Course Title: Applied Earth Science

DESCRIPTION OF COURSE: (Grade 9) (1 Credit) (Prerequisite: none)

Applied Earth Science is geared for students seeking a technical college or technical career. Students are exposed to background information and experiences providing them with a basic understanding of the earth and environment. Topics covered include physical geology; ecology; the environment and the impact of human activities; conservation of resources; as well as meteorology and climate. Examples of projects might include analysis of an ecosystem, research on local environmental concerns, testing and identifying rock and mineral samples, or plotting weather systems. Students will demonstrate their achievement through tests, quizzes, homework, laboratory investigations and projects.
