando para que la escuela se convierta en una escuela bilingüe, ya que esto dará a los niños mejores oprrunidades durante su vidaBilingües (We are fighting for the school to become a bilingual school, as this will give the children better opportunities during their bilingual lives)
Class sizes need to be smaller and go back to the 20 to 1 ratio.
Student culture. Overwhelmed staff. Under staffed. Drop off/ pick up etiquette.
Dedicated resources for special education. One on one special dedication to children with autism.
Facility availability for more kids on campus.
Exclusion from activities
School sizes will be too big. Pick up and drop off traffic will be a nightmare.

Loss of certain dual language programs
Dual immersion programs

Please provide additional feedback:
Overcrowding at schools.
there would be no challenges
HLPUSD schools are amazing, I think that the different changes would affect make actually somehow great changes
Don't make us move.
More baseball
I dislike how we dont do any fieldtrips
can we have dnd
Baldwin academy should have the opportunity to go till 8th grade. It's a great environment and children there actually learn because the principal and teachers that show they care. My child had to go to another school and noticed that school doesn't care for their middle grades!! Baldwin academy kids
School is fun
Better school food for the students.
Please make the band room bigger everyone trips on stuff.
no challenges
Some other additional feedback is that there should be more elctives also there should be hal so if af time breaks per week
us people at lassalette need a new PE teacher. He makes us run in 100 degree weather at times and sometimes he doesn't even let us go to the
Small schools should be connected to big schools
this takes up class time
i like my school
I don't want the school to close because it can hurt people or it can make students sad if this school closes down.
I don't want you guys to change the grades around because its going to make things complicated and confusing.
Think they should have back up teachers because at are school we had one teacher leave and know are classes got switch up.
I think that if schools change it wont effect the school
i would feel like going to 8 grade
I don't want schools to close as much as I hate getting up early I like how active the P.E is.
I do not think schools should change because its perfectly fine how it is.
Change grades
Some times better food because the food sometimes has mold.
i don't want the school to clos because i don't want my friends to leave.
Better food that's edible and you can eat last time my friend got food poisoning by the school food
To put 6th, 7th, and 8th grades in one school.
i want the school to change.
I think they shouldn't change it
I would not like the feeling if you guys will close down the school or change the grades.

I don't want schools to change grades.
I think you should do it because upper grade should be together and lower grade should be together.
I want 1st through 8th grade.
I would not like the school to close down or change grades because in the future when I meet new people I would want to explain this school how I
No because if the district moves grades around then no one is gonna be used to it and it will be different for everyone because the school wont be the
Don't change anything. Maybe change the time school starts to like 8 30.
Baldwin needs to become a k-8
i dont have anything to say
I don't have anything to say.
I feel that many schools need to do this.
I will feel uncofertatble with other schools in our school.
we sould get better help
more art
have a good day
What additional assistance will teacher get with over size class rooms ?
If schools are combined I'm afraid classes may become too large for one single teacher to handle, which may leave some students behind because they will not get the attention they need and will fall behind academically.
My daughter had a combo class and had to move 3 classrooms. I would hear that in some days she would not have anything to do because the teacher was busy with the other grade. Have less students per class base on the board information Many parents have left the district, combo classes will only
Please provide a safe community for our kids . And no homeless plan in our district.
School culture affects parents' decision. Holding truth and building good characters will lead students to be loyal, truthful, and responsible. Thus,
When the population of students increases so do problems. One of the reasons why our middle schools are safe and manageable is because the population is small and the principals know their students. Merging middle schools would destroy their individual cultures and create large schools that are unmanageable. Sacrificing the safety and culture of our childrenâ€™s school is not an option over â€œconsolidationâ€ of resources.
My children have already had to experience one school closure with the district. Having to do this again would be a great impact to their continued
When consolidating, keep in mind building family partnerships as an integral part of the decision making.
My child goes to Winglane elementary school and I truly love the ratio (teacher per student) I am truly scared that this school will be closed along with each and everyone of the other parents. It is a very family oriented community the parents have built at Wing Lane elementary.
Closures and reconfigurations of school May lead to less academic, and social-emotional support, specially for our children with special needs. School
I would like to say that my son is currently at Wing Lane and i really appreciate the staff teachers and principal. I feel safe knowing that Mrs. Blanton knows everyone name and greets them every morning . I love that it's a small school and the parking is not overpacked and it's an easy pick up and drop off situation. My son loves his school and enjoys his teacher . Mrs. Blanton makes everyone feel welcomed . I do not want Wing lane to close down and be merged with a another school . It will impact his learning and it will not continue to feel like a home. Wing lane is a great school and I absolutely love

Class sizes are already too large! School closures shouldn't be an option! If you cared about the students in the district class sizes would be smaller. You closed schools and sold off property. Kids need to come first over profit.
Just a personal opinion if reconfiguration of schools will eliminate having combo classes, that would definitely have my support and of many parents.
I think that there should be more work time to finish things in class.
I feel the administration at our school could do a lot better with how they treat the children, how they treat the parents, how they address bullying and issues that happen on school campus, the treatment they provide to the teachers, not to push this new transgender and gay agenda onto the children and let them be themselves without making the new agenda seem appealing to the younger students and middle school students. They aren't fully
please dont make me leave my friends, please
classes getting super full i feel will be challenging for students and teachers. When theres more people in one school i hope we are still provided free items and they dont change previously free thing to being paid.
This school is nice.
I wouldn't like it if school closed because then I'd loose some of my friends that I don't have contact with other than school.
I am scared of losing my friends
I don't want to be away from my friends, please don't close this school, this is scary.
I dodn want the school to clos
I don't want to move schools especially because of my freinds
i dont wont to be apart frm my friends ols i tec itwil be scare.
Don't close this school no no.
Pretty good clubs i just wish you can add cooking
special education and class sizes
there is a lot bulling and harrasment in school
Mabye provide transportation.
improve school lunch
Sports are important
Please remove uniforms.
please don't close fairgrove academy
I feel that the dress code is extremely sexist toward young women.
Mabey put a class to make people learn different languages so that there is more kids that want to learn them.
We need a football program
one suggestion I have is to provide more clubs.
I have bad asthma and will impact if you take the nurse
Caseloads for special education staff
Would like for Baldwin Academy to transition up to 8th. To stay under same principal administration and school culture.

Some schools are exceptionally loved, and others not so much. The community would benefit from keeping such loved ones open for as long as possible. The significnat positive impact of these schools can be seen in our children, and in their families involvement. Please be mindful when deciding which
no homework
pls put football for 5 grade
The school programs are awsome.
I love this school because it has so many memories. Many activites, And games.
I like fairgrove nd i would want to stay in the school because i already know the layout of the school.
I really love this school I would really miss every memories that this school has created I learned so much from the teachers and the sports. I think it is really nice that they make us wear uniform other people may not like wearing it but it helps others a lot like kids and parents because they may not have a lot of cloths and maybe cant even afford a lot so you can wear uniform every day and with other cloths you can just wear at home. And its more better
learning is very imponent
I like soccer
fairgrove is cool :)
Fairgrove is cool :)
I want school to start at 1am
my home life will be more difficult
It would be difficult to having to move schools further away.
I don't think it would affect as much on us.
DON'T CLOSE FAIRGROVE
I think that fairgrove academy is a very welcoming school and their special events are amazing
i hope to stay in this school because it keeps me safe and makes me feel safe
Middle school is important for the developing student. It gives them the opportunity to explore their independence and individuality. They need their own space, away from the young students and not yet ready for HS. Reconfiguration may delay maturation from elementary into high school.
This letter began with "experiencing declining enrollment," then why in the "h" are you building a new school Wedgeworth? DOES IT MAKE ANY SENSE?
I don't feel this survey is helping to find out how parents choose schools. School and the overall neighborhood safety is very important. Schools readiness/professionalism is also very important. If schools are starting a new academic year with multiple teacher vacancies with no plans on when it
One of the biggest issues with our schools are the class sizes. Too many students per teacher. Kids tend to get left behind in these scenarios. The class rooms have only gotten more crowded each school year.
If my child is further from home they will be less likely to be part of their school community ie afterschool events/programs and will be less likely to want to participate in things that will take them out of their comfort zone or community area
Why can't the students benefit from a lower student to teacher ratio?
This is never an easy task. Thank you for reaching out.
En algunas grados tienen muchos alumnos y no reciben la misma atención (In some grades they have many students and they do not receive the same

My son is in special education and has gone yo 3 different schools already due to closures/reconfiguration. It's unfair to for the school district to disrupt a special needs student's educational program and hinder their education. My son would have to readjust once again therefore triggering behaviors that
Winglane is one of the best schools my daughter has been to. It has helped in so many ways from special education staff and one of the best principals in
School closures will highly effect the children & the class sizes. It's important to keep schools open & keep the kids in their schools. We can not effect the
We already have way too many kids in classrooms, I don't want to imagine putting more kids in classrooms
I am concerned now that the sixth-grade team has to take in more students because of low enrollment. My son has difficulty learning, and this is not
I feel the increase class size will hinder my child ability to get the attention needed to succeed. The teacher will be overwhelmed and less effective.
Es un caos para encontrar parking y transitar en la calle cuando juntan 2 escuelas. Ejemplo en la escuela Nelson es todo un caos el recoger a los niÃ±os en la salida..muchos carros y poco espacio para estacionarse. (It is chaos to find parking and travel on the street when 2 schools come together. For example, at the Nelson school it is a complete chaos to pick up the children at the exit...many cars and little space to park.)
More attention to special education classes. Important to have one school dedicated to special needs students. Not fair special education students need to transfer each school year to new schools. District needs to provide more aids and teachers for special education. Especially to preschool, tk and
People are moving out of La Puente or HLPUSD because of the rising cost of living specifically the rent. We want to stay here but the rent keeps rising so we may have to figure something out. Please put this in consideration.
Other important things to consider - addressing differences in practices/norms from two merging schools, combining offerings from two schools rather than cutting them, increased college readiness/preparation
As a parent, I want to ensure students have qualified teachers who have subject matter expertise in the core class they are teaching - ESPECIALLY IN MATH. Also that classes are not overcrowded so that teachers are not stretched thin and cannot meet the learning needs of an enormous class size
What will happen to the impacted special education classes? Will teachers be supported with enough assistants?
Classes are already too full.
DO NOT CUT DOWN ON EDUCATION!!!!!
Other children from different districts can bring children with bad behaviors and can cause safety issues.
Consolidation or combining of schools will have significant negative impacts for the students and parents. Transportation from home to school will tremendously become inconvenient. Culturally background and the diversity of the school or classroom can affect the students well being and emotional social interaction skills. Increasing in classroom sizes will be harder for teachers to manage and teach the students. The students will not be able to get the best education they need. Consolidating schools or downsizing resources is not a way to improve in school enrollment. Please reconsider
I believe kids will have a much harder time learning and staying focus during class time.
Recursos informativos para que los estudiantes se mantengan libres de posibles gangas , drogas y se involucren en actividades beneficiosas (Informational resources for students to stay free from potential gangs, drugs and get involved in beneficial activities)
The biggest concerns about combining schools is that students may end up at a less desirable school (possibly second or third choice pending those become full), they may become separated from their friends which may affect their mental well-being, and lastly moving to a new school may very well require a longer commute and this needs to be taken into great consideration for the working parents who may opt to do distance learning and further
I would prioritize what happens in the classroom then consider spending to supplement the needs and support of the students within those classrooms. Student learning should be the focus of any and every conversation.

A bigger number of students per class means less focus less one on one with teacher it's an un controlled environment over populated and crowded
If the school system gets any worse, I am going to homeschool.
Deeply consider about the safety if the students
My wife and I both feel that combo classes will affect our child's learning environment. If this keeps up we will be forced to consider another school district. We came to HPLUSD with hope that our kids would have a better learning environment.
Children not receiving services they need such as mental health, counseling, social skills.
stop reconsolidating especially during the school year, why are we paying for weight rooms when we could be paying educators to better enrich our children's lives. it seems like this should be common sense.
Do not mandate covid vaccine to employees and do not mask our children. I will pull my children out of school if this happens. I have 3 children in
Class sizes are big issues, more than 20 kids is too much for an elementary teacher, kids need more attention and help and definitely having too many
Stop with critical race theory.
Consider online classes for students.
I am against the closure of schools as this will significantly impact the teacher to student ratio. It' not far to the youth or teachers to increase class size.
I am concerned that children will be overlooked and held to unreasonable standards. The class sizes are also concerning.
Thank you dual immersion teachers! We appreciate you!
We need bilingual teachers for our dual immersion programs. Nelson is missing a kindergarten teacher, Newton is missing a 7th grade, Los Altos kindergarten teacher is not full-time. Enough! Invest in dual immersion!
For me the quality of the education is key. Having good, motivated teachers that want to teach the kids is critical.
Need more chinese programming
Sunset Elementary school lacks a lot of stability and leadership. This school year started of terribly with lack of teachers and having students mixtures of
Safety should be the top priority.
Configuring classes affect teachers and students. Going from a straight grade level to a combo can change the dynamic of the classroom. Even changing the class sizes to have an average of 36 students in one class creates a difficult environment for students to learn effectively. As a parent, I would think it would be very difficult to have 36 students or more in a classroom and have my child be focused. Or even having to change classes and teachers after
Cannot stress this enough and I know I'm not the only one, NO LGBT/GENDER IDENTITY EDUCATION.
I'm aware of the difficulty of decreased enrollment and the desire to reconfigure schools. I think it is critically important for Teachers to be in smaller classrooms to allow for the student/teacher bond to be as strong as possible. The relationships with the school staff is very important to me and my son.
School closures affect all of the people who know and love their school. The only ones who are not affected are the district officials who generally just want to save money. It's such a shame that we are even having this discussion.
Sometimes it is hard to join afterschool activities if you take school transportation, due to no transportation after sports. Hard for parents to pick up if
More staff support needed not just teachers, but aides to supervise larger student body to encourage and enforce healthy behavior and discourage and
I worry that school reconfiguration will adversely affect our district's classified staff.
Clases con un gran número de alumnos afectaría la calidad del aprendizaje y la enseñanza. Podrá haber más problemas entre alumnos (Classes with a large number of students would affect the quality of learning and teaching. There may be more problems between students)

En mi opinión me gustaría que la escuela Baldwin agreguen clases asta el octavo grado eso nos beneficiará mucho . (In my opinion I would like Baldwin School to add classes up to 8th grade that will benefit us greatly.)
Please consider the ramifications of school closures for traditionally under-served students and families. Considerations for fostering and maintaining
I like the ration of teacher to kids at my current school. The kids get more attention.
Our school teacher/student ratio is huge. 2 5th grade teachers for what should be 3 or 4 classes. Same thing with kindergarten.
Baldwin academy becoming a middle school as well.
I feel as if we were to close schools then we would have bigger class sizes which do not benefit our students. The curriculum also seems to be different in schools from in HH and down in La Puente. This decision should have been made before it was approved to rebuild the school in Hacienda Heights. It's
Desearíamos que la escuela Baldwin Academy abriera grados hasta el 8 (We wish Baldwin Academy would open grades through 8)
do not consolidate the schools. It will impact the quality of the education received (bigger class sizes, bigger student: teacher ratios, less focus on the
In reference to Special Education, particularly support services (e.g.; RSP, Speech, Psychologist), I am concerned that these services will not have a classroom available to conduct the important, confidential work they do with some of the most vulnerable students in the district's care. If they are once again regulated to closets or using the cafeteria, it would be disrespectful to the students, the programs, and the faculty.
En Baldwin Academy seria muy bueno que los niños pudieran estudiar hasta el grado 8 creo que la escuela tiene el espacio y cumple los requisitos 1además sería muy útil para nuestra cuminidad (At Baldwin Academy it would be great if the children could study up to grade 8. I think the school has
As a parent with lots of concerns, the lack of communication from the district. If I cannot get that reassurance from the high ups, I do not feel
We have increased class sizes, how will configuration improve this? I actually feel it is going to increase class sizes even more. This is not good.
Allowing families to choose schools wonâ€™t fix the problem. In fact, the families will choose schools with good ratings. Currently at Grazide there are 6 full classes in the kindergarten yard at lunch time. Yes, thatâ€™s right. 6 FULL classes (1 preschool, 2 TK and 3 kinder) are ALL sharing one small yard. There are 2 swings total. The yard is that large enough to accommodate for 6 classes. Kinder classes are allowed to eat lunch in the cafeteria but the rest of the school has to eat lunch outside because there is not enough space in the cafeteria. There arenâ€™t enough restrooms for all the kids at recess
The changes that take place need to take into account the students' best interests. We need to make sure that class sizes are not too large and the least
Considering closing schools will make classroom sizes bigger and it is very difficult for teachers to teach so many students and for students to learn and
There needs to be other options or ways to reduce spending that does.not include closing schools. HLPUSD was already sold two properties and forced
people are disappointed due to your liberal and woke agenda
Reducing the number of students each teacher is responsible for would make the biggest impact on student behavior and performance.
Los niños ya están afectados del covi. Todavía emocional y académico no se recuperan. Todavía les cuesta la normalidad pues muchos sufren de anciedad. No se les puede quitar nada a los niños porque ya el covi les quito mucho. El distrito tiene que encontrar los recuerdos para si no ay estudiantes permanezcan las escúdelas y programas. Nosotros seguimos pagando taxes así que igual las escuelas y programas tienen tienen que seguir. (The children are already affected by covi. Emotional and academic still do not recover. Normality is still difficult for them as many suffer from old age. Nothing can be taken from the children because the covi has already taken a lot from them. The district has to find the memories so that no students
Currently classrooms have maximum number of kids. Can you please share where is this data coming from? What statistics are you using? They are combing grades because the school don't have the rooms for the one single class.
Para es difícil que se cierre la escuela porque el aprendizaje de hijo disminuye (It is difficult for the school to close because the child's learning decreases)

Already crowding and dangerous drop off and pick up conditions, bathroom, sanitation, crowding, large class, sizes, far distance from home to school.
I fear how it may affect my daughter mentally and emotionally.
Would really love and appreciate if Baldwin Academy could be a school where my kids could attend up to 8th Grade!! Thank you
Yo quisiera que Baldwin Academy tuviera hasta el 8 grado (I want Baldwin Academy to have until 8th grade)
Closing a school disrupts the community. Every attempt should be made to keep a school open regardless of cost.
I feel the choice schools should be exempt from this consolidation. This would disrupt the culture on campus far too much.
As schools are consolidated how will you build culture? Will you take advantage and rebrand so that schools get a fresh restart?
Special education students should be made sure to be included in school. Talks to other students about our special education students need kindness as
Combining schools will not support students who are already enrolled into schools within a low income community. It's a way to support the district's agenda of what the district feels is best not student's need or education
We can't possibly be down that many students that you would need to combine schools. What is the current teacher to student ratio?
If we close/combine schools, it is important that it improve programs. Combining an small elementary with too many combos or few options (one forth grade class) with a small middle school that is forced to cohort students and teachers have nobody to collaborate with, doesn't solve anything. It just combines two problems on one site. The combining of schools should enhance what is available to students.
Equity for all not just gifted but also the students who are not independent learners. Limiting class sizes will help teachers scaffold and support all learners. Sometimes teachers need help supporting students when the class has behavior issues. I notice a lot of trash around campus, students need to pick up after themselves. More awards or positive reinforcement in and out of class. Gift cards for kids that help clean up around campus. More
I hope this does not negatively impact Valinda
I actually think that combining school would give students more opportunities for extra curricular activities and elective classes. More students and adults gives a larger pool of offerings and students with the same iterests.
請讓遊民離開哈崗 , 小孩安全是第一任務 (Please let the homeless leave Hagang, children's safety is the first priority)
Deseo que mi escuela tenga hasta grado 8. (I desire that my school goes until grade 8)
Too many students coming to the Hacienda Heights schools and bringing the schools down. That is why people pull their kids out of the schools, especially High School. Class sizes too big so they pull them out as well. Public schools have become too political instead of listening to the parents.
I think smaller classes can benefit students and teachers. Smaller classes and more teachers
It's known that our school educational program here in state of CA doesn't provide any skill training education for students can experience some skill training to explore and support when making decisions for college/university choice and their major and minor as well as a plan to achieve their career.
Please make sure that any school closures are planned in advance and do not affect student and schools at the start of the school year. If closures are to occur, the consolidated schools should be equipped with all the necessary rooms, furniture and textbooks prior to the first day of school.
Please only consolidate Los Molinos to make it a duel immersion school.
Appropriate Student-teacher ratio is crucial to my student's academic success.
不建议合并，学生太多，不利用管理 (It is not recommended to merge, too many students, do not use management)
Consolidation of schools will only increase the class sizes and it will not allow for enough one on one time with students.

If schools were to be reconfigured, having an all Dual Immersion school would be beneficial to the program. Dual Immersion is suffering because there aren't enough teachers and new administration is not aware of the intricacies of these specialized programs. If you had a school that was just DI then the program would receive the attention it deserves and the administration would be trained on how to elevate the program.
I feel very strongly about class sizes. There are already way to many students in a classroom
If no class for my daughter's needs, HLPUSD needs to contract out to find the appropriate placement per our IEP!
Would like to be able to choose any school within the school district
Community Safety, and Keeping Students Safe
Keep class sixe small, also don't merge multiple grades for one teacher.
Class sizes May become overwhelming.
Will opening TK for even younger children possibly help with enrollment
I am not in favor of school consolidation. This would put too much pressure on school teachers and resources.
Don't want bigger class sizes
I'm afraid reconfiguration might affect school culture
Smaller sized classrooms are better for learning.
You should really consider accessibility for the community as a result of consolidating schools. Things that are already challenging such as parking and drop off traffic. This consolidation should include time changes.
If there is a school closure, you need to inform all involved (teachers, students, parents) as soon as possible, don't wait.
Workman has low enrollment, I would hate to see it close. Make it the high school with CTE classes. I understand adult Ed offers those courses which is awesome but if we want enrollment we need to offer something to entice student to come to our district. Look at Rowland USD and West Covina, see w
My 5th grade son attends Los Molinos and his class size is 38 students. This teacher/student ratio is unacceptable and part of the reason parents are
class sizes are already high enough, closing schools will result in even bigger classroom count. I am concerned that the change in school culture may be
Schoolâ€™s should be reduced in size rather than closing some and filling others to fill capacity. Some schools are filled beyond capacity. In some schools children are in portable classrooms. Some school auditoriums are too small for the amount of parents. Closing schools seems like it will only worsen
School security guards in elementary and junion/high school would be great.
I feel as though there needs to be better special education services and allowing our disabled students to learn alongside their typical peers
Lack of staff with reconfiguring. More students in one classroom. Teachers and staff stretched too thin. Activities for students also based on number of teachers and volunteers to assist with the programs. Consolidating will stretch staff and teachers thin. Current support system for teachers is lacking.
Have a school specialized for special needs students so that they donâ€™t have to be bounced around from location to location
You will continue to lose students if your curriculum doesn't focus on Academics - Reading, Writing, Math, Science
Maintaining small class sizes should be the #1 priority. Post Covid students need more 1:1 attention as opposed to increasing class sizes.
Very concerned about large class sizes. My children are thriving in part due to reasonable class sizes.
Want to make sure is in a good neighborhood.
You all are incompetent. Bring race and sexuality into the school and classroom and I guarantee enrollment will decline further. GUARANTEE.

I work at Wing Lane. We have worked very hard to build a school culture of trust and inclusivity. Our cafeteria is open at 7 am which helps out many families in our neighborhood. Kids have a safe place to go where they are supervised. Our special education students are not treated differently or ignored by the principal. They are not referred to by their designation EVER. Our principal is able to effectively support their needs and support the teachers when dealing with difficult situations that arise. Unfortunately, this is not part of our district culture and therefore a huge concern. We love having an active parent booster community that initiates fun activities like dances, movie nights and a school store. We have many families that have sent 2-3 generations of their kids to Wing Lane and feel strongly linked to the school. We have worked hard to build relationships with families and were able to maintain those relationships even through the pandemic. We have band, music and choir programs. We have Conga Kids which was initially
Already the after school program does NOT have enough spaces at Grazide. We NEED to expand this program no matter what.
Combining the schools will make it very difficult for parents who may have previously had students in TK-6th grade, as now they may have to drive to multiple schools, making trips they previously would not have had to. I also think younger and older kids can benefit from interacting with each other on campus. It gives younger children something to look up to and want to emulate, and it gives older kids a chance to mentor younger kids and be proud of
I worry about class size, why close schools
Dual programs may be less available in different languages. Over crowding of kids at school and during drop off/pick up times. Concerned that teachers
Elementary schools suffering with more than 40 students is really unethical and morally wrong, it is unfair to have so many students in one classroom with only 1 teacher , either you decrease in class size or you bring in an instructional aide to support the teacher of the classroom
The district should seriously consider using existing school sites instead of spending on a new campus at Wedgeworth.
School with the arts is a priority as many schools do not offer these programs.
Consolidating schools are no benefit to the students or teachers. It's to many kids for teachers to handle in class. It will affect the teachers ability to
Education system in general is flawed
学校老师的水平和稳定性 (The level and stability of school teachers)
May be have the school sites combine to make a TK-8th grade
Class size are to big for one teacher
consolodating campuses by adding portable classrooms at one location while also taking away usable public space including playgrounds and grass areas is a challenge. Smaller cafeteria and food service areas makes lunches challenging when smaller campus are reconfigured to handle a larger student
schools with low enrollment should be closed to save district overhead costs and allocate those resources to schools that need the supports/resources.
Close Wedgeworth Elementary
im most concern with how this would affect class size and crowding
With current school numbers, class sizes are already impacted. Elementary, middle and high schools have classes that are 30+ students with little
Lower grade classes should be 20 to 1
學區和社區安全是家長最主要的訴求 (School district and community safety is the most important appeal of parents)
Class sizes in this district are already too large. Students in these classes don't get the attention and support needed from their teacher because they are simply spread too thin. School closures will continue to increase class room sizes. This would be to the detriment of our students education.

I am not in support of consolidating schools. Schools in my neighborhood are already crowded, class sizes are too large, there is lack of resources such as access to playgrounds and space in after care programs. Teachers and admin staff are over worked as-is, consolidation would put additional burden on them at a time when teachers are supposed to work with students and make up for lost learning during pandemic.
I am a Glenelder Alumni, It was heartbreaking when it was close and even more so when the entire school was torn down. This all happened while I was an adult. Larger school dont need to have all the districts attention, money/resources. Our smaller school deserve the same focus. They dont need to be
Schools need to have all students able to eat inside not outside. There are days itâ€™s raining too hot or cold and kids are forced to eat outside
Make efforts to reduce class sizes. It's a better learning environment where attendance will increase (school gets funding), caps enrollment at lower levels, and will prevent lay-offs. Also, HLPUSD does not collect school impact fees on new developments. The state wants more dense housing, which results in denser population and more kids that need schooling. If you can find a way to start collecting school impact fees, those areas that experience a lot of residential development will be required to pay the fee that can help build schools when that time comes. I know the opposite is occurring
Since enrollment are decreasing then perhaps we should extend TK to younger kids?
Please note, section 2 would not allow me to select all applicable options. I could only select one
Many students left HLPUSD to Walnut district because of the weak academic standards, opportunities and teaching offered.
TK-5 schools should remain. Removing upper grades from primary will remove the leaders from the school. Upper grade love to help the littles and show them the ways of the school. Big Buddy and Little Buddy activities are looked forward to. Lower grades love seeing their older siblings and are comforted knowing they are near. Parents enjoy being part of once school community. Dropping off and picking up children from one school, knowing
Why is the district still building a new school at for Wedgwood if there is low enrollment!
The challenges of consolidating schools will increase the overcrowding at the already crowded schools like Los Molinos Elementary and Newton MS. The schools are so full that portables have had to be built and added to support the student population. Consolidating schools will only worsen this problem.
Currently my student gets extra care from their teachers due to not having a large class
La escuela Fairgrove, cumple con las expectativas, que los padres buscamos para nuestros hijos hoy en día. (Fairgrove School meets the expectations
I am hopeful that this process could make schools stronger in resources both material and staff-wise. I am a little concerned the schools will become over crowded or there will be a higher student to staff ratio.
HLPUSD should be a two-high school district! Our numbers simply can't responsibly sustain three high schools. Close one at least! It would free up so
It is so important to have smaller class sizes so that students get all the support they need.
With the school closures and reconfiguration of combining students is just going to create overcrowding classrooms. This was our biggest concern in the LAUSD schools and are happy with the smaller classroom size in the HH district. If this goes through then I'll be considering to homeschooling
Share teacher responsibility/two teachers teach a class or vise versa, move teachers where the need is greater or shortage
I'm concerned about the grade level grouping at sites and how that would work for families. I have a student in 4th grade and 2nd grade currently and I love that they are both at the same campus. How are the sites going to be split up for grade levels? Also, how would the campuses be modified to fit the needs of those students in those particular grades? For example, if a site is for only TK-3rd, would there be new play ground equipment added for those
HLPUSD students deserve the smallest class size possible. While there may be benefits to consolidation, the benefits are larger to keep class sizes at a
The K-8 schools are a great asset to our district. Please do not close any of them.
Special education NEEDS support staff and resources. They also desperately need to have programs specifically geared toward sports and extracurricular

Concerned with class size increasing, availability of after-school programs, school culture decreasing, impact during school consolidation transitions, and
Schools are differentiated within the district by the programs and funding that are provided. The desire to put a child in a school on the Hacienda Heights side is higher due to academics, programs and funding versus the La Puente side. The demographics should not affect how the programs should be distributed within the school district. We are one school district, the programs should be offered evenly throughout all sites.
I feel that classes will become jammed packed and their academics will drop. Kids will fall through the cracks if they go unnoticed. Having dual immersion is such a great advantage for my children and taking that away disheartened me.
My son , has a diagnosis of selective mutism, which if anything , he barely is gaining some control of . Since he mostly has had his same classmates since kinder, now he is 7th grade. By having school closure I feel it would impact his progress and make him regress social emotionally and academically. I don't FEEL that closing schools is the RIGHT choice. I'm pretty sure , there are other MULTIPLE choices to be made.
I have concerns about the possibility of this change due to the transparency the district has had in the past. Parents not knowing what is happening until it is happening, not including parent input. If this does happen, I would hope the district would create some type of parent panel as well to be involved.
My biggest concern is class sizes affecting thevquality of instruction. At Los Molinos the class sizes are already much larger than would be optimal.
How would reconfiguring schools change class sizes. The current elementary school my child attends seems overly populated and to capacity as is
School buses should facilitate transportation to all the schools within the district so parents can have a choice of which school we want to send our
I love my kids school (Kwis) I would be devastated if it were to close. To the point where I would take my kids out of the school district.
We need smaller class size (students to teacher ratio reduction) and not school consolidation which will likely lead to larger classes.
I am concerned about the impact that an upper grade student can have on lower grade students. How will a campus accommodate for more students on
I was only allowed to check one box under education support services, but I would also add AVID, extracurricular/enrichment, wellness centers, and
It would have been ideal to keep the original proposal to change Wedgeworth from K-5 to K-8. The school would have been perfect to combine students
If there are too little schools than there will too many students per classroom and the special needs students will not get the help they need.
Special ed teachers are important
School closures would mean more students enrolled at a particular school and more than likely classes will be more impacted. This may lead into less individual attention for students. Transportation to and from school may also have an impact depending on school distance. I'm also concerned
Class sizes are already big, need to hire additional teachers
leave the schools open. pay teachers more. hire more teachers and less admin
second question was not select multiple. why are you all so incompetent?
My 5th grade son attends Los Molinos and his class has 38 students. This teacher-student ratio is unacceptable but yet you are looking to consolidate elementary/middle school classes. THIS IS WHY PARENTS ARE LEAVING HLPUSD
Reconfiguring schools will affect our student teacher ratio. As it is our kids are struggling academically and emotionally.
Why not have smaller schools, rather than max out schools?
There are way to many kids in one class! My son class has 32 kids!!!
