

Cal Grants

As part of the California Student Aid Commission and Assembly Bill 2160, high schools are now required to electronically submit to the Commission, the grade point average (GPA) for all 12th grade students by the spring of their senior year.

This requirement was put into law to assist families in receiving more Cal Grant awards. Cal Grants are funds from the State of California that can be used for any California State University, University of California or California Community Colleges (as well as some independent and career colleges or technical schools in California) for undergraduate studies. These Grants do not have to be paid back. To apply for these funds, a Grade Point Average (GPA) must be submitted by the high school for every senior. This year, high schools will electronically upload and submit GPAs.

The District is required to notify you of this electronic submission of your senior's Grade Point Average and you may choose to opt out of the electronic GPA submission. **If you would not like the school to upload your student's Grade Point Average, please contact your student's counselor.** You do not need to do anything if you want the school to submit your student's GPA to the California Student Aid Commission to help in the application for Cal Grants.

You are welcome to contact your student's counselor or the Director of Education at the Oroville Union High School District Office.
