

7122	Pre-Admission Health Appraisals
-------------	----------------------------------------

All preschoolers eligible to enroll in September and living in the Ballston Spa Central School District must have a physical examination completed by their own physician prior to the first day of school using the health examination form provided by the school.

If the parent/guardian of such pre-school student has not furnished the school with such health appraisal, then the district's school physician or his/her designee shall give parents an option for their child to receive a free public school health appraisal. The appraisal must have been conducted within one year prior to the entrance of the student into school.

Adoption Date: 07/10/2019
