

8140	Homework Policy
-------------	------------------------

The Board of Education believes that all students must be intellectually challenged both in school and at home, and that instructional activities and assignments may be expanded outside of the current school day. The District requires all students to regularly perform instructional activities, as planned by their teachers, on an age-appropriate basis outside of the normal classroom. Instructional staff is expected to challenge each student to his/her academic abilities at all times in support of the District's educational goals.
