Course Title: HONORS EARTH SCIENCE

Course #: 503

DESCRIPTION OF COURSE: (Grade 9) (1 Credit) (Prerequisite: none)

Honors Earth Science students are exposed to academic experiences providing them with a higher-level understanding of the earth and environment. Topics covered include physical geology; ecology; the environment and the impact of human activities; conservation of resources; as well as meteorology and climate. Examples of projects might include analysis of an ecosystem, research on local environmental concerns, testing and identifying rock and mineral samples, or plotting weather systems. Students will demonstrate their achievement through tests, quizzes, homework, laboratory investigations and projects.
