STRASBURG SCHOOL DISTRICT 31J

RAPTOR SYSTEM

What is the Raptor system?
Raptor is a visitor registration system that enhances school security by reading visitor Drivers'
Licenses, comparing information to a sex offender database, alerting school administrators if a
match is found, then (assuming no match was made) printing a visitor badge that includes a
photo.

How does it work?
Drivers' License information is compared to a database that consists of registered sex offenders
from all 50 states. If a match is found, school administrators and law enforcement personnel can
take appropriate steps to keep the school safe.

Why is Strasburg School District using this system?
Safety of our students is our highest priority. Raptor will provide a consistent system to track
visitors and volunteers while keeping away people who present a danger to students and staff
members. The system quickly prints visitor badges that include a photo, the name of the visitor,
time and date.

What other information is the school taking from Drivers' Licenses?
Raptor is only scanning the visitor's name, date of birth and photo for comparison with a
national database of registered sex offenders. Additional visitor data will not be gathered and no
data will be shared with any outside company or organization.
