

7410	Extracurricular Activities
-------------	-----------------------------------

The Board of Education encourages the development of those activities that extend and/or enhance learning opportunities in a relevant way. Such activities shall be planned to supplement the experiences available to students through their homes and community. The Board recognizes the value of both competitive and cooperative extracurricular activities because of their potential for developing a sense of good citizenship and human understanding within the school community.

Extracurricular activities shall be considered appropriate when involvement enhances the educational experience, and the value of which is in proportion to the time and resources involved. These activities shall be provided for the benefit of students and shall be carried out under the guidance and supervision of school staff.

A student's participation in extracurricular activities is a privilege, not a right. Participation is also subject to the standards set forth in the District's various codes of conduct, including but not limited to the Student Code of Conduct and the Athletic Code of Conduct.

The Board encourages planned joint school/community activities.
